07/01/2022-06/30/2027

PI: Jennifer L. Vincenzo

Title: Developing and testing implementation strategies to support the STEADI for falls risk management in outpatient rehabilitation.

Direct costs: \$989,073, Total costs: \$1,051,000

The goal of this project is twofold. (1) To develop and test implementation strategies to support the STEADI for falls risk management in outpatient rehabilitation; and (2) to support the career development of Jennifer Vincenzo to advance as an independent investigator as an implementation scientist and investigator in falls prevention.

**Center on Health Services Training and Research**

02/01/2022 - 04/30/2023

PI: Jennifer L. Vincenzo

Title: Barriers, Facilitators, and Contextual Factors to Implementing the STEADI for Fall Prevention of Older Adults Attending Outpatient Rehabilitation in a Large Healthcare System - A Mixed Methods Study

\$25,000 in salary and project costs (14% effort)

The goal of this study is to identify (1) PTs, older adults, and caregivers perceived feasibility, acceptability, and appropriateness of implementing STEADI in rehab, and (2) clinic-, provider-, patient-, and caregiver-level barriers to and facilitators of implementing the STEADI in rehab in a large health system (over 34 outpatient rehabilitation clinics).

**Completed Funding**

**University of Arkansas for Medical Sciences KL2 Scholar Award** 08/01/2019 – 07/31/2022

(Funded to UAMS by the National Center for Clinical and Translational Science)

PI at UAMS: Jennifer L. Vincenzo

PI of NCATS award: Laura James and John Arthur

Project Number: UL1 TR003107 and UL1 TR003108

Title: Year 1-2 - Development of a Falls Prevention Self-Management Plan

The goal of this study is to investigate older adults' perceptions and recommendations of components and support that should be included in a falls prevention self-management plan, develop a plan, and pilot the plan.

Title: Year 2-3 - Using the RE-AIM Framework to Describe Implementation of the STEADI for Falls Prevention in Outpatient Rehabilitation.

Funded 3 years. \$360,680 (75% protected time x 2 years and \$50,000 funds for research and career development). \*Awarded 50% protected time for a 3rd year. The purpose of the KL2 is to increase the number and quality of independently funded clinical and translational research investigators.

The goal of this study is to identify older adults recommended strategies to support uptake of falls prevention after community screenings by developing a falls prevention self management plan. The goal of year 3 is to describe implementation and outcomes of a large health system's clinical implementation of the STEADI in outpatient rehabilitation.

**NIH NHLBI Non-Federal Grant**

Title: Safety Outcomes of Obese Nursing Home Residents -

Co-I: Jennifer Vincenzo, 2.5% effort x 2 years

(Agency for Health Care Research and Quality, \$1,162,917, direct costs)

Project Number: 5R01HS025703-03

The goal of this study is to describe and compare resident safety outcomes among obese and non-obese residents of US nursing homes and to develop a survey instrument to assess issues related to the care of obese residents of nursing homes.

**Parkinson's Wellness Recovery Exercise -**

2020-2021 0.3 mo.

PI: Christopher Oholendt

Co-I: Jennifer L. Vincenzo

(Parkinson's Foundation, \$40,000, direct cost).

The purpose of these studies are: 1. To determine the feasibility and acceptability of virtual exercise classes for people with Parkinson's disease, 2. To determine the perceived impact of a community-based (and virtual) exercise program for people with Parkinson's disease.

Serum myostatin, IGF-1 and insulin as biomarkers of sarcopenia: proof of concept. 2017-2018
