GENERAL INFORMATION

THE UNIVERSITY OF ARKANSAS FOR MEDICAL SCIENCES

MISSION STATEMENT

The mission of UAMS is to improve the health, health care and well-being of Arkansans and of others in the region, nation and the world by

Education of current and future health professionals and the public;

Providing high quality, innovative health care and also providing specialty expertise not routinely available in community settings; and

Advancing knowledge in areas of human health and disease and translating and accelerating discoveries into health improvements.

CORE VALUES

Integrity: We foster, encourage and expect honesty, accountability and transparency in pursuit of the highest ethical and professional standards in all that we do. We take responsibility for our performance, and will communicate our critical decisions to our employees, patients, students and stakeholders.

Respect: We embrace a culture of professionalism with respect for the dignity of all persons, honoring the unique contributions provided by a diversity of perspectives and cultures.

Diversity: We are committed to the importance of the diversity of UAMS leadership, faculty, staff and students in order to enhance the education of our students, reduce racial and ethnic health disparities in our state, and provide an environment in which all employees and views are welcomed.

Teamwork: We seek to create interdisciplinary, synergistic and collegial relationships characterized by honesty, collaboration, inclusiveness and flexibility.

Creativity: We encourage and support innovation, imagination, ingenuity, resourcefulness and vision.

Excellence: We strive to achieve, through continuous improvement and adherence to institutional policies and best practices, the highest quality and standards in all our endeavors.

ROLE AND SCOPE

The University of Arkansas for Medical Sciences (UAMS) is Arkansas' only institution of professional and graduate education devoted solely to the health and biological sciences. First founded as a School of Medicine in 1879, UAMS became a medical sciences campus in 1951 with the addition of the College of Pharmacy. The College of Nursing was established in 1953, and the University Hospital was built in 1956. The College of Health Professions was organized as a separate

college within UAMS in 1971. The College of Public Health was established in 2001. The Graduate Program was organized as an extension of the Graduate School of the University of Arkansas at Fayetteville in 1943, and was approved for independent status by the Board of Trustees in 1995. The Area Health Education Centers (AHECs) Program was established in 1973. The Winthrop P. Rockefeller Cancer Institute was established in 1984. The Harvey and Bernice Jones Eye Institute (HBJEI) was established in 1993. The Donald W. Reynolds Center on Aging was established in 1996. Today, UAMS is one of twelve campuses of the University of Arkansas. It has grown into an academic health sciences center that encompasses broad aspects of education, research, and service. The institution offers programs that improve the physical, economic, and intellectual well-being of the citizens of Arkansas.

In fulfilling its educational mission, the six academic units of UAMS—the Colleges of Medicine, Nursing, Pharmacy, Health Professions, and Public Health, and the Graduate School—as well as the UAMS Medical Center, the Area Health Education Centers, the Winthrop P. Rockefeller Cancer Institute, the Harvey and Bernice Jones Eye Institute, the Donald W. Reynolds Center on Aging, the Myeloma Institute for Research and Therapy, and the Jackson T. Stephens Spine & Neurosciences Institute—provide the environment and opportunities for students and practitioners alike to learn and maintain the knowledge and skills they need. These programs integrate the liberal arts with the biological, physical, and behavioral sciences, and emphasize life-long learning for practitioners in the health professions.

UAMS is the principal biomedical research center for the state of Arkansas. In its programs of research, UAMS seeks to stimulate and support scholarly inquiry for both faculty and students aimed at maintaining and preserving knowledge, and making discoveries that address the health needs of the state, nation, and world.

These research programs enhance the economic and educational progress of Arkansas through technology transfer and collaborative arrangements with other qualified individuals, groups, companies, and institutions. The research mission involves the quest for new information, the organization of known information in new ways, and the sharing of this information with the scientific community.

The service mission of UAMS is fulfilled by providing comprehensive health care services to meet both the educational needs of students and the special health care needs of the state. As the only academic medical center in Arkansas, the unique role of UAMS is to provide services requiring highly specialized personnel and technology. These services are delivered in an interdisciplinary environment to all Arkansans regardless of their ability to pay.

In addition, comprehensive services in health, wellness, and rehabilitation are offered in a statewide context. The service mission is enhanced by affiliations with Arkansas Children's Hospital (ACH), John L. McClellan Memorial Veterans Administration Medical Center, the Arkansas Rehabilitation

Institute, the Central Arkansas Radiation Therapy Institute (CARTI), and the Arkansas State Hospital. Additional cooperative programs are offered with other hospitals and practitioners affiliated with the AHEC Programs. UAMS has a responsibility to provide health care services in a manner that ensures the long-range financial viability and continued quality of its programs, while providing the most cost-effective care for its patients.

The UAMS mission encompasses a responsibility to its alumni and other health care practitioners of Arkansas to help them continue to improve their professional knowledge and skills. All schools and departments offer life-long learning opportunities as appropriate to their missions. The UAMS Library also serves as a resource for all health professionals by maintaining a portfolio of information services needed to support their information needs.

UAMS values its role of service to the general welfare of the state of Arkansas. This service includes action as a partner in science and health areas to all levels of the educational systems of the state. As the leader in health care, the institution provides educational programs, consultation, and technical advice to other institutions, agencies, and local communities for the purpose of improving and maintaining the health of citizens.

The role of UAMS in the economic life of the community is significant. A major element of the central Arkansas economy, the salaries of a highly educated work force contribute substantially to the regional economy.

UAMS fulfills its mission through coordinated action of the following units:

- College of Health Professions
- College of Medicine
- College of Nursing
- College of Pharmacy
- College of Public Health
- Graduate School
- Area Health Education Centers
- Donald W. Reynolds Institute on Aging
- Harvey and Bernice Jones Eye Institute
- Jackson T. Stephens Spine & Neurosciences Institute
- Myeloma Institute for Research and Therapy
- Northwest Regional Campus
- Psychiatric Research Institute
- UAMS Medical Center
- Winthrop P. Rockefeller Cancer Institute

THE COLLEGE

MISSION OF THE COLLEGE

The College of Health Professions (CHP) serves the state of Arkansas as the primary arm of the University of Arkansas in offering programs that provide education, service, and research in the allied health professions. The College was organized as a separate college within the University of Arkansas for Medical Sciences in 1971.

In fulfilling its mission, the College of Health Professions offers education and training opportunities for students of the allied health professions to prepare them as graduates to assume the roles of the professional. The College curricula coordinate the professional course work with the arts, humanities, and basic and social sciences into a total educational experience that emphasizes life-long learning in the allied health professions.

Patient and public health education is an important part of the mission of the College of Health Professions. In its public service role, programs in the College render patient care services as part of their educational efforts under the supervision of faculty. Technical advice and consultative services are available from the College to institutions and agencies throughout the state. The professional service mission of the College includes the offering of continuing education courses to practitioners to enhance teaching, administration, and professional skills.

Research in the College of Health Professions involves the educational process as well as professional fields. The research mission involves the quest for new information which addresses the health and health care educational needs of the state, and the sharing of this information with the scientific community.

CHP ROLE AND SCOPE

The CHP mission is achieved through the varied offerings of its departments. The College, the only one of its kind at an academic health science center in Arkansas, has as its main role the education of allied health professionals to serve in the health care delivery system in the state. The specific educational programs currently offered within the College of Health Professions are provided by twelve academic departments and the Center for Dental Education. They include: Audiology and Speech Pathology; Dental-General Practice Residency; Dental Hygiene; Dietetics and Nutrition; Emergency Medical Sciences; Genetic Counseling; Health Information Management; Imaging and Radiation Sciences (Diagnostic Medical Sonography, Medical Dosimetry, Nuclear Medicine Imaging Sciences, Radiation Therapy, Radiologic Imaging Sciences); Laboratory Sciences (Cytotechnology, Medical Laboratory Sciences); Ophthalmic Technologies; Physical Therapy; Physician Assistant Studies; and Respiratory and Surgical Technologies. Programs range from academic requirements of one semester to programs that require four or more years. Academic awards include the certificate and the associate, bachelor, master, and doctoral degrees. Nearly all the programs stipulate prerequisites for admission that must be completed at another (general undergraduate) institution.

Other roles of the College of Health Professions include public and professional service, and research. The College offers professional continuing education opportunities to enhance the abilities of practicing allied health professionals; serves as a resource center for allied health planning, education, and delivery systems in Arkansas, and develops

applied research programs in allied health. All of these roles combine to support the overall mission of the College.

DEPARTMENT AND PROGRAM LISTINGS

The following departments/programs comprise the College:

Center for Dental Education

General Practice Residency (currently applying for accreditation)

Department of Audiology and Speech Pathology

Audiology
Communication Sciences and Disorders, M.S.
Communication Sciences and Disorders, Ph.D.

Department of Dental Hygiene

Dental Hygiene

Department of Dietetics and Nutrition

Clinical Nutrition
Dietetic Internship

Department of Emergency Medical Sciences

Emergency Medical Sciences

Department of Genetic Counseling

Genetic Counseling

Department of Health Information Management

Health Information Administration
Health Information Technology

Department of Imaging and Radiation Sciences

Diagnostic Medical Sonography
Medical Dosimetry
Nuclear Medicine Advanced Associate
Nuclear Medicine Imaging Sciences
Radiologic Imaging Sciences
Radiologist Assistant

Department of Laboratory Sciences

Cytotechnology
Medical Laboratory Sciences

Department of Ophthalmic Technologies

Ophthalmic Medical Technology

Department of Physical Therapy

Physical Therapy (currently applying for accreditation)

Department of Physician Assistant Studies

Physician Assistant

Department of Respiratory and Surgical Technologies

Respiratory Care
Surgical Technology

CERTIFICATES AND DEGREES

These certificates and degrees are awarded by departments in the College:

Certificates:

Emergency Medical Sciences

Associate of Science (A.S.) Degrees:

Dental Hygiene
Emergency Medical Sciences
Health Information Technology
Medical Radiography
Surgical Technology

Bachelor of Science (B.S.) Degrees:

Cardio-Respiratory Care
Cytotechnology
Dental Hygiene
Diagnostic Medical Sonography
Emergency Medical Sciences
Health Information Administration
Medical Dosimetry
Medical Laboratory Sciences
Nuclear Medicine Imaging Sciences
Ophthalmic Medical Technology
Radiologic Imaging Sciences

Post-Bachelor's Certificate:

Auditory-based Intervention
Dietetic Internship (Joint UAMS—CAVHS)

Master of Imaging Sciences (M.I.S.) Degree:

Nuclear Medicine Advanced Associate
Radiologist Assistant

Master of Physician Assistant Studies (M.P.A.S.) Degree

Master of Science (M.S.) Degrees:

Clinical Nutrition
Communication Sciences and Disorders
Genetic Counseling

Doctor of Audiology (Au.D.) Degree

Doctor of Philosophy (Ph.D.) Degree:

Communication Sciences and Disorders

Doctor of Physical Therapy (D.P.T.) Degree

PRIMARY AFFILIATIONS

A unique partnership in health manpower training exists between the College; the Department of Veterans Affairs, Central Arkansas Veterans Healthcare System; and the University of Arkansas at Little Rock. Each institution strives to coordinate and complement the resources necessary for the student's total education.

THE CAMPUS AND FACILITIES

The University of Arkansas for Medical Sciences campus is located in Little Rock near War Memorial Park. The UAMS Medical Center is the focal point of the campus. East of the Medical Center are the Outpatient Center, the Harvey and Bernice Jones Eye Institute, the Jackson Stephens Spine and Neurosciences Institute, and the Winthrop P. Rockefeller Cancer Institute. The Barton Institute for Medical Research and the Biomedical Research Center are northeast of the Medical Center and

the John L. McClellan Memorial Veterans Hospital and the Donald W. Reynolds Aging Institute are south.

The Shorey, Education II, and College of Public Health Buildings are located to the north, with the Wilson Education Building, Residence Hall, and facilities for the College of Health Professions in the northwest part of the campus. UAMS Regional Centers are located at Fort Smith, Fayetteville, Jonesboro, Pine Bluff, Magnolia, Texarkana, Helena, and Batesville-Mountain Home.

ACCREDITATION

The University of Arkansas for Medical Sciences is accredited by the Higher Learning Commission of the North Central Association of Colleges and Schools and the departments are accredited as appropriate by their national and state agencies.

EQUAL OPPORTUNITY

Applicants are considered without regard to race, color, gender, age, sexual orientation, religion, national origin or disability status as a criterion in deciding against any individual in matters of admission, placement, transfer, hiring, dismissal, compensation, fringe benefits, training, tuition assistance, and other personnel or educationally-related actions. Students who have concerns should contact the CHP Associate Dean for Academic Affairs.

STUDENT INFORMATION

ASSOCIATED STUDENT GOVERNMENT (UAMS)

The Associated Student Government (ASG) is the student governing body that represents all colleges on campus. All students are encouraged to attend the monthly meetings; however, dates and locations vary from year to year. For the ASG meeting schedule and other campus events, students should visit the [website](#) or contact their ASG representative. Students are encouraged to stay informed and make suggestions to their ASG representative on ways to improve campus life.

CHP STUDENT COUNCIL

The College of Health Professions Student Council serves as representative organization for the student body of the college. Through involvement in the CHP Student Council, students have the opportunity to impact the operation of the college and voice their desires directly to the college. The HSC Student Council meets monthly. Contact the CHP Welcome Center at (501) 686-5730 for more information.

STUDENT BADGE

A student badge with photograph will be made during the initial registration process. The badge entitles students to use the UAMS Library and obtain tickets to University functions at student rates. It should be worn at all times while on campus (including at AHECs and other UAMS sites). If the badge is lost or damaged, or if your name changes while you are a student at UAMS, you may purchase a replacement badge from Creative Services, located in ED II/B/142. See the Creative Services website for hours of operation, fees, and other information. <http://creativeservices.uams.edu/>

MAIL SERVICE

Mail Room Services: The Mail Room window is open daily between the hours of 8:00 AM – 4:00 PM Monday through Friday. Regular first class stamps are sold individually, by the book of 20, or by the roll of 100 when available. The stamps are available on a cash only basis. Personal stamped mail as well as business related items are accepted. All mail received in the Mail Processing Center is taken to the U.S. Post Office daily at 4:30 PM, Monday through Friday.

AUTOMATIC BANKING TELLERS

Banking services are available via automatic tellers located in the lobby of the Central Building near the Information desk and in the lower level of the Central Building near the cafeteria entrance and across the hallway from the College of Medicine offices.

DENTAL HYGIENE SERVICES

Dental hygiene services are available to UAMS students at a nominal fee. Services include teeth cleaning, diagnostic radiographs, pit and fissure sealants, and fluoride applications. Services are provided by students under the

direct supervision of faculty. The Dental Hygiene Clinic is located in room 1E/13 in the Ward Tower. Telephone: (501) 686-5733 or visit [website](#).

ORAL HEALTH CLINIC

A full service dental clinic is available to the public. The clinic provides services such as cleanings, tooth whitening, restorative dental care (such as fillings and crowns) and extractions performed by licensed dentists and dental hygienists. The clinic accepts dental insurance. It is located on the first floor of the Ward Tower. Appointments can be made by calling (501) 526-7619. For more information, visit [website](#).

PHARMACY

Students receive discounts on prescriptions filled at the UAMS Outpatient Pharmacy located in the Outpatient Center on the first floor. Telephone: (501) 686-5530. See [website](#) for more information.

SPEECH, LANGUAGE, AND HEARING SERVICES

The CHP cooperatively sponsors a clinic for clients with communication disorders. Speech, language, literacy, fluency, and voice evaluations and therapy are available to students at reduced rates. The clinic also offers hearing evaluations, assistive listening devices, audiologic rehabilitation, and hearing aid services. The Speech and Hearing Clinic is located at the University of Arkansas at Little Rock (UALR), University Plaza, Suite 600. Telephone: (501) 569-3155. See [website](#) for more information.

STUDENT AND EMPLOYEE HEALTH SERVICES

Student and Employee Health Services (SEHS): The SEHS main clinic is located at Sixth Street and Jack Stephens Drive in the back of the Family Medical Center and is open Monday - Friday 8:00 AM - 4:30 PM. Telephone: (501) 686-6565 or visit their [website](#).

SEHS provides the following services at no cost to students:

- Annual Flu Vaccines
- Annual Tuberculosis (TB) screening
- Completion of any necessary vaccine series

SEHS will also provide care for needle sticks and blood/body fluid exposure as well as infections disease exposure management.

Student Health Clinic: The Student Health Clinic (SHC) provides basic medical care to all UAMS students. Telephone: (501) 686-6565 or visit their [website](#).

Family Medical Center (FMC): The FMC offers medical care to students and their families who choose one of the Family Practice Physicians as their primary doctor. The FMC offers a full range of Primary Care including women's health, newborn, pediatric, and adult care. The FMC is

located on the UAMS campus on the corner of 6th St. and Jack Stephens Drive. Telephone: (501) 686-6560 for visit [website](#).

CHILD CARE FACILITIES

Arkansas Department of Health and Human Services-approved child care facilities are available by contacting the Division of Child Care and Early Childhood Education or accessing the web pages of the licensed child care facilities at: www.accessarkansas.org/childcare/.

UAMS STUDENT WELLNESS PROGRAM

The UAMS Student Wellness Program (student mental health program) is a preventative service created to provide short term, confidential assistance for students who are actively enrolled at UAMS (Little Rock Campus). The purpose of this service is to provide the necessary tools for students to achieve their fullest potential.

Students seek help for depression, anxiety, grief, relationship conflicts, academic difficulties, and numerous other issues interfering with their maximal functioning. Seeking care through this service is absolutely confidential. The only exceptions to the strict code of confidentiality (as required by law) include homicidality (planning to kill someone else, or being so severely impaired that patients in your care are in jeopardy), suicidality (planning to kill self) and child abuse. Record keeping is also strictly confidential within the student wellness program and does not become part of the campus-wide electronic UAMS medical record.

For short-term treatment, there is no financial cost to students seeking care (other than the cost of medication should it be needed). The service is made possible through the support of the Chancellor of UAMS, and a portion of the student health fee.

Location: The Student Wellness Program is located at 201 Jack Stephens Drive, in a two story grey building. The office suite is on the street level. Ring the doorbell for entry. Parking is available immediately in front in reserved parking spaces #15, #17, #19, and #20 for the duration of the appointment (only).

Referrals for Long Term Difficulties: Students with major mental illnesses and/or substance abuse requiring inpatient hospitalization and/or intensive long-term care will be referred to a community mental health center, the UAMS Psychiatric Clinic, or to appropriate resources in the community. The cost for this level of care is the responsibility of the student (it is important to maintain health insurance coverage without lapse through school).

Hours: The Student Wellness Program can be reached by telephone at (501) 686-8408 between 7:45 AM to 4:30 PM Monday through Friday. Students are seen by appointment only. To schedule a confidential appointment,

call (501) 686-8408. Help us know the type of problem you are having and how urgently you need help. This will help us triage urgent situations immediately and/or schedule you with the most skilled clinician for your particular problem.

Emergencies: For an after-hour emergency, call the UAMS operator at (501) 686-7000, identify yourself as a UAMS student with an emergent problem, and request the operator to page the UAMS Department of Psychiatry resident on call.

SEXUAL VIOLENCE HOTLINE (SAFE PLACES)

Safe Places' services are provided throughout Pulaski County through local hospitals and can be accessed through the local or statewide sexual violence hotline numbers: (501) 801-2700 (Pulaski County) or (877) 432-5368 (Statewide). The hotline provides crisis intervention via phone and serves as a resource and referral for anyone who needs assistance or information about sexual violence. Additionally, the sexual violence hotline can connect you with emergency advocacy through trained crisis intervention advocates for any individual who seeks care in hospital emergency rooms following a sexual assault or sexual violence. The crisis advocate will provide emotional support, information, clothing, and advocacy. Receiving services from a crisis intervention advocate is always the decision of the victim of sexual violence.

UAMS BOOKSTORE

The UAMS Bookstore is located at 200 Hooper Drive, across from the College of Public Health Building and is open 8:00 AM - 5:00 PM, Monday - Thursday and 8:00 AM - 4:00 PM on Friday with extended hours during registration. The Bookstore is a convenient resource for books, supplies, and medical equipment, scrubs, lab coats, and various other items for students, faculty, and staff. In addition to providing monogramming services, the bookstore also stocks reference and review books as well as UAMS apparel and gifts. See [website](#) for more information.

AUTOMOBILE REGISTRATION

The Parking Operations Office, located at the UAMS Distribution Center- 800 Cottage Drive, is open Monday - Friday 7:30 AM - 4:00 PM and can be reached at (501) 526-7275. All faculty, students and staff at UAMS who park on campus, at any time, are required to register their vehicles with the UAMS Parking Operations Office and display the appropriate registration decal on vehicles. See [website](#) for more information.

PARKING

Parking on the UAMS campus is limited and requires a permit that can be obtained from the Parking Operations Office for a fee. Parking for commuter students or students who do not have a parking permit can be found at War Memorial Stadium or Ray Winder Parking lots and those

students can ride the shuttle bus onto the UAMS camps. The shuttle bus runs 4:30 AM - 7:30 PM, Monday - Friday, with exception of UAMS holidays.

Regulations: The parking regulations set forth by Parking Operations Office are in effect at all times. Violations of any parking regulations may result in tickets, fines, booting, towing or having parking privileges revoked. If you have any doubt concerning any parking regulations please contact the Parking Operations Office at (501) 526-7275. See [website](#) for more information.

Appeals: Any person charged with a parking violation has the right to appeal the violation to the UAMS Parking and Traffic Committee within seven calendar days of when the violation was issued. An official appeal form can be found at www.uams.edu/parking/documents/appeals.pdf

UAMS POLICE

The UAMS Police Department is located at the Distribution Center, 4301 W. Markham St. and can be reached at (501) 868-7777. The UAMS Police Department operates 24 hours a day, seven days a week. UAMS Police officers are sworn, certified, and trained in accordance with Arkansas State Standards and are dedicated to protecting the students, employees, patients, and visitors, as well as the property of UAMS. See [website](#) for more information.

UAMS SECURITY REPORT

The UAMS Police Department, in compliance with the "Student Right-to-Know" and "Campus Security Act," has added an annual security report to its list of printed material that is distributed to our campus community. UAMS Crime Statistics are compiled in accordance with the definitions of the FBI's Uniform Crime Reporting System which UAMS Police department has participated since 1979. For a copy of the current security report, please visit the [UAMS Police website](#).

EMERGENCY TELEPHONES

Emergency telephones have been installed on campus for immediate access to the UAMS Police Department at any time of the day or night. Steady or revolving blue lights mark telephones throughout the campus. If you need help or want to report any unusual situation, open the telephone box door and lift the receiver; a police officer will answer.

ACTIVE SHOOTER—CODE BLACK

In the event of an emergency situation requiring a secured campus, a Code Black/Campus Lockdown Alert will be issued. Code Black may be called for an active shooter, hostage situation, terroristic threatening, and other scenarios that include violent events or the threat of such events.

Any threat or act of violence witnessed or experienced by a member of the campus community (including students) must be promptly reported to UAMS Police. Those reporting a

threat or act of violence should call (501)-686-7777 immediately. Information the caller should provide the dispatcher includes:

- Caller's name and location
- Description of assailants and location of the incident
- Number of assailants (if known)

A Code Black Lockdown Alert is issued over the public address system in all buildings and through the external sirens. The announcement will as follows or similar to:

The UAMS campus is now in a Code Black status. Everyone should immediately move out of any hallway or other open areas into the nearest office, patient room, or classroom. Close and lock the door. Do not leave the building. Do not enter stairwells or hallways until further notice. If you are currently off campus, do not come to campus.

Upon determination by the UNIFIED COMMAND the campus no longer needs to operate within Code Black status, the public address system will broadcast the following announcement three times.

Code Black all clear, Code Black all clear, please return to normal operations.

FIRE ASSISTANCE—CODE RED

Activate the nearest alarm box and then dial 686-5333 to inform central control of exact location, floor, wing, room number, what is burning and name of caller. In the education and research buildings, the ringing of a general alarm will signal "Fire/Danger." It is advisable to become familiar with the location of alarm boxes, fire blankets, and extinguishers in the area where you spend most of your time. The fire plan for UAMS is referred to as "CODE RED." "CODE RED" will be put into effect when fire and/or smoke are reported anywhere on campus. The phrase "CODE RED" shall be used as the code for announcing a fire emergency or a fire drill. Under no circumstances should anyone shout "Fire."

SEVERE WEATHER—CODE GRAY

When a Code Gray is activated across the Campus, severe weather is predicted to impact the UAMS Campus and/or area in a matter of minutes. All students, staff, employees, visitors and patients should take refuge in an interior room or stairwell away from windows or glass. Do not attempt to "sight" the weather, especially in tornadic conditions. Take precautions to protect your safety and suspend all non-lifesaving activities until after the Code Gray has been cleared.

MEDICAL EMERGENCY—CODE BLUE

A medical emergency is called a Code Blue. In buildings contiguous to University Hospital, to call a Code Blue, dial beeper (501) 688-6333 and give the location (building and room number), or dial "0" and give the operator the

location. In buildings not contiguous to University Hospital and on the NW Campus, call the community “911” number.

MASS CASUALTY—CODE GREEN

A mass casualty disaster is reported as a Code Green. Students may be used for patient transport and reassigned to the Labor Pool in the EMS office and then to the hospital cafeteria if needed and as directed by the hospital Emergency Operations / Incident Command Center. In general, students should not be assigned to critical patient care areas but may be used as runners, etc.

OTHER EMERGENCY CODES

- Code Pathogen—Bioterrorism
- Code Yellow—Deacon Plan
- Code Exodus—Evacuation
- Code Purple—Utility Failure
- Code Pink—Infant/Child Abduction
- Code Amber—Bomb Threat

Refer to the emergency quick reference guide/flip chart:
<http://intranet.uams.edu/safety/flipchart.aspx#TTOP>

LIBRARY SERVICES

The UAMS Library serves the faculty, staff, and students of all UAMS colleges as well as the staff of the University Hospital. It also extends reference and borrowing privileges to health care practitioners throughout Arkansas either directly or through the UAMS Regional Programs Libraries. The collection and services are designed to meet the education, research, service, and patient care missions of UAMS. Library [website](#). Library mobile [website](#). Call Reference (501) 686-6734 for research assistance and further information on any library services.

MINORITY STUDENT ASSISTANCE

The CHP Welcome Center may be able to assist in responding to minority student needs or problems. For further information, call (501) 686-5730.

OFFICE OF EDUCATIONAL DEVELOPMENT (OED)

Many students find that the pace and amount of learning in CHP courses are considerably different from other courses they've had. CHP students often say they have more to learn in one course than in an entire semester in other courses.

Just as you take stock of your health during annual physicals, the beginning of the semester is a good time to take stock of your study and learning skills. Some Educational Development resources to help you check your study skills and “kick your learning up a notch” are:

- Learning skills assessments: Helps you check skills such as identifying relevant information, making the

best use of practice test questions, and condensing/organizing lecture and text information. To schedule a “learning skills checkup,” call (501) 686-7349 or (501) 686-5720.

- Learning in CHP sessions: Although these sessions are available at any time, they are most helpful during the first few weeks of the semester for non-science majors or anyone who's been out of school for a while. These sessions focus on important study skills for CHP courses such as the amount of information and type of learning (application vs. rote memory) and on strategies for retaining and applying information.

Call the Office of Educational Development at (501) 686-7349 or (501) 686-5720 for more information about these services or to schedule an appointment for a learning skills checkup or help with study strategies.

RELIGIOUS OPPORTUNITIES

The non-denominational Samuel Moore Walton Memorial Chapel is open every day 6:00 AM - 8:30 PM for quiet prayer or meditation and is located on the first floor (1E90) of the Hospital. The Pastoral Care office is located on the first floor of the Hospital (1E50) across from the Doc Java. The Pastoral Care office can be contacted at (501) 686-5410 for students in need of assistance and is open Monday - Friday 8:00 AM - 4:30 PM.

RECREATIONAL SERVICES

Intramural Sports: The intramural sports offered at UAMS include: flag football, basketball, and softball. Information can be found on the student activities [website](#) or obtained by contacting the Assistant Director of Student Activities at (501) 686-6973.

Fitness Center: Students may join the UAMS Fitness Center located on the eighth floor of the College of Public Health building. The current fee is \$15.00 per month. The Fitness Center is the hub for all wellness-related activities, programs, events, classes/seminars, materials, and community involvement initiatives. The Fitness Center includes a 24-hour gymnasium, on-site management, and access to nutritionists, dietitians, trainers, and other health care professionals. The Fitness Center also carries a full line of supplements at wholesale prices. Some of the items offered include protein ready to drinks, energy drinks, protein bars, and full line of snack items. For more information, visit the [website](#).

Students receive a \$10 per month discount at UALR's Donaghey Fitness Centers. You will have to show proof of your current UAMS enrollment by showing your current student ID badge at those facilities. You must also provide your social security number to receive the discount. Membership is for the UAMS student only, and neither the card nor membership is transferable. This discount is provided by the Office of the Vice Chancellor for Academic Affairs.

UAMS INFORMATION TECHNOLOGY

Access to the UAMS network, including access to the internet via the UAMS network, on-line reference and information resources provide through the UAMS Library and other UAMS computing resources is restricted to people having a UAMS network account. All active UAMS students receive UAMS network accounts. Information about network accounts is provided to new students during the registration or orientation sessions.

Everyone granted access to the UAMS network must review and sign the UAMS Confidentiality Agreement which students complete during registration and orientation.

Your UAMS network account is to be used only by you. Do not share your UAMS network logon identification and password with other people as it violates the UAMS Confidentiality Agreement. See [website](#) for more information.

ADMISSION/ACADEMIC INFORMATION

ADMISSION TO THE COLLEGE

Individuals who have not decided upon a specific health career may obtain counseling through the CHP Welcome Center. Call (501) 686-5730 for an appointment.

Admission to all programs is by formal application only and is selective, as enrollment for each program is limited. Completing the application process includes submission of the application form and fee, all official transcripts to date, all references, and any other materials required by the department to which application is being made. Departmental admissions committees establish pre-determined criteria for selection and admit no more than the total class capacity.

Students of potential merit as future health professionals are accepted into the College of Health Professions without regard to race, color, gender, age, sexual orientation, religion, national origin or disability status as a criterion in deciding against any individual in matters of admission, placement, transfer, hiring, dismissal, compensation, fringe benefits, training, tuition assistance, and other personnel or educationally-related actions.

The College of Health Professions will provide reasonable and appropriate accommodations for students with documented disabilities who demonstrate a need for accommodation in accordance with the Americans with Disabilities Act. Students who wish to request accommodations should contact the Associate Dean for Academic Affairs. More information about the CHP Disability Policy may be found on the College [website](#).

In admissions reviews, first consideration is given to Arkansas residents. In recognition of the significant support of CHP programs by private and federal health care facilities, however, highly qualified applicants who are residents of another state or citizens of a foreign country may successfully compete for admission.

Prior to their first semester's registration, all individuals admitted must submit proof of a physical examination using the UAMS Physical Examination Form. This examination is used by the Student and Employee Health Service to verify required immunizations and to establish a baseline for treating illnesses occurring after admission.

Applicants who are not United States citizens or permanent resident aliens or for whom English is not their native language must take the Test of English as a Foreign Language (TOEFL). Please refer to the foreign Applicant Section of the catalog.

CHP WELCOME CENTER

The CHP Welcome Center is staffed by the Assistant Dean for Student Affairs, Registrar, Admissions Officers, and the Student Recruiter. The Welcome Center assists the Dean and the academic departments in the recruitment, selection, and admission of students; student retention; maintenance of student records; and other student affairs. The Welcome Center is located in the CHP Dean's Office suite on the third floor of the Administration West Building. The Center is open 8:00 AM - 4:30 PM, Monday through Friday. Appointments may be made by telephoning (501) 686-5730.

CRIMINAL BACKGROUND CHECKS/DRUG SCREENS

A criminal background check and/or drug screen must be obtained from a vendor approved by the College of Health Professions, the University of Arkansas for Medical Sciences, or the University of Arkansas System. Results of the background check/drug screen must be deemed satisfactory as a condition of the student's admission or continuation in the program.

Scope of Background Checks: Background checks typically include the following criteria and cover the past seven years:

- Social Security Number verification
- Criminal search, including felonies, Class A, Class B, and Class C misdemeanors (7 years)
- Violent Sexual Offender and Predator Registry search
- Office of the Inspector General (OIG) List of Excluded Individuals/Entities
- General Services Administration (GSA) List of Parties Excluded from Federal Programs
- U.S. Treasury, Office of Foreign Assets Control (OFAC), List of Specially Designated Nationals (SDN)
- Applicable State Exclusion List

(Note: The time period and the types of searches are subject to change without notice. Changes will be approved by the College of Health Professions Executive Committee.)

Timing of the Background Checks: An applicant offered admission must obtain a background check and drug screen prior to enrollment into a certificate or degree program. Background checks must be completed no more than six months before matriculation.

Cost of Background Checks: The applicant or student will pay the cost of required background checks and drug screens.

Period of Validity: A background check is honored for the duration of enrollment if the student is continuously enrolled. Students may be asked to complete a drug screen "for cause" at any time during enrollment.

A student who has a break in enrollment is required to complete a new background check and drug screen. A break in enrollment is defined as non-enrollment of at least one semester in the approved curriculum of the

certificate or degree program. An officially approved leave of absence is not considered a break in enrollment.

Significant Findings in Background Checks

Re-verification: An applicant or student has the right to request that the vendor who performed the background check re-verify that the background check is correct. Any costs associated with the re-verification will be paid by the applicant or student. The college may require the applicant or student to produce additional documentation to verify or re-verify findings.

Evaluation of Significant Findings: If significant findings are reported in a background check, the applicant or student may be referred to the specific program or discipline's professional licensing board to obtain clearance. The College of Health Professions will concur with the licensing board's decision.

If the professional licensing board does not review significant findings, the dean or dean's designee will review the findings in consultation with the department chair and make a recommendation to the program's admission committee as to whether the applicant should be admitted or the student should be allowed to participate in clinical education experiences.

False or misleading information supplied by the applicant or student, or omission of required information with regard to a background check, will result in (1) rescindment of an offer for admission or (2) dismissal from the certificate or degree program.

Adverse Actions Based on Background Checks: Consistent with the Fair Credit Reporting Act, if an applicant is denied admission or if an adverse action is taken against an enrolled student, based on findings of a background check (e.g., denial of participation in clinical education experiences, dismissal, or suspension), the applicant or student will be informed: (1) how to obtain a copy of the background check report, (2) how to contact the vendor to challenge the accuracy of the report, and (3) that the vendor was not involved in the decision that resulted in the adverse action.

Appeal Procedures for Enrolled Students: Ordinarily, a student who is unable to complete clinical education experiences will be unable to complete the certificate or degree program, and the student may withdraw or be dismissed from the program. Therefore, a student who is denied participation in clinical education experiences because of significant findings on a background check may request consideration following the College of Health Professions Grievance Procedures.

Deferred Matriculation or Participation: If a background check reveals matters that may be cleared by the applicant or student, matriculation or continuation in the certificate or degree program may be deferred up to one year while the matter is being resolved.

Approved Vendor(s): Background checks and drug screens must be conducted by a vendor approved by the College

of Health Professions, the University of Arkansas for Medical Sciences, or the University of Arkansas System. Background check and drug screen reports from other sources will not be accepted.

Confidentiality and Disposition of Background Check Reports: Background check and drug screen reports are maintained securely, confidentially, and separately from other academic files in the office of the dean for a period of time established by guidelines or policy.

SUBMISSION OF TRANSCRIPTS TO THE COLLEGE

Official transcripts from all previously attended institutions are required of CHP applicants. A college transcript is official if mailed directly from the issuing institution or if hand-carried (or mailed with the application) to the CHP Welcome Center in a sealed institution envelope. The transcript must bear the college seal, date, and appropriate signature. If hand-carried (or if mailed with the application), a school seal, stamp, or signature must be on the back flap of the envelope. Transcripts should be mailed to the CHP Welcome Center **before the Application Deadline** (varies by program). CHP Welcome Center, 4301 West Markham Street, #619, Little Rock, Arkansas 72205.

HIGH SCHOOL GRADUATE/GED APPLICANTS

Minimum Criteria: Individuals who have completed no college/university course work and are applying to programs with no prerequisite (transfer credit) requirements must meet the following minimum criteria:

1. A 2.0 Cumulative Grade Point Average (CGPA) based on all high school course work.
2. The applicant must be a high school graduate who has completed a minimum of 15 high school units including at least three (3) units of English, one (1) unit of mathematics, and two (2) additional units of mathematics and/or science.
3. Satisfactory scores on the General Education Development Test (GED) may be substituted for the above criteria. (The GED is administered through various armed forces and state agencies).

Application Procedures:

1. Complete the online application found on the College website. There is a non-refundable application fee of \$40.00.
2. Arrange for an official transcript from each high school attended to be forwarded to the CHP Welcome Center. CHP Welcome Center, 4301 West Markham Street, #619, Little Rock, Arkansas 72205.
3. Consult the Program Information section in this catalog for further specific requirements of the department to which applying. Applicants who are not United States citizens or for whom English is not their native language

must also consult the Foreign Applicants section for additional requirements.

TRANSFER APPLICANTS

Minimum Criteria: The following apply to applicants who have completed academic credits at other colleges or universities:

1. A 2.0 (on a 4.0 scale) Cumulative Grade Point Average (CGPA) based on all college and university course work (excluding remedial courses) completed at regionally accredited institutions.*
2. Only courses in which a grade of C (2.0 on a 4.0 scale) or higher was earned are accepted in transfer to meet prerequisite and/or graduation requirements.
3. The CHP college transcript will list prerequisite courses accepted in transfer (consult the Evaluation of Transcripts for Transfer section) and all professional and concurrent courses completed while enrolled in the CHP.
4. Transfer credit is granted only for course work completed at a regionally accredited institution of higher education. Departments reserve the right to disallow credit for course work completed more than seven (7) years before the date of anticipated entry into their program(s).

*Some programs may require a CGPA greater than 2.0 for consideration. Contact the department for specific program requirements.

Application Procedures:

1. Complete the online application found on the College [website](#). There is a non-refundable application fee of \$40.00.
2. Arrange for an official transcript from each college and university attended to be forwarded to the CHP Welcome Center. CHP Welcome Center, 4301 West Markham Street, #619, Little Rock, Arkansas 72205.
3. Consult the Program Information section in this catalog for further specific requirements of the department to which applying. Applicants who are not United States citizens or for whom English is not their native language must also consult the Foreign Applicants section for additional information.

ACADEMIC FRESH START POLICY

Applicants to undergraduate programs in the College of Health Professions (CHP) may request consideration under the Fresh Start Policy. This policy does not apply to currently enrolled students in the CHP or to admission to a CHP post-baccalaureate program.

Under the Fresh Start Policy, applicants to undergraduate programs may request that all academic credits, as well as the grades assigned to them, that they earned more than

seven (7) years before the anticipated date of registering for classes in the CHP program to which they have applied shall not be considered by the CHP in determining 1) their acceptance to that program or 2) the prerequisites, electives, or professional courses they have completed. If the request is granted, all courses taken at all colleges and/or universities that are more than seven (7) years old by this date will be removed from consideration irrespective of the grades earned. That is, the Fresh Start Policy may not be applied to selected courses in a given term or terms or to only those with certain grades. Thus, none of the courses excluded by granting such a request may be counted toward completion of any prerequisites, electives, or professional courses.

If the request is granted, only academic work completed less than seven (7) years prior to the date of registration in the intended program will be used in calculating the applicant's grade point average (GPA) and determining transfer credit for admissions. This will be so noted on the CHP academic transcript if the applicant is admitted. A Fresh Start may be granted only once to any student. It is not to be confused with the prerogative each CHP department has to selectively decline to accept for transfer credit any course or courses taken more than seven (7) years before the intended date of registration on the grounds that the knowledge in the discipline(s) in question, and thus the content of the course(s) as currently taught, has changed so extensively in the interim that it (they) no longer will fulfill the prerequisite or other transfer requirement for the given CHP program.

Applicants seeking consideration under the Fresh Start Policy must complete and submit the Petition for Admission under the Fresh Start Policy form to the CHP Welcome Center prior to the application deadline or the deadline for receipt of transcripts of the specific CHP program to which the individual is applying. To review the entire Fresh Start Policy, see <http://healthprofessions.uamsonline.com/files/2014/07/Academic-Fresh-Start-Policy.pdf> or request a copy from the CHP Welcome Center, College of Health Professions, University of Arkansas for Medical Sciences, 4301 West Markham Street, #619, Little Rock, AR 72205, (501) 686-5730.

NONDEGREE/NONCERTIFICATE STUDENTS

Minimum Criteria: Department chairmen (with approval of the Dean or the Dean's designee) may elect to admit nondegree/noncertificate students to selected courses in their department on a space available basis. The Dean may elect to admit nondegree/noncertificate students to CHP interdisciplinary courses. Nondegree/noncertificate students are students who register for one or more courses, but who do not want to pursue a formal credential or follow the entire curriculum of a professional program in the College.

1. Applicants who are accepted as nondegree/ noncertificate students may enroll in no more than 24 semester credits in a given program while in this status. Nondegree/

noncertificate students may earn some or all of those 24 semester credits by successful performance on challenge examinations. No more than 25% of a program's total professional credit hours may be taken by examination. Each department reserves the right to determine which, if any, of its professional courses may be challenged by examination. There is no limit to the number of approved courses that may be challenged by examination in a given semester, provided the "24 SC/25% of the total" rule is observed. Nondegree/noncertificate students challenging a course or courses by examination in a given semester may also be enrolled in not more than one course during that semester.

2. There is no assurance that courses completed by a nondegree/noncertificate student will be transferred toward degree or certificate program requirements should the student later be admitted as a candidate for a degree or certificate, nor does completion of courses by nondegree/noncertificate students in any way obligate the College to admit those students to a particular professional program.
3. While a nondegree/noncertificate student may, at the discretion of the department chairman, be excused from program prerequisite requirements, the student must otherwise complete all course prerequisites prior to enrollment in the given course.
4. Admission to nondegree/noncertificate status will be based on the applicant's objective, the appropriateness of the course sought to meet the objective, the applicant's academic qualifications, and the space available, if any, in the course in question.

Application Procedures:

1. Obtain an Application for Admission Form from the CHP Welcome Center. Telephone (501) 686-5730, or go to the College [website](#).
2. Return the completed application, with a non-refundable application fee of \$40.00 to the address listed on the form.
3. If requested by the chairman of the department, arrange for all colleges and universities attended to forward an official transcript to the CHP Welcome Center. If no college/university level course work has been completed, arrange for each high school attended to forward an official transcript to the CHP Welcome Center.
4. Forward to the CHP Welcome Center a letter outlining the course(s) sought and the objective to be achieved through completion of the course(s).
5. Forward to the CHP Welcome Center a signed statement that indicates the applicant has read, understands, and agrees to the requirements governing nondegree/non certificate applicants. A standard form is available from the CHP Welcome Center for this purpose.

STUDENTS ENTERING WITH A BACCALAUREATE OR HIGHER DEGREE

The student entering with a baccalaureate or higher degree from an accredited college or university must complete the following requirements for a CHP associate's or bachelor's degree: (a) 32 SC in residence; (b) all specific program mathematics, biological and physical science prerequisites; (c) all program-specific professional requirements; (d) and all core curriculum requirements specified by the Arkansas Department of Higher Education.

APPLICANTS FOR A CHP BACCALAUREATE DEGREE WHO ALREADY HOLD A CHP ASSOCIATE DEGREE OR CERTIFICATE IN THE SAME DISCIPLINE

Minimum Criteria: The following conditions apply to applicants who have completed a certificate or an associate's degree in a CHP discipline and want to complete the next highest award (*i.e.*, the associate's or the baccalaureate degree) in the same discipline.

1. If a degree plan for the next highest award was filed while the student was enrolled in the initial program, the student must complete the remaining requirements within the time limits specified in the degree plan, forward official transcripts which verify the completion of all requirements, file an application for graduation, and pay the graduation fee.
2. If a degree plan was not filed, or if one was filed, but requirements were not completed within the specified time limits, the former CHP student must apply for admission to the program which offers the next highest degree award. Upon acceptance, the student must complete a degree plan in accordance with the degree requirements stated in the catalog in force at the time of the most recent admission. To ensure that these students will have knowledge and skills comparable to those with whom they graduate, the admitting department evaluates each applicant's level of knowledge and clinical competence. In addition to catalog requirements, current standards for the profession will be used to determine if any core curriculum, science, or professional courses are necessary. The degree plan will include these additional requirements. Upon completion of all requirements specified in the degree plan, the student must arrange for official transcripts, file an application for graduation, and pay the graduation fee.

UAMS GRADUATE SCHOOL PROGRAMS

Students pursuing the Master of Science degree in Clinical Nutrition, the Master of Science degree in Communication Sciences and Disorders, Master of Science in Genetic Counseling, and the Doctor of Philosophy in Communication Sciences and Disorders are considered to be students in the Graduate School who are taking courses offered by the faculty of the College of Health Professions. Accordingly, the Graduate School Student Catalog is to be considered the primary catalog for all students in these programs. All provisions of the Graduate Student Catalog, including the grievance procedures, are the authority applicable to students pursuing this certificate or degree.

INTERNATIONAL APPLICANTS

Minimum Criteria: As nearly all **undergraduate applicants** who complete the application process must be interviewed as part of the selection process, the College of Health Professions encourages prospective international students residing outside the United States to apply first for admission to a general college or university in this country, complete any science and/or core curriculum prerequisite requirements that they lack, then apply for admission to the College of Health Professions. International students who meet the other requirements and who present themselves for an interview, if invited, will be considered for admission.

All applicants who are not United States citizens or permanent resident aliens or for whom English is not their native language must meet the following admission requirements in addition to those stated in the Program Information section of this catalog.

1. If an applicant is basing his/her eligibility on credits from an international university, the official transcript or copy must first be evaluated by the **Education Credential Evaluators, Inc., P.O. Box 514070, Milwaukee, WI, 53203-3470 or World Education Services, P.O. Box 5087, Bowling Green Station, New York, NY, 10274-5087**. An official copy of the evaluation from either the Education Credential Service or World Education Services must be forwarded directly to the College of Health Professions, Welcome Center. A fee list and application forms for this service may be obtained from the agencies.
2. All applicants, regardless of citizenship, whose native language is not English, are required to demonstrate fluency (speaking) and literacy (reading and writing). The primary means to document fluency and literacy is to submit a Test of English as a Foreign Language (TOEFL). At the discretion of the CHP program's admissions committee and approval of the Associate Dean for Academic Affairs, the TOEFL requirements may be waived for applicants to programs in CHP who meet specific criteria. Please refer to the English Fluency and Literacy Requirement section of this catalog.

3. There are currently no student aid funds available at UAMS to support international students. Completion of a financial affidavit and documentation indicating that the applicant has sufficient funding to pay for his/her educational and personal expenses while enrolled are required. The United States Department of Justice's Immigration and Naturalization Service Affidavit of Support form must be used. It currently costs a student with no dependents approximately \$35,000 in United States currency for each full calendar year (12 months) of study.
4. Because accidents and sickness can require expenses for which many persons are not prepared, all students are required to purchase health insurance through a program approved by the University of Arkansas for Medical Sciences or an equivalent coverage from a private source. Applicants who choose not to purchase appropriate insurance will not be allowed to register.
5. Those applicants selected for admission must arrange through the Immigration and Naturalization Service of the United States Department of Justice for the transfer of their Certificate of Eligibility (I-20) to the University of Arkansas for Medical Sciences.

In admissions reviews, first consideration is given to Arkansas residents. In recognition of the significant support of CHP programs by private and federal health care facilities, however, highly qualified applicants who are residents of another state or citizens of a foreign country may successfully compete for admission.

ENGLISH FLUENCY AND LITERACY REQUIREMENT

TOEFL REQUIREMENT

All applicants, regardless of citizenship, whose native language is not English, are required to demonstrate fluency (speaking) and literacy (reading and writing). The primary means to document fluency and literacy is to submit a Test of English as a Foreign Language (TOEFL). A minimum score of 213 is required on the computer-based version of the examination, 79 on the Internet-based version of the examination (subtest score minimums: 15 reading, 15 listening, 18 speaking, 17 writing), or total score of 550 on the paper version with 55 or greater in each of the four subtest scores. CHP programs have the option of setting higher score requirements. The test must be taken within the two years immediately preceding the requested semester of admission. An official copy of the TOEFL score, issued by the Educational Testing Service must be sent directly to UAMS by the Educational Testing Service. A photocopy of the scores sent to the student is not sufficient. No action will be taken on an application containing a photocopied test score.

Petitioning for a TOEFL Waiver: At the discretion of the program admissions committee within the College of Health Professions (CHP) and approval of the CHP Associate Dean for Academic Affairs, the TOEFL requirement may be waived

for applicants to programs in CHP who meet any of the following criteria:

- Received a bachelor's degree or master's degree from an accredited U.S. college or university.
- Graduated from a U.S. high school having completed a minimum of 3 full years in residence and having completed two years of regular English courses with B or better grades.
- Scored 21 or greater on the English component of the ACT exam.
- Maintains a current U.S. certification to practice in the related discipline in which further coursework will be completed and has practiced in this discipline in the U.S. for at least 2 years.

A waiver is not automatically granted. Each petition is reviewed on an individual basis, and the department chair/program director and/or the Associate Dean for Academic Affairs may request additional supporting documentation and/or demonstration of the applicant's ability to write, speak, and comprehend the English language.

To Submit for Consideration of a Waiver: You must complete a "Request to Waive TOEFL Requirement" form and obtain the approval of the department chair/program director. Return the form to the CHP Welcome Center, Administration West Building, Room 1.328A or fax to (501) 686-6855. The request to Waive TOEFL Requirement form is available on the CHP webpage.

REAPPLYING TO THE COLLEGE

Applicants who have either (1) not completed their applications for the entry semester they designated, or (2) not been admitted to a program, or (3) chosen not to matriculate may reapply for a future admission cycle. To do so they must complete a new application and pay an application fee. Students may be required to provide additional documentation in support of their application.

READMISSION TO A PROGRAM

Students who withdraw from or are dismissed from the College of Health Professions for any reason must reapply for admission by:

- Completing an application by the published application deadline.
- Providing any required information for admission that is not in the student's previous admissions file.
- Paying the admission fee.

EVALUATION OF TRANSCRIPTS FOR TRANSFER

Only officially signed and sealed transcripts received directly from another academic institution are accepted for evaluation by the College. Transcripts are evaluated for:

1. Course subject and content equivalency to the department requirements.
2. Grade point acceptability per credit. Only courses in which a grade of C (2.0 on a 4.0 scale) or higher was earned are accepted in transfer.
3. Course content equivalency to degree requirements. Only courses that count toward the total credits for a degree at the institution offering the courses will be accepted in transfer ("remedial" and "developmental" courses are not acceptable). **No more than one course in the following group will be accepted in transfer to meet degree requirements:** band, studio, physical education, military science, English as a second language (ESL), manual skills.
4. Accreditation of institution. Transfer credit is granted only for course work completed at a regionally accredited institution of higher education.

Applicants must submit official transcripts from all institutions attended. In no case is the application process complete until all official transcripts are on file.

Upon request, an appropriate catalog for the years covered by a transcript must be submitted before evaluation can take place. Applicants who have attended another college on the UAMS campus, but did not graduate, must submit a letter from the College stating the reason(s) for withdrawal from the College. The letter will be reviewed as part of the application.

ADVANCED PLACEMENT

The following mechanisms for advanced placement in a program may be available. Contact the respective department chairman for additional information.

Program Evaluation: A department's admissions committee may sometimes recommend advanced placement upon consideration of an applicant's background and experience, subject to approval by the Dean.

Military Service: A student who has been in active military service may submit a copy of his/her separation notice for possible award of credit for satisfactory completion of relevant course work taken as part of military training.

Credit by Examination and Correspondence: With departmental approval, credits established by examination and/or correspondence appearing on an official transcript of a regionally accredited college or university may be transferred to fulfill elective and core curriculum with the exception of speech and laboratory science courses.

A maximum of 15 semester credits (SC) earned by examination may be applied to meet certificate and associate's degree program requirements. A maximum of 30 SC earned by examination may be applied to meet baccalaureate program requirements. A maximum of nine (9) SC earned by correspondence, not more than six (6) of which may be earned from an institution outside of the

University of Arkansas system, may be applied to meet certificate, associate's degree, or baccalaureate elective and core curriculum program requirements. (Internet courses are not considered correspondence courses and can be applied to meet program requirements if they are earned from regionally accredited institutions and are included on official transcripts from the institutions.)

Credit by Challenge Examination of Professional Courses: A student who is enrolled in or admitted to a department in the College may establish professional credit by challenge examination in courses approved by the department. Such credit will be limited to a maximum of 25% of the total professional credits required for the specific certificate or degree. Professional credits may not be established by CLEP or correspondence credit. A fee of one-half of the SC registration fee (tuition) will be charged for courses challenged by examination.

When credits are earned by challenge examination, "CR" will be entered into the student record. This credit will not be used in computing GPA or CGPA.

The total semester credits established by correspondence, CLEP, and challenge examinations are limited to 25% of the total credits required for the specific certificate or degree.

ACADEMIC REGULATIONS

COURSE LOAD

The maximum load is 20 semester credits for the fall or spring semester, and a total of sixteen (16) SC for the summer sessions. To take a course load exceeding the maximum, approval by the department chairman is required.

Students may enroll for classes on other campuses in the University of Arkansas system as a part of their normal course load, but such concurrent enrollment must be approved by the appropriate CHP department chairman prior to registration.

Students receiving financial aid through student loans, grants, scholarships, or Department of Veterans Affairs benefits are required to maintain specified course loads to continue eligibility for aid. For specific information about loans, grants, or scholarships, students should contact the **UAMS Student Financial Services Office, Financial Aid Office, University of Arkansas for Medical Sciences, Administration West Building, 1.120. Telephone: (501) 686-5451**. For specific information about Department of Veterans Affairs benefits, students should contact the **CHP Welcome Center, Administration West Building, 328A. Telephone: (501) 686-5730**.

REGISTRATION

Formal admission by the department/college as well as completion of registration in accordance with instructions issued by the CHP Welcome Center is a prerequisite to class attendance. Registration after the close of the announced registration period requires the payment of a late registration

fee of ten (10) percent of the applicable tuition. Registration is not permitted after the fifth day of classes. A student is not considered registered until the appropriate forms have been filed with the CHP Welcome Center and payment or special arrangements regarding tuition and fees have been made with the UAMS Treasurer.

CONCURRENT ENROLLMENT

Concurrent enrollment at more than one campus is permitted under certain circumstances. The current policy requires applicable fees to be paid to each campus. There is no cap on tuition when combining campus fees.

AUDITING A COURSE

When a student audits a course, s/he must register, pay the appropriate fees, and be admitted to class on a space available basis. Instructors will notify students of the requirements for receiving the mark of "AU" for audited courses. If the student is not satisfying the requirements specified by the instructor, the instructor or Associate Dean for Academic Affairs may drop a student from the course being audited. The student will be notified if this action is taken.

The only successful grade or mark which may be given is "AU" and no course credit will be awarded. Courses completed with grades of "AU" are not counted toward completion of degree requirements.

The cost for auditing is the same as taking classes for semester credit. The last day to change from audit to credit is the fifth (5th) calendar day of classes. Changing from credit to audit must be done during the first one-half of the course and with the approval of the chairman of the department. Changing from credit to audit may affect the student's eligibility to receive financial aid or the amount of the financial aid awarded. Students will be responsible for the return of any financial aid due as a result of the change from credit to audit.

ADDING/DROPPING A COURSE

Students have until the close of the announced registration period to add or drop courses for the subsequent semester without penalty.

A student may add courses, if approved by the course instructor and the student's faculty advisor/department chairman, within the ten working days after the close of registration. The appropriate form for addition of courses may be obtained from the CHP Welcome Center. Completed forms and a \$10 fee must be filed with the Centralized Registrars' Office.

A student may drop a class using the appropriate form with the required signatures for a \$10 fee until the fifth day of class*. No notation will appear on the transcript concerning the deletion of a course. The change(s) in course work will be assessed or remitted at 100% of the applicable tuition. After the fifth day and at least one week before the end of the semester, a course can be dropped with the fees adjusted

based on “refund of fee policy” found in the current year’s catalog.

Students who withdraw after the fifth day of class and by the midpoint of a course will receive a “W”; those who withdraw after the midpoint and by the deadline for withdrawals will receive either a “WP” or “WF”. Students who do not withdraw by the deadline will receive an “F” in the course. The deadlines for course withdrawals are five working days before the end of the semester.

REPEATING A COURSE

When a course is repeated, the grade earned in the repeated course is used to assess the student’s fulfillment of the academic plan. Though all enrollments, original and repeated, will be shown on the student’s transcript, only the grade in the repeated course (even if it is lower than the first) will be used to calculate the cumulative grade point average course in the college.

WITHDRAWAL

A student withdrawing from one or more courses will pay a \$10 fee for each course. Students who withdraw by the midpoint of the course will receive a “W”; those who withdraw after the midpoint and by the deadline for withdrawals will receive either a “WP” or “WF”. The deadlines for course withdrawals are five working days before the end of the semester.

A student withdrawing from the University must complete the Student Clearance Certificate and have an exit interview with the Associate Dean for Academic Affairs. If the student does not formally withdraw following the above procedures, a grade of “F” will be assigned in all courses in which the student has not completed all requirements.

WITHHOLDING OF GRADES AND TRANSCRIPTS

The Centralized Registrars’ Office is authorized to withhold grades and transcripts and refuse registration to any student or former student who:

- does not complete a degree plan in the first semester of attendance in a program
- does not return medical, laboratory, library, or other University property entrusted to his or her care
- does not comply with rules governing the audit of student organization accounts
- does not pay any fees, tuition, room and board charges, fines or other charges assessed against him or her by a University official or by the campus judicial system, or
- does not officially withdraw from the University prior to graduation.

TRANSCRIPT REQUEST FROM THE COLLEGE

Requests for transcripts can be submitted to the CHP Welcome Center between 8:00 AM – 4:30 PM, Administration West Building, Third Floor, or sent to the

Office through mail or by fax (if the student signs the fax request). The mailing address and fax number are on the form. Please allow 3-5 working days for receipt of the requested transcript. There is no fee for transcripts; however, no more than five (5) transcripts may be requested per day. Electronic transcripts are available through the CHP [website](#).

GRADUATION

The student must file an application for graduation and pay the graduation fee at least 30 days before the end of the semester in which the student wants to graduate. If the student wants to participate in the annual UAMS Commencement, the application for graduation and the graduation fee must be received no later than January 31 of the year in which Commencement occurs. Forms are provided for this purpose at registration and may also be requested from the CHP Welcome Center.

Students must complete by the end of spring semester all degree or certificate requirements, except for professional (*i.e.*, CHP) courses that will be taken in the following summer session, in order to be eligible to participate in Commencement as a candidate for that degree or certificate. All transcripts should be forwarded to the Centralized Registrars’ Office prior to the end of the semester in which the student is scheduled to graduate. Official transcripts must be received in envelopes sealed by the issuing institution. All UAMS accounts must be paid in full

At the conclusion of the semester in which degree/certificate requirements are completed, the student must complete the Student Clearance Certificate. Failure to do so will result in withholding of grades, transcripts, and diploma. Degrees are awarded by the University on designated dates each Fall, Spring and Summer. Diplomas are issued on those dates.

GRADUATION WITH HONORS AND HIGH HONORS

Students whose transcript grade point averages (TGPA) are 3.5 or higher will graduate with honors from the CHP. Those students whose TGPA’s are 3.7 or higher will graduate with high honors. The TGPA is computed after the end of the preceding fall semester for students likely to be eligible to participate in the following May Commencement (for listing honors recipients in the Commencement Program) and again at the end of each student’s academic program (completion of all requirements for the degree). If the TGPA falls below the requisite level for honors after computation for May Commencement, or if the TGPA subsequently rises to the honors level, the student’s final program TGPA will be used to determine eligibility for honors or high honors. This means it is possible a student will be listed in the Commencement Program as receiving honors (due to the submission time for program listings), but will not actually be eligible by the time Commencement occurs, OR, that a

student eligible for honors at Commencement will not be listed because the requisite TGPA level was not reached until the end of spring or summer semester. To insure students who earn honors will be so notified and appropriately recognized in their records, students will be notified by mail at the end of their academic program if they have earned honors or high honors, and their final transcripts will list these awards.

CERTIFICATION/LICENSURE/REGISTRY REQUIREMENTS

Successful completion of a CHP program does not itself insure certification/ licensure/registry eligibility. Students are advised to become familiar with the discipline-specific requirements published by each certification/licensure/ registry agency.

CLASSIFICATION OF COURSES

A four-digit numbering system is used to classify each course. The first digit identifies the level of the course content (difficulty of course content, not necessarily the year in which the course is taught): 1 for freshman; 2 for sophomore; 3 for junior; 4 for senior; 5, 6, or 7 for graduate. The second digit is the number of semester credit hours. (Courses with greater than nine [9] semester credit hours will be identified by the letter "X" in place of the second digit.* Courses with a variable number of semester credit hours will be identified by the letter "V" in place of the second digit). The third and fourth digits are assigned by the department to identify specific courses.

*In cases where the letter "X" replaces the second digit, the number of semester credit hours will be indicated in the course descriptions.

CREDIT HOURS

The standard unit of measurement for course work in the College is the semester credit. One semester credit hour is equal to 750–800 minutes of classroom instruction, 2250–2400 minutes of laboratory instruction, or 3750–4000 minutes of clinical instruction.

CHANGE OF NAME/ADDRESS

The student must report in writing any change in his/her name or address to the department chairman and to the CHP Welcome Center within ten (10) days of the change.

GRADES AND MARKS

Grades

Final course grades are recorded and preserved in the CHP Welcome Center. The following Grades and Grade Point (GP) values are used in the College:

GRADE	DENOTATION	GP
A	Outstanding	4
B	Good	3
C	Satisfactory	2
D	Poor	1
F	Failure	0

The grade of "A" is given for superior achievement to excellent scholars. "B" represents above average achievement. "C" represents average achievement. "D" (poor achievement) is considered the minimum passing grade; while academic credit is awarded for a D grade, some CHP departments (see departmental policies) do not accept D grades for progression into subsequent semesters. (Note that a minimum of a 2.0 Cumulative Grade Point Average is required in order to qualify for graduation, and similar standards described in the following pages apply to progression as well. Departments reserve the right to establish higher standards.) The grade of "F" denotes failure and is given for unsatisfactory performance. No credit is earned for courses in which the grade of F is recorded.

GPA: Grade Point Average (GPA) refers to the average Grade Point (GP) value achieved in graded courses in a given semester. Only courses in which regular letter grades (see above) are earned are used in GPA calculations. To calculate the GPA for a semester, the number of grade points for each letter grade earned is multiplied by the number of credit hours for that course, and the products are summed for all graded courses in the given semester. This sum of weighted grade points is then divided by the total number of graded credit hours for which the student was registered, and the subsequent quotient is the GPA.

CGPA: Cumulative Grade Point Average (CGPA) refers to the average Grade Point (GP) value achieved in all graded courses appearing on the CHP transcript. Only courses in which regular letter grades (see above) are earned are used in CGPA calculations. CGPA is calculated similarly to the calculation of GPA (above), except that all graded courses on the transcript are used in the calculation.

PGPA: Program Grade Point Average (PGPA) refers to the average Grade Point (GP) value achieved for the CHP courses taken in a given program. Only courses in which regular letter grades (see above) are earned are used in PGPA calculations. PGPA is calculated similarly to the calculation of GPA (see above) except that only graded courses taken in the program at UAMS/CHP are used in the calculation.

In determining "Candidates for Undergraduate Degrees with Honors," all grades recorded on the CHP transcript will be used. This includes all professional and concurrent course grades and grades in all courses accepted in transfer. Undergraduate students with a CGPA equal to at least 3.5 will be identified as graduating with "Honors" while those with a CGPA of at least 3.7 will be identified as graduating with "High Honors."

Marks

The following marks are used in the College:

MARK	DENOTATION
I	Incomplete
IP	In Progress
AU	Audit
CR	Credit
NC	No Credit
S	Satisfactory
U	Unsatisfactory
W	Withdrew
WA	Withdrawn Administratively
WF	Withdrew Failing
WP	Withdrew Passing

A Mark of I: A mark of "I" may be assigned to a student who has not completed all course requirements, but has demonstrated work of passing quality. It is the student's responsibility to arrange completion of the course requirements with the instructor. The "I" mark must be removed from the student's transcript by the last day of the semester subsequent to the scheduled completion of the course, or it is automatically replaced by the grade of "F." An extension of time past the last day of the semester subsequent to the scheduled completion of the course is permitted only in unusual circumstances and must be approved in advance by the course instructor and department chairman. Students who are members of military reserve or National Guard units who must arrange an "I" as a result of activation authorized by the President of the United States are governed by a separate policy (see Military Duty Policy in this catalog).

Authorization for Progression with an Incomplete ("I") Grade in a Prerequisite Program Course: If a student receives an incomplete ("I" grade) in a program prerequisite course, is subsequently allowed to enroll in the next semester of a program, fails to replace the "I" with a passing grade, and is administratively dismissed during the semester and not allowed to complete course work for that semester, the student may be responsible for repaying any or all financial aid received by the student for that semester. Consequently, for students who are receiving financial aid at the time of registration who also have a grade of "I" in a professional course from the previous semester that is a prerequisite to progression to subsequent course work, there will be three options:

1. The student may not be allowed to register for classes.

2. The chairman of the department in which the student's program resides may provide written authorization for the student to register for courses; however, he/she will be not be eligible to receive financial aid until the grade of "I" is converted to a grade of "C" or better. In this option, the student may be administratively withdrawn from the program at any time during the semester should he/she not meet the standards of progress for the prerequisite course for which they received an "I" grade.
3. The department chairman may provide written authorization for the student to enroll and continue in the program and complete all required current semester course work. In this option, students will be eligible to receive the financial aid for which they have been approved, assuming they meet all other financial aid requirements. If, at the conclusion of the semester, the student has failed to convert the "I" to a grade of "C" or better, the student will not be allowed to continue in the program. Students will, however, receive grades earned for other course work that is completed during the semester. All other departmental and college policies regarding student progression remain in effect.

For all these options, permission to enroll in classes for the semester following the one in which an "I" grade was awarded must be based on a review by the chairman of the student's past academic performance, progress in the curriculum, amount of material and other requirements yet to be completed, and any special circumstances regarding the student and the reason for the "I" grade (e.g., illness, injury, death in the family). The option selected should reflect the chairman's conclusion that it is the one least likely to result in the repayment of the student's financial aid award, while recognizing the importance of upholding the academic standards and the rules and regulations of the university, college, and program as well as assisting the student in achieving his/her academic objectives to the extent possible consistent with the foregoing considerations.

A Mark of IP: For a course requiring more than one semester to complete and where evaluation of the student's performance is deferred until a subsequent semester, a mark of "IP" may be assigned for the initial semester (the student does not register for the course in question during subsequent semesters while completion of assignments is in progress). The "IP" mark will be replaced by the final course grade when the student completes all course requirements.

1. May be assigned only in a course officially designated for such a mark.
2. May persist on a student's transcript for no more than three consecutive semesters in a given course, including summer session.
3. Must be replaced by a letter grade on the student's transcript by the last day of the fourth consecutive semester or it will be automatically replaced by the

grade of "F". [An extension of time to remove the mark of "IP" past the last day of the fourth semester for the course may occur only in unusual circumstances and must be approved in advance by the course instructor and department chairman.]

A Mark of AU: The mark of "AU" (audit) denotes participation in a course for which no grades are assigned nor credit given. Students auditing a course pay full semester credit fees. Entry into an audited course and scoring of examinations while enrolled are at the discretion of the instructor. Neither grade points nor credits are assigned upon completion of audited course work.

A Mark of CR: The marks "CR" (credit) and "NC" (no credit) may be used in seminar and CHP elective courses. Performance in courses taken CR/NC is rated as credit (C or higher level work) or no credit (D or F level work). CR is also used in denoting successful challenge of a course by examination. Courses with marks of CR or NC are not computed in a student's CGPA.

A Mark of S and U: The marks "S" (satisfactory) and "U" (unsatisfactory) may be used in practicum and clinical courses. Courses offered only on a S/U basis are so designated in this Catalog. Performance in courses taken S/U is rated as satisfactory (C or higher level work) or unsatisfactory (D or F level work). A mark of U in a required course precludes progression to the next semester. Courses taken under the S/U option are not computed in a student's CGPA.

A Mark of W, WP, and WF: The marks of "W," "WP," or "WF" will be assigned upon official withdrawal from a course. W is assigned up to the midpoint of a course. Afterwards, either WP (Withdrew Passing) or WF (Withdrew Failing) is assigned until five working days (one week) before the end of the semester. At that time, a grade of F is assigned where official withdrawal procedures have not been completed (for students who have not finished course requirements nor completed arrangements for assignment of a temporary mark of "I" for the course). Students who repeat a course will have only the last grade received used in computing GPA and CGPA. Students requiring additional information should contact the CHP Welcome Center.

Inspection of Records: Students may review their academic records which qualify as "educational records" under the Family Educational Rights and Privacy Act. Exceptions are:

- Personal notes of faculty/staff
- Employment records
- Medical and counseling records used solely for treatment
- Department of Public Safety records
- Financial records of parents
- Confidential recommendations regarding admission, employment or honorary recognition.

COLLEGE OF HEALTH PROFESSIONS ACADEMIC APPEAL POLICY AND PROCEDURES

The Academic Appeal Procedure represents a formal mechanism whereby a student may obtain a review of a complaint related to academic matters including grades or other evaluations awarded for a course, assignment, project, examination, clinical procedure, clinical rotations, or other program-related performance. The procedures below provide opportunities for students to request a review of recommendations and decisions made by the department faculty, submit information not previously available to the faculty, or suggest alternative remedies. Established college or program policies themselves cannot be appealed.

Students enrolled in College of Health Professions (CHP) program through the UAMS Graduate School follow appeal processes for the Graduate School. Policies and procedures for scholastic dishonesty or other non-academic disciplinary matters differ from these procedures and are addressed in procedures and regulations governing student behavior and discipline found in this catalog.

Appeal Procedure

1. Before initiating a formal appeal, the student must contact the course instructor to discuss the academic matter or grade within five business days of the occurrence. "Occurrence" is the notification of a student's grade or performance evaluation.
2. **Appeal to the Department Chair**

If the matter is not resolved with the faculty member, the student may appeal in writing to the Department Chair within five business days following the meeting with the instructor. The written appeal should include:

- a. name of the student
- b. nature of the occurrence
- c. date of the occurrence
- d. name of the instructor(s) involved
- e. summary of the student's meeting with the instructor, including date, time, and outcomes
- f. student's rationale for the appeal

The student will be responsible for setting an appointment with the Department Chair to discuss the appeal. This meeting should occur as soon as feasible. The Department Chair's responsibilities include:

- a. investigating the facts and examining the evidence
- b. meeting with the instructor(s) and student to clarify areas of dispute
- c. mediating a mutually-acceptable resolution, if possible
- d. documenting in writing actions taken to seek resolution

The Department Chair will notify the student and faculty member in writing of her/his decision within five business days following the final meeting with concerned parties. Additionally, the Department Chair will forward a copy of all documents pertaining to the academic appeal to the Associate Dean for Academic Affairs.

3. Appeal to the Associate Dean for Academic Affairs

If mutually acceptable resolution is not achieved, or if the student wishes to appeal the Department Chair's decision, the student may submit a written request to the Associate Dean to review the merits of the student's appeal, rationale for the appeal and any new information they wish to have considered. The request must be submitted within five business days of the Department Chair's notice. The Associate Dean will review the student's appeal and the information and may solicit other information deemed appropriate for resolving the matter. The Associate Dean will inform the student and the Department Chair in writing of his/her decision within five business days following the final meeting with concerned parties. The decision of the Associate Dean will be final except in issues pertaining to procedural matters.

4. Appeal to the Dean for Procedural Matters

While the decision of the Associate Dean is final, the student may request a review of appeal process by the Dean. The student may submit a written request to the Dean to review the process utilized in reviewing the appeal. The request must be submitted within five business days of the Associate Dean's notice. The Dean will review the process and may solicit other information deemed appropriate. The Dean will inform the student, Department Chair, and Associate Dean in writing of his/her decision within five business days following the submission of the request by the student. No further appeals may be made.

PROGRESSION

For a student to progress in a CHP professional program from one semester to the next, including progression from one year to the next, each semester he/she must achieve a grade of "C" or higher in all courses designated by the respective program (see individual departmental sections of this catalog) as prerequisite to progression to subsequent course work. In addition, students are required to maintain a program grade point average (PGPA) of at least 2.0 with the following stipulations:

1. A **first semester** student who meets the specific course grade(s) and other program requirements but has **not** maintained a PGPA of 2.0 for all courses taken since entering the program **will** be allowed to progress **on probation** to the second semester. Since a student cannot be on probation for two consecutive semesters, however, a student on probation because of insufficient PGPA at the end of the first semester must raise his/her PGPA to at least 2.0 by the end of the next (probationary) semester in order

to remain in the program. Students failing to do so will be dismissed from the College.

2. For a student who is in the **second or subsequent semester** of a program to continue to progress, however, he/she must maintain a PGPA of not less than 2.0 for all courses taken since entering the program, including both professional and concurrent courses. These students, therefore, are not eligible for probation if their PGPA falls below 2.0 (eligibility for probation on other grounds is described elsewhere in this catalog, in the CHP Student Handbook, and in various program materials). Students who fail to meet this requirement will be dismissed from the College.

ACADEMIC PROBATION AND DISMISSAL

A student who fails to achieve a GPA of at least 2.0 in any given semester will be placed on academic probation for the following semester, providing that student meets the CHP Progression Requirements (see above). At the end of the probationary semester:

1. Students who achieve at least the minimum CGPA will be reinstated in good standing.
2. Students who fail to achieve at least the minimum CGPA (*i.e.*, 2.0) will be dismissed from the College.

Departments reserve the right to impose more stringent requirements beyond these minimal provisions for the College as a whole. Students who fail to meet departmental regulations pertaining to academic standing will be placed on academic probation or dismissed and are subject to the policies regarding progression within their respective departments to regain or retain student status.

CHP LEAVE OF ABSENCE POLICY

The CHP Leave of Absence Policy exists to bring some standardization to the process of requesting a Leave of Absence in the College. Some programs within CHP also have a Leave of Absence policy. Should there be a difference between the CHP Leave of Absence Policy and that of the program, the program policy takes precedence.

With approval of the student's program director and the associate dean for academic affairs, a student may take a Leave of Absence for non-academic reasons such as family care, serious illness or accident, or other extenuating reasons. A Leave of Absence may be granted for up to one year to students in good academic standing. The Leave of Absence offers the student the opportunity to leave school temporarily with the assurance that studies can be resumed with minimal administrative difficulty.

To initiate a Leave of Absence, the student must (1) discuss his/her plans with the program director and (2) then make a formal request in writing (see Request for Leave of Absence form) to the associate dean for academic affairs. The formal request must include a plan by the program director or department chair to integrate the student into the program

upon completion of the leave and verification that the student is currently in good academic standing. The associate dean will approve or deny the leave request and communicate the outcome in writing to the student and program director or department chair. If the student is not satisfied with the decision of the associate dean, he/she may appeal to the dean of the college within five working days of being informed of the associate dean's decision. The appeal must be in writing and state the rationale for reconsideration.

If a student is granted a Leave of Absence before the end of a semester, a grade of I (Incomplete) may be recorded for each course that has not been completed, on the condition that the student is in good academic standing in the course at the time of the Leave of Absence, *i.e.*, the student's grade in each course is satisfactory by the program's published standards. The student is required to complete requirements for these courses under conditions prescribed by the program director or department chair.

A student must inform the program director or department chairman in writing of his/her intention to return by the program application deadline to assure clinical space for the returning student.

Students on Leave of Absence are not eligible for student health services including visits to the Wellness Center. They do, however, retain access to their UAMS Internet account.

A Leave of Absence does not automatically override a program requirement to complete the degree within a required period of time. However, the program director or department chair may take the Leave of Absence into consideration if extension is requested.

Financial obligations to the University for past periods of enrollment are not waived by a leave of absence. Certain regulations exist with regard to the financial impact of a leave of absence. Anyone contemplating a leave is advised to look into the regulations and discuss them with personnel in Student Financial Services. The Leave Request Form is available on the CHP [website](#).

READMISSION

Each department has a policy on readmission to its program(s). The policy includes voluntary and involuntary withdrawal and continuous enrollment. Please review the department handbook or contact the department chairman for specific policy.

Students who withdraw or are dismissed from the CHP for any reason and wish to be considered for readmission to the same program in the CHP (if readmission is permissible under the circumstances in question) must follow the respective department's policy on readmission to its program(s). In addition, the College policy states that the Cumulative Grade Point Average (CGPA) is used to determine eligibility for admission. The CGPA is based on all courses taken prior to applying for admission to a CHP program. Students seeking readmission will be considered "new" applicants to the

program, and the CGPA will be calculated on all courses taken to date, including those taken in the CHP prior to the reapplication.

Note: The CGPA differs from the transcript GPA (TGPA) that students receive who are enrolled in a CHP program. The TGPA is based on specified prerequisite courses (a subset of all of the courses taken prior to admission to the CHP) and the professional courses subsequently taken in the CHP. The TGPA is not used when determining eligibility for readmission.

DENIAL OF ENTRY INTO CLINICAL PHASES

A grade of C or higher is required for designated courses which are prerequisites to subsequent clinical course work. Students failing to achieve this requirement may be denied entry into subsequent course work.

ADDITIONAL CRIMINAL BACKGROUND CHECKS/DRUG SCREENS

At times, a currently enrolled student may be required to obtain an additional background check and/or drug screen for a variety of reasons, *e.g.*, clinical affiliate requirements, contradictory findings from a clinical affiliate's background check, suspicion or reports of violation of laws, *etc.* In those instances, currently enrolled students will be barred from participating in clinical education experiences at clinical affiliates until a background check clearance is obtained. Failure to obtain an additional background check may be cause for suspension or dismissal from the program. See Background Checks and Drug Screens in the Admission/Academic Information section of this catalog.

CLINICAL PROBATION AND DISMISSAL

Since patient well-being is a major concern of the University, action will be taken when a student's clinical practice poses a potential threat to patient health, welfare, or safety. Students, therefore, are subject to the department's specific regulations governing clinical practice and may be placed on clinical probation by the department and/or dismissed from the department and the College for unsatisfactory clinical behavior as defined by his/her department. The specific regulations are contained in the respective departmental handbook and/or clinical course syllabi and distributed to students prior to their entering the clinical area.

CERTIFICATE AND DEGREE REQUIREMENTS

PREREQUISITE AND PROGRAM COURSE REQUIREMENTS

Students enrolled in certificate or degree programs in the College of Health Professions must complete both prerequisite and program components in order to graduate.

PREREQUISITE COURSE WORK

Course work required as a prerequisite for admission, varies by program but is a required program component for most certificate and degree programs of the College. Students should consult the individual program section of the CHP catalog for specific program information.

PROGRAM COURSE WORK

Course work required as part of each student's program area or area of specialization, also varies by program. For certificate, associate's, and bachelor's degree programs, students must complete at least 32 semester credits (SC) of professional course work in residence at the College.

CORE CURRICULUM

Students enrolled in associate's and bachelor's degree programs must fulfill core requirements for graduation in addition to prerequisite and program requirements. In general, the 35 SC state core curriculum is listed below. Programs may have specific course requirements for these core requirements. Please check the program curriculum for specific courses. Some of the courses required as part of the core curriculum may also fulfill the prerequisite course requirement.

Area	Semester Credits
COMMUNICATION	
Speech*	0-3
LIBERAL ARTS	
English Composition	6
American History or National Government	<u>3</u>
	9
SOCIAL SCIENCES	
Sociology, Anthropology, Geography, Economics, or Psychology	6
HUMANITIES/FINE ARTS**	6-9
MATHEMATICS	
College Algebra (or higher level mathematics)	3
LABORATORY SCIENCE	<u>8</u>
TOTAL	35

Under Arkansas law or regulations, no associate's or bachelor's degree may be granted without a three (3) SC course in American history or national government and a three (3) SC course in college algebra or higher level mathematics. **It is strongly recommended that prospective CHP students contact the CHP program of their interest to determine**

the acceptability of all prerequisite and core curriculum courses before enrolling in them.

*A student completing this core would either take speech and 6 credits of Humanities/Fine Arts, or would take 9 credits of Humanities/Fine Arts and no speech.

**The Fine Arts requirement cannot be fulfilled with a studio course. Humanities requirements may be selected from the courses in the subject areas of philosophy, political science, literature and the humanities. The course in National Government, if selected to meet the US History/National Government requirement, cannot also be used to meet the Humanities requirement in Political Science. Acceptable courses in literature must be broad survey courses; world literature is especially recommended. A grade of "C" or better is required for all Core Curriculum courses.

REQUIREMENTS FOR PROGRAM COMPLETION

Certificate Programs: Students enrolled in certificate programs of the College must successfully complete approved prerequisite and program course work composed of at least 7-18 SC or 24-42 SC if 75% of course work is currently offered in an existing AS or BS program for undergraduate certificate programs and 12-18 SC for graduate certificate programs.

Associate's Degree: A minimum of 60 SC of approved prerequisite, program, and core curriculum requirements must be successfully completed in order for a student to be awarded an associate's degree.

Bachelor's Degree Programs: Students are required to complete successfully at least 120 SC of approved prerequisite, program, and core curriculum in order to be eligible for graduation in a bachelor's degree program in the College. In addition, at least 40 SC of the total must be taken from upper-level (*i.e.*, 3000 and 4000: junior and senior) courses.

The above semester hour requirements for program completion are the College's minimum requirements and do not represent specific degrees. Individual programs in the College may require additional semester credit hours.

ACADEMIC POLICIES

ACADEMIC INTEGRITY POLICY

The College of Health Professions believes that both students and instructors have significant roles within the educational process. Acts of academic misconduct can influence this educational process by causing a distorted picture of the academic achievement of individual students and jeopardizing the success of the student's total educational program. Although monitoring of academic conduct is primarily the responsibility of faculty, students ultimately have the responsibility and are expected to act in an honest and responsible manner during the educational preparation for their professional role.

In the event a student is involved in a violation of the CHP academic integrity policy, sanction(s) for academic misconduct may include, but are not limited to, a failing grade on the test/assignment, failing grade for the course, or suspension or dismissal from the CHP. Refer to the student disciplinary procedure in the Student Conduct and Disciplinary Action section of this catalog.

DEFINITION OF ACADEMIC MISCONDUCT

Academic misconduct is considered to be an act contrary to academic and/or professional ethics. Examples of academic misconduct include, but are not limited to:

1. Copying from another student's test paper, reports, or computer files;
2. Using materials and/or devices during an examination which have not been authorized by the person in charge of proctoring the examination;
3. Giving or receiving assistance on examinations. This not only includes providing specific answers to subsequent examinees, but also involves providing or receiving information which would allow the student to have an unfair advantage in the examination over those students who did not possess such information;
4. Exchanging places with another person for the purpose of taking an examination or completing other assignments;
5. Using, buying, selling, stealing, transporting or soliciting in its entirety, or in part, the contents of an examination or other assignment not authorized for release;
6. Falsifying clinical logs, records, or reports (oral or written);
7. Plagiarism, *i.e.* presenting work that has been done by others as one's own. Plagiarism is characterized by failure to acknowledge the source of the work and includes the unreferenced use of ideas and words which belong to others or distribution of copyrighted material from texts, internet websites, or other printed or electronic material. It also includes the unacknowledged use of another's created products such as computer programs, clinical material, audio and video tapes, graphs, charts, tables, artwork, and photographs;

8. Misrepresenting facts to cover up mistakes or omissions in clinical or academic settings;
9. Deliberately performing at less than maximum ability, or asking another student to do so, to alter the grading scale.

PROFESSIONALISM AND PROFESSIONAL CONDUCT

Professional conduct and professionalism are important in education and the health care professions. Individuals seeking service from professionals in health care or education must be able to trust their provider. This policy establishes standards of professionalism and professional behavior for students, staff, and faculty in the College of Health Professions (CHP).

STANDARDS FOR PROFESSIONAL CONDUCT

Professional behaviors and professionalism are critical to the effective education of allied health students and the practice of their respective professions. All students, staff, and faculty in the College of Health Professions are expected to demonstrate high standards of professional behavior in all educational settings, including classrooms and laboratories, professional and clinical sites, and in non-educational settings. Students are encouraged to speak with their departments as programs within the CHP may have additional standards for professional conduct in addition to what is listed below. Examples of such behavior include, but are not limited to:

1. Act with honesty or truthfulness and demonstrate integrity to moral principles in academic matters as well as professional relationships.
2. Demonstrate dependability to carry out responsibilities assigned to you.
3. Conduct yourself with appropriate interpersonal interaction that respects not only yours but others race, ethnicity, sex, gender identity, gender expression, religion, and sexual orientation.
4. Communicate effectively with faculty, staff, students, patients, and other professionals.
5. Demonstrate confidence in actions and communications.
6. Demonstrate punctuality in academic and professional environments.
7. Comply with established oral and written deadlines.
8. Display professional behavior toward faculty, staff, students, patients, and other health professionals in all settings while on the UAMS campus, at clinical sites, or while at any business pertaining to your role with UAMS.
9. Show regard for persons in authority in classrooms, laboratories, and clinical settings.

10. Demonstrate high moral standards related to health education, practice, research, and service. These standards include, but are not limited to, telling the truth, maintaining confidentiality, and respecting individuals.
11. Comply with federal, state, university, and college laws and regulations regarding confidentiality of information at all times.
12. Display a positive attitude when receiving constructive criticism.
13. Produce quality work in academic and clinical settings.
14. Take responsibility for learning.
15. Demonstrate accountability for all decisions that you make.

NONCOGNITIVE PERFORMANCE STANDARDS

Students are accountable for conducting themselves as responsible adults. The following is a description of the principal noncognitive responsibilities of students in the College:

1. Come adequately prepared for class.
2. Attend all classes, laboratories, and clinical/field experiences, as scheduled, unless previous arrangements have been made with the instructor or department chairman.
3. Request instructor/student conferences when needed.
4. Treat patients and co-workers justly and impartially, regardless of their sex or their physical, mental, emotional, political, economic, racial, or religious characteristics.
5. Maintain a non-biased, open point-of-view during class sessions.
6. Request and take makeup examinations, if permitted by the instructor, within the specified period of time for the given course.
7. Act as a favorable role model for your chosen health profession at all times.
8. Be responsible for the condition of the instructional area during and at the completion of a class session.
9. Refrain from smoking on campus or clinic sessions.
10. Maintain and arrange class materials in a form which will be usable in the future as a professional reference.
11. Attempt to resolve concerns and questions in a courteous and informal manner, utilizing only when necessary the Grievance Procedure according to the published rules.
12. Adhere to the student responsibilities required by the program in which enrolled.

13. Maintain academic integrity (see Academic Integrity Statement in this catalog) by doing one's own work.

STUDENT INSPECTION OF EDUCATIONAL RECORDS

STUDENT RIGHTS UNDER THE FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT

The Family Educational Rights and Privacy Act (FERPA, 20 U.S.C. § 1232g) and University of Arkansas policy require an annual notice that informs students of their rights regarding education records. A student at UAMS has the following rights with regard to his/her education records:

1. The right to inspect and review the student's education records, with some exceptions under the Act, within 45 days of the day the University receives a request for access.
 - Students should submit to the appropriate official written requests that identify the record(s) they wish to inspect. The appendix to University-wide Administrative Memorandum 515.1 provides a list of the types and locations of education records, the custodian of those records, and copying fees for each individual campus. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom the request should be addressed.
2. The right to seek amendment of the student's education records that the student believes to be inaccurate, misleading, or otherwise in violation of the student's privacy rights.
 - Students may ask the University to amend a record that they believe is inaccurate, misleading or otherwise in violation of the student's privacy rights. Students should submit to the appropriate University official a written request that clearly identifies the part of the record they want changed and specifying why it is inaccurate, misleading, or in violation of the student's privacy rights. A sample form which may be used in making this request is contained in the appendix to University-wide Administrative Memorandum 515.1 which may be found in the UAMS Library.
 - If the University decides not to amend the record as requested by the student, the University will inform the student of the decision and of his or her right to a hearing regarding the request for amendment. Additional information regarding the hearing procedure will be provided to the student when notified of the right to a hearing and is also contained in University-wide Administrative Memorandum 515.1.

3. The right to consent to disclosures of personally identifiable information contained in the student's education records, except to the extent FERPA authorizes disclosure without consent.

- One exception which permits disclosure without consent is disclosure to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic, or research role, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has outsourced institutional services or functions (such as an attorney, auditor, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee, such as a disciplinary or grievance committee, or assisting another school official in performing his or her tasks.
- A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility.
- The University forwards education records to other agencies or institutions that have requested the records and in which the student seeks or intends to enroll or is already enrolled so long as the disclosure is for purposes related to the student's enrollment or transfer.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by the University to comply with the requirements of FERPA. The name and address of the Office that administers FERPA is:

Family Policy Compliance Office
US Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-4605

5. The right to withhold consent of disclosure of directory information. This information will be subject to public disclosure unless the student informs the Centralized Registrars' Office in writing by one week following registration that the student does not want any or all of directory information disclosed.

- Directory information includes, but is not limited to, the student's name; address; telephone listing; electronic mail address; photograph; date and place of birth; major field of study; grade level; enrollment status (e.g., undergraduate or graduate, full-time or part-time); dates of attendance; participation in officially recognized activities and sports; weight and height of members of athletic teams; degrees, honors and awards received; and the most recent educational agency or institution attended.
- Directory information also includes a student ID number, user ID, or other unique personal identifier used by the student for purposes of accessing or communicating in electronic systems, but only if the

identifier cannot be used to gain access to education records except when used in conjunction with one or more factors that authenticate the user's identity, such as a personal identification number (PIN), password, or other factor known or possessed only by the authorized user.

- Directory information does not include a student's social security number.

CHP DISABILITY POLICY

The College of Health Professions (CHP), in accordance with the Rehabilitation Act of 1973 and Americans with Disabilities Act as Amended (ADAAA) of 2008, provides appropriate accommodations for students with disabilities in order to facilitate equitable access to education at the University of Arkansas for Medical Sciences.

When a qualified student with a disability requests accommodation, every reasonable effort will be made to provide the accommodation, adjustment, and/or auxiliary service, as long as the accommodation(s) do not alter the fundamental objective of a course or violate the program's technical standards.

Students with a disability that need accommodations should contact the Associate Dean for Academic Affairs at 501-686-5730 to schedule an appointment to discuss their needs.

MILITARY DUTY POLICY

Students enrolled in the UAMS College of Health Professions who are members of military reserve or National Guard units may elect one of the following options when called to active military duty and given deployment orders. Spouses of members with a dependent child living with them that are enrolled in the UAMS College of Health Professions may also elect one of the following options when their spouse is called to active military duty.

1. **Withdrawal:** The student can officially withdraw from the CHP, and receive a full adjustment and refund of tuition and non-consumable fees for the terms they will be deployed but have already paid for. A copy of the activation orders must be attached to the official withdraw form for the student to obtain the full tuition and fee adjustment and refund. Students electing this option will not receive credit for any courses for the semester(s) involved; however, the academic record will indicate enrollment until the official date of withdrawal.
2. **Incomplete:** The student can remain enrolled and arrange to take an "Incomplete" for each class for which she or he is enrolled, provided the work to date is of passing quality. In order to receive an "Incomplete" in any course, the student must obtain approval from the instructor of each course. Upon discharge from the service, the student must contact the department to develop a plan with the department to complete the necessary course work to remove the incomplete from

their academic record six months after discharge. The incomplete will be changed to a "Withdrew Passing" (WP").

- 3. Grade:** An instructor who believes a sufficient portion of a course has been completed may assign an appropriate final grade in that course at the time the student leaves. This grade will be reported on the final grade roster.

A student activated during the course of a semester shall be entitled, within a period of two years following deactivation, a free tuition for one semester at the institution where attendance had been interrupted unless a federal aid is made available for the same purpose.

USE OF SOCIAL NETWORKING SITES

The University of Arkansas for Medical Sciences recognizes that social networking websites and applications such as Facebook, MySpace, Twitter, etc. are important and timely means of communication. Students who use these websites and applications must be aware of the critical importance of privatizing these websites and applications so that only trustworthy "friends" have access to the sites. They must also be aware that posting certain information is illegal. Violation of existing statutes and administrative regulations may expose the offender to criminal and civil liability, and punishment for violations may include fines and imprisonment. Offenders also may be subject to adverse academic actions that range from a letter of reprimand to probation to dismissal from the University.

The following actions are strictly forbidden:

- Students may not report the personal health information of patients. Removal of an individual's name does not constitute proper de identification of protected health information. Furthermore, inclusion of data such as age, gender, race, or date of evaluation may still allow the reader to recognize the identity of a specific individual.
- Students may not report private (protected) academic or financial information of another student or trainee. Such information might include, but is not limited to: course grades, narratives evaluations, examination scores, adverse academic actions, or financial aid information.
- In posting information on social networking sites, students may not present themselves as official representatives or spokespersons for the University of Arkansas for Medical Sciences or their college, department, or program.
- Students may not represent themselves as another person.
- Students may not utilize websites and/or applications in a manner that interferes with educational or work commitments.

In addition to the absolute prohibitions outlined above, the following actions are strongly discouraged as these are considered unprofessional and reflect poorly on the

individual, the healthcare profession, program, department, college, and the University of Arkansas for Medical Sciences:

- Display of vulgar language
- Display of language or photographs that imply disrespect for any individual or group because of age, race, gender, ethnicity, sexual orientation, or disability.
- Presentations of photographs that may reasonably be interpreted as condoning irresponsible use of alcohol, substance abuse, or sexual misconduct.

The following actions are strongly encouraged:

- Students should use privacy settings to limit the unknown or unwanted access to the student's profile or application.
- When listing an email address on a social networking site, students should use a personal email address (not a uams.edu address) as the primary means of identification.

When using these social networking sites, students are strongly encouraged to present themselves in mature, responsible, and professional manners. Discourse should always be civil and respectful. No privatization measure is perfect and undesigned persons may still gain access to the site. Once an item is posted on a networking site, it may not be easily removed. Future employers (e.g., residency or fellowship program directors, representatives of employers) may review these sites when considering potential candidates for employment.

GENERAL POLICIES AND PROCEDURES

AFFIRMATIVE ACTION POLICY

(Revised April 16, 2014)

The purpose of this policy is to inform all departments within The University of Arkansas for Medical Sciences (UAMS) of UAMS' commitment to take positive, good-faith efforts to recruit, employ, and promote qualified minorities, women, individuals with physical or mental disabilities and protected veterans. The ability of UAMS to meet its mission will increasingly depend upon constructively incorporating diversity and inclusion in its faculty and staff.

UAMS will comply with and enforce all applicable federal and state laws regarding equal employment opportunity and affirmative action, including Title VII of the Civil Rights Act of 1964 (as amended), Executive Order 11246 (as amended), - the Vietnam Era Veterans' Readjustment Assistance Act of 1974 (as amended), 38 U.S.C. 4212, (VEVRAA) the Uniformed Services Employment and Reemployment Rights Act (USERRA) (38 U.S.C. 4301, et.seq) (as amended), the Jobs for Veterans Act; Sections 503 and 504 of the Rehabilitation Act of 1973 (as amended), the American with Disabilities Act of 1990, the ADA Amendments Act (ADAAA) of 2008 (as amended), US Federal Court Decree in the Adams Cases of 1973, Arkansas Code Annotated section 21-3-302 and 303 (as amended) and Act 99 of 1989 of the Arkansas General Assembly. UAMS will take affirmative, positive actions to overcome institutional forms of exclusion and discrimination.

Our affirmative action program ensures equal employment opportunity by institutionalizing our commitment to equality in every aspect of the employment process. This policy will be followed in recruitment, hiring, determination of pay, promotions, University-sponsored training programs, transfers, layoffs, returns from layoff, demotions, terminations, social and recreational programs, use of UAMS facilities, fringe benefits, and treatment as individuals. It is to be implemented throughout the campus, and its implementation is the responsibility of all departments and all supervisory and non-supervisory personnel. Compliance of this policy shall be monitored by the Affirmative Action section of the Office of Human Resources. UAMS commits itself to a policy of equal employment opportunity and to a program of affirmative action not solely because of legal requirements, but because UAMS believes such practices are basic to human dignity.

Questions regarding the affirmative action program should be referred to the Affirmative Action section of the Office of Human Resources.

UAMS CONFIDENTIALITY POLICY

UAMS Administrative Guide

Policy #: 3.1.15 – Revised August 7, 2013

[Web page](#)

Purpose: To inform the UAMS Workforce about the UAMS Confidentiality Policy.

Scope: UAMS Workforce as well as non-UAMS employees, vendors, consultants, and other visitors who may access Confidential Information.

Definitions: Confidential Information includes information concerning UAMS research projects, confidential employee and student information, information concerning UAMS research programs, proprietary information of UAMS, and sign-on and password codes for access to UAMS computer systems. Confidential Information shall include Protected Health Information. Confidential Information includes information maintained or transmitted in any form, including verbally, in writing, or in any electronic form.

Protected Health Information (PHI) means information that is part of an individual's health information that identifies the individual or there is a reasonable basis to believe the information could be used to identify the individual, including demographic information, and that (i) relates to the past, present or future physical or mental health or condition of the individual; (ii) relates to the provision of health care services to the individual; or (iii) relates to the past, present, or future payment for the provision of health care services to an individual. This includes PHI which is recorded or transmitted in any form or medium (verbally, or in writing, or electronically). PHI excludes health information maintained in educational records covered by the federal Family Educational Rights Privacy Act and health information about UAMS employees maintained by UAMS in its role as an employer and health information regarding a person who has been deceased for more than 50 years.

UAMS Workforce means for the purpose of this Policy, physicians, employees, volunteers, residents, students, trainees, visiting faculty, and other persons whose conduct, in the performance of work for UAMS, is under the direct control of UAMS, whether or not they are paid by UAMS

Policy: UAMS prohibits the unlawful or unauthorized access, use or disclosure of Confidential Information obtained during the course of employment or other relationship with UAMS. As a condition of employment, continued employment or relationship with UAMS, the UAMS workforce and all non-UAMS employees, vendors, consultants and other visitors who may access Confidential Information shall be required to sign a UAMS Confidentiality Agreement approved by the UAMS Office of General Counsel. UAMS will provide training for each of its workforce members on the importance of maintaining confidentiality and the specific requirements of state and federal law, including the HIPAA Privacy Regulations and laws protecting the privacy of students and employees, as well as UAMS policies, in accordance with Policy 3.1.30 HIPAA Education and Training.

Procedures

Confidentiality Agreement: As a condition of employment, continued employment, or relationship with UAMS, UAMS will require its workforce and all non-UAMS employees, vendors, consultants and other visitors who may access Confidential Information to sign the UAMS Confidentiality Agreement.

All new employees, students, or vendors requiring access to electronic Confidential Information (computer systems) must have a current Confidentiality Agreement on file in the IT Security Office. The person signing the agreement will receive a copy of the Confidentiality Policy with the Confidentiality Agreement. The UAMS IT Security Office will maintain signed Confidentiality Agreements. It is the responsibility of the manager or of the hiring individual vendors or consultants (who do not require electronic access but who may have access to Confidential Information) to require execution of the appropriate confidentiality agreements approved by the UAMS Office of General Counsel and to send those documents to the UAMS IT Security Office.

Restriction on Access, Use and Disclosure of Confidential Information: UAMS limits and restricts access to Confidential Information and computer systems containing Confidential Information based upon the specific job duties and functions of the individual accessing the information. UAMS will restrict access to Confidential Information to the minimum necessary to perform individual job functions or duties. UAMS will further limit and control access to its computer systems with the use of unique sign-on and password codes issued by the IT Security Office to the individual user authorized to have such access. Users are prohibited from sharing their password or using the access codes of another. Authorization to access, use or disclose Protected Health Information also is governed by the UAMS Use and Disclosure Policy 3.1.28.

UAMS will control and monitor access to Confidential Information through management oversight, identification and authentication procedures, and internal audits. UAMS managers and heads of departments will have the responsibility of educating their respective staff members about this Policy and the restrictions on the access, use and disclosure of Confidential Information, and will monitor compliance with this Policy.

Sales Representatives and Service Technicians: Sales representatives and service technicians must register in the appropriate area and execute the Confidentiality Agreement prior to any exposure to UAMS Confidential Information.

Media: All contacts from the media regarding any Confidential Information must be referred to the UAMS Office of Communications and Marketing (501-686-8998 or pager 501-395-5989).

Violation of Confidentiality Policy: Individuals shall not access, use, or disclose Confidential Information in violation of the law or contrary to UAMS policies. Each individual allowed by UAMS to have access to Confidential Information must maintain and protect against the unauthorized access, use or disclosure of Confidential Information. When no longer needed for the individual's specific job duties, Confidential Information must be returned to UAMS or destroyed. Any access, use or disclosure of Confidential Information in any form – verbal, written, or electronic – that is inconsistent with or in violation of this Policy will result in disciplinary action, including but not limited to, immediate termination of employment, dismissal from an academic program, loss of privileges, or termination of relationship with UAMS. Any workforce member whose relationship with UAMS is not terminated as a result of intentionally violating this Policy must, in order to continue working at or attending UAMS, complete a HIPAA training module through the UAMS HIPAA Office.

All UAMS employees and others subject to this Policy must report any known or suspected incidents of access, use or disclosure of Confidential Information in violation of this Policy or in violation of the law to the HIPAA Office at 603-1379, in accordance with Policy 3.1.23 Reporting Policy for HIPAA Violations.

Sanctions: Violation of this Policy will result in disciplinary action, in accordance with Policy 4.4.02 Disciplinary Notice Policy.

UAMS TITLE IX, SEX DISCRIMINATION, SEXUAL HARASSMENT, SEXUAL ASSAULT, SEXUAL MISCONDUCT, SEXUAL VIOLENCE, STALKING, GENDER-BASED HARASSMENT AND RETALIATION POLICY

UAMS Administrative Guide

Policy #: 3.1.48 – Revised April 16, 2014

[Web page](#)

Purpose: To Establish The Policy And Procedure For Reporting, Investigating, and responding to complaints of sex discrimination, sexual harassment, sexual assault, sexual misconduct, sexual violence, stalking, gender-based harassment, and retaliation.

Scope: All UAMS employees, faculty members, staff members, students, non-employees (such as contractors, vendors, delivery persons, and volunteers) and guests and visitors of the UAMS campus.

Definitions:

Complainant: Any party who makes a complaint/grievance against another student, employee, faculty member, staff member, non-employee, guest or campus visitor.

Respondent: The person(s) against whom a complaint has been made.

Definition of Status: A full-time employee will be considered as an employee, regardless of student status. A student who is a part-time employee will be considered a student unless the incident under consideration occurred in connection with employment.

Sexual Harassment: Sexual harassment generally includes any unwanted or unsolicited sexual gesture, physical contact, or statement which, when viewed from the perspective of a reasonable person similarly situated, is offensive, threatening, humiliating, or interferes with a person's ability to perform his or her job, educational pursuit, or participation in campus life. Sexual harassment may include: (1) submission to or rejection of the conduct is made either explicitly or implicitly a term or condition of employment or status in a UAMS-sponsored course, program, or activity; (2) submission to or rejection of the conduct is used as a basis for employment or academic decisions affecting that individual; or (3) such conduct unreasonably interferes with an individual's work or academic performance, or creates an intimidating, hostile, or offensive environment for work or learning.

Hostile Environment: A hostile environment exists when harassment: (1) is sufficiently serious (i.e., severe, pervasive, or persistent) and from both the alleged victim's and reasonable person's viewpoint offensive so as to deny or limit a person's ability to participate in or benefit from the UAMS's programs, services, opportunities, or activities; or (2) when such conduct has the purpose or effect of unreasonably interfering with an individual's employment opportunities.

Sexual Misconduct: includes sexual assault, inducing incapacitation for sexual purposes, sexual exploitation, and relationship violence.

Sexual Assault: means an actual or attempted sexual contact with another person without that person's consent.

Inducing incapacitation for sexual purposes: includes using drugs, alcohol, or other means with the intent to affect or having an actual effect on the ability of an individual to consent or refuse to consent (as "consent" is defined in this policy) to sexual contact.

Sexual Exploitation: Occurs when a person takes non-consensual or abusive sexual advantage of another for his/her own advantage or benefit, or to benefit or advantage anyone other than the one being exploited, and that behavior does not otherwise constitute one of the other sexual misconduct offenses.

Relationship Violence: Abuse or violence between partners or former partners involving one or more of the following elements: (1) battering that causes bodily injury (2) purposely or knowingly causing reasonable apprehension of bodily injury; (3) emotional abuse creating apprehension of bodily injury or property damage; or (4) repeated telephonic, electronic, or other forms of communication - anonymously or directly - made with the intent to intimidate, terrify, harass, or threaten.

Stalking: includes repeatedly following, harassing, threatening, or intimidating another by telephone, mail, electronic communication, social media, or any other action, device or method that purposely or knowingly causes substantial emotional distress or reasonable fear of bodily injury or death.

Consent: is informed, freely given, and mutual. Consent must be knowing, willing, and voluntary.

Non-Consensual Sexual Contact: Non-consensual sexual contact is any intentional sexual touching, however slight, with any object by a person upon another person that is without consent and/or by force.

Non-Consensual Sexual Intercourse: Non-consensual sexual intercourse is any sexual intercourse however slight, with any object by a person upon another person that is without consent and/or by force.

Gender-based Harassment: Non-sexual harassment of a person because of the person's sex and/or gender, including, but not limited to harassment based on the person's nonconformity with gender stereotypes.

Retaliation: action taken by an accused individual or an action taken by a third party against any person because that person has opposed any practices forbidden under this policy or because that person has filed a complaint, testified, assisted, or participated in any manner in an investigation or proceeding under this policy. This includes action taken against a bystander who intervened to stop or attempt to stop discrimination, harassment, sexual assault, sexual violence, or sexual misconduct. Retaliation includes intimidating, threatening, coercing, or in any way discriminating against an individual because of the individual's complaint or participation. Action is generally deemed retaliatory if it would deter a reasonable person in the same circumstances from opposing practices prohibited by this policy.

Policy: UAMS is committed to providing an environment that emphasizes the dignity and worth of every member of its community. Members of the UAMS community have the right to an environment free of sex discrimination, sexual harassment, sexual assault, sexual misconduct, sexual violence, stalking, gender-based harassment and retaliation, and this behavior will not be tolerated. This right is protected by Title VII of the 1964 Civil Rights Act, Title IX of the Educational Amendment of 1972 Act, the Clery Act, the SaVE Act, and the Violence Against Women Act.

No person at UAMS will be subjected to sex discrimination, sexual harassment, sexual assault, sexual misconduct, sexual violence, stalking, gender-based harassment or retaliation under any employment, academic, educational, extracurricular, or other program of UAMS, whether these programs take place in UAMS facilities, in transportation, at a class, training program, or event sponsored by UAMS at another location or elsewhere. All complaints or any concerns about conduct that may violate this policy and retaliation must be filed

with the Campus Title IX Coordinator or a Deputy Title IX Coordinator.

Campus Title IX Coordinator	Odette Woods, Office of Human Resources obwoods@uams.edu (501) 296-1076
Title IX Deputy Coordinators – Student Issues	Associate Dean for Academic Affairs, College of Health Professions, (501) 686-5730 Assistant Dean, Graduate Student Recruitment and Retention, Graduate School, (501) 526-7396
Title IX Deputy Coordinators – Employee Issues	Audrey Bradley, Office of Human Resources bradleyaudrey@uams.edu (501) 603-1579

- A. **Consensual Relationships:** Consenting romantic relationships between faculty and students, supervisors and subordinates or fellow employees are strongly discouraged. Faculty members exercise power over students as do supervisors over subordinates, whether in promotions, raises, evaluations, recommendations, study, job duties, grades, assignments, or other benefits. This difference in power increases the opportunity for abuse of power, thus endangering the professional environment. Employees and students involved in a consenting relationship in the actual or equivalent context of educational/employment supervision and evaluation should be and are deemed to be aware of the possible costs of even an apparently consenting relationship, including the possible difficulty in defending a future charge of violating this policy on the grounds of mutual consent. The element of power implicit in sexual relationships occurring in the supervisory context has the potential to diminish a subordinate’s freedom of choice. It is incumbent upon those with authority not to abuse, or appear to abuse, the power with which they have been entrusted.
- B. **Disciplinary Actions:** Disciplinary actions for violations of this policy may include, but are not limited to, the following: oral or written warning, reassignment, counseling, demotion, termination, suspension, or expulsion, or any combination thereof. Sanctions will depend upon the circumstances in each case. The severity of sanctions or corrective action will depend on the circumstances in each case, taking into consideration the frequency and severity of the offense and any history of past misconduct. In instances of non-employee or guest/visitor violations of the policy, the appropriate action will be taken. In addition to disciplinary action, those who engage in violations of this policy may be subject to legal consequences, including civil and criminal penalties and monetary damages.

- C. **Confidentiality:** Subject to the other provisions of this policy and the requirements of law, every possible effort will be made to ensure that any information received as part of UAMS’s resolution and complaint procedures is treated discreetly. All parties to the complaint will be asked to assist in maintaining the privacy of the parties involved. Because of UAMS’s obligation to investigate allegations of misconduct, it is not possible to guarantee that complaints will be handled confidentially. Except as compelled by law, in the interest of fairness and problem resolution, disclosure of complaints and their substance and the results of investigations and complaint procedures will be limited to the immediate parties, witnesses and other appropriate administrative officials. Disclosure may also be necessary to conduct a full and impartial investigation.

- D. **Malicious Allegations/Complaints; False Information:** UAMS is committed to protecting the due process rights it provides to the respondent as well as the complainant. Allegations of sex discrimination, sexual harassment, sexual assault, sexual misconduct, sexual violence, stalking, gender-based harassment or retaliation that are malicious, intentionally false, or without foundation are very serious with potential for great harm to all persons involved and are prohibited by this policy. Such actions constitute grounds for disciplinary action as described above. Further, repeated filing of frivolous complaints is considered a malicious action and may be grounds for disciplinary action.

The failure to substantiate a sex discrimination, sexual harassment, sexual assault, sexual misconduct, sexual violence, stalking, gender-based harassment or retaliation complaint does not automatically constitute a malicious or frivolous complaint. In the event that allegations are not substantiated, every reasonable effort will be made and all reasonable steps taken to restore the reputation of the accused if it was damaged by the proceedings.

- E. **Training:** The Campus Title IX Coordinator, Title IX Deputy Coordinators, and all organizational units and colleges must make reasonable efforts to provide training for their employees and students each year. All new employees and students should receive a copy of this policy and training within the first six months of becoming an employee or student at UAMS. Employees should receive refresher training from the Office of Human Resources every three years.

Procedure:

- A. **Reporting Violations of this Policy**
1. **Mandatory Employee Duty to Report:** To enable UAMS to respond effectively and to stop conduct that violates this policy, all UAMS employees must, within 24 hours of witnessing or receiving

information about a violation of this policy, report it to a Title IX Coordinator regardless of whether an informal or formal complaint has been filed. Employees who are statutorily prohibited from reporting such information are exempt from these reporting requirements, including licensed health-care professionals. Any student, non-employee, or campus visitor/guest who has witnessed or received information about conduct that violates this policy is **strongly encouraged** to report it to a Title IX Coordinator.

2. **Complainants:** A complainant who wishes to make an informal or formal complaint about an incident involving an employee must report the incident to either the Title Deputy Coordinator for Employees or his/her immediate supervisor or department head, who must report it to the Title IX Deputy Coordinator. If the respondent is the employee's supervisor, the employee may contact someone outside his or her chain-of-command, who then must also report the incident to the Title IX Deputy Coordinator for Employees. A complainant who wishes to make an informal or formal complaint about an incident involving a student must report the incident to the respective college's Title IX Deputy Coordinator. Complainants who need to report violations of this policy after regular business hours should report the incident to the UAMS Police Department if the Title IX Deputy Coordinator is not available. The UAMS Police Department will take appropriate action and will notify the Title IX Deputy Coordinator for Employees and the Campus Title IX Coordinator at the beginning of the next business day.
3. **Anonymous Complaints:** All members of the UAMS community may contact the Campus Title IX Coordinator, Title IX Deputy Coordinators, or the Office of Human Resources at any time to ask questions about sex discrimination, sexual harassment, sexual assault, sexual misconduct, sexual violence, stalking, gender-based harassment or retaliation or complaint procedures without disclosing their names and without filing a complaint. However, because of the inherent difficulty in investigating and resolving allegations from unknown persons, individuals are discouraged from making anonymous complaints. Although anonymous complaints are discouraged, UAMS will respond reasonably to all allegations. In order to determine the appropriate response to an anonymous allegation, UAMS will weigh the following factors:
 - The source and nature of the information;
 - The seriousness of the alleged incident;
 - The specificity of the information;
 - The objectivity and credibility of the source of the report;

- Whether any individuals can be identified who were subjected to the alleged incident; and
- Whether those individuals want to pursue the matter.

If, based on these factors, it is reasonable for UAMS to investigate the matter; the Office of Human Resources will conduct an investigation and recommend appropriate action to address substantiated allegations. However, a reasonable response would not include disciplinary action against a respondent if a complainant insists that his or her name not be revealed, if there is insufficient corroborating evidence, and if the respondent could not respond to the charges without knowing the name of the complainant.

4. **TITLE IX Coordinators:** Upon receiving a report of an alleged violation of this policy, the Title IX Deputy Coordinators must notify the Campus Title IX Coordinator. The Title Deputy Coordinators, in coordination with the Campus Title IX Coordinator, will evaluate the information received and determine what further actions should be taken. The Title IX Deputy Coordinators will follow the procedures described in this policy. The Title IX Deputy Coordinators will take steps, either directly with the complainant or through a reporting individual, to provide information about this policy and its procedures, as well as available health and advocacy resources and options for criminal and civil reporting. A statement of the rights of the complainant and the respondent will be provided to the parties upon an allegation of a violation of this policy.

B. Informal Complain Process

Before pursuing the formal complaint process, every reasonable effort should be made to constructively resolve issues with students, faculty members, staff members, or administrators. Whenever possible and safe, the complainant should discuss the problem or complaint with the respondent. If satisfactory resolution is not reached after discussion with the respondent, the complainant should contact the respondent's direct supervisor or college to resolve the complaint. If these efforts are unsuccessful, the formal complaint process may be initiated. UAMS does not require a complainant to contact the respondent or the respondent's supervisor or college if doing so is impracticable, or if the complainant believes that the conduct cannot be effectively addressed through informal means.

1. In the event that an individual believes that a violation of this policy has been or is occurring, he or she is encouraged, but not required, to maintain careful written records the violation and to continue to maintain current records throughout the process.

2. The complainant should consider meeting with their designated Title IX Deputy Coordinator to discuss the allegation. If the complainant cannot decide whether to initiate a formal complaint or is reluctant to discuss the matter with the respondent, he or she may seek the advice of their designated Title IX Deputy Coordinator who, along with the HR Director of Employee Relations or a designee, and with the complainant's permission, may seek to resolve the issue informally through discussions with the complainant, the respondent, and the respondent's supervisor or college. The Title IX Deputy Coordinator shall provide a written summary of the agreed upon informal resolution to the Campus Title IX Coordinator. If the complainant does not wish to prepare a signed, written complaint, written documentation shall be prepared by the designated Title IX Deputy Coordinator with the assistance of the Director of Employee Relations, or a designee. Such written documentation shall include the nature of the complaint, the date(s) on which the alleged incident(s) occurred, and any witness(es) to the incident(s). The complainant shall be asked to read and sign the written documentation to acknowledge its accuracy; a written acknowledgment will be prepared and may be made in a separate document. If the complainant refuses to sign the written documentation, the designated Title IX Deputy Coordinator shall note such on the documentation. The designated Title IX Deputy Coordinator, along with the Director of Employee Relations and the Campus Title IX Coordinator, will make a determination of whether the complaint will be investigated despite the complainant's refusal to acknowledge the written documentation. Written documentation shall be prepared before any informal discussions are held with the respondent and the respondent's supervisor or college. The respondent shall be given an opportunity to read the written documentation that may be edited to protect the anonymity of the complainant and any other collateral witnesses to the process.
3. If the parties are unable to reach a mutually satisfactory agreement after an informal discussion, the option of filing a formal complaint is available.
4. The Informal Complaint Process may also include referral of either or both parties to confidential counseling through UAMS' Employee Assistance Program (EAP). This referral may be made by the designated Title IX Deputy Coordinator, the Director of Employee Relations, or the Campus Title IX Coordinator.
5. The complainant or the designated Title IX Deputy Coordinator may elect to refer the

complaint to the Formal Complaint Process at any time as deemed necessary to resolve the complaint in an appropriate and timely manner.

C. Formal Complaint Process

1. When the Informal Complaint Process fails to resolve the complaint, or in instances where the designated Title IX Deputy Coordinator and the Office of Human Resources determines the nature of the allegations requires formal investigation, the Formal Complaint Process will be used. A preponderance of the evidence standard will be used to decide complaints (i.e., it is more likely than not that the allegation occurred). The designated Title IX Deputy Coordinator or a designee in the Office of Human Resources may assist the complainant in preparing his or her complaint, in writing, as necessary.
2. If the complainant wishes to file a formal complaint, he or she must submit a signed, written statement alleging violation of this policy to his or her designated Title IX Deputy Coordinator. The designated Title IX Deputy Coordinator will forward a copy of the statement to the HR Director of Employee Relations and to the Campus Title IX Coordinator. The written statement should include the name of the complainant, the name of the respondent, the nature of the complaint, date(s), witness(es), and any other information relevant to the complaint. If some of this information is not available, the reason(s) of unavailability, if known, should be documented. Upon receipt of the written complaint, the HR Director of Employee Relations will initiate an investigation of the complaint and appoint the investigators. The investigators will meet with the respondent and allow him or her to view the complaint and present a copy of this policy. The respondent will be given an opportunity to respond to the complaint orally and in writing, and may provide evidence and witnesses. The investigators will also explain that there is to be no contact with or retaliation against the complainant. If necessary, interim steps to protect the complainant prior to the final outcome of the investigation may also be taken. The investigators will gather relevant evidence by interviewing the complainant, the victim (if different from the complainant), the respondent, and any witnesses or other individuals deemed appropriate to conduct a thorough investigation. Every effort will be made to ensure an impartial, fair, thorough and timely investigation of the complaint. All parties will be provided a written status update of the investigation after 30 days. Unless the complexity of the investigation and the severity and extent of the offense requires otherwise, or the allegation involves multiple incidents or multiple complainants, the

investigation should be completed sixty (60) calendar days following receipt of the complaint.

3. Following completion of the investigation, the investigators will present their written findings to the Assistant Vice Chancellor of Human Resources and to the Campus Title IX Coordinator. The Assistant Vice Chancellor of Human Resources will prepare a written report, containing a recommended course of action for the complainant's Division Head or Dean (as applicable) and may provide further consultation when necessary. A copy of the report shall be given to the Campus Title IX Coordinator. It is the responsibility of the Division Head or Dean to take action consistent with the written findings. Once a final determination is made by the appropriate Division Head or Dean, both the complainant and the respondent will be notified in writing of the outcome of the complaint, including whether the campus determined that sexual harassment or violence occurred, and in accordance, with federal and state privacy laws, the sanction imposed against a student, employee or third party.
4. The complainant or respondent may appeal a finding, pursuant to the timeframe in the applicable grievance procedure, of whether or not a violation of this policy has occurred. The respondent may also appeal sanctions imposed as a result of a policy violation. All appeals shall be made through the campus grievance procedures (See Grievance Procedure for Alleged Discrimination, Academic Affairs Policy Number 2.400 and Employee Grievance Procedure, Administrative Guide Policy Number 4.4.16). Both parties will be notified concurrently in writing of the outcome of any appeal.
5. Pursuant to FERPA (Family and Educational Rights to Privacy Act), the Clery Act, and VAWA (Violence Against Women Act), student disciplinary records will remain confidential unless the accused consents to release of information, or the sanction impacts the complainant, or there is an allegation of a sex offense, including sexual violence.

RECORD KEEPING:

Each complaint should be documented and kept in a confidential file separate from the personnel or student files normally maintained by the Office of Human Resources or college's Associate Dean. Documentation should include the name of the complainant, the name of the accused, the nature of the complaint, date(s), witnesses, the name(s) of the person(s) who received the complaint, the name(s) of the person(s) who prepared the written documentation and the date of the written documentation, and any other information relevant to the case. If some of this information is not available, the reason(s) for unavailability, if known, should be

documented. Such file will be maintained as provided by law.

Questions regarding this policy may be directed to the Title Campus IX Coordinator or Office of Human Resources at (501) 686-5650.

PROHIBITION AGAINST HAZING

Prologue: In 1983, the General Assembly of the State of Arkansas implemented Act 75 which prohibits hazing and prescribes punishment for those convicted of hazing. It is printed below in its entirety.

Section 1: A student of any school, college, university, or other educational institution in Arkansas shall not engage in hazing or encourage, aid, or assist any other student in hazing.

Section 2: Hazing is defined as follows:

1. Any willful act on or off any school, college, university, or other educational institution in Arkansas by one student alone or acting with others, directed against any other student done for the purpose of intimidating the student attacked by threatening such student with social or other ostracism, or of submitting such student to ignominy, shame or disgrace among his fellow students, and acts calculated to produce such results; or
2. The playing of abusive or truculent tricks on or off any school, college university, or other educational institution in Arkansas by one student alone or acting with others, upon a student to frighten or scare him; or
3. Any willful act on or off any school, college, university, or other educational institution in Arkansas by one student alone or acting with others, directed against any other student done for the purpose of humbling the pride, stifling the ambition, or impairing the courage of the student attacked, or to discourage any such student from remaining in such school, college, university, or other educational institution or reasonably to cause him to leave the institution rather than submit to such acts; or
4. Any willful act on or off any school, college, university, or other educational institution in Arkansas by one student alone or acting with others, in striking, beating, bruising, or maiming, or seriously offering, threatening, or attempting to strike, beat, bruise, or maim, or to do or seriously offer, threaten, or attempt to do physical violence to any student of any such educational institution or any assault upon any such students made for the purpose of committing any of the acts, or producing any of the results, to such student as defined in this Section.
5. The term hazing as defined in this Section does not include customary athletic events or similar contests or competitions, and is limited to those actions taken and situations created in connection with initiating into or affiliation with any organization.

Section 3: No person shall knowingly permit, encourage, aid, or assist any person in committing the offense of hazing, or willfully acquiesce in the commission of such offense, or fail to report promptly his knowledge or any reasonable information within his knowledge of the presence and practice of hazing in this State to an appropriate administrative official of the school, college, university, or other educational institution in Arkansas. Any act of omission or commission shall be deemed hazing under the provisions of this Section.

Section 4: The offense of hazing is a Class B misdemeanor.

Section 5: Upon conviction of any student of the offense of hazing, he shall, in addition to any punishment imposed by the court, be expelled from the school, college, university, or other educational institution he is attending.

Section 6: Nothing in this Act shall be construed as in any manner affecting or repealing any law of this State respecting any other criminal offense.

INCLEMENT WEATHER PROCEDURE

(Revised February 5, 2014)

When weather and road conditions warrant, UAMS leadership will declare "inclement weather" in order for employees, residents, students, patients and volunteers to know how to properly respond. For students, when UAMS is operating under Inclement Weather designation (both "*Inclement Weather – all areas open*" or "*Inclement Weather – non-essential areas closed*"), all on-campus classes are cancelled and the Library is closed. If UAMS implements its inclement weather policy, detailed announcements will be emailed to employees and students, communicated through local media and posted on the front pages of www.uamshealth.com, www.uams.edu, and the UAMS intranet. Students should refer to the inclement weather procedures within their specific CHP academic program for guidance about off-campus clinical rotations, make-up class, labs, and/or clinic sessions, rescheduling of a missed examination, quiz, or activity, etc.

UAMS SMOKING/TOBACCO USE POLICY

UAMS Administrative Guide

Policy #: 3.1.01 – Revised December 4, 2013

Web page

Purpose: The University of Arkansas for Medical Sciences (UAMS) is committed to promoting health, wellness, prevention, and the treatment of diseases within the community as well as to providing a safe, clean, and healthy environment for patients, visitors, employees, and students. UAMS serves as a model for the community in the area of promoting the good health of our staff and influencing public attitudes about the use of tobacco products. It is, therefore, UAMS's policy to provide a tobacco-free work environment.

Scope: All UAMS employees, faculty, staff, students, contractors, vendors, volunteers, patients, visitors, and anyone on any UAMS property.

Policy: Smoking and the use of tobacco products (including cigarettes, cigars, pipes, smokeless tobacco, and other tobacco products) by employees, faculty, students, patients, and visitors are prohibited on all properties of the University of Arkansas for Medical Sciences.

Definitions: Tobacco products include, but not limited to: cigarettes, smokeless tobacco, pipes, cigars, and any tobacco containing product.

Employee – for the purpose of this policy, all UAMS employees while in UAMS facilities (leased or owned) or on the grounds of those facilities.

Students – for the purpose of this policy, any student attending any of the colleges or clinical areas on the UAMS grounds, leased or owned buildings.

Contractors/subcontractors/vendors/volunteers – individuals who enter UAMS Property for the purpose of providing a service to the institution.

Visitors – individuals who do not fall under the above categories including patients and their families.

E-Cigarettes – an electronic inhaler meant to simulate and substitute for tobacco smoking. It generally utilizes a heating element that vaporizes a liquid solution.

Procedures:

1. All Persons are prohibited from using tobacco on or in all UAMS owned or leased properties, UAMS owned or leased vehicles, and UAMS adjacent grounds, including parking lots and ramps.
2. Patients in the UAMS Medical Center are prohibited from tobacco use in accordance with the UAMS Medical Center Policy Manual Policy PS 1.09.
3. Compliance with this – tobacco free policy will be the responsibility of all administrators.
 - Lack of cooperation or repeated violations by employees, vendors, and students should be reported to the individual's supervisor/student's department chairman. The supervisor/chairman shall then attempt to resolve the problem.
 - Standard disciplinary procedures will be followed for compliance problems with employees/students. Violations will result in progressive disciplinary actions, including termination.
 - In the event the tobacco violation involves a potential threat to health or safety (e.g., smoking where combustible supplies, flammable liquids, gasses, or oxygen are used or stored) the UAMS Police may be called for additional support.

- UAMS Police shall be notified as the final resource to resolve problems arising with visitors, employees, or students during the enforcement of this policy.
 - Under Arkansas law violators of the smoking ban may be fined an amount not less than \$100 and no more than \$500.
4. New employees will be informed of the UAMS tobacco free policy during orientation. The Office of Human Resources will also inform employment candidates of the tobacco free policy during the application process.
 5. Tobacco products will not be sold or dispensed within the UAMS campus.
 6. Employees/students may not use tobacco products in any vehicle when the vehicles are on UAMS property.

SUBSTANCE ABUSE POLICIES

UAMS is committed to ensuring that employees, students, and faculty have the information and resources necessary to keep our campus free from drug and alcohol abuse. In accordance with the Drug Free Schools and Communities Act Amendment of 1989, UAMS policies prohibit the unlawful possession, use, and distribution of illicit drugs and alcohol on campus and provide for sanctions that may include termination of employment or dismissal from academic programs for individuals who violate this policy.

UAMS SUBSTANCE ABUSE POLICY

UAMS Administrative Guide - Policy #: 4.4.06 – September 1, 2000.

Purpose: It is the goal of the UAMS to provide the highest quality health care, education and services available. To achieve this goal it is important that administrators, faculty, staff, and students be able to fulfill their respective roles without the impairment produced by intoxication or addiction to alcohol or other drugs.

The unlawful manufacture, distribution, dispensation, sale, possession or use of any controlled substance (as defined in the UAMS Drug-Free Workplace Policy) by any employee or student of UAMS while on University property or on a University affiliated assignment will not be tolerated. Consumption of alcohol on University property will not be tolerated, except within approved areas by individuals over the age of 21 years. It is the policy of UAMS to provide a drug-free workplace. To support our goal of a drug-free environment, the UAMS drug testing program has been established and consists of (1) pre-employment drug testing, (2) for-cause drug testing, and (3) random drug testing.

Policy:

1. No employee or student of UAMS may report for their assignments and/or classes impaired by the use of alcohol or following the use of controlled substances.

2. Nothing in this policy will preclude the medical or research use of alcohol or controlled substances. Violators of this policy will be disciplined up to and including termination.

3. It is the underlying philosophy of the UAMS that addiction to alcohol and/or other drugs represents a disease state, and treatment of such problems is a legitimate part of medical practice. Employees or students with an addiction to drugs or alcohol are encouraged to seek help through the UAMS Employee Assistance Program (EAP) or Student/Employee Health Service. Individuals who seek help through the UAMS EAP or Student/Employee Health Service will not be punished for seeking such help. However, appropriate disciplinary procedures linked to performance criteria are not precluded by this policy.

CHP SUBSTANCE ABUSE POLICY

If a faculty member or the director of Student Wellness Program (SWP) suspects a student of impairment due to substance abuse, the student will be required to submit to an immediate drug screen and will be referred to SWP services for evaluation. SWP will forward a report with treatment recommendations and the results of the drug screen to the Associate Dean for Academic Affairs to be placed in the student's permanent record. The student must comply with the treatment plan recommended by SWP to continue in his/her respective program. A student who is identified under the CHP Substance Abuse Policy is subject to periodic random drug screening as long as he/she is a student at the University of Arkansas for Medical Sciences. Any subsequent drug screening that is reported as "positive" will result in the immediate dismissal of the student. The refusal of the student to submit to the drug screen or SWP evaluation and/or recommended treatment plan will result in immediate dismissal of the student.

UAMS SEXUAL ASSAULT POLICY DISCLOSURE

Amended in 1992, the security policies released pursuant to the Campus Security Act shall specifically address sex offense prevention and include the following provisions in cases of alleged sexual assault:

- Accuser and accused must have the same opportunity to have others present.
- Both parties shall be informed of the outcome of any disciplinary proceeding.
- Survivors shall be informed of their options to notify law enforcement.
- Survivors shall be notified of counseling services.
- Survivors shall be notified of options for changing academic and living situations.

SEX OFFENDER NOTIFICATION

The UAMS Police Department maintains information on registered sex offenders for the University of Arkansas Medical Science Campus and makes notifications regarding registered sex offenders associated with the Campus consistent with the state guidelines pursuant to Arkansas Code Annotated 12-12901-920 and 12-12-1301-1303.

These individuals subject to the notification process have been convicted of an offense that requires registration with the Arkansas Crime Information Center. These individuals, it must be stressed, are not wanted by law enforcement at this time and have already served their assigned sentences. Should you become aware of a registered sex offender on campus, no action on your part is required other than the type of alertness and caution that increases the safety of individuals, families, neighborhoods, and communities. Should you observe suspicious behavior on the part of such an individual, do not take action on your own, but immediately notify law enforcement. You may not share confidential information that you may receive regarding registered sex offenders with others, except those who have a need to know (for example, supervisors or co-workers in a position to prevent harm).

A written summary of campus guidelines and the notification plan for each offender will be maintained by the UAMS Police Department. Our campus Police Department will also make determinations regarding notifications. If you seek further information, please the Detective Division, UAMS Police Department at (501) 686-7777.

REPORTING POLICY FOR HIPAA VIOLATIONS

UAMS Administrative Guide

Policy #: 3.1.23 – Revised August 7, 2013

[Web page](#)

Purpose: To inform the UAMS Workforce on the proper procedure for reporting HIPAA violations.

Definitions: UAMS Workforce means for the purposes of this Policy, physicians, employees, volunteers, residents, students, trainees, visiting faculty, and other persons whose conduct, in the performance of work for UAMS, is under the direct control of UAMS, whether or not they are paid by UAMS.

Policy: Any known or suspected violations of the HIPAA regulations or related UAMS policies and procedures must be reported in accordance with this Policy.

UAMS workforce who report in good faith such known or suspected violations shall not be subjected to retaliation, intimidation, discrimination, coercion, or harassment as a result of their report.

Violations of this policy, including failure to report, will be grounds for disciplinary action up to and including termination. Any sanctions that are applied will be documented.

Procedure: Reports by patients or employees may be made to any of the following:

- UAMS HIPAA Office, Slot 829, Room 6C635, Hotline (501) 614-2187;
- UAMS HIPAA Office, Main Office (501) 603-1379, Email: hipaa@uams.edu;
- UAMS Reporting Line 1-888-511-3969;
- UAMS HIPAA [Website](#) under “Report an Incident”;
- UAMS Research Privacy Board Office/IRB (501) 686-5667, Email: IRB@uams.edu or
- UAMS IT Security Office (501) 603-1336.

If the employee making the report is more comfortable reporting to the head of his/her department or anyone else in a position of responsibility, he/she may do so. The person receiving this report should contact the UAMS HIPAA Office as outlined above.

Sanctions: Violation of this Policy will result in disciplinary action, in accordance with [Policy 4.4.02](#).

References: UAMS [Clinical Programs Patient Complaint Policy, PS.2.03](#).

EMPLOYEE, STUDENT, AND VOLUNTEER VACCINATIONS AND TUBERCULOSIS (TB) SCREENING

UAMS Medical Center Policies and Procedures

Policy #: HR.3.03 – Revised January 2013

[Web page](#)

Purpose: Minimize potential exposure to vaccine-preventable diseases and Tuberculosis (TB) for all UAMS students who work in a UAMS facility or with patients, and visitors.

Policy: UAMS Medical Center makes optimal use of immunizing agents and TB screening to safeguard the health of students and protect patients from becoming infected with vaccine-preventable diseases or TB. Vaccines will be administered as indicated unless contraindicated or refused.

Procedure:

- A. All students are required to complete a student physical exam. All UAMS students must obtain required vaccines prior to matriculation. Subsequent annual limited screenings for students will be performed by SEHS.
 1. All students are required to have a completed TB step one screening and updating of required vaccinations each academic year. Special populations may be required to have more frequent screenings.
 2. All students who do not have documentation of Rubella vaccine or do not have laboratory evidence of immunity must be vaccinated.

3. All students are required to be vaccinated for Measles/Mumps if they do not have one of the following:
 - a. Proof of two doses of live measles vaccine no closer than one month apart or of one dose of live Measles vaccine after age 12.
 - b. Documentation of physician-diagnosed Measles.
 - c. Laboratory evidence of Measles immunity.
 4. Students are required to be vaccinated annually for both seasonal and, if recommended by the CDC, novel types of influenza.
 5. Students enrolled in programs with the potential for occupational exposure to Hepatitis B on the average of one or more times per month, and who do not have documentation or history of completion of the vaccine series or laboratory evidence of prior disease, should obtain this vaccine. Occupational exposure means reasonably anticipated skin, eye, mucous membrane, or parenteral contact with blood or other potentially infectious materials that may result from the performance of an employee's duties. This definition excludes incidental exposures that may take place on the job, and that are neither reasonably nor routinely expected and that the worker is not required to incur in the normal course of employment. Students who are at risk for Hepatitis B infection are in locations or occupations where contact with blood or body fluids from infected patients are frequent.
 6. All students are offered the Influenza vaccine according to CDC guidelines for that particular year.
 7. All students are recommended to have a Tetanus Diphtheria and Pertussis (TDAP) booster every 10 years. A current booster is required for all employees who work with animals. A history of the vaccination is sufficient.
 8. All students with clinical placements in high risk areas with neonates (newborns), children, and oncology patients without a reliable history of Varicella disease or proof of vaccination must have a Varicella titer. Those who are seronegative for Varicella must be vaccinated.
- B. Students who works in UAMS facility or with UAMS patients that refuses to receive the required vaccines and testing (as listed above) will be subject to disciplinary measures up to suspension or termination. Students not completing required new student screening or annual screening will be suspended from attending classes. Those unable to comply for specific reasons may be subject to special requirements such as wearing protective masks and/or covering during influenza season or other infectious outbreaks. Influenza season and other infectious outbreaks will be defined by the Infection Control Division of UAMS Medical Center.
- C. The financing of necessary vaccinations will be in accordance with UAMS Medical Center Employee Testing/Services Policy.

UAMS NEEDLE STICK AND UNIVERSAL PRECAUTION POLICIES AND PROCEDURES

NEEDLE STICK/SHARPS INJURIES AND BLOOD/BODY FLUID EXPOSURE

UAMS Medical Center Policies and Procedures
Policy #: HR.4.01 – Revised: November 7, 2012

Purpose: This document outlines the policy and procedures to follow when a student experiences a needlestick/sharp injury, blood/body fluid exposure when fulfilling requirements of a University of Arkansas for Medical Sciences education program. Regardless of where an incident occurs, students should be evaluated IMMEDIATELY. If indicated, chemoprophylaxis must be started within 2 hours to be effective.

Scope: All students enrolled in University of Arkansas for Medical Sciences education programs.

Policy: All students who experience a blood/body fluid exposure while carrying out clinical/experiential requirements of their education program should be evaluated for the need for chemoprophylaxis and monitoring regardless of the type of exposure or risk status of the source patient. Procedures for students who suffer parenteral (e.g. needlestick or cut) or mucous membrane (e.g., splash to the eye or mouth) exposure to blood or other body fluids, or who have a cutaneous exposure involving blood or prolonged contact with blood—especially when exposed skin is chapped, abraded, or afflicted with dermatitis – are described according to the practice site location where the incident occurs.

- For incidents that occur at the UAMS Medical Center, the applicable policy can be found at: <http://intranet.uams.edu/uh/Policy/Policy-PDF/Human%20Resources/HR401.pdf>.
- For incidents that occur at **OFF-CAMPUS** locations, the site-specific procedures for handling a needlestick or blood/body fluid exposure as established by that site/facility are in effect and may vary slightly from UAMS procedures. However, general requirements for notification, evaluation, and documentation are outlined.

The central points for UAMS students who experience a parenteral, mucous membrane, or cutaneous exposure to a blood/body fluid, regardless of practice site location, are:

1. Report the incident IMMEDIATELY to their clinical supervisor or instructor and appropriate College administrator.
2. Call Student and Employee Health Service (SEHS), (501) 686-6565 or page (501) 405-6734, as soon as possible

regardless of where the incident occurs. However, in all cases, evaluation of the incident must occur IMMEDIATELY, and is not to be delayed pending discussion with SEHS.

3. The amount of risk incurred as a result of the exposure must be evaluated and prophylactic treatment must be started within 2 hours to be effective; therefore, students should seek evaluation and treatment IMMEDIATELY.
4. Complete the UAMS Incident and Injury (I&I) Report form available at:
<http://www.uams.edu/adminguide/PDFs/empinjury.pdf>

A training module for Bloodborne Pathogens is available for completion through the UAMS Occupational Health and Safety [website](#). Students are strongly encouraged to complete this module for their general education regarding bloodborne pathogen safety.

Post exposure Prophylaxis with Antiretroviral Agents: Under certain circumstances, it is recommended that individuals exposed to HIV through injury, etc., be offered combinations of anti-HIV medications for four weeks while surveillance laboratory monitoring is taking place. This process will be coordinated through Student/Employee Health (SEHS), so it is important that any such exposure be reported to SEHS as quickly as possible.

Billing: Students who have a blood/body fluid exposure shall be evaluated by SEHS or the Emergency Department (ED) and are required to complete an I&I Report form. All UAMS students are required to maintain a health insurance policy, which will be billed for services related to evaluation, treatment and monitoring. Deductible and co-pay costs not covered by the student's health insurance policy will be the responsibility of the student's primary college. Insured students will bear no out-of-pocket expenses.

In cases where a person is both a student and an employee, the role the person was fulfilling at the time of the incident will determine billing, so that if the person was carrying out student requirements, rules governing billing of care related to students will be in effect. If the person was carrying out employment related duties, the UAMS Medical Center employee policy will be applied.

Reporting

Incidents Occurring at UAMS Medical Center

For incidents that occur at the UAMS Medical Center, students will follow all procedures detailed in the UAMS policy located at <http://intranet.uams.edu/uh/Policy/Policy-PDF/Human%20Resources/HR401.pdf>. These include:

1. Report the incident IMMEDIATELY to their clinical supervisor or instructor and the appropriate College administrator.
2. Call IMMEDIATELY to Student and Employee Health Service (SEHS), (501) 686-6565 or page (501) 405-6734, if it is during regular business hours. For after-hours

incidents, students are to report to the UAMS ED (501) 686-6236.

3. The amount of risk incurred as a result of the exposure must be evaluated and prophylactic treatment must be started within 2 hours to be effective.
4. Complete the UAMS Incident and Injury (I&I) Report form <http://www.uams.edu/adminguide/PDFs/empinjury.pdf>.
5. All students who have a blood/ body fluid exposure are to be evaluated either by the SEHS or the ED regardless of the type of exposure or risk status of the source patient.
6. Information about the source patient shall be documented on the Incident and Injury (I&I) report form by the nursing supervisor or his/her designee from which the source patient is receiving care. The I&I form shall accompany or be forwarded to the student to SEHS or the ED at the time of the initial evaluation.
7. It is the responsibility of the clinical supervisor or instructor to make sure that all information relevant to the incident has been completed on the I&I form and the student has called either SEHS or the UAMS ED, for triage.
8. It is the responsibility of the Nursing Supervisor or designee to record all information regarding the source patient on the I&I report form, notify either SEHS or the ED with the risk factors for HIV, and ensure that orders are written for lab work on the source patient's chart.

Incidents Occurring at Off-campus Locations

When students participate in experiential training in a variety of practice locations, the procedures for handling a needlestick or mucosal splash injury as established by that site/facility are in effect and may vary slightly from UAMS procedures. However, general guidelines include:

1. Students should familiarize themselves with local procedures for needle sticks, splash and other injuries. Some sites may require site-specific training prior to the student entering the facility. However, if this information is not covered, students should educate themselves regarding local procedures.
2. In general, regardless of the practice site, if a student receives a needle stick or other sharp injury or has a body fluid exposure, the student should seek treatment IMMEDIATELY. If a specific site has not been identified through training/orientation materials, the student should go to the nearest Emergency Room for evaluation and possible treatment. Students must also IMMEDIATELY inform their clinical supervisor (i.e., resident and/or attending, preceptor, etc.) of the exposure, and make sure that an incident report, or reasonable facsimile, from the site/facility where the incident occurred is completed.
3. The student should make sure that Student and Employee Health (SEHS) and his/her College is informed of off-campus incidents since ongoing monitoring may be required.

UAMS Medical Center, Billing Statement

UNIVERSAL PRECAUTIONS AND PROTECTION AGAINST OCCUPATIONAL EXPOSURE TO BLOOD BORNE INFECTIONS

PROTECTION AGAINST OCCUPATIONAL EXPOSURE TO HEPATITIS B VIRUS (HBV) AND HUMAN IMMUNODEFICIENCY VIRUS (HIV)

UAMS Medical Center Policies and Procedures

Policy #: HR.4.02 – Revised June 2009

Web page

Purpose: Protection against blood borne infections.

Policy: Since medical history and examination cannot reliably identify all patients infected with HIV, Hepatitis B, or Hepatitis C, or other blood-borne infections, "Universal/Standard Precautions" when handling blood and body fluid shall be consistently used for all patients. Students, residents, and employees (hereafter known as health care worker) shall not be permitted by their supervisors to draw blood or perform invasive procedures until their skills have reached a satisfactory level of proficiency.

Procedure:

I. Routine Precautions

- A. Health care workers shall use appropriate barrier precautions according to Universal/Standard Precautions, see below.
- B. Hands and other skin surfaces shall be cleaned immediately if contaminated with blood or body fluid. Hands shall be cleaned after gloves are removed.
- C. Precautions to prevent "sharps" injury should be taken. Needles should not be recapped, bent, or broken by hand, or removed from disposable syringes. After use, "sharps" should be placed in puncture-resistant containers for disposal.
- D. Although saliva has not been implicated in HIV transmission, mouth-to-mouth resuscitation should

be replaced by mouth pieces, resuscitation bags, or other ventilation devices.

- E. Health care workers with exudative lesions or weeping dermatitis should refrain from direct patient care and handling equipment until the condition resolves.
 - F. Pregnant health care workers are not known to be at greater risk of contracting HIV, Hepatitis B, or Hepatitis C than non-pregnant workers. However, if infections did occur, prenatal transmission may result. Therefore, pregnant health care workers should be especially familiar with and strictly adhere to these precautions.
 - G. Blood, saliva, and gingival fluid from all dental patients should be considered potentially infected. Blood and body fluids from all patients sent to clinical laboratories should be considered potentially infected.
- #### II. Universal (Standard) Precautions

- A. **Hand Hygiene:** Frequent hand hygiene is an important safety precaution which should be practiced after contact with patients and specimens. Hands should always be cleaned with antimicrobial soap or waterless hand cleaner before and after contact with patients even when gloves have been used. If hands come in contact with blood, body fluids, or human tissue, they should be immediately cleaned with an antimicrobial agent. (Washing with an antimicrobial agent is recommended; however, soap and water may be used. Using an approved moisturizing hand cream may reduce skin irritation caused by frequent handwashing.)

Hands NEED to be cleaned:

1. Before invasive procedures.
2. After the completion of work.
3. Before any contact with wounds.
4. After removal of gloves and/or other protective clothing, immediately or as soon as possible after hand contact with blood or other potentially infectious materials and upon leaving the work area.
5. Before eating, drinking, smoking, applying makeup, or changing contact lenses.
6. Before all other activities which entail hand contact with mucous membranes or breaks in the skin.
7. Immediately after accidental skin contact with blood, body fluids, or tissues, hands or other skin areas should be thoroughly washed. If the contact occurs through breaks in gloves, the gloves should immediately be removed and the hand should be thoroughly cleaned.

8. Between contacts with different patients.
 9. After contact with a source that is likely to be contaminated with virulent microorganisms or hospital pathogens (e.g., touching infected patient, after taking rectal temperatures, emptying Foley bags, blowing nose).
- B. **Gloves:** Gloves shall be worn when the employee/student has the potential for direct skin contact with blood, other potentially infectious materials, mucous membranes, non-intact skin of patients, and when handling items or surfaces soiled with blood or other potentially infectious materials. Gloves shall be disposable and changed in between patients, or between different open body sites. Gloves should be changed if they become visibly contaminated with blood or body fluids or if physical damage occurs. Latex, vinyl, nitrile, or polyethylene gloves all provide adequate barrier protection. Wearing two pairs of gloves (double-gloving) is recommended in situations where large amounts of blood may be present in the field of work, such as in the Emergency Department.
- C. **Facial Protection:** Masks and eye protection or face shields shall be worn whenever splashes, spray, splatter, droplets or aerosols of blood or other potentially infectious material may be generated and there is a potential for eye, nose, or mouth contamination. Full-face shields made of lightweight plastic (similar to chemical splash shields) are the preferred means of facial protection. They offer excellent protection of the entire face and neck region. A surgical mask offers protection of the nose and mouth. Either soft or preformed masks are effective. Ordinary prescription glasses are not adequate eye protection. Better protection is afforded by plastic wrap-around safety glasses that fit over regular glasses. If there is substantial hazard of spattering, goggles with a plastic cushion seal are preferred. Surgical caps may be worn if extreme spattering is anticipated.
- D. **Occlusive Bandages:** All open skin defects (e.g., exudative lesions, dermatitis, cuts, abrasions, etc.) on health care workers shall be covered with a water-impermeable occlusive bandage. This includes defects on the arms, face, and neck.
- E. **Gowns, Aprons and Other Protective Body Clothing:** Appropriate protective clothing shall be worn when the employee/student has a potential for exposure to blood and other potentially infectious materials. Gowns and laboratory coats shall be changed immediately if grossly contaminated with blood or body fluids to prevent blood seeping through and contaminating street clothes or skin. They should be changed at appropriate intervals to ensure cleanliness. Contaminated gowns shall be placed into the isolation linen bag and sent to the

hospital laundry. Disposable plastic aprons are recommended if there is a significant probability that blood or body fluids may be splashed on the worker. At the completion of the task being performed, the apron shall be discarded into a biohazard container.

TESTING PATIENTS FOR HIV - CONSENT REQUIREMENT

UAMS Medical Center Policies and Procedures
Policy #: HR.4.05 – Revised September 2011
[Web page](#)

Purpose: To set consistent guidelines governing consent for Human Immunodeficiency Virus (HIV) testing.

Policy: No student, employee or member of the medical or affiliate staff shall test a UAMS Medical Center patient for HIV except in accordance with this Policy.

Procedure: Documentation in the medical chart of patient consent (verbal or written) of the patient to testing shall be obtained in advance of testing, unless the patient's attending physician orders testing without consent in one of the two following circumstances:

1. A student, employee, staff member, or other person providing health care at UAMS Medical Center has been exposed to a patient's bodily fluids, in which case testing shall be done in compliance with UAMS Medical Center Policies and Procedures.
2. In the judgment of the patient's attending physician, such testing is medically indicated to provide appropriate diagnosis and treatment to the patient, provided that the patient has otherwise provided his or her consent to such physician for medical treatment, if able to do so.

HEALTH CARE WORKERS WITH HIV AND INFECTIOUS HBV

UAMS Medical Center Policies and Procedures
Policy #: HR.4.03 – Revised September 2011
[Web page](#)

Purpose: The purpose of this policy is to prevent transmission of blood-borne pathogens, specifically HIV and HBV, from health care workers who are infectious.

Policy: UAMS Medical Center provides an environment that limits the potential for transmission of bloodborne infections from UAMS health care workers to patients, while protecting employee privacy.

Definitions: Healthcare Worker - shall mean any person who provides medical or health care to a patient at UAMS Medical Center, and shall include employees, students, staff, physicians, residents, and all other providers of medical or health care at UAMS Medical Center.

Procedure:

1. **Reporting of Infectious Status:** Health care workers who are infected with HIV or who are HBV surface-antigen-positive are encouraged to report their status. Physicians are encouraged to report their status to their Chief of Service and the Chief of Staff; students are encouraged to report their status to the Dean of Students; and employees are encouraged to report their status to their supervisors.
2. **Counseling:** Counseling shall include education as to the modes of transmission of blood-borne pathogens, the risk of transmission, appropriate standards of personal hygiene, maintenance of health for the infected individual, and restriction, if any, on such individual's work. If appropriate, the individual shall also be informed of the possibility that knowledge of the individual's status may become known due to work restrictions. Counseling shall be provided under the direction of the Medical Director of Student/Employee Health.
3. **Disciplinary Action:** Any infected individual who places any other person at risk of infection by failing to follow reasonable precautions and restrictions shall be subject to appropriate disciplinary measures.
4. **Restriction on Work:** Infected individuals shall not perform "exposure-prone procedures." Characteristics of exposure-prone procedures include digital palpation of a needle tip in a body cavity or the simultaneous presence of the individual's fingers and a needle or other sharp instrument or object in a poorly visualized or highly confined anatomic site. Performance of exposure-prone procedures presents a recognized risk of percutaneous injury to the individual, and if such an injury occurs, the individual's blood is likely to contact the patient's body cavity, subcutaneous tissues, and/or mucous membranes. The Chief of Service will make determinations about potential performance of exposure-prone procedures on a case-by-case basis on consultation with experts in the field.
5. **Confidentiality:** If an infected individual reports her/his status as outlined in this policy, the person who receives such report shall maintain the information in confidence, with further disclosure being limited to those with a need to know, who shall have the same duty of confidentiality.

STUDENT CONDUCT AND DISCIPLINARY ACTION

STUDENT BEHAVIOR AND DISCIPLINE

STUDENT DISCIPLINARY PROCEDURE

A violation of academic integrity or professional conduct as described under Academic Policies is a serious matter and is expected to be handled in a professional, efficient, and timely manner. The following policy is designed to afford all involved parties the opportunity to handle suspected academic dishonesty or professional conduct violations in the most equitable manner possible. If there are any questions about the policy, members of the College of Health Professions are encouraged to contact the Associate Dean for Academic Affairs.

A. **Faculty/Student Discovery Meeting:** Prior to taking any student disciplinary action, the faculty needs to inform their department chair of the situation and then approach the student suspected of being in violation of professional standards or academic integrity policies. The faculty will allow the student an opportunity to explain the situation, admit to the violation, or deny the accusation. If the student admits to the accusations the faculty can propose sanctions to rectify the situation. If the student accepts the sanctions, a written notice of all actions will be created and sent to the department chair, the sanctions will be carried out, and the matter will be resolved.

B. **Departmental Student Disciplinary Procedure:** If, after the Faculty/Student Discovery Meeting, the student denies the accusation or the student does not agree with the faculty member's sanctions, the faculty member will submit written documentation and evidence of the alleged violation to the department chair.

1. **Investigation and Sanctioning:** The department chair will review the situation and report the matter to the Associate Dean for Academic Affairs. The Associate Dean will then appoint an investigator from a different department to collect information and evidence. Once the investigator has collected all of the evidence they will meet with the department chair, faculty member, and student to present the evidence. The department chair will then attempt to resolve the matter by recommending appropriate sanctions, if necessary, based on the investigation findings. These possible sanctions will be presented to both the faculty and the student in writing within two (2) business days of receiving the findings of the investigator.

a. Sanctions determined by the department chair may not include suspension or dismissal from the program or the college. Departments wishing to request suspension or dismissal must refer the issue to the CHP Honor Council using the procedure listed below.

2. **Resolution:** Any agreement about the outcome of the informal student discipline shall be put into writing and signed by all parties and a copy of the resolution being sent to the Assistant Dean for Student Affairs. If all parties accept the outcome of the informal disciplinary process, the agreement will be signed and any sanctions (if applicable) will be carried out as recommended by the department chair. If either the student or the faculty does not agree with the outcome of the informal disciplinary process, they may appeal the department chair's decision by filing a Student Integrity Report Findings form to the CHP Assistant Dean for Student Affairs and initiating the formal student disciplinary procedure. The resolution will be placed in the student's academic file in the department for the remainder of their enrollment in the College of Health Professions.

C. CHP Student Disciplinary Procedure:

1. **Student Integrity Report Findings Submitted to Associate Dean for Academic Affairs:** To initiate the college disciplinary procedure to an alleged student integrity violation:

a. A faculty member or department chair will submit the Student Integrity Report Findings form, along with supporting documentation through their department chair to the Assistant Dean for Student Affairs. This report shall be made part of the student's disciplinary record and shall remain on file with the Assistant Dean for Student Affairs until the academic integrity issue is resolved. Any prior incidents of student misconduct shall be provided to the Honor Council during the sanctioning phase of the Honor Council hearing.

b. A student will submit the Student Integrity Report Findings form to the Assistant Dean for Student Affairs in response to the proposed sanctions proposed in the Informal Student Disciplinary Process. The Assistant Dean for Student Affairs will then acquire all documentation through the department chair. This report shall be made part of the student's disciplinary record and shall remain on file with the Assistant Dean for Student Affairs until the academic integrity issue is resolved. Any prior incidents of student misconduct shall be provided to the Honor Council during the sanctioning phase of the Honor Council hearing.

2. **Role of the Associate Dean for Academic Affairs:** Once the matter of a possible student violation to either the academic or professional conduct policies is reported, the Associate Dean for Academic Affairs will be responsible for convening the CHP Honor Council. Once the council is formed and made

ready to precede, the Associate Dean for Academic Affairs removes him/herself from the administrative process until a final recommendation as to the possible sanctioning of the accused student is made. The CHP Honor Council will utilize the disciplinary procedures outlined in the CHP Honor Council section below.

3. **Student Rights and Responsibilities:** Throughout the disciplinary process the Assistant Dean for Student Affairs for CHP is assigned to assist the student to prepare their portion of the hearing and navigate the Student Disciplinary Process.
 - a. The student is responsible for making contact and arranging to meet with the CHP Assistant Dean for Student Affairs to better understand the Student Disciplinary Process.
 - b. The student involved in the allegation may be present and hear all witnesses and have the opportunity listen to all the information presented to the CHP Honor Council.
 - c. The student may request a legal advisor to work with them during the hearing; however the legal advisor is not allowed to speak during the hearing or other portions of the process (other than privately to the student).
 - d. The Assistant Dean for Student Affairs will work with the student until they are satisfied with the results or until the appeal process is completed.
- D. **CHP Student Honor Council:** In handling alleged incidents of misconduct through the formal student disciplinary process, the Associate Dean for Academic Affairs shall convene the CHP Honor Council, as the need arises, to consider the issues related to alleged incidents of student misconduct and/or the proposed sanctions.
 1. **Purposes:** The purpose of the CHP Honor Council is to insure full investigation of incidents of alleged student misconduct and/or the sanction(s) of student misconduct when use of the informal student disciplinary process, described previously, has not resolved an issue to the faculty or student's satisfaction. The council shall be advisory to the Associate Dean for Academic Affairs, and its recommendations shall not be binding upon him/her.
 2. **Composition:** The composition of the CHP Honor Council shall be:
 - a. Two full time faculty members will be randomly selected from the CHP. No faculty member shall be from the department in which the accused student is enrolled. The two faculty members shall be from different departments of the CHP.
 - b. Five students selected randomly from the Honor Council pool by the Associate Dean for Academic Affairs. The students shall be in good standing. No student shall be selected from the department in which the accused student is enrolled.
 - c. Two alternating ex-officio chairpersons of the CHP Honor Council will be appointed by the Dean of the College of Health Professions. The ex-officio chairs will alternate in chairing the committee and ensure that the proceedings of the committee are conducted in compliance with college procedure set forth by the Associate Dean for Academic Affairs and that all hearings are conducted in an appropriate and equitable manner. The ex-officio chair presiding over the CHP Honor Council may not be from the department in which the accused student is enrolled and may not vote on any proceedings before the Honor Council.
 3. **Duties of the CHP Honor Council:** The primary duty of the CHP Honor Council shall be to review as rapidly and discreetly as possible, all information provided about the alleged incident of student misconduct and to seek other facts deemed necessary to insure adequate review of the allegation and/or recommendations for sanction(s). Confidentiality is expected from all Honor Council members and others involved during and after the honor council hears a student integrity case.
 4. **Timeline for CHP Honor Council Hearing:** At the time the Honor Council is convened to hear a case of alleged student misconduct, a reasonable deadline by which the Council's work must be completed will be established by the Associate Dean for Academic Affairs, recognizing an overall ten (10) business day deadline to hear and decide the matter.
 5. **Written Report:** At the completion of its review, a written report of the Council's process of review, findings, and its recommendations will be written by the ex-officio chair and shall be forwarded to the Associate Dean for Academic Affairs of the CHP.
 6. **Final Student Disciplinary Decision:** Following the review of the findings and recommendations of the CHP Honor Council, the Associate Dean for Academic Affairs of the College of Health Professions shall make the final disciplinary sanctions and notify the accused student of his/her decision in writing.
- E. **Procedural Appeal:** While the decision of the Associate Dean for Academic Affairs is final, the student may request a review of the CHP Honor Council process by the Dean of the College of Health Professions. The student may submit a written request to the Dean to review the process utilized in determining the outcome

of the CHP Honor Council hearing. The request must be submitted within five business days of the Associate Dean's notice. The Dean will review the process and may solicit other information deemed appropriate. The Dean will inform the student, Department Chair, and Associate Dean in writing of his/her decision within five business day following the submission of the request by the student. No further appeals may be made.

ARRESTS AND CONVICTIONS

Students who are convicted of a felony while enrolled in a CHP program are subject to immediate dismissal. The CHP also reserves the right to suspend or dismiss students who are arrested for a violation of the law, in accordance with regard for the due process rights of the student as described in the Persistent Disruption to the Educational Environment Policy below.

POLICY ON ADMINISTRATIVE ACTIONS

In the College of Health Professions, individuals in the Dean's Office have the authority to take administrative actions in order to protect the safety and welfare of members of the University community. Individuals who may use these administrative actions are the: Dean, Associate Dean for Academic Affairs, Assistant Dean for Student Affairs, or any designee as approved by the Dean

In special situations where the presence of physical, emotional, or psychological harm to one's self or others is present, the CHP Dean's Office may take administrative action to protect the safety and welfare of members of the university community. Such action could include, but is not limited to, a student's restriction from certain activities or locations on campus, changes in class schedule, or suspension. Any emergency action taken will be clearly outlined and explained, in writing, and presented to the student.

PSYCHOLOGICAL EVALUATION AND/OR COUNSELING FOR STUDENTS OF CONCERN

Department Chairs or the Dean's Office of the College of Health Professions may determine that a student should undergo psychological evaluation and/or counseling based on a student's behavior which indicates reasonable concern for the health and well-being of the student or other members of the university community that come in contact with the student. In the event that a student presents behaviors of concern to department chairs or members of the CHP Dean's Office, the student will be referred to the Student Wellness Program and expected to undergo the requested psychological evaluation and/or counseling. In the event that a student refuses to seek the evaluation or services required in a timely manner, emergency administrative action may be taken.

PERSISTENT DISRUPTION TO THE EDUCATIONAL ENVIRONMENT

The College of Health Professions at the University of Arkansas for Medical Sciences is dedicated to the pursuit of academia and to providing the opportunity for students to be successful in their educational endeavors. As such, students who display persistent behavior which disrupts the educational process of a classroom are subject to disciplinary action.

FINANCIAL INFORMATION

FEES

Payment of all fees is due upon registration. Students who have not paid tuition, course, and other required fees, or received a deferment for payment by the date specified at registration, will be notified (orally and in writing, if possible) that they have an additional three working days to pay the charges. If full payment is not received during that period, the students will be administratively suspended from classes within the following two working days. (Submission of a check which is not honored by the bank does not constitute payment, and the rules described above apply.)

REGISTRATION FEES

Undergraduate and graduate students enrolled in CHP programs, including post-bachelor's degree certificates and the M.I.S. and Au.D. degree programs, pay an hourly rate for tuition.

Graduate students enrolled in the UAMS Graduate School, who are enrolled in 9 SC or fewer pay an hourly rate, with 10 SC or more considered a full-time load. Some undergraduate CHP programs admit only full-time students (at least 12 SC).

Fees are subject to change without notice by action of the Board of Trustees. **Payment of all fees is due upon registration.**

Registration fees are available on the college [website](#).

For the latest information on registration fees, call the **CHP Welcome Center (501) 686-5730** or see **College [website](#)**.

ARKANSAS RESIDENCY STATUS

The classification of Arkansas resident or non-resident is determined on the basis of legal domicile of the student. A student/applicant who is financially independent will be evaluated based on his/her own circumstances. A student who is a dependent of a parent or guardian will be evaluated based on the parent(s)/guardian(s) circumstances. One parent or guardian must qualify as an Arkansas resident in order for a dependent student/applicant to claim state residency. Each of the following standards must be met in order for state residency status to be granted. The applicant/student has:

1. Physically resided in Arkansas for at least twelve consecutive months in the permanent home (a bona fide domicile) and was not a student at any Arkansas higher education institution during those twelve months.
2. Maintains a permanent connection to the state and has an expectation of remaining in the state beyond graduation.
3. Earned a minimum of \$4,000 gross taxable income in the state during the twelve consecutive months prior to application.

Applicants or continuing students may request a change in their classification by completing an *Application for Change*

of Residency Status form available in the CHP Welcome Center and on the CHP [website](#). Please note, completing an application for reclassification is not a guarantee that a change in resident status will be granted.

Native Americans in other states belonging to tribes which formerly lived in Arkansas before relocation, and whose names are on the rolls in tribal headquarters, shall be classified as in-state students of Arkansas for tuition and fee purposes (but not for consideration for admission) on all campuses of the University of Arkansas. Tribes so identified include the Caddo, Cherokee, Choctaw, Osage, and Quapaw.

Students residing in Bowie and Cass counties in Texas are eligible for in-state tuition and fees (but are not considered Arkansas residents for purposes of admission). For more information about registration fees, contact the **CHP Welcome Center, Administration West, 328C. Telephone: (501) 686-5730.**

University Administrative Memorandum 540.1 allows waiving of tuition and fees for dependents of Arkansas citizens who are prisoners of war or missing or killed in action. "Dependent" means a spouse of prisoner of war or person declared to be missing or killed in action, or any child born before or during the period of time its father or mother served as a prisoner of war or was declared a person missing or killed in action, or any child legally adopted or in the legal custody of the father or mother prior to and during the time the father served as a prisoner of war or was declared to be a person missing or killed in action. Contact the CHP Welcome Center for details.

SPECIAL FEES

Special fees, subject to change, which may be charged by the College, are available on the College [website](#).

HOUSING

Room descriptions, rates, and application procedures for the UAMS residence hall can be found on the UAMS student activities and housing [website](#).

For further information contact: **Director of Student Activities and Housing, University of Arkansas for Medical Sciences, 4301 West Markham, #536, Little Rock, Arkansas 72205. Telephone: (501) 686-5850.**

LABORATORY FEES

Laboratory fees are charged by some departments and vary by semester and program. Laboratory fees for the current year are subject to change without notice by action of the Board of Trustees. Laboratory fees are available on the College [website](#).

ENROLLMENT DEPOSIT FOR ALL PROGRAMS EXCLUDING PHYSICIAN ASSISTANT APPLICANTS

Although not a fee, an enrollment deposit of \$60.00 is due upon acceptance into the College and is not refundable,

but it is applied to the first term tuition if the applicant is accepted and enrolls. (Contact the CHP Welcome Center for further information.) If more than one year has passed, the deposit is forfeited.

ENROLLMENT DEPOSIT FOR PHYSICIAN ASSISTANT APPLICANTS ONLY

A tuition deposit of \$300 will be required from physician assistant program applicants who are accepted into the program. The tuition deposit is utilized to hold a position in the cohort and will be applied to the student's tuition expenses once the student matriculates into the program. The tuition deposit is not refundable to accepted applicants who choose not to enroll into the program. The deadline for the college to receive the tuition deposit will be three weeks after the applicant has been officially notified of acceptance by the program.

REFUND OF FEES

Students officially withdrawing may be eligible for a refund calculated as a percentage of the registration fees. (See next column for definition of class days.) Such refunds are determined according to the schedules below. Special fees are not refundable. Refund of housing deposits and overpayment of rental fees are made after the occupant has checked out of University Housing and after all Housing Policy requirements have been met.

Fall and Spring Semesters: Students officially withdrawing from the University during the fall or spring semester shall be entitled to a refund of registration fees as follows:

Semester	Student Who Withdraw	Will Receive Refund of:
Fall & Spring	on/before 5 th day	100%
	on/before 10 th day	50%
	after 10 th day	0%

Fall and Spring Semesters: Students officially dropping one or more courses and who continue to be enrolled in the University during a fall or spring semester shall be entitled to individual course refunds as follows:

Semester	Student Who Withdraw	Will Receive Refund of:
Fall & Spring	on/before 5 th day	100%
	on/before 10 th day	50%
	after 10 th day	0%

Summer Session: Students who drop a course or officially withdraw from the University during a summer session shall be entitled to an adjustment as follows

Session Length	Student Who Withdraw	Will Receive Refund of:
1 – 4 weeks	before 1st day	100%
	on/after 1st day	0%
5 – 6 weeks	on/before 1st day	100%
	on/before 3 rd day	50%
	after the 3 rd day	0%
7 – 9 weeks	on/before 2nd day	100%
	on/before 5th day	50%
	after the 5th day	0%
10 – 12 weeks	on/before 4th day	100%
	on/before 9th day	50%
	after 9th day	0%

The date you file a completed Application for Official Withdrawal at the CHP Welcome Center governs the amount of your refund. An Application for Official Withdrawal is not considered complete without all necessary signatures.

Withdrawing from a course without doing so officially will adversely affect your transcript and grades. See the section on Grading for details.

The date a student files a completed Application for Official Withdrawal at the CHP Welcome Center determines the amount of refund. An Application for Official Withdrawal is not considered complete without all necessary signatures. Failure to withdraw officially from a course will adversely affect grades on official transcripts.

If Student Financial Services receives an authorized refund request for payment of tuition and fees, the following schedule is used:

- If payment was made by check, the refund will not be processed until 30 days from the date the check was deposited.
- If payment was made by credit card, the refund will be processed within 24 hours provided the student furnishes credit card information.
- For all other forms of payment, the refund will be processed within 24 hours.

INSURANCE

HEALTH INSURANCE

Full-time and part-time students admitted to a CHP degree or certificate program must have major medical health insurance coverage at all times that meets the following minimum standards.

- Provides \$100,000 in coverage for each covered injury or sickness incident.

- No major exclusions. For example: plan must cover major medical, pharmacy, emergency medical, mental health, and diagnostic x-rays/lab services.
- Individual plans must have a policy year deductible of \$1,000 or less and family/employer plans must have a policy year deductible of \$2,500 or less.
- Includes identification card or policy with student name.
- Provides documents in English with currency amounts converted to U.S. dollars and an insurance company contact telephone number in the U.S.

Each August and January, students complete a verification process prior to registration for their existing health insurance or purchase health insurance during registration. Student health insurance compliance is managed by VCA-Department of Campus Life and Student Support Services.

If the student's insurance lapses after registration, the University will assume no responsibility for expenses incurred for health care services rendered to the student or his/her dependents. Lack of required health insurance may also affect student status.

Students admitted as nondegree/noncertificate students are strongly encouraged, though not required, to purchase health insurance through a private source. **The University will assume no responsibility for expenses incurred for health care services rendered to these students or their dependents.**

STUDENT LIABILITY INSURANCE

The CHP requires all students to purchase liability insurance effective during their enrollment in any course requiring active participation in a patient care setting. The fee for liability insurance is included in the tuition and fee statement. Students should contact the CHP Welcome Center for current information regarding this requirement.

UAMS STUDENT FINANCIAL SERVICES

UAMS Student Financial Services is divided into two divisions: The Financial Aid Office and the Bursar's Office.

FINANCIAL AID OFFICE

The role of the Financial Aid Office is to actively assist students in seeking and securing financial resources. For more information on determining financial aid eligibility and the application process, visit their website.

The resources available to the College in any year determine how many students can be assisted and to what extent. Funds to assist students are provided by state and federal governments, philanthropic organizations, alumni, and other individuals. To be eligible for any form of financial aid, one must have been accepted for admission or be currently enrolled.

Contact: **UAMS Student Financial Services Financial Aid Office, University of Arkansas for Medical Sciences, 4301 West Markham Street, #864, Little Rock, Arkansas 72205. Telephone: (501) 686-5451 or visit their website.**

The Financial Aid Office is located in the Administration West Building, Room 1.120. The hours are 8:00 a.m. to 4:30 p.m., Monday through Friday. It is not necessary to make an appointment to visit with the staff in the office.

In order to be considered a full-time student for financial aid purposes, undergraduate students must be enrolled in a minimum of 12 credit hours per semester (fall, spring, and summer) CHP graduate students must be enrolled in at least 10 semester credit hours per semester (fall and spring) and five (5) semester credit hours in the summer session.

All students receiving financial aid are required to maintain satisfactory academic progress in order to continue receiving funds. If a student fails to maintain the academic progression standards set forth by the College and is subsequently dismissed, the student must contact the UAMS Student Financial Services Office, Financial Aid Office, for any reinstatement of aid at a future date.

FINANCIAL NEED DETERMINATION

The Free Application for Federal Student Aid (FAFSA) is used to evaluate the needs of students who are applying for financial assistance. This application is available at the FAFSA website. An attempt will be made to provide, from one source or another, the difference between the reasonable cost of attending UAMS and the amount of resources already available to the student. If aid requests exceed available funds, a selection process will be necessary to ensure that the most deserving and best qualified students' needs are met first. Students must also maintain Satisfactory Academic Progress according to the policy of the UAMS Student Financial Services Financial Aid Office. For more information, visit their website.

DATES OF APPLICATION

Students are encouraged to make application for financial assistance between January and March of the academic year they plan on attending (**acceptance in a program of study is not required to apply for financial aid, and it is suggested that students complete the application as soon as they decide to pursue their education**). Applications which are complete prior to **May 1** each year will receive first consideration. All other applications will be reviewed in the sequence in which they are completed. Financial aid is not automatically renewed; therefore, students must reapply for aid every year.

TYPES OF AID

The University of Arkansas for Medical Sciences participates in the full range of financial aid opportunities to include:

Grants: Federal Pell Grant

- Federal Supplemental Educational Opportunity Grant
- Arkansas Student Assistance Grant
- Academic Challenge Scholarship
- Governor's Scholarship
- Opportunity "GO" Grant
- Workforce Investment Grant

Loans:

- Federal Carl Perkins Loans
- Federal Direct Student Loans
- Federal Parent Loan for Undergraduate Students

In addition, a limited number of academic scholarships are awarded each year by the College of Health Professions and some of its departments. Consideration is given to scholastic merit, potential for professional development, and financial need. For information about these scholarships, contact the chairman of your department.

A number of the CHP students are eligible for the workforce education on a loan forgiveness program. For information about this program, including eligible disciplines, contact the UAMS Student Financial Services Financial Aid Office.

Also, the UAMS Student Financial Services Awards Division coordinates financial aid provided through local agencies such as the Workforce Investment Grant (WIG). Students who are eligible to receive benefits from the Veterans Administration should contact the College of Health Professions VA Certifying Official (the College registrar) in the College office and their VA Regional Office representative.

SATISFACTORY ACADEMIC PROGRESS

A student receiving Federal Title IV financial aid or other financial aid directly administered or certified by the University of Arkansas for Medical Sciences must maintain satisfactory academic progress (SAP) toward the completion of a certification or degree program of study. Satisfactory academic progress for financial aid recipients is measured by both quantitative and qualitative standards and is an assessment of a student's cumulative academic record at UAMS.

To ensure Satisfactory Academic Progress, students must meet all of the following standards and requirements.

- Minimum Cumulative Grade Point Average (GPA)
- Minimum Completion Standard for Attempted Credit Hours
- Maximum Time Frame for Degree Completion

The Student Financial Services Financial Aid Office will request confirmation from each college verifying SAP for those recipients of financial aid. The verification will be measured by both quantitative and qualitative standards. Students must maintain a minimum 2.00 cumulative grade point average measured on a 4.00 scale at the end of each semester. In

addition to maintaining the specified grade point average, students must complete their degree within a maximum time frame outlined by the specific program enrolled in. Students are expected to complete 67% of their cumulative attempted hours. Completing less than 67% of the cumulative attempted hours and/or scoring less than 2.0 GPA will result in financial aid probation for the next term of enrollment. At the end of the next term of enrollment, if the student has not met the minimum requirements, the student will be placed on Financial Aid Suspension.

A student is deemed to have met the qualitative requirements for satisfactory academic progress for financial aid purposes provided the student's academic status is not one of Academic Dismissal.

Transfer Credit: For transfer students, the total years of credit hours includes time spent at the previous institution, to the extent that credit hours are transferred and applied toward the degree objective at this institution. Applicants must qualify and meet the individual college's admission requirements prior to enrollment.

Unofficial Withdrawals: An unofficial withdrawal is determined by comparing the SSCR to our OASIS financial student database, or by notification from the Centralized Registrars' Office, or by confirmation of an unearned F.

The Centralized Registrars' Office will request faculty to provide the last date of attendance for a student that is considered unofficially withdrawn. A Title IV Return of Funds calculation will be processed and may result in a portion of their aid being returned to the federal government.

Course Repetitions: Students may repeat courses but will be placed on financial aid probation if:

1. The student's GPA is below the minimum requirement to proceed in the curriculum.
2. The student does not make incremental progress as determined by the college and/or the Financial Aid Office.
3. The student reaches the maximum time frame for completion of his/her program of studies.

Students who fail to meet the SAP requirements will be notified that their financial aid has been denied. Each student denied aid will automatically be given an option to appeal to the Financial Aid Office. Each appeal will be reviewed to determine whether there are circumstances beyond the student's control that prevented him or her from maintaining satisfactory progress. The decision of the Financial Aid Office is final in appeal matters.

If a student is denied aid, an "Alert Flag", will be placed on his/her account in our financial aid software, ProSam, to monitor/manage any requests for future awards.

RETURN OF FINANCIAL AID

Students are responsible for returning a portion of the funds received through a Pell, Perkins, SEOG, Direct, or Grad PLUS student loan if they withdraw/separate from the college prior to the completion of the enrollment period. The return of funds is calculated based on the number of days in attendance. All grades and transcripts are withheld until the student complies with this policy.

BURSAR'S OFFICE

The role of the UAMS Student Financial Services Bursar's Office is to coordinate the disbursement of awarded financial aid, process tuition payments, and manage UAMS federal and institutional student loan programs.

Financial aid refunds are disbursed on the 11th Day of Class for each fall and spring term. Enrollment on this date determines your financial aid eligibility for all awards including federal aid, funds received from the Arkansas Department of Higher Education, and various UAMS scholarships.

Visit the Bursar's Office's [website](#) for more information on paying your tuition or receiving your financial aid refund check. The Bursar's Office is located in the Administration West Building, Room 1.106 and is open Monday-Friday 8 AM - 4:30 PM. Call (501) 686-6128 for more information. The address is **UAMS Student Financial Services Bursar's Office, University of Arkansas for Medical Sciences, 4301 West Markham Street, #758, Little Rock, Arkansas, 72205.**

SCHOLARSHIPS

AWARDS AND SCHOLARSHIPS

Dean's List: Once a student has completed twelve (12) semester credit hours of required College of Health Professions course work (including core curriculum credits earned at UAMS), they are eligible to be on the College of Health Professions Dean's List. In order to make the Dean's List, a student must take at least 9 semester credit hours in the fall and spring semester (6 semester credit hours in the summer semester) and achieve a minimum 3.75 grade point average for the semester credits earned.

COLLEGE-WIDE SCHOLARSHIPS

Arkansas Hospital Auxiliary Association Scholarship

This scholarship is awarded each year by the Arkansas Hospital Auxiliary Association to one outstanding student in his or her second or third program year. The scholarship recipient is selected based on high academic performance, professionalism, and financial need.

Arkansas Hospital Auxiliary Association Endowed Scholarship

The College of Nursing and the College of Health Professions share this scholarship through the Arkansas Hospital Auxiliary Association which advocates for better health care throughout Arkansas. The scholarship is awarded annually to a Nursing or College of Health Professions student in their last year of studies. Selection of the scholarship recipient is based on academic excellence and financial need.

CHP Academic Excellence Scholarship

The CHP Academic Excellence Scholarship is provided by generous donations gathered through the annual CHP phone-a-thon campaign. The purpose of this scholarship is to recognize excellence in the classroom. The number of annual awards is based on the money raised during the annual phone-a-thon. An annual scholarship of \$500 is awarded (typically) to each selected student.

CHP Financial Assistance Scholarship

The CHP Financial Assistance Scholarship is provided by generous donations gathered through the annual CHP phone-a-thon campaign. The purpose of this scholarship is to assist student based on their financial need. The number of annual awards is based on the money raised during the annual phone-a-thon. An annual scholarship of \$1000 is awarded (typically) to each selected student.

James O. Wear, Ph.D. Endowed Scholarship

This scholarship was established in 2011 in honor of Dr. James Wear, chairman of the former Biomedical Instrumentation Technology program. An annual scholarship is awarded to one student who demonstrates high academic performance and financial need. The scholarship recipient must be enrolled in a baccalaureate or higher-level program in the college.

Neal and Clara Spain Endowed Scholarship

The Neil and Clara Spain Endowed Scholarship was established in 2009 through a generous bequest from Neal and Clara Spain. The scholarship is awarded annually to one student who demonstrates high academic performance and financial need. The recipient may be enrolled in any program in the college.

Ronald H. Winters, Ph.D. Endowed Scholarship

The Ronald H. Winters, Ph.D. Endowed Scholarship was established in honor of Dean Emeritus Ronald H. Winters, at his retirement in 2011. Dr. Winters served as dean of the college for almost 29 years. An annual scholarship is awarded to an Arkansas resident who is enrolled in a baccalaureate or higher-level program in the college and

who demonstrates high academic performance, strong leadership skills, and financial need. The recipient is also a student ambassador for the college who plans to utilize the skills he or she acquires in the college to become a leader in his or her profession.

Walter S. Nunnally Scholarship

The Walter S. Nunnally Scholarship was established in 2014 through a generous gift from Mr. Nunnally, a longtime member of the UAMS Foundation Fund Board and founding member of the College of Health Professions' Dean's Society. The scholarship recipient is selected for his or her high academic performance, financial need, and experience and/or accomplishments in service, service-learning or leadership activities. The recipient may be enrolled in any program in the college.

UAMS SOUTHWEST REGIONAL CENTER

Herbert B. Wren, M.D. Scholarship

The Herbert B. Wren, M.D. Scholarship was established by the Council for Regional Health Education Centers to honor the life and work of Dr. Herbert B. Wren. Scholarships are awarded to students who demonstrate high academic achievement and who are enrolled in one of six College of Health Professions programs offered at the UAMS/AHEC-Southwest campus: cardiorespiratory care, diagnostic medical sonography, health information management, medical laboratory sciences, nuclear medicine imaging sciences, or radiologic imaging sciences.

DEPARTMENT OF AUDIOLOGY AND SPEECH PATHOLOGY

Leah Katayama Wilkins Scholarship

This scholarship was established in 2003 by Dr. and Mrs. Katayama in loving memory of their daughter, Mrs. Leah Katayama Wilkins. Mrs. Wilkins received a Master of Science degree in Audiology and Speech Pathology in 2000. The scholarship is awarded to an exemplary Master of Science graduate student in Audiology and Speech Pathology in his or her first year of study.

DEPARTMENT OF DENTAL HYGIENE

Ann Bowers Hurst Endowed Scholarship

This scholarship was established in 2012 through the Hot Springs Village Community Foundation by the estate of Mrs. Edith Bowers, in memory of Mrs. Bowers' daughter, Mrs. Ann Bowers Hurst. A 1973 graduate of the dental hygiene program, Mrs. Hurst served as a dental hygienist in Little Rock for 34 years. She remained dedicated to the dental hygiene profession until her death in 2008. The inaugural recipients of this scholarship were selected in 2012 for demonstrating academic excellence and commitment to the field of dental hygiene.

Alice Marie Kelly Kuntz Endowed Scholarship

This scholarship was established in 2007 by the estate of Mrs. Alice Marie Kelly Kuntz, a former dental hygienist who passed away in 2007. Mrs. Kuntz is survived by her sister, Mrs. Irene Mason, who was also a dental hygienist. The scholarship is awarded annually to an outstanding dental hygiene student who demonstrates high academic achievement, financial need, and strong leadership abilities.

Arkansas State Dental Hygienists Association Endowed Scholarship

Established in 2000 by the Arkansas State Dental Hygienists Association, this scholarship is awarded to an exemplary upper-level student in the dental hygiene program. The scholarship recipient is selected for his or her high academic performance, leadership qualities, and professionalism.

Delta Dental Plan of Arkansas Endowed Scholarship

Established in 2004 by the Delta Dental Plan of Arkansas, Inc., this scholarship is awarded annually to an exceptional upper-level dental hygiene student. The scholarship recipient must demonstrate high academic performance, financial need, and the qualities indicative of a dedicated healthcare provider.

Virginia Goral Endowed Scholarship

This scholarship was established in 2008 to honor Dr. Virginia Goral, former chair of the Department of Dental Hygiene, at her retirement. The scholarship was established with support from Dr. Goral's colleagues and former students in recognition of Dr. Goral's many contributions to the department during her 15 years of service to UAMS and 34 years in dental hygiene education.

Center for Dental Education Scholarship

Established in 2014, this scholarship is awarded to a student in the dental hygiene program. The scholarship recipient is selected for his or her high academic performance, financial need, and experience/accomplishments in service, service-learning or leadership activities.

DEPARTMENT OF EMERGENCY MEDICAL SCIENCES

Arkansas Trauma System Scholarship

This scholarship is available through a sub grant to the Arkansas Department of Health. Established in 2005, the scholarship is intended for EMS students who will be working in the trauma system.

West Little Rock Rotary Club Scholarship

The West Little Rock Rotary Club established this scholarship in 2011 to provide financial assistance and recognize high academic achievement by students in the Department of Emergency Medical Sciences. The scholarship is awarded annually to outstanding upper-level students who demonstrate high academic performance and financial need.

DEPARTMENT OF IMAGING AND RADIATION SCIENCES

Division of Diagnostic Medical Sonography

Terry J. DuBose Endowed Scholarship

This scholarship was established in 2010 in honor of Mr. Terry J. DuBose, a retired faculty member, and his long-time service to the College of Health Professions. Mr. DuBose developed the first educational program in Arkansas for Diagnostic Medical Sonography. He was the founding director of the Division of Diagnostic Medical Sonography in the Department of Imaging and Radiation Sciences. Mr. DuBose is recognized nationally and internationally for his contributions to the field of sonography. The scholarship is awarded annually to one outstanding student in the Division of Diagnostic Medical Sonography.

Division of Radiologic Imaging Sciences

Joseph R. Bittengle Memorial Endowed Scholarship

This scholarship was established in 2009 in memory of Mr. Joseph R. Bittengle, former director of the Division of Radiologic Imaging Sciences in the Department of Imaging and Radiation Sciences. Mr. Bittengle was greatly respected and admired by his colleagues and students. He was a dedicated and accomplished teacher, mentor, and leader in the college until his untimely death in 2008. The scholarship is awarded each year to one outstanding student in the Division of Radiologic Imaging Sciences.

Dr. and Mrs. W.R. Brooksher, Jr. Endowed Scholarship

In 1958, the Arkansas Medical Society Alliance established this scholarship in honor of Dr. and Mrs. W.R. Brooksher, Jr. Dr. Brooksher was a pioneer in the use of x-ray technology in Fort Smith, Arkansas. Endowed by the Arkansas Medical Society Alliance in 2009, the scholarship is awarded annually to an outstanding student in Radiologic Imaging Sciences.

Jeremy L. Overstreet Memorial Scholarship

This scholarship was established in loving memory of Mr. Jeremy L. Overstreet by the Overstreet family in 2011. A dedicated student with unwavering personal strength, Overstreet graduated in 2005 with high honors from the Radiologic Imaging Sciences program at the UAMS Area Health Education Center in Fayetteville. After graduation, he worked at Mercy Health Systems in Rogers until he passed away of cancer in 2011. The inaugural scholarship recipient was selected in 2012 based on academic merit, financial need, and career goals in the field of radiologic imaging sciences.

Kenneth C. Pederson Memorial Scholarship

Kenneth C. Pederson was a faculty member in the radiologic technology program when an unfortunate accident took his life in 1971. This scholarship was established shortly after Mr. Pederson's death in memory of his dedication, compassion, and excellence to his profession and his students. The scholarship is awarded annually to a student who demonstrates high personal and academic achievement, as well as financial need.

DEPARTMENT OF LABORATORY SCIENCES

Cytotechnology Program

Wanda L. Culbreth Endowed Scholarship

This scholarship was established in 2006 in memory of Wanda L. Culbreth, a cytotechnologist and former director of the cytotechnology program. This scholarship was established by Mrs. Culbreth's husband, Reverend Cecil Culbreth, as well as Mrs. Culbreth's colleagues in the Department of Laboratory Sciences and in the Department of Pathology in the UAMS College of Medicine.

Eulalia S. Araoz Endowed Scholarship

This scholarship was generously endowed in 2013 in memory of Mrs. Eulalia Araoz by her husband Dr. Carlos Araoz. Mrs. Araoz graduated from Cytotechnology in 1970. She was a very special mentor to many students, residents, and fellows and exemplified the work ethic required for making patients and families the focus of healthcare. This scholarship will be awarded annually to a Cytotechnology student who has demonstrated professionalism and academic excellence.

Medical Laboratory Sciences Program

Bobby Morgan Endowed Scholarship

Established in 1994, this scholarship honors Mrs. Bobby K. Morgan, former UAMS Blood Bank Technical Director and Associate Professor in the medical laboratory sciences program. Mrs. Morgan was a valued faculty member in the college for 30 years. The scholarship was established by Mrs. Morgan's husband, Dr. Paul Morgan, and Mrs. Morgan's colleagues. The scholarship is awarded annually to an upper level student for his or her outstanding academic record, professionalism, and community involvement.

Jerry Brummett Endowed Scholarship

This scholarship was established in 2005 in honor of Mr. Jerry Brummett, former Chief Technologist and educator in the UAMS Blood Bank. Established by his wife, Mrs. Jan Brummett, and Mr. Brummett's friends and colleagues, the scholarship honors his 40 years of service to UAMS, patients at the UAMS Medical Center, and students in the medical laboratory sciences program. The scholarship is awarded annually to an upper-level student who demonstrates academic excellence and financial need.

Sharon Edwards Gibbert Memorial Scholarship

This scholarship was established in memory of Mrs. Sharon Edwards Gibbert by her mother, Mrs. Dorothy Edwards, her sister, Mrs. Carolyn Clerico, and fellow students. Mrs. Gibbert graduated from the medical laboratory sciences program in 1971 and died of leukemia shortly after her graduation. Mrs. Gibbert's bravery and dedication to her profession was an inspiration to all who knew her. The scholarship is awarded annually to one student who exhibits academic excellence.

M. Gene Hall Endowed Scholarship

This scholarship was established in 1989 in honor of Ms. M. Gene Hall, Emeritus Associate Professor in the Department of Laboratory Sciences. Ms. Hall was a beloved faculty member in the medical laboratory sciences program for 32 years. The scholarship was established by Ms. Hall's family, friends, colleagues, and former students. The scholarship is awarded to three students each year on the basis of academic excellence, citizenship, and professionalism.

Kathleen M. Mugan Endowed Scholarship

This scholarship was established in 2007 in honor of Mrs. Kathleen M. Mugan, former director of the medical laboratory sciences program, at her retirement. Mrs. Mugan was greatly respected and admired by her students and colleagues alike. The scholarship was established at her retirement by her students and colleagues, with generous support from Mrs. Mugan's husband, Mr. Douglas Murray.

Paula Peacock Endowed Scholarship

In 1998, this scholarship was established by Mrs. Paula Peacock's family and friends to recognize her 40 years of service to the college, her students, the medical laboratory sciences profession, and the UAMS community. The former manager of the UAMS Clinical Laboratory, Mrs. Peacock was a role model and friend to many until she passed away in 2012. The scholarship is awarded annually to an upper-level student who displays academic excellence and laboratory skills.

DEPARTMENT OF OPHTHALMIC MEDICAL TECHNOLOGY

John Shock, M.D. Endowed Scholarship

This scholarship was endowed in 2011 in honor of Dr. John Shock, founding director of the UAMS Jones Eye Institute. The scholarship is awarded to two exemplary upper-level students in the ophthalmic medical technology program who demonstrates high academic performance, professionalism, and financial need.

DEPARTMENT OF PHYSICIAN ASSISTANT STUDIES

Arkansas Medical, Dental, and Pharmacy Association Scholarship

The Arkansas Medical, Dental, and Pharmacy Association Scholarship (AMDPA) was established in 2013 through a generous donation from the AMDPA to the UAMS Physician Assistant Program. AMDPA is Arkansas' leading minority health provider association. The mission of the AMDPA is to serve as the essential resource for its members and their patients toward ensuring professional excellence, promoting social justice, and realizing health equity in Arkansas. The goals of the association is to: reduce and ultimately eradicate health disparities in Arkansas, increase diversity of the medical/dental/pharmacy workforce in Arkansas, provide relevant and cutting-edge information and services to members and their constituents, advocate for the interests of members and their patients through public policy, outreach and awareness. The annual scholarship of \$2,500 is awarded to one student in the 2nd year of the physician assistant program.

Ruth M. Allen, Ph.D. Endowed Scholarship

This scholarship honors Dr. Ruth Allen, former associate dean for academic affairs in the College of Health Professions. Dr. Allen retired from UAMS in 2002 after serving in various academic leadership roles. The endowed scholarship is awarded annually to one 2nd year physician assistant female student who demonstrates interest and experience in community service.

PROGRAM INFORMATION

AUDIOLOGY – DOCTOR OF AUDIOLOGY DEGREE

Department of Audiology and Speech Pathology

Audiology Website

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The Doctor of Audiology (Au.D.) degree program is offered in a consortium with the College of Education and Health Professions at the University of Arkansas at Little Rock. This unique educational consortium combines the academic and clinical resources of a major medical sciences campus with those of a large, comprehensive, metropolitan university. It is a full-time four year program with one cohort of 9 students beginning each fall semester, and consists of a total of 11 semesters including three summers. The program's mission, goals and knowledge, and skills acquisition (KASA) objectives can be found on the department [website](#).

Post-Bachelor's Track: Students must have earned at least a bachelor's degree from a regionally-accredited college or university. This track is designed to be completed in 4 years (including three summers with a common entry point in the fall). Exceptions to these timelines may occur on an individual basis. All work must be completed within 8 calendar years of initial admission. A minimum of 118 semester credit hours are required for completion of the program.

Post-Master's Track: Students must have earned a master's degree in audiology, communication sciences and disorders, or the equivalent approved by the Council on Academic Accreditation of the American Speech-Language-Hearing Association (ASHA) (at least 36 semester credits of graduate level courses specified by the department). Admission to the post-master's program can occur in any semester. The time to complete the program will vary depending on individual requirements. All work must be completed within eight (8) calendar years of initial admission. A minimum of 118 semester credits are required for graduation (28 credits of clinical practicum will be waived for those who can provide proof of ASHA certification, and up to 30 credits may be transferred from ASHA accredited programs). Proof of current state licensure in audiology and/or national certification in audiology (CCC-A or ABA) must be provided at the time of application.

Successful completion of all program requirements qualifies the student to apply for national examinations required for licensure and/or certification. Graduates of the program will be eligible to apply to the Arkansas Board of Examiners in Speech Pathology and Audiology for a license to practice audiology in the state. Graduates will also be eligible to

apply for national certification. Successful completion of the program does not itself ensure licensure and/or certification. It is the student's responsibility to be familiar with state licensure and national certification requirements.

ACCREDITATION

The program is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850. Telephone: (800) 498-2071 or (301) 296-5700. Website: www.asha.org

APPLICATION PROCEDURES

All application materials must be received by **February 1** to be considered for fall admission. No applications will be reviewed after this date. Early application is strongly recommended.

Application procedures require applicants to mail documentation to **two different addresses**. The application for admission, non-refundable application fee, official transcripts, and official GRE scores should be mailed to the CHP Welcome Center. The letter of application, three letters of recommendation, and resume should be sent to AUSB-UALR, 2801 South University Avenue, Little Rock, Arkansas 72204. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A minimum cumulative major GPA of 2.85 is required to apply for admission. Applicants whose bachelor's degree is not completed at the time of application will be considered for admission; if accepted, the applicant must submit a supplementary transcript showing completion of the degree before registration.

4. **GRE Scores:** Scores must not be older than 5 years of application and must be sent directly from GRE. Institution Code: 6146. Scores should include verbal, quantitative, and writing.
5. **Application Letter:** Submit a letter of application (business format, 12-pt font, and <2 pages) to the Audiology Admissions Committee addressing the following items:
 - a. An explanation of your interest in audiology.
 - b. Your long-term and short-term goals.
 - c. Other information you deem relevant to the committee's decision-making process.
6. **Resume:** Submit a 1-page resume listing relevant educational credentials, honors, awards, activities, work history, etc. with a cover.
7. **Interview:** Contact the Audiology Admissions Committee to schedule an interview (on-site or via distance technology) and tour our facilities. Telephone: (501) 569-3155.
8. **Letters of Recommendation:** Three letters of recommendation on the official recommendation form are required. The form is on the department website. Recommendations should be from professors with whom you have worked and who are familiar with your ability and academic performance. Supplemental letters are optional.
9. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.
10. **Graduate Assistantship Application:** To apply for a graduate assistantship, an application and the required written essay must be submitted with the admissions application. The graduate assistantship application form is posted on the department website.

ADMISSION FACTORS

Admission to the program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Leadership and professionalism
- Written and oral communication

PREREQUISITES

Undergraduate course work in mathematics (college algebra or higher) and in biological, physical, and behavioral sciences is required. A course in statistics is required. Although there are no prerequisite courses in audiology or speech pathology, the program does require that all students have one course in phonetics and one in

language acquisition. If these are not completed prior to admission, they must be completed during the first year of study for the program. These courses are prerequisites to AUD 5158 Pediatric Audiology.

CURRICULUM

A minimum of 118 semester credits (SC) are required in the program. The following 119 credit sample degree plan demonstrates a program that meets the credit minimum.

Course #	Title	Semester Credit
		<u>Year 1</u>
Fall		
AUD 5023	Basic Diagnostic Audiology	3
AUD 5043	Anatomy and Physiology of the Auditory and Vestibular Systems I	3
AUD 5053	Acoustics and Psychoacoustics	3
AUD 5113	Instrumentation in Audiology and Speech Pathology	3
AUD 540V	Audiology Practicum	1
AUD 5041	Clinical Laboratory	<u>1</u>
		14
Spring		
AUD 5073	Advanced Diagnostic Audiology	3
AUD 5193	Anatomy and Physiology of the Auditory and Vestibular System II	3
AUD 5183	Outcomes Research and Evidence-Based Practice	3
AUD 5223	Amplification	3
AUD 540V	Audiology Practicum	1
AUD 5041	Clinical Laboratory	<u>1</u>
		14
Summer		
AUD 5162	Genetics of Hearing Loss	2
AUD 5222	Professional Issues in Audiology and Speech Pathology	2
AUD 5192	Cultural Competence in Audiology	2
AUD 540V	Audiology Practicum	1
AUD 5041	Clinical Laboratory	<u>1</u>
		8
		<u>Year 2</u>
Fall		
AUD 5153	Pediatric Audiology	3
AUD 5083	Clinical Electrophysiology	3
AUD 5013	Research Methods in Communication Disorders	3
AUD 5253	Amplification II	3
AUD 540V	Audiology Practicum	2
AUD 5041	Clinical Laboratory	<u>1</u>
		15
Spring		
AUD 5233	Pediatric Amplification and Intervention	3
AUD 5103	Medical Audiology	3
AUD 5243	Audiologic Rehabilitation: Adult	3
AUD 5263	Evaluation and Treatment of the Balance System	3
AUD 540V	Audiology Practicum	2
AUD 5041	Clinical Laboratory	<u>1</u>
		15

Summer

AUD 5232	Audiology: Practice Management	2
AUD 536V	Directed Research	2
AUD 540V	Audiology Practicum	2
AUD 5041	Clinical Laboratory	<u>1</u>
		7

Year 3**Fall**

AUD 5283	Gerontology in Audiology	3
AUD 5033	Educational Audiology	3
AUD 5273	Implant Device Technology	3
AUD 536V	Directed Research	2
AUD 540V	Audiology Practicum	2
AUD 5041	Clinical Laboratory	<u>1</u>
		14

Spring

AUD 5063	Auditory Processing	3
AUD 5212	Hearing Conservation	2
AUD 5173	Counseling in Communication Disorders	3
AUD 536V	Directed Research	2
AUD 540V	Audiology Practicum	2
AUD 5041	Clinical Laboratory	<u>1</u>
		13

Summer

AUD 536V	Directed Research (if not complete)*	1
AUD 546V	Clinical Externship	4
AUD 5041	Clinical Laboratory	<u>1</u>
		5

Year 4**Fall**

AUD 536V	Directed Research (if not complete)*	1
AUD 546V	Clinical Externship	6
AUD 5041	Clinical Laboratory	<u>1</u>
		7

Spring

AUD 536V	Directed Research (if not complete)*	1
AUD 546V	Clinical Externship	6
AUD 5041	Clinical Laboratory	<u>1</u>
		7

TOTAL**119**

*These directed research credits are not included in total.

This course work represents a minimum of 72 credits of classroom courses, 6 credits in directed research with successful completion of a research project, 11 credits of clinical laboratory, 13 credits of practicum, and 16 credits of clinical externship during the final academic year.

AU.D./PH.D. DUAL DEGREE OPTION

The Au.D./Ph.D. dual degree prepares individuals to conduct research, teach, and/or to participate in leadership roles in prevention, assessment, and non-medical management of auditory and balance system disorders.

It is anticipated that potential students seeking a joint Au.D./Ph.D. degree will have completed two semesters of study in the Au.D. program. Audiology clinical researchers and researchers with clinical expertise provide

value in translating the advances in basic research to clinical practice and vice versa. Because of their in-depth clinical training, combined with extensive academic research/scholar training, Au.D./Ph.D. students offer unique perspectives with which to view hearing and balance problems. Strengths include facilitation of inter-professional training opportunities, participation on translational research teams, and introduction of new and innovative diagnostic and intervention techniques and strategies. Specialized training in hearing and balance issues coupled with the rigor of an interdisciplinary academic research/scholar program prepares students for the highly rewarding field of clinical research in a wide variety of settings.

Students applying for admission to the Au.D./Ph.D. dual option are required to have completed two semesters of study in the Doctor of Audiology program prior to application. Au.D. students interested in pursuing a dual degree should consult with their advisor and/or the Ph.D. and Au.D. program directors prior to application. The student, Au.D. advisor, and Ph.D. advisory committee will develop a program of study designed to meet the individual needs of the student.

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the program [website](#).

- Attendance
- Class and Clinic Hours
- Computer Usage and Access
- Expected Student Performance and Progression
- Official Correspondence
- Outside Employment
- Professionalism
- Social Networking
- Supervision in Clinics and Laboratories
- Student Responsibilities
- Student Transportation

PROGRAM COSTS

The total cost of the eleven semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

AUDITORY-BASED INTERVENTION – POST-BACHELOR’S CERTIFICATE

Department of Audiology and Speech Pathology

Auditory-Based Intervention Website:

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The Certificate in Auditory Based Intervention (ABI) is offered to currently enrolled full-time students in either the Audiology or Speech-Language Pathology (M.S. or Ph.D.) program as a specialty, supplemental course of study to the degree programs to which they have been accepted. Additionally, ABI coursework will be available online to practicing professionals interested in upleveling knowledge and skills to work with children who are deaf or hard of hearing and who are accessing spoken language through listening technologies. Speech language pathologist, audiologists, teachers, early interventionists and other interested service providers will be eligible to enroll this multi-level professional learning track which would result in a certificate upon completion of the program in its entirety. The purpose of this certificate is to provide a strong foundation for aspiring professionals who wish to provide listening and spoken language services to children who are deaf/hard of hearing. In addition to academic coursework, candidates will obtain a significant number of supervised/mentored contact hours working with children who are deaf/hard of hearing.

ACCREDITATION

There is no accrediting body for the Auditory Based Intervention graduate certificate program. However, the University of Arkansas for Medical Sciences is accredited by the Higher Learning Commission, a Commission of the North Central Association of Colleges and Schools. The address and telephone number of the Commission are as follows: 30 North LaSalle Street, Suite 2400, Chicago, Illinois 60602-2504, 1-800-621-7440. Website: www.ncahlc.org

APPLICATION PROCEDURES

Admission to the program is competitive and is based on academic achievement and aptitude, leadership and professionalism and a demonstrated commitment to needs of individuals who are deaf or hard of hearing. Students apply to the program by contacting Dr. Mary Ellen Nevins (501-569-8249).

CURRICULUM

Content areas include:

- Essential elements of listening and spoken language practice
- Listening, language learning, and literacy
- Family-centered intervention
- Listening technologies and auditory management
- Effective communication for interprofessional collaboration
- Advocacy
- Telepractice for auditory-based intervention
- Assessments, instructional designs and outcomes
- Supervised/mentored practicum

CLINICAL NUTRITION – MASTER OF SCIENCE DEGREE

Department of Dietetics and Nutrition

Clinical Nutrition [Website](#):

UAMS Graduate School

University of Arkansas for Medical Sciences
4301 West Markham Street, #601
Little Rock, AR 72205

Telephone: (501) 686-5454

Email: graduateschool@uams.edu

Website: <http://gradschool.uams.edu/>

THE PROGRAM

The clinical nutrition program offers a Master of Science in Clinical Nutrition through the UAMS Graduate School. The program includes both full-time and part-time enrollment options. The program has a thesis and a non-thesis option, both of which require completion of 36 semester credits. Students also select one of four areas of emphasis as a subspecialty: geriatric nutrition, pediatric nutrition, community nutrition, or nutrition in health, wellness, and sports.

Successful completion of all program requirements qualifies the student (or graduate) to be employed in academic, research, clinical, and community nutrition facilities.

APPLICATION PROCEDURES

Applicants must provide:

- Application for Admission:** The application is required and is available on the Graduate School [website](#). Practitioners or other graduate students may apply as special non-degree students directly to the Department of Dietetics and Nutrition.
- Application Fee:** None
- Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work to the Graduate School. A minimum cumulative GPA of 2.85 (4.0 scale) is required to apply for admission.
- GRE Scores:** Scores must be sent directly to the Graduate School from GRE. Institution code: 6146.
- Letters of Reference:** Three letters of reference from undergraduate professors in your major, directors of an Internship or other practice program, and/or employers must be sent to the Graduate School.

*Students pursuing the Master of Science degree in Clinical Nutrition are considered to be students in the UAMS Graduate School who are taking courses offered by the faculty of the College of Health Professions. Accordingly, the Graduate School Catalog is considered the primary catalog for all students in this program. All provisions (including grievance procedures) in the Graduate School Catalog and the Graduate School Handbook are the authority applicable to students pursuing the Master of Science degree in Clinical Nutrition.

- TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of the Graduate School catalog.

Master of Science students seeking admission to the dietetic internship program must use the dietetic internship application process. Acceptance to the Master of Science program does not ensure admission to the dietetic internship program.

ADMISSION FACTORS

- Academic achievement
- Academic aptitude
- Personal or professional endorsement

CURRICULUM

The program requires a total of 36 semester hours of coursework. The thesis option include: 1) six (6) hours of master's thesis, 2) 27 hours of required courses, and 3) three (3) hours of supportive/elective courses. The non-thesis option include: 1) three (3) hours of research 2) 27 hours of required courses, and 3) six (6) hours of supportive/elective courses. A combined maximum of 12 credits of course work may be transferred from the UAMS/CAVHS dietetic internship and a maximum of 6 credits as electives from other accredited colleges and universities. Required courses must be completed within the department. A specific degree plan will be prepared for each student.

Required Courses

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the department [website](#).

PROGRAM COSTS

The total cost of the four semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

COMMUNICATION SCIENCES AND DISORDERS – MASTER OF SCIENCE DEGREE

Department of Audiology and Speech Pathology

Communication Sciences and Disorders Website

UAMS Graduate School

University of Arkansas for Medical Sciences
4301 West Markham Street, #601
Little Rock, AR 72205

Telephone: (501) 686-5454
Email: graduateschool@uams.edu
Website: <http://gradschool.uams.edu/>

THE PROGRAM

The Communication Sciences and Disorders program is a full-time program beginning each fall semester. It consists of four fall/spring semesters with one intervening summer semester. The program is a consortium between the College of Health Professions at the University of Arkansas for Medical Sciences and the College of Education and Health Professions at the University of Arkansas at Little Rock. This unique educational consortium combines the academic and clinical resources of a major medical sciences campus with a large, comprehensive, urban university. Practicum experiences are provided at a large number of clinical sites in the central Arkansas area.

Graduates of this program are eligible to apply for the Certificate of Clinical Competence through the American Speech-Language-Hearing Association and to apply for licensure in Speech Pathology with the Arkansas Board of Examiners in Speech Pathology and Audiology. Successful completion of the program does not itself ensure certification and/or licensure. All students are responsible for familiarizing themselves with the applicable certification and licensure requirements.

The Master of Science in Communication Sciences and Disorders consists of a minimum of 49 semester credit hours. Students choosing the thesis option can count up to 6 credits of ASP 600V-Thesis toward the 49 credit minimum. Those choosing the research project option can count up to 3 credits of ASP 516V-Independent Research toward the 49 credit minimum. Students must pass a comprehensive examination.

ACCREDITATION

The Master of Science degree program in Communication Sciences and Disorders at the University of Arkansas for Medical Sciences/University of Arkansas at Little Rock is accredited by the Council of Academic Accreditation in Audiology and Speech-Language Pathology of the American Speech-Language-Hearing Association, 2200 Research Boulevard #310, Rockville, Maryland 20850. Telephone: (800) 498-2071 or (301) 296-5700. Website: www.asha.org.

APPLICATION PROCEDURES

The deadline for all application materials is **February 1**. The application process for the Master of Science in Communication Sciences and Disorders at the University of Arkansas for Medical Sciences is a two-step process. Applicants should begin the process the previous October. Applicants who wait until January to begin the process often do not meet the **February 1** deadline.

1. By **February 1**, complete the online application located on the UAMS Graduate School website.
2. By **February 1**, complete a centralized online application that goes directly to the program in Communication Sciences and Disorders.

To access this system log on at: <http://portal.csdcas.org>. This is where you will create your application and monitor your application status (i.e., to determine if your application is complete). You will need to submit the following documents to complete your application:

1. Submit an official transcript from each college from which you received course credit even if past course work appears on a later transcript. Download the CSDCAS transcript request form and send that to each school's registrar. Send all transcripts for the program application to the following address:

CSDCAS
P.O. Box 9113
Watertown, MA 02471

*If you are admitted to the UAMS Communication Sciences and Disorders program you will also need to provide official transcripts from all colleges you have attended to the UAMS Graduate School before you can enroll.

2. Three Letters of Recommendation. At least two of these recommendations should be from academic faculty members who are familiar with your course work in the major. Letters of recommendation should be completed within the CSDCAS system.

3. GRE Scores: You **must give ETS both** of the following codes when taking the GRE: **UAMS is 6901** and **CSDCAS is 7504**. If you do not do this you will be charged additional fees from ETS to have your scores sent to either UAMS or CSDCAS.
4. Personal Statement. Describe your motivations for pursuing a career in speech-language pathology at the University of Arkansas for Medical Sciences. State why you want to be a speech-language pathologist and why you think the UAMS graduate program is a good fit for you. Tell us why you think you will be a successful candidate. We are interested in knowing how you have prepared for graduate study; identify your strengths and challenges.

Both the UAMS Graduate School online application and the Centralized Program Application must be completed by **February 1**. Applications not completed by this date or incomplete applications will not be considered in the application process.

Before starting the Central Program Application process please carefully read all Frequently Asked Questions (FAQs) and Instructions to better understand how the process works and what to expect. If you are reapplying, please review these again as this information has been updated.

CSDCAS Customer Service is available Monday through Friday, 9:00 AM to 5:00 PM EST. Phone: 617-612-2030; Email: csdcasin@csdcas.org.

Although this is a consortium program between the University of Arkansas at Little Rock (UALR) and the University of Arkansas for Medical Sciences (UAMS), **DO NOT** send any application materials to the UALR Graduate School.

The UAMS Audiology & Speech Pathology department offers a limited number of assistantships. If you would like to submit an application for an assistantship please contact Mrs. Beth McWeeny at exmcweeny@ualr.edu to obtain the proper forms.

Students whose degrees are not in Communication Sciences and Disorders or Speech-Language Pathology must complete a sequence of ten pre-professional communicative disorders courses before admission into the program. Dr. Donna Kelly advises all such post-baccalaureate students. She can be reached by phone through the Department of Audiology and Speech Pathology at (501) 569-3154 or by email at djkelly@ualr.edu.

If you have questions regarding admission please contact Dr. Kathy L. Shapley in the Department of Audiology and Speech Pathology at (501) 682-1456 or by email at klshapley@ualr.edu.

ADMISSION FACTORS

Admission to the Master of Science degree program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Leadership and professionalism
- Written and oral communication

CURRICULUM

The following 49 credits are required in the program.

		<u>Year 1</u>	
Course	Title		Semester Credit
Fall			
CSD 5093	Neurogenic Language Disorders		3
CSD 505V	Practicum		1
CSD 5113	Language Assessment & Therapy		3
CSD 5133	Infant-Toddler Communication		<u>3</u>
			10
Spring			
CSD 5012	Research Methods		3
CSD 505V	Practicum		1
CSD 5122	Fluency Disorders		2
CSD 5192	Neurogenic Speech Disorders		2
CSD 5213	Dysphagia		<u>3</u>
			11
Summer			
CSD 505V	Practicum		1
CSD 513V	Topics in SLP (Literacy)		2
CSD 5183	Advanced Articulation Disorders		<u>3</u>
			6
		<u>Year 2</u>	
Fall			
CSD 505V	Practicum		3
CSD 515V/600V	Research/Thesis		3
CSD 5163	Auditory Based Intervention		3
CSD 5293	Multicultural Issues		<u>3</u>
			12
Spring			
CSD 5042	Augmentative & Alternative Comm.		2
CSD 505V	Practicum		3
CSD 5253	Voice Disorders		<u>3</u>
			8
Plus 2 hours of <u>elective course work</u> chosen from the following:			
CSD 513V	Topics in SLP (Partners)		3
CSD 5143	Sociolinguistics		2
CSD 516V	Independent Study		1-3
CSD 5173	Counseling in Communication Dis.		3
CSD 5262	Craniofacial Speech Disorders		2
CSD 600V	Thesis		3
TOTAL			49-50

PROGRAM POLICIES

The following program policies and procedures can be found in the student handbook on the department [website](#):

- Acceptable Grades for Progression*
- Computer Usage
- E-mail
- Responsibilities as a M.S, student
- Student Behavior and Dress
- Student Supervision in the UALR Speech and Hearing Clinic and in Off-Campus Sites

*Students pursuing the Master of Science degree are considered to be students in the Graduate School of the University of Arkansas for Medical Sciences who are taking courses offered by the faculty of the College of Health Professions. Accordingly, the Graduate School Catalog is considered the primary catalog for all students in this program. All provisions (including grievance procedures) in the Graduate School Catalog and the Graduate Student Handbook are the authority applicable to students pursuing the Master of Science degree in Communication Sciences and Disorders.

PROGRAM COSTS

The total cost of the five semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

GRADUATE ASSISTANTSHIPS

The UAMS Audiology & Speech Pathology department offers a limited number of assistantships. If you would like to submit an application for an assistantship please contact Mrs. Beth McWeeny at exmcweeny@ualr.edu to obtain the proper forms.

COMMUNICATION SCIENCES AND DISORDERS – DOCTOR OF PHILOSOPHY DEGREE

Department of Audiology and Speech Pathology

Communication Sciences and Disorders Website

UAMS Graduate School

University of Arkansas for Medical Sciences
4301 West Markham Street, #601
Little Rock, AR 72205

Telephone: (501) 686-5454
Email: graduateschool@uams.edu
Website: <http://gradschool.uams.edu/>

THE PROGRAM

The Department of Audiology and Speech Pathology offers the Doctor of Philosophy degree in a consortium with the College of Health Professions at the University of Arkansas for Medical Sciences, the College of Professional Studies at the University of Arkansas at Little Rock, and the College of Health and Applied Sciences at the University of Central Arkansas call the Arkansas Consortium for the Ph.D. in Communication Sciences and Disorders. This unique educational consortium combines the academic and clinical resources of a major medical sciences campus with those of two large, comprehensive universities. The curriculum is designed to emphasize the science of speech, language, and hearing, the acquisition of knowledge through research about human communicative disorders, and the advanced study and practice of methods for evaluation and treatment of those disorders. The consortium accepts applications for admission to the program for both full- and part-time students. Students may apply and be admitted to the Ph.D. program each semester but fall application is encouraged. Students enrolled in the consortium program full-time must enroll in at least 9 semester credit hours during the fall or spring semesters. Full time requirements for summer vary depending upon financial aid status. Part-time students must enroll in a minimum of 5 semester credit hours each semester.

ACCREDITATION

The Ph.D. program is accredited by the Higher Learning Commission, a Commission of the North Central Association of Colleges and Schools. The address and telephone number of the Commission are as follows: 30 North LaSalle Street, Suite 2400, Chicago, Illinois 60602-2504, 1-800-621-7440. Website: www.ncahlc.org.

APPLICATION PROCEDURES

Applicants must provide the following materials to the UAMS Graduate School.

1. **Application for Admission:** The application is required and is available on the Graduate School website.
2. **Application Fee:** There is no application fee.
3. **GRE Scores:** Official scores (within the past five years) must be sent directly from GRE.

4. **Official Transcripts:** Arrange for each college or university (graduate and undergraduate) you have attended to forward an official transcript of your course work.
5. **Letters of Reference:** Three letters of recommendation required from most recent academic program.
6. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

Send letters, scores and transcripts to:

Graduate School
University of Arkansas for Medical Science
4301 W. Markham St., Slot #601
Little Rock, Arkansas 72205

Applicants must provide the following materials to the Consortium Admission Committee:

1. Consortium application (available on the program website)
2. On-site writing sample (completed at time of interview)

Send consortium application to:

Dr. Betholyn Gentry
Chair, Admissions Committee
Audiology and Speech Pathology Department
University of Arkansas at Little Rock
2801 South University Ave.
Little Rock, AR 72204-1099

Qualified applicants will be contacted to arrange an interview.

ADMISSION FACTORS

Admission to the Ph.D. program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Written and oral communication
- Personal endorsement

PREREQUISITES

Students applying for admission to the program are required to have earned a bachelor's or master's degree in audiology or speech pathology from a program accredited by the American Speech-Language Hearing Association or a degree in a related discipline.

CURRICULUM

A minimum of 70 credits of specified course work is required by individuals who currently hold a master's degree in speech-language pathology or audiology. The Ph.D. will be awarded to those candidates who successfully complete all required course work (including any additional courses deemed necessary by the candidate's graduate committee). The semester and year of courses offerings vary based on student need. The curriculum emphasizes the development of research skills and advanced study of communication sciences and disorders. Students must pass a comprehensive examination and successfully defend their dissertations. Degrees are awarded upon successful completion of all academic and research requirements.

The curriculum is divided into the following categories and minimum requirements:

Area/Typical Course Title	Credits
Research and Statistics	
Advanced Research Methods	3
Research Project (variable credit)	6
Statistics Sequence (three courses)	9
Dissertation	<u>18</u>
	36
Major Area of Study	
Doctoral Seminars in Speech, Language, or Hearing (Four courses)	12
Minor Area of Study	
Doctoral Seminars in Speech, Language, or Hearing (Two courses)	6
Collateral Area of Study	
Courses from departments outside of the program (Two courses)	6
Professional Development	
Teaching Pedagogy	3
Teaching Internship	2
Grant Writing	2
Grant Writing Internship	1
Supervision Internship	<u>2</u>
	10
TOTAL	<u>70</u>

PH.D./AU.D. DUAL DEGREE OPTION

The Ph.D./Au.D. dual degree prepares individuals to conduct research, teach, and/or to participate in leadership roles in prevention, assessment, and non-medical management of auditory and balance system disorders.

It is anticipated that potential students seeking a joint Ph.D./Au.D. degree will be practicing audiologists with an earned Master's degree. Audiology clinical researchers and researchers with clinical expertise provide value in translating the advances in basic research to clinical practice and vice versa. Because of their in-depth clinical training, combined with extensive academic research/scholar training, Ph.D./Au.D. students offer unique perspectives with which to view hearing and balance problems. Strengths include facilitation of inter-professional training opportunities, participation on translational research teams, and introduction of new and innovative diagnostic and intervention techniques and strategies. Specialized training in hearing and balance issues coupled with the rigor of an interdisciplinary academic research/scholar program prepares students for the highly rewarding field of clinical research in a wide variety of settings.

Students applying for admission to the Ph.D./Au.D. dual option are required to have completed one semester of study in the Communication Sciences and Disorders Consortium Ph.D. program prior to application. Ph.D. students interested in pursuing a dual degree should consult with their research mentor, program committee and/or the Ph.D. and Au.D. program directors prior to application. The student, Ph.D. mentor, and advisory committee will develop a program of study designed to meet the individual needs of the student.

PROGRAM POLICIES

The following program specific policies and procedures can be found on the program website:

- Full-Time/Part-Time Status
- Leave of Absence Policy
- Retention/Probation Policy
- Transfer Credit Policy

PROGRAM COSTS

Tuition and fees for specific courses are assessed by where the course is taken and where the faculty member who teaches the course is employed. For instance, for all Consortium Program courses, if the course is taught by a UALR/UAMS faculty member in Little Rock, the UAMS tuition and fees apply. If a course is taught by a UCA faculty member, the UCA tuition and fees apply. In instances where a student enrolls in a non-program course (statistics or collaterals), the tuition and fees will be assessed from the institution where the course is taught.

The processes for paying tuition and fees to the consortium institutions vary depending upon if students have external or internal funding, have applied for federal student loans, and for those not funded. Please contact Dr. Betholyn Gentry at gentrybetholyn@uams.edu for instructions on how your tuition and fees should be paid each semester.

For information about current tuition and fees per institution please see:

UAMS Tuition and Fees

www.uams.edu/gradschool/students

CYTOTECHNOLOGY – BACHELOR OF SCIENCE DEGREE

Department of Laboratory Sciences

Cytotechnology [Website](#)

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

Cytotechnology is a full-time, day program with one cohort of up to 10 students beginning each fall semester. It is a 12 month program that requires completion of three semesters (fall, spring, summer) upon which a Bachelor of Science in Cytotechnology is awarded. Graduates of the cytotechnology program are eligible to apply to take the national registry certification examination in cytotechnology given by the American Society of Clinical Pathology Board of Certification. The program's mission, goals, and competencies can be found on the department website.

The Bachelor of Science in Cytotechnology consists of 80 semester credits of prerequisite course work and 40 semester credits in the cytotechnology program for a total of 120 credits.

ACCREDITATION

The cytotechnology program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater, Florida 33756. Telephone: (727) 210-2350. Website: www.caahep.org.

APPLICATION PROCEDURES

All application materials must be received by **May 15** to be considered for admission. Early consideration will be given to those who have submitted complete applications by the early consideration deadline, March 1. Send all requested materials to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A minimum cumulative GPA and biological science GPA of 2.50 is required to be considered for admission.
4. **Interview:** Qualified applicants are contacted to arrange an interview to be conducted in small groups.

5. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission is competitive and based on the following factors:

- Academic achievement
- Leadership and professionalism
- Written and oral communication

PREREQUISITES

The following 80 credits are required for admission. These credits may be completed at any regionally accredited college or university, and must fulfill all College requirements regarding acceptance of transfer credit.

Area/Typical Course Title	Minimum Credits
CORE CURRICULUM	
English Composition	6
History	
History of Civilization or World History	3
American History or U.S. Government	3
Social Sciences	6
Speech Communication	3
Fine Arts	3
Humanities	3
Electives	<u>22</u> 49
SCIENCE AND MATHEMATICS REQUIREMENTS	
Biological Science	20
(Recommended Biological Science courses include: General Biology, Cell Biology, Genetics, Microbiology, Anatomy & Physiology, and Histology)	
Chemistry	8
Mathematics	
College Algebra or higher level mathematics	<u>3</u>
TOTAL	<u>31</u> 80

CURRICULUM

The following 40 SC are required in the program:

Course #	Title	Credits
Fall		
CYTO 4411	Introduction to Cytotechnology	4
CYTO 4412	Gynecological Cytopathology I	4
CYTO 4313	Gynecological Cytopathology II	3
CYTO 4614	Non-Gynecological Cytopathology I	<u>6</u>
		17
Spring		
CYTO 4126	Molecular Diagnostics Laboratory	1
CYTO 4221	Laboratory Operations	2
CYTO 4225	Molecular Diagnostics	2
CYTO 4424	Cytology Internship I	4
CYTO 4623	Non-Gynecological Cytopathology II	<u>6</u>
		15
Summer		
CYTO 4331	Comprehensive Cytotechnology	3
CYTO 4531	Cytology Internship II	<u>5</u>
		<u>8</u>
TOTAL		40

A letter grade of "C" or better is required for the student to progress in the program.

PROGRAM COSTS

The total cost of the three semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

DENTAL–GENERAL PRACTICE RESIDENCY

Center for Dental Education

General Practice Residency Website

Center for Dental Education

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #624
Little Rock, AR 72205

Telephone: (501) 686-8089
Email: DentalEducation@uams.edu
Website: <http://dentaeducation.uams.edu/>

THE PROGRAM

The General Practice Residency (GPR) program is a full-time program with one cohort of two residents beginning each July. It consists of 12 months of advanced dental education in clinical dentistry and is conducted primarily within a hospital environment.

The GPR is a postdoctoral educational program designed to provide essential skills, attitudes and abilities related to the contemporary practice of advanced general dentistry, with emphasis on total patient-centered care. The program provides the resident the opportunity to augment his/her knowledge of oral disease and his/her diagnostic and therapeutic skills in dentistry. Treatment of oral disease in the medically complex patient and/or hospitalized patient is emphasized. A private practice environment is maintained throughout the program to assist the recent dental school graduate in the transition from academics to “real world dentistry.”

The program has didactic and clinical components. Two-week clinical rotations provided in emergency medicine, internal medicine, otolaryngology, and anesthesia. Each resident also participates in two two-week clinical rotations at Arkansas Children’s Hospital with focus on pediatric and special needs dentistry. Through the year, each resident will spend 12 days at the Harmony Health Clinic and 12 days at the UAMS 12th Street Health and Wellness Clinic.

Successful completion of all program requirements qualifies the student to receive a Certificate of Completion. The program’s mission, goals, and competencies/learning outcomes can be found on the program website.

ACCREDITATION

This program is not fully-operational and is in initial accreditation with the Commission on Dental Accreditation of the American Dental Association, 211 East Chicago Avenue, Suite 1900, Chicago, Illinois 60611.

Telephone: (312) 440-2500.
Website: www.ada.org/en/coda.

APPLICATION PROCEDURES

For those applying for entrance in **July 2015**, the UAMS GPR program will not be participating in the Postdoctoral Dental Matching Program (“MATCH”). All interviewed applicants are eligible for acceptance into the first year program, and early offers of acceptance may occur prior to the current end-of-year MATCH deadline.

Applicants must be a graduate of a fully-accredited North American dental school. Successful completion of the National Boards Part I is required.

All application materials must be received by **March 1, 2015** to be considered for admission. Send all requested material to the UAMS Center for Dental Education at the address at the top of this page.

Applicants must provide:

1. **Official Transcripts:** Arrange for your dental school to mail an official transcript of your course work to the Center for Dental Education at the address at the top of this page. Only transcripts sent to us directly from the institution will be considered official.
2. **Essay:** The submission of a written essay is required.
3. **Letters of Recommendation:** Provide three letters of recommendation from your dental school professors.
4. **Interview:** The most qualified applicants will be contacted after the admissions deadline to arrange an interview.

Applicants for 2016: For those applying for entrance in **July 2016**, all applicants must apply through the American Dental Education Association’s Postdoctoral Application Support Service (PASS) program. In order to meet the **October 15, 2015** application deadline, completed PASS documents should be submitted to the PASS office no later than **October 1, 2015**. Late applications may not be reviewed. Application materials can be obtained from your dental school or by writing:

ADEA PASS
1625 Massachusetts Avenue N.W., Suite 600
Washington, D.C. 20036-2212
Telephone: (202) 332-8795

CURRICULUM

The didactic portion of the curriculum includes lectures, patient care conferences, and journal club. Topics include, but are not limited to:

- ACLS
- Advanced Dental Therapeutics
- AHA/EKG: Review and Competency Test
- Anesthesia
- Behavior Management for the Pediatric Patient
- Conscious Sedation
- Dental Emergencies
- Dental Implants
- Dental Management of Special Needs Patients
- Dental Management of the Medically Compromised Patient
- Dental Restorations: Techniques, Pearls, Decisions
- Dental Sleep Medicine
- Emergency Medicine
- Endodontics
- Ethics and Patient-Focused Care
- Full Mouth Reconstruction
- Geriatric Patient Care
- Interprofessional Health Care
- Management of Traumatic Dental Injuries
- Oral Pathology
- Oral Surgery
- Orofacial Pain
- Orthodontics
- Pediatric Dentistry
- Periodontics
- Pharmacology
- Principles of Practice Management/Jurisprudence
- Radiation Oncology: The Cancer Patient
- Removable Prosthodontics
- Sedation, Pain and Anxiety Control
- Treatment of TMD
- Writing Medical Consults

The program's clinical curriculum includes rotations in emergency medicine, internal medicine, otolaryngology, anesthesia, dental specialties, and pediatric and special needs dentistry.

PROGRAM POLICIES

Program specific policies and procedures can be found in the resident handbook on the program [website](#).

PROGRAM COSTS

There are no program costs.

HEALTH INSURANCE

- Health Insurance is required. Residents will be UAMS employees and will be able to participate in UAMS benefits in accordance with full-time employment.

DENTAL HYGIENE – ASSOCIATE OF SCIENCE DEGREE BACHELOR OF SCIENCE DEGREE

Department of Dental Hygiene

Dental Hygiene Website

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The dental hygiene program is a full-time, day program with one cohort of 34-36 students beginning each fall semester. It consists of four fall/spring semesters with one intervening summer session. The program's mission, goals, and clinical competencies/learning outcomes can be found on the department website.

Successful completion of all program requirements qualifies the student to apply for state, regional, and national examinations required for licensure. Successful completion of the program does not itself insure certification.

Associate of Science Degree Option

The Associate of Science in Dental Hygiene consists of 39 semester credits of prerequisite course work and 68 credits in the dental hygiene curriculum for a total of 107 credits.

Bachelor of Science Degree Option

The Bachelor of Science in Dental Hygiene consists of the same 39 semester credits of prerequisite course work and 68 credits in the dental hygiene curriculum, plus 13 credits of additional course work for a total of 120 credits. These 13 additional credits must be completed prior to graduating from the dental hygiene program.

ACCREDITATION

The program is accredited by the Commission on Dental Accreditation of the American Dental Association, 211 East Chicago Avenue, Suite 1900, Chicago, Illinois 60611.

Telephone: (312) 440-2500.

Website: www.ada.org/100.aspx.

APPLICATION PROCEDURES

All application materials must be received by **May 20** to be considered for admission. No applications will be reviewed after this date. Send all requested material to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the [CHP website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A minimum cumulative and prerequisite GPA of 2.75 is required to apply for admission. Additionally, applicants must have completed all of the prerequisite course work prior to the application deadline.
4. **Professional Observation Form:** A professional observation form signed by a dentist or a dental hygienist that documents at least 20 observation hours in a dental office or actual dental assisting experience **must be submitted before the deadline**. The professional observation form is available on the [program website](#).
5. **Interview:** The most qualified applicants will be contacted after the admissions deadline to arrange an interview to be conducted in small groups.
6. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the dental hygiene program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Leadership and professionalism
- Written and oral communication

PREREQUISITES

The following 39 credits are required for admission. All listed courses are required from a regionally accredited post-secondary academic institution, and must fulfill all College requirements regarding acceptance of transfer credit. If in doubt of the suitability of the following prerequisite courses, please contact the CHP Welcome Center.

Area/Typical Course Title	Minimum Credits
SCIENCE AND MATHEMATICS	
Chemistry	
Principles of chemistry course with laboratory	4
Biology	
Principles of biology course with laboratory (A Zoology course is also acceptable.)	4
Microbiology	
One semester course with a laboratory	4
Mathematics	
College Algebra or higher mathematics	$\frac{3}{15}$
LIBERAL ARTS	
History	
History of the United States or National Government	3
English Composition	
Two-semester sequence of English Composition	$\frac{6}{9}$
FINE ARTS	
Music, Art, Theater	3
HUMANITIES	
Philosophy, Political Science, Literature, or Humanities	3
SOCIAL SCIENCES	
Psychology	
General Psychology	3
Sociology	
Introduction to Sociology	$\frac{3}{6}$
COMMUNICATIONS	
Speech Communication	
Fundamentals of Speech or Speech Communication	$\frac{3}{39}$
TOTAL	39

Chemistry, biology, and microbiology courses must include laboratory sections and must have been completed not more than seven years prior to entry into the program. Credit by examination will not be given for the science courses. A course grade of "C" or higher must be achieved to satisfy program prerequisite and core curriculum requirements.

Proof of successful completion of course work taken in a semester immediately preceding entry into the professional curriculum must be presented before registration.

A grade of "F" or a mark of "U" or "NC" is not acceptable for progression to the next semester, nor is it acceptable for graduation if it occurs in the last semester of the program. A grade of "D" in the following professional courses is not acceptable for progression to the next semester, nor is it acceptable for graduation if it occurs in the last semester of the program: Dental Hygiene Theory (DHY 2312), Dental Hygiene Preclinic (DHY 2413), Dental Radiography I (DHY 2217), Dental Hygiene Clinic I (DHY 2521), Dental

Radiography II (DHY 2223), Local Anesthesia (DHY 3246), Dental Hygiene Clinic II (DHY 3531), Dental Hygiene Clinic III (DHY 3541), Dental Hygiene Clinic—Summer (DHY 3145), Dental Hygiene Seminar I (DHY 2119), Dental Hygiene Seminar II (DHY 3119).

ADDITIONAL BS DEGREE REQUIREMENTS

The following 13 credits are required before graduating from the dental hygiene program:

Area/Typical Course Title	Minimum Credits
History of Civilization	6
Upper Level Electives	<u>7</u>
TOTAL	13

CURRICULUM

The following 68 credits are required in the program:

Course #	Title	Year 1	Credits
Fall			
DHY 2116	Oral Embryology and Histology		1
DHY 2119	Dental Hygiene Seminar I		1
DHY 2215	Oral Anatomy		2
DHY 2217	Dental Radiography I		2
DHY 2312	Dental Hygiene Theory		3
DHY 2314	Human Anatomy and Physiology I		3
DHY 2413	Dental Hygiene Preclinic		<u>4</u>
			16
Spring			
DHY 2119	Dental Hygiene Seminar I (continued)		
DHY 2223	Dental Radiography II		2
DHY 2425	Human Anatomy and Physiology II		4
DHY 2521	Dental Hygiene Clinic I		5
DHY 3434	Pathology		<u>4</u>
			15
Summer			
DHY 3145	Dental Hygiene Clinic—Summer		1
DHY 3246	Local Anesthesia		<u>2</u>
			3
Year 2

DHY 2327	Dental Materials		3
DHY 3119	Dental Hygiene Seminar II		1
DHY 3332	Pharmacology		3
DHY 3335	Periodontology		3
DHY 3344	Community Dentistry I		3
DHY 3531	Dental Hygiene Clinic II		<u>5</u>
			18
Spring			
DHY 3119	Dental Hygiene Seminar II (continued)		
DHY 3245	Community Dentistry II		2
DHY 3333	Nutrition		3
DHY 3342	Management of Patients with Special Needs		3
DHY 3343	Practice Management		3
DHY 3541	Dental Hygiene Clinic III		<u>5</u>
			16
TOTAL			68

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the department [website](#):

- Acceptable Grades for Progression
- Attendance Policy
- Computer Usage
- CPR Certification
- E-mail
- Examination Protocol
- Grading Scales
- Requesting Extra Clinic Time
- Responsibilities as a UAMS Dental Hygiene Student
- Social Networking
- Student Behavior and Dress
- Student Supervision in the Clinic and Laboratory
- Student Transportation, Parking, and Clinic Rotation Hours

PROGRAM COSTS

The total cost of the five semester program can be found on the college [website](#). Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#)

PERFORMANCE REQUIREMENTS

In order to accomplish the objectives of the dental hygiene program, students must be able to meet the following performance requirements:

- Professional attitude during all phases of the application process. If at any time during the process, it is determined that your attitude or actions are unprofessional, your application may not be considered for acceptance.
- Visual acuity with corrective lenses to identify oral tissue changes and evaluate treatment effectiveness.
- Hearing ability with auditory aids to understand normal speaking voice without viewing the speaker's face and take/hear blood pressure with a stethoscope.
- Physical ability to sit for prolonged periods of time, perform repetitive wrist motion for instrumentation, and move from room to room or maneuver in limited spaces.
- Written and verbal communication skills to succinctly describe patient conditions, document findings in a patient record and implement oral health teachings.
- Manual dexterity to use a variety of instruments in the small, confined space of the oral cavity.
- Function safely under stressful conditions with the ability to adapt to an ever changing environment inherent in clinic situations involving patient care.
- Computer skills to use a variety of software programs and the Internet for research and course projects; Microsoft PowerPoint utilized for presentations.

DIAGNOSTIC MEDICAL SONOGRAPHY –BACHELOR OF SCIENCE DEGREE

Department of Imaging and Radiation Sciences

Diagnostic Medical Sonography Website

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The diagnostic medical sonography program is a full-time program with a cohort of 12 students beginning each fall semester. It consists of four fall/spring semesters with one intervening summer session.

The program requires successful completion of 48 semester credits of prerequisite courses and 72 credits of program course work for a total of 120 credits.

The program also has an online Career Ladder track for ARDMS-certified sonographers who want to pursue a bachelor's degree. No additional clinical education is required.

Successful completion of all program requirements qualifies the student to apply for state, regional, and national examinations for licensure. The program's mission goals, and competencies/learning outcomes can be found on the department website.

To earn these credentials, candidates must pass the following American Registry for Diagnostic Medical Sonography (ARDMS) examinations:

Registered Diagnostic Medical Sonographer (RDMS): Sonography Principles and Instrumentation **AND** Abdomen, **OR** OB/GYN, **OR** Neurosonology, **OR** Breast Sonography, **OR** Fetal Echocardiography.

Registered Vascular Technologist (RVT): Sonography Principles and Instrumentation **AND** Vascular Technology.

Registered Diagnostic Cardiac Sonographer (RDMS): Sonography Principles and Instrumentation **AND** Adult Echocardiography, Pediatric or Fetal Echocardiography.

Successful completion of the program does not in itself ensure registration. Each student is responsible for familiarizing himself/herself with the applicable registration requirements. See: www.ARDMS.org.

TWO TRACKS

There are two entry points for applicants to the DMS program.

1. **Traditional Program:** Applicants may be accepted if they have completed all 48 credits of prerequisite course work. Senior students will select one of two areas of

concentrations in either vascular sonography or adult echocardiography. The 48 credits of prerequisite courses plus the 72 credits of professional courses equals the 120 credits requirement for a Bachelor of Science degree in Diagnostic Medical Sonography.

2. **B.S. Degree Completion:** Applicants who are certified by the American Registry for Diagnostic Medical Sonography (ARDMS) may be accepted into the online B.S. Degree Completion track if they have completed all 88 credits of prerequisite course work. A minimum of one visit to the UAMS campus is required during the first year in the program.
 - a. ARDMS certification.
 - b. 88 prerequisite credits transferred from any regionally accredited college or university, including:
 - i. A minimum of 47 credits of specific liberal arts and science courses.
 - ii. 41 credits of electives; 13 credits of which must be upper level (3000 or 4000) electives. The upper level electives may be completed concurrently at UAMS or transferred from any 4-year regionally accredited college or university.
 - c. The 88 prerequisite credits plus 32 credits in the career ladder track equals a total of 120 credits required for a Bachelor of Science degree in Diagnostic Medical Sonography. Of the 120 credits, a minimum of 40 credits must be upper level (3000 and 4000) courses.

ACCREDITATION

The program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP) in general, cardiac, and vascular imaging. The contact information is 1361 Park Street, Clearwater, Florida 33756. Telephone: (727) 210-2350. Website: www.caahep.org.

APPLICATION PROCEDURES

Traditional Program: Application materials must be received by **March 1** to be considered for admission. No applications will be reviewed after this date. Send all materials to the CHP Welcome Center unless otherwise instructed. Applicants must provide:

- Application for Admission:** The application is required and is available on the CHP [website](#).
- Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
- Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A minimum cGPA of 2.5 or higher for all undergraduate courses is required.
- Professional Observation:** Applicants are required to gain an understanding of the responsibilities and duties of the diagnostic medical sonographer through direct observation of an ARDMS Registered Sonographer in a hospital department where sonography is practiced and through discussion with current sonographers in the field. Details of the observation and a verification form are available at the program's website. The form must be received before the **March 1** deadline.
- Counseling:** Qualified applicants must present themselves in person for academic counseling in the division. This counseling session will be scheduled by the program.
- TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

Career Ladder: Applicants must provide:

- Application for Admission:** The application is required and is available on the CHP [website](#).
- Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
- Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A minimum cGPA of 2.5 or higher for all undergraduate courses is required.
- Proof of ARDMS Certification:** Fax a copy of your ARDMS certification card to (501) 526-7975, Attn: DMS Program.
- Essay:** Submit an essay of 450-550 words describing your personal history in sonography and why you want to pursue a Bachelor of Science degree in Diagnostic Medical Sonography online. This essay must be submitted as an electronic attachment (Rich Text Format, .rtf file or Word.doc file) to an email to the Division Director at: bakeranthonyl@uams.edu.

- TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the diagnostic medical sonography program is competitive and based on the following factors:

- Academic achievement
- Leadership and professionalism
- Written and oral communication

PREREQUISITES

Applicants must have completed, or be currently enrolled in, Introductory College Physics, College Algebra, and Anatomy and Physiology II before the **March 1** application deadline. Applicants may not have more than nine credits of remaining prerequisite courses that will be completed during the summer semester prior to enrollment in the fall.

The following 48 credits are required from an accredited college or university and must fulfill all College requirements regarding acceptance of transfer credit:

Area/Typical Course Title	Minimum Credits
SCIENCE	
College Algebra (or higher level Mathematics)	3
Anatomy and Physiology I and II (with laboratory)	8
Introductory College Physics*	<u>3</u>
	14
LIBERAL ARTS	
English Composition (two semester sequence)	6
American History or National Government	3
History of Civilization or World History (two semester sequence)	<u>6</u>
	15
SOCIAL SCIENCES	
Psychology	3
Sociology	<u>3</u>
	6
COMMUNICATIONS	
Speech or Oral Communication	3
COMPUTER SCIENCE	
Computer Fundamentals/Applications**	3
FINE ARTS	
Art, Music, Theater, Architecture, or Film	3
HUMANITIES	
Philosophy, Political Science, Literature, or Humanities	3
ELECTIVES	
	<u>1</u>
TOTAL	48

To be considered for acceptance into the program, the applicant must have earned a cGPA of 2.5 or higher at the time of application. In addition, only grades of "C" or higher are accepted in all course work.

*Introductory College Physics must cover acoustics, wave motion, heat, electricity, force, and energy.

**Computer fundamentals must be completed no more than seven years prior to admission into the program.

Actual course titles may vary among institutions. Consult the Division Director for preprofessional counseling.

Fulfillment of the Diagnostic Medical Sonography preprofessional curriculum does not assure admittance into the professional program (please see Application Procedures and Deadlines).

Not more than one course in the following group will be accepted in transfer to meet degree requirements: band, studio, physical education, military science, English as a second language (ESL), manual skills.

- Attendance, Absenteeism
- Infractions of Departmental Policy
- Policy on Pregnancy
- Professional Responsibilities
- Student Awards and Honors
- Student Responsibilities in the Classroom and Laboratory
- Student Responsibilities in the Clinical Area

PROGRAM COSTS

The total cost of the five semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

CURRICULUM

The following 72 credits are required in the program.

Course #	Title	Credits
<u>Year 1</u>		
Fall		
DMS 2310	Basic Patient Care	3
DMS 3211	Sectional Anatomy	2
DMS 3221	Gynecologic Sonography	2

All professional courses must be completed with a grade of "C" or higher for progression to the next semester and for graduation.

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the program [website](#):

DIETETIC INTERNSHIP – POST-BACHELOR’S CERTIFICATE

Department of Dietetics and Nutrition

Dietetics and Nutrition Website

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The dietetic internship program consists of a 40-week, full-time, experience with a minimum of 40 hours scheduled per week. Interns are required to enroll in 12 hours of graduate course work that includes clinical and administrative supervised practice experiences. Fourteen students are accepted into the internship program each year.

The program is jointly sponsored by the University of Arkansas for Medical Sciences and the Central Arkansas Veterans Healthcare System. Affiliations with a number of hospitals, school food services, and clinics in the central Arkansas area provide experiences that supplement and complement those received at the primary training sites.

Successful completion of the program requirements qualifies the graduate to apply for the national registration examination through The Commission on Dietetic Registration. Upon successful completion of the examination, the graduates become Registered Dietitians (RD) and eligible for state licensure. Successful completion of the program does not itself ensure registration or licensure. Each student is responsible for familiarizing himself/herself with the applicable registration and licensure requirements.

ACCREDITATION

The dietetic internship program is accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND) of The Academy of Nutrition and Dietetics, 120 South Riverside Plaza, Suite 2000, Chicago, IL 60606. Telephone: (800) 877-1600, ext. 5400 or (312) 899-0040. Website: www.eatright.org.

APPLICATION PROCEDURES

All application materials must be postmarked by **mid-February** to be considered for admission. Contact the department for the exact deadline date. No application will be reviewed after this date. Applicants must provide:

1. **Application for Admission:** The program participates in the online Dietetic Internship Centralized Application System (DICAS) process. More information including submission deadlines and fees can be found at <http://portal.dicas.org>.
2. **Supplemental Application for Admission:** The Supplemental Application is required and is available on

the program website. A \$40 non-refundable application fee is required and must accompany the supplemental application.

3. **Official Transcripts:** Official transcript(s) of all college work must be submitted to DICAS. A bachelor's degree from an accredited university and a cumulative GPA of 2.7 and math/science GPA of 2.0 or above are required for consideration.
4. **Official GRE Score Report:** Use institutional code number 6146 to have scores sent directly to the College of Health Professions.
5. **Official Verification or Intent to Complete Statement:** An official verification or intent to complete statement from the program director of the applicant's Didactic Program in Dietetics must be submitted to DICAS.
6. **TOEFL scores, if applicable.** See International Applicants in the Admission/Academic Information section of the catalog.
7. **References:** Three letters of reference must be submitted to the DICAS System. An e-mail message will be sent to the references requesting them to complete an online form. At least one reference letter should come from a college professor or major advisor. Other references may include employers and/or other professional references.
8. **One-Page Resume:** Resumes must be entered into the DICAS System. Include paid and volunteer work experience. Experience in hospital dietetics is desirable but not required. Include extracurricular activities, honors, and awards indicative of a well-rounded lifestyle.
9. **Personal Statement:** Applicants must enter a personal statement of 1,000 words or less into the DICAS System. The following items should be addressed:
 - a. Why you want to enter the dietetic profession
 - b. The areas in your previous experiences that have helped prepare you for a career in dietetics
 - c. Your short and long-term career goals
 - d. Your strengths and weaknesses or areas for improvement
 - e. Other information you consider relevant to the selection committee's decision making.

10. **National Computer Matching Program:** The Internship program participates in the national computer matching of dietetic interns. Applicants must complete the online registration through D & D Digital to participate in the computer matching process. Information may be obtained from the applicant's undergraduate dietetic advisor or directly from **D & D Digital Company, 304 Main Street, Suite 301, Ames, IA 50010-6140. Telephone: (515) 292-0490, Fax: (515) 663-9427, <http://www.dnndigital.com/>.**

Master of Science students seeking admission to the Dietetic Internship program must use the Dietetic Internship application process. That is, acceptance to the Master of Science program does not ensure admission to the Dietetic Internship program.

ADMISSION FACTORS

Admission to the program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Dietetics achievement
- Math and science achievement
- Personal and professional endorsement
- Work and volunteer experience
- Written communication

CURRICULUM

During the internship, development of competencies in general dietetics is emphasized including clinical dietetics, food service administration, and community nutrition. The program's concentration is medical nutrition therapy and management in dietetics practice. Supervised practice through establishment of a working relationship with registered dietitians is emphasized. Seminars, lectures, and classes complement the student's practical experiences.

The following credits are required in the program:

Course #	Title	Credits
NUTR 5073	Practicum in Clinical Dietetics	3
NUTR 5083	Practicum in Administrative Dietetics	3
NUTR 5112	Nutrition Counseling	2
NUTR 5161	Advanced Nutrition Seminar	1
NUTR 5333	Advanced Clinical Dietetics	<u>3</u>
TOTAL		12

PROGRAM POLICIES

Program specific policies and procedures can be found in the dietetic internship policy and procedure manual or are available upon request.

PROGRAM COSTS

The total cost of the two semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#)

Email: CHPWelcomeCenter@uams.edu

THE PROGRAMS

The department offers three program options: Emergency Medical Technician, Paramedic, and Bachelor of Science. The Emergency Medical Technician (EMT) Program consists of 6 semester credits of course work in EMS 1602 Introduction to Emergency Medical Technology. Historically, those enrolled in this course are interested in working as a licensed EMT, fulfilling the primary prerequisite for the paramedic program, embarking on a fire service career, or establishing patient care skills in another health profession such as physician assistant or medicine. Students who successfully complete the course may be eligible to challenge the EMT credentialing examinations offered by the NREMT.

Classes begin in August and January of every year. Classes are held two nights per week.

The Paramedic program has two degree options: Certificate or Associate's degree. Successful program completion of both options satisfies the eligibility requirements to apply for the paramedic credentialing examinations offered by the National Registry of Emergency Medical Technicians (NREMT). Graduates who complete the certificate program are eligible to complete the associate's degree at a later time as long as all requirements of the degree plan are met.

Students accepted into the paramedic program can choose a fall or spring entry. Approximately 40% of the paramedic program course work is delivered online. Classes are held one or two days per week. Students may schedule their clinical time within program guidelines including weekends and weekdays.

The Bachelor of Science program is available for licensed paramedics who typically hold a position within emergency services who seek to better advocate for their respective communities and public services. Courses will typically be delivered online with some offerings in an independent study format. Some of the elective courses will require face-to-face instruction. Graduates from nationally accredited paramedic programs will be awarded up to 30 credits for their EMS knowledge and experience upon completion of all other degree requirements. Students are typically enrolled in the fall, summer, and spring semesters.

Successful completion of the above programs does not itself ensure licensure or registration. Each student is responsible for becoming familiar with the applicable licensure and registration requirements.

ACCREDITATION

The paramedic program is accredited by the Commission on the Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater, Florida 33756. Telephone: (727) 210-2350. Website: www.caahep.org.

APPLICATION PROCEDURES AND DEADLINES

EMT and Special Courses: Special courses, including Introduction to Emergency Medical Technology (EMS 1602); Anatomy and Physiology (EMS 1311); and Medical Emergency Responder (EMS 1291), can be taken individually without acceptance into the paramedic program. Application for any of the special courses must be made under the Nondegree/Noncertificate student guidelines published in the Admission to the College section of this catalog. Early consideration will be given those who have submitted complete applications (see the required items below) in the early consideration deadline. For applicants to the fall semester courses, the early consideration deadline is **March 31**; applications must be received by **June 15**, to be assured of consideration for admission. For applicants to the spring semester courses, the early consideration deadline is **October 1**, applications must be received by **December 1** to be assured of consideration for admission. To be eligible for EMT Licensure, applicants must be at least 18 years of age by the last day of the semester in which they wish to enroll. Send all requested materials to the CHP Welcome Center.

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **High School Transcripts:** Arrange for high school transcripts that show proof of high school graduation to be sent to the CHP Welcome Center. Applicants who are not high school graduates must provide

documentation of satisfactory scores on the General Education Development Test (GED).

4. **Letter of Application:** A self-written letter stating the course in which you wish to enroll and the personal objective(s) to be achieved through completion of the course is required.
5. **Nondegree/Noncertificate Form:** A signed statement that indicates the applicant has read, understands, and agrees to the requirements governing nondegree/noncertificate applications must be submitted. A standard form is available from the CHP Welcome Center and from the department.
6. **Documentation:** A copy of current American Heart Association Healthcare Provider CPR card must be submitted (only for EMS 1602).
7. **TOEFL Scores** as applicable. See International Applicants in the Admissions/Academic Information section of this catalog.

Paramedic: Early consideration will be given those who have submitted complete applications by **March 31** for fall entry or **October 1** for spring entry. Applications must be received by **June 15** for fall entry or **December 1** for spring entry to be assured consideration for admission. In the event the class is not filled, the application deadline may be extended. Applicants must complete all application requirements below in order to receive consideration. Send all requested materials to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course. A college Cumulative Grade Point Average (cGPA) of 2.0 is required for admission to the program.

If no college/university course work has been completed, arrange for each high school attended to forward an official transcript of your course work to the CHP Admissions Officer. A high school cGPA of 2.0 is required for admission to the program if no college work has been completed. Applicants who are not high school graduates must provide documentation of satisfactory scores on the General Education Development Test (GED).

4. **Official Documentation:** A copy of a current American Heart Association Healthcare Provider CPR card must be submitted. Proof of a current Arkansas EMT License.
5. **Letter of Application:** A letter written by the applicant is required. It should state the applicant's interest in the program and the profession, and objective(s) to be achieved through completion of the program.

6. **Interview and Entrance Examination:** Qualified applicants are contacted to schedule an interview and the entrance examination. The examination assesses basic skills pertinent to the profession (*i.e.*, reading, writing, mathematics, psychomotor, and critical thinking). Acceptance decisions and each student's individual professional program plan will be based upon the interview, academic transcripts, and entrance examination scores.
7. **TOEFL Scores** as applicable. See International Applicants in the Admissions/Academic Information section of this catalog.

Bachelor of Science in EMS: Early consideration will be given those who have submitted complete applications (see the required items below) by **March 31** for fall entry or **October 1** for spring entry. Applications must be received by **June 15** for fall entry or **December 1** for spring entry to be assured of consideration for admission. In the event the class is not filled, the application deadline may be extended. Applicants must complete all application requirements below in order to receive consideration. Send all requested materials to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A college Cumulative Grade Point Average (CGPA) of 2.5 is required for admission to the program.
4. **High School Diploma:** Candidates must have evidence of a high school diploma or equivalency qualification with a 2.5 GPA or better.
5. **Advisement Session:** Applicants will be contacted in order to determine entrance requirements and to formulate a degree plan specific to the individual's needs.
6. **TOEFL Scores** as applicable. See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the EMS programs is competitive and based on the following factors:

- Academic achievement
- Leadership and professionalism
- Written and oral communication
- Knowledge of the profession
- Interpersonal skills

PREREQUISITES

EMT: Individuals who possess a high school diploma (or equivalent) and hold a current American Heart Association

CPR Healthcare Provider card are eligible to apply for this 6 credit course (EMS 1602).

Paramedic: Applicants who did not earn a GPA of at least 2.0 (on a 4-point scale) in high school must have completed at least 9 credits of course work chosen from the list of required core curriculum courses for this program from a regionally accredited higher education institution with a grade of “C” or better. Credit earned through completion of a college-level EMT course taken at a regionally accredited institution of higher education may be applied for up to 3 credits of the 9 credits requirement. Applicants who have completed 9 credits must have earned a grade of “C” or better in each of the courses in order to transfer that credit and be eligible for consideration for admission. Students who have completed 9 credits or more of college work must submit transcripts of all the courses taken, and earned a GPA of at least 2.0 to be considered for admission.

College-level course work is encouraged before entry into the paramedic program. Prospective students are encouraged to contact the Department for advisement.

The Department will test applicants for competency in anatomy and physiology who have never successfully completed a full body systems course from an accredited institution. For applicants who score below the published criteria on the competency exam, an extension course in anatomy and physiology or other equivalent education plan must be completed. Upon successful completion, a certificate in Emergency Medical Sciences is awarded.

Associate of Science in Emergency Medical Sciences: All paramedic students are eligible for the A.S. degree by completing the core curriculum in addition to the professional curriculum.

Bachelor of Science in EMS: All college work must have a GPA of at least 2.5 or better (a GPA of 3.0 is strongly preferred). All prerequisite courses must have a minimum grade of a “C” or higher. Candidates are encouraged to complete all of their core curriculum. However, candidates may be considered with a minimum of successful completion of English Composition I and II as well as one course in College Algebra.

The candidate must have documented proficiency in online education by successfully completing at least one online course (grade of “C” or higher) or demonstrate proficiency in online education skills through an assessment by the Department of EMS (an assessment fee applies).

CORE CURRICULUM

The following 35 credits are required in the A.S. and B.S. degree programs. All courses are required from a regionally accredited post-secondary academic institution and must fulfill all college requirements.

Area/Typical Course Title	Minimum Credits
SCIENCE	
Two science courses with laboratories	8
MATHEMATICS	
College Algebra or higher mathematics	3
LIBERAL ARTS	
Two semester sequence of English Composition	6
History of the United States or National Government	3
FINE ARTS/HUMANITIES	
Music, Art, Theater – Appreciation	3
HUMANITIES	
Philosophy, Political Science, Literature or Humanities	3
SOCIAL SCIENCES	
Two Social Science courses	6
COMMUNICATIONS	
Speech Communication	<u>3</u>
TOTAL	35

PROGRAM REQUIREMENTS

All students are required to have a thorough medical examination by a physician upon acceptance for admission and prior to registration for classes. Students are required to complete a hepatitis B vaccination series if one has not been completed.

CURRICULUM – PARAMEDIC

The following 43 credits are required in the paramedic program:

Fall Entry	Year 1	Credits
Course #	Title	
Fall		
EMS 1122	EKG Interpretation	1
EMS 1210	Clinical Preparation	2
EMS 1320	Pharmacology	3
EMS 2210	Foundations of the Paramedic	2

		<u>10</u>
TOTAL		43

A grade of "D", "F", or a mark of "U" or "NC" is not acceptable for progression to the next semester, nor is it acceptable for graduation if it occurs in the last semester of the program. Successful completion of the American Heart Association Advanced Cardiac Life Support course is required for the student to progress to Paramedic Field Internship (EMS 2431). The didactic portion of ACLS is taught during Cardiovascular Care (EMS 2501).

CURRICULUM – BACHELOR OF SCIENCE

Program Additional Requirements

Area/Typical Course Title	Minimum Credits
Computer Concepts	3
History of Civilization or World History	6
Relevant Course Work*	<u>16</u>
TOTAL	25

*As approved by advisor; minimum of 10 of the 16 credits must be upper level electives.

EMS or Health Professions Course Work - 30 Credits

Current state licensed, certified or National Registry paramedic who graduated from a Committee on the Accreditation of Allied Health Professions (CAAHEP) paramedic program may receive up to 30 semester credits for paramedic course work upon review of the student's academic records. These hours will be credited to the transcript after all other degree requirements have been met. Semester credits may also be awarded for health professions coursework as determined by the department.

The following 30 credits are required in the B.S. program:

I. Program Core - 18 SC

Course #	Title	Semester Credits
EMS 3301	Foundations of EMS Systems	3
EMS 3302	EMS Operations Management	3
EMS 3303	Leadership Development	3
EMS 3304	Community Paramedic	3
EMS 4X08	Directed Internship*	3
EMS 4307	Current Topics in EMS	<u>3</u>
TOTAL		18

II. Upper Level Courses - 12 SC

Students can take any combination of upper level EMS courses below as long as the prerequisite criteria for each course have been satisfied.

Course #	Title
EMS 4301	Human Resource Management
EMS 4303	Foundations of Health Professions Education (Optional)
EMS 4304	Safety & Risk Management
EMS 4305	Special Operations
EMS 4306	Community Paramedic Strategies
EMS 4316	Community Paramedic Practicum
EMS 4320	Critical Care Practicum
EMS 4330	Introduction to Research (RES 4330)
EMS 4610	Critical Care Paramedic

*To be offered whenever a student has completed all other EMS course requirements.

Candidates must complete the core EMS courses (EMS 3301, EMS 3302, EMS 3303, EMS 3304, EMS 4307, and EMS 4308) as part of the upper level hour requirement.

In addition, students must maintain a cumulative average of "C" or higher in all courses in order to enter any clinical area. All professional courses must be successfully completed in order to be eligible for licensure and graduation.

PROGRAM POLICIES

The following Paramedic Policy Manual can be found on the department [website](#).

PROGRAM COSTS

The total cost of the EMS programs can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

GENETIC COUNSELING – MASTER OF SCIENCE DEGREE

Department of Genetic Counseling

Genetic Counseling Website

UAMS Graduate School

University of Arkansas for Medical Sciences
4301 West Markham Street, #601
Little Rock, AR 72205

Telephone: (501) 686-5454

Email: graduateschool@uams.edu

Website: <http://gradschool.uams.edu/>

THE PROGRAM

The Genetic Counseling program offers a Master of Science degree in Genetic Counseling, through the UAMS Graduate School. The program is a full-time, day program with one cohort of 5-7 students beginning each fall semester. It consists of four, fall/spring semesters with one intervening summer semester session. The program curriculum consists of 59-61 semester credits. Graduates of this program are academically and clinically eligible to apply for national board certification through the American Board of Genetic Counseling. Successful completion of the program does not itself ensure such certification. Students are responsible for familiarizing themselves with applicable certification requirements.

ACCREDITATION

The program is accredited by the Accreditation Council for Genetic Counseling, PO Box, 15632, Lenexa, KS 66285. Telephone: (913) 895-4629.

APPLICATION PROCEDURES

All application materials must be received by **January 15** to be considered for admission. No applications will be reviewed after this date. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the UAMS Graduate School [website](#).
2. **Application Fee:** None
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. Undergraduate cumulative GPA of at least 3.0 on a 4.0 scale for the last 60 hours of course work, with a 2.85 cumulative GPA for all course work attempted is required. Each required prerequisite course (see Prerequisites) must be completed with letter grade of B or above.
4. **GRE Scores:** Submission of official GRE scores to the UAMS Graduate School, 4301 West Markham, #601, Little Rock, AR 72205. Must be taken within 5 years of application for admission. No advanced subject score required. Institution code: 6146.
5. **Professional Observation (two types):** 1) Working or volunteering in a counseling setting where one receives training and supervision in providing counseling to other

individuals; example settings include a counseling service, a crisis or suicide hotline, a domestic violence shelter or hotline, or a pregnancy counseling center such as Planned Parenthood. Experience working with individuals with disabilities and/or teaching are also helpful to applicants. 2) Additionally, applicants must have job shadowed for at least one day or have completed a genetic counseling internship before applying. If not completed before applying, admission to the program will be contingent upon completion of that prior to matriculation. Professional observation forms are available on the program website.

6. **Interview:** The most qualified applicants will be contacted after the admissions deadline to arrange an interview.
7. **Essay:** An 800-word statement that addresses one's personal goals and professional career vision to be submitted with your application.
8. **Letters of Recommendation:** Please submit three letters on departmental form, which is available on the department [website](#).
9. **Resume:** A current curriculum vitae or resume is to be submitted with your application.
10. **TOEFL Scores,** as applicable. See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Leadership and professionalism
- Written and oral communication
- Knowledge of the profession
- Interpersonal skills

PREREQUISITES

Applicants must have earned a bachelor's degree from a regionally accredited college or university. Preferred degrees are in biology, genetics, chemistry, and/or psychology, nursing, or related fields. At least one upper level genetics course is required. The following 35 credits are required for

admission. All listed courses must have been completed at a regionally accredited post-secondary academic institution and must fulfill all college requirements regarding acceptance of transfer credit.

Area/Typical Course Title	Minimum Credits
General Biochemistry	3
Genetics (taken in the last 5 years)	4
General Biology with Laboratory	8
Social Science (one course of which must be Psychology)	6
Statistics	3
General Chemistry with Laboratory	8
Additional Biology Laboratory	<u>3</u>
TOTAL	35

Please see department website for recommended prerequisite course work. 35

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the department [website](#).

- Academic Progression
- Clinical Training
- Program Completion Requirements

PROGRAM COSTS

The total cost of the program is provided on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

*Students pursuing the Master of Science degree in Genetic Counseling are considered to be students in the Graduate School who are taking courses offered by the faculty of the College of Health Professions. Accordingly, the Graduate School Catalog is considered the primary catalog for all students in this program. However, all students taking courses taught by CHP faculty are to be notified of the CHP Disability Policy located in this catalog. All provisions (including grievance procedures) in the Graduate School Catalog and the Graduate School Handbook are the authority applicable to students pursuing the Master of Science degree in Genetic Counseling.

HEALTH INFORMATION ADMINISTRATION – BACHELOR OF SCIENCE DEGREE

Department of Health Information Management

Health Information Management Website

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730
Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The Department of Health Information Management offers the Bachelor of Science degree in Health Information Administration. It is a year-round program with entrance offered in the fall. Full-time students must complete four semesters (roughly a year and a half); Part-time students must complete seven semesters (roughly two and a half years).

The classes are on-line with the exception of professional practice rotations which are obtained in hospitals and other health care related agencies. Some travel is required. These rotations are scheduled according to the healthcare facilities' policies and may necessitate participation during regular work hours.

This degree must be completed within four years from the first enrollment date into the program.

Elective cancer registry courses are available. These classes plus one year experience in a cancer registry allow the student to take the certification examination of the National Cancer Registry Associate (NCRA) to receive the credential of certified tumor registrar.

ACCREDITATION

The program is applying for accreditation. Graduates of this program may not sit for the Registered Health Information Administrator (RHIA) credentialing examination until this program has received accreditation status. The program can seek accreditation in the final semester of the first graduates. Accreditation is by the Commission on Accreditation for Health Informatics and Information Management Education, 233 North Michigan Avenue, 21st Floor, Chicago, Illinois 60601-5800. Website: www.cahiim.org.

APPLICATION PROCEDURES

For applicants to the fall semester, applications must be received by **June 1** to be assured of consideration. Send all requested materials to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP website.

2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to mail an official transcript of your course work. A minimum cumulative GPA of 2.25 is required to apply for admission.
4. **Associate Degree in HIT:** Applicants must provide proof by transcript of successful completion of an associate's degree in Health Information Technology. This may be an A.S. or an A.A.S. degree but must be from an accredited institution of both HLC and CAHIIM.
5. **References:** Three reference forms from persons qualified to judge your promise of success in the program are required. The reference form is available on the program website.
6. **Interview:** Qualified applicants will be contacted to arrange an interview after receipt of their application and transcript(s). The applicant's writing ability and computer skills will be assessed during the interview.
7. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the HIA Program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Computer competency
- Leadership and professionalism
- Personal endorsement
- Written and oral communication

PREREQUISITES

The coursework of the associate's degree in HIM or HIT shall be satisfactorily completed with a grade of "C" or above prior to starting the HIA program. The following 38 general education and program requirements must be taken prior to enrollment of the HIA program. All courses

are to be taken at a regionally accredited educational institution. Those applying to the Bachelor of Science program in Health Information Administration must have an associate's degree successfully completed in Health Information Technology or related area. Any courses not taken from an accredited CAHIIM Health Information Management program may not transfer as HIT courses. Prior to enrollment in the bachelor's degree program, students must have successfully completed ICD-10 coding. For those needing to complete this requirement, the HIM Department offers online continuing education courses in both ICD-10-CM and ICD-10-PCS. Successful completion of both courses would fulfill this requirement. Please contact the department for more information.

General Education & Program Requirements:

Area/Typical Course Title	Credits

Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The Department of Health Information Management offers the Associate of Science degree in Health Information Technology. It is a part-time program that is 8 semesters in length and year-round with admission offered in the fall and spring. The program admits approximately 20 students in the fall and 12 in the spring.

The classes are on-line with the exception of professional practice rotations which are obtained in hospitals and other health care related agencies. Some travel is required. These rotations are scheduled according to the healthcare facilities' policies and may necessitate participation during regular working hours.

This degree must be completed within 4 years from the first enrollment date into the program.

Elective cancer registry courses are available. These classes plus one year experience in a cancer registry allow the student to take the certification examination of the National Cancer Registry Association (NCRA) to receive the credential of certified tumor registrar.

ACCREDITATION

The associate degree program is accredited by the Commission on Accreditation for Health Informatics and Information Management Education, 233 North Michigan Avenue, 21st Floor, Chicago, Illinois 60601-5800. Website: www.cahim.org.

APPLICATION PROCEDURES

For applicants to the fall semester, applications must be received by **June 1** to be assured of consideration. For applicants to the spring semester, applications must be received by **December 1**. Send all requested materials to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP website.
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.

3. **Official Transcripts:** Arrange for each college or university you have attended to mail an official transcript of your course work. A minimum cumulative GPA of 2.25 is required to apply for admission.
4. **ACT/SAT Scores:** If an applicant has successfully completed nine or more university/college hours, an ACT/SAT score is not required. ACT/SAT scores may be documented on an official high school transcript or sent directly from ACT or SAT.
5. **References:** Three reference forms from persons qualified to judge your promise of success in the program are required. The reference form is available on the program website.
6. **Interview:** Qualified applicants will be contacted to arrange an interview after receipt of their application and transcript(s). The applicant's writing ability and computer skills will be assessed during the interview.
7. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the HIM Program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Computer competency
- Leadership and professionalism
- Personal endorsement
- Written and oral communication

PREREQUISITES

A 3 credit computer fundamentals course must be taken prior to entrance into the program as a prerequisite and must be within seven years of admission into the program. The following 35 credits must be taken prior to completion of the program to fulfill the state core curriculum. All courses are to be taken at a regionally accredited educational institution.

Area/Typical Course Title	Credits
SCIENCE AND MATHEMATICS	
Anatomy and Physiology*, **	8
College Algebra	<u>3</u>
	11
LIBERAL ARTS	
English Composition I	3
English Composition II	3
American History I or II or National Government	<u>3</u>

	6
FINE ARTS/HUMANITIES	
Fine Arts (including Architecture, Film, Photography, Music, or Theatre Art) OR	6
Humanities (including Philosophy, Political Science, Literature, or Humanities)	
TOTAL	35

*Anatomy & Physiology courses must cover all body systems and include accompanying laboratory sections. If taken at a college where this is offered in one course, the student must take an additional 4 credits laboratory biology course to satisfy the 8 credits of laboratory science.

**Students may not proceed with the coding sequence in this program until Anatomy and Physiology, Medical Terminology, and Pathophysiology have been successfully completed.

MEDICAL DOSIMETRY – BACHELOR OF SCIENCE DEGREE

Department of Imaging and Radiation Sciences

Medical Dosimetry Website

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730
Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The Medical Dosimetry program is a one-year, full-time Bachelor of Science degree program. Applicants must be registered radiation therapists in CE compliance or radiation therapy certificate eligible with the ARRT. The program consists of three semesters: fall, spring, and summer. Four to six students are accepted annually. The curriculum consists of 88 credits of prerequisite course work and 32 credits in the Medical Dosimetry curriculum for a total of 120 credits. Up to 14 credits can be awarded from the radiation therapy training program. Successful completion of all program requirements qualifies the student to apply for the national certification examination. Successful completion of the program does not itself insure certification.

ACCREDITATION

The program is accredited by the Joint Review Committee on Education in Radiologic Technology (JRCERT), 20 N. Wacker Drive, Suite 2850, Chicago, Illinois 60606-3182.
Telephone: (312) 704-5300. Website: www.jcert.org/

APPLICATION PROCEDURES

Currently, the Medical Dosimetry program at UAMS is investigating the possibility of changing some components of its admissions criteria for the academic year of 2015-2016. Changes may affect prerequisite course requirements. Please check the website often for any changes or call the department at 501 686-5948 for updated information.

All application materials must be received by **May 1** to be considered for admission. No application will be reviewed after this date. Send all requested materials to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A minimum cumulative and prerequisite GPA of 2.8 is required to apply for admission.

4. **Professional Observation Form:** Applicants are required to demonstrate an understanding of the responsibilities and duties of the profession through observation and discussion with a practicing professional in the field. Contact department for details.
5. **Interview:** Qualified applicants are encouraged to present themselves in person for an interview at UAMS scheduled by the department. A telephone interview can also be scheduled.
6. **References:** Two letters of recommendation are required for consideration for admission. References should be mentors/professors with whom you have worked and are familiar with your ability and academic performance.
7. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the medical dosimetry program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Professionalism
- Career goals
- Oral communication

PREREQUISITES

The following 88 credits are required for admission. All listed courses are required from a regionally accredited post-secondary academic institution, and must fulfill all College requirements regarding acceptance of transfer credit. If in doubt of the suitability of the following prerequisite courses, please contact the CHP Welcome Center.

Area/Typical Course Title	Minimum Credit
SCIENCE AND MATHEMATICS	
College Algebra	3
Calculus I	3
Biology with Laboratory	4
Anatomy and Physiology I & II with Laboratories	8
Physics I & II with Laboratories (Algebra or Calculus based)	8
Medical Terminology	3

Computer Science	3
Chemistry with Laboratory	4
Additional Mathematics (Trigonometry, Linear Algebra, Calculus III, or Different Equations)*	<u>3</u>
	39
LIBERAL ARTS	
English Composition I & II	6
American History or US Government	3
Humanities	<u>3</u>
	12
SOCIAL SCIENCES	
Sociology	3
Psychology	<u>3</u>
	6
COMMUNICATIONS	
Speech Communication	2
FINE ARTS	
Music, Art, Theater	3
UP TO 14 CREDITS FROM RADIATION THERAPY TRAINING PROGRAM ELECTIVES**	14
TOTAL	<u>12</u> 88

*If the applicant has successfully completed any of these courses as the additional mathematics course, the requirement for College Algebra can be waived, and three additional semester credits of electives will be required.

**Successful completion of Radiation Therapy courses from a regional accredited institution may be applied to this elective course work/prerequisite requirement.

CURRICULUM

The following 32 credits are required in the program:

Course #	Title	Semester Credit
Fall		
MED 4102	Clinical Orientation for Medical Dosimetry	1
MED 4203	Practicum I	2
MED 4301	Cross-Sectional Anatomy for Medical Dosimetry	3
MED 4303	Medical Dosimetry Physics	3
	Elective Approved by Program Director	<u>3</u>
		12
Spring (2)		
MED 4404	Practicum II	4
MED 4304	Treatment Planning	3
MED 4305	Special Programs in Dosimetry	3
MED 4306	Research Special Topics	3
	Elective Approved by Program Director	<u>3</u>
		16
Summer (3)		
MED 4405	Practicum III	<u>4</u>
		4
TOTAL		<u>32</u>

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the program [website](#).

- Acceptable Grades for Progression
- Attendance Policy
- Computer Usage
- CPR Certification
- E-mail
- Examination Protocol
- Grading Scales
- Responsibilities as a UAMS Medical Dosimetry Student
- Social Networking
- Student Behavior and Dress
- Student Supervision in the Clinic and Laboratory
- Student Transportation, Parking, and Clinic Rotation Hours

PROGRAM COSTS

The total cost of the three semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

MEDICAL LABORATORY SCIENCES – BACHELOR OF SCIENCE DEGREE

Department of Laboratory Sciences

Medical Laboratory Sciences [Website](#)

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The Medical Laboratory Sciences program is a full-time or part-time program with a cohort of 36 students beginning each fall semester. The full-time track requires 17 months to complete either as an on-campus or distance student. The part-time track allows students a maximum of five semesters to complete the program. In addition, the program offers a MLT-to-MLS advanced placement track that is designed for employed medical laboratory technicians (MLTs). Upon completion of the full-time, part-time, or MLT-to-MLS track, a Bachelor of Science in Medical Laboratory Sciences is awarded.

Graduates are eligible to apply for certification examinations given by national agencies and for licensure examinations given by some states. The granting of the B.S. degree is not contingent upon the student's performance on any type of external certification or licensure examination.

The program consists of 70 semester credits of prerequisite course work and 50 credits in the medical laboratory sciences curriculum for a total of 120 credits.

ACCREDITATION

The program is accredited by the National Accrediting Agency for Clinical Laboratory Sciences, 5600 North River Road, Suite 720, Rosemont, IL 60018. Telephone: (773) 714-8880. Website: www.naacls.org.

APPLICATION PROCEDURES

Application materials must be received by **April 1** to be considered for admission. The early application deadline is **February 1**. Early acceptance is contingent upon satisfactory completion of remaining prerequisites. The criteria for *Early Acceptance for Academic Achievement* are: (a) completed application on file; (b) 65 credits including a minimum of 12 credits of required biology courses, 8 credits of required chemistry courses, 3 credits of required math, and a 3.0 or higher math/science and overall GPA; and (c) a satisfactory advisory session. Send all requested materials to the CHP Welcome Center.

Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A minimum GPA of 2.50 is required in science/mathematic courses as well as the core curriculum courses.
4. **Advising Session:** Qualified applicants are contacted to arrange an advising session after receipt of application and all official transcripts. This session will be scheduled during the spring semester.
5. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the medical laboratory sciences program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Leadership and professionalism
- Written and oral communication

PREREQUISITES

A minimum of 70 credits are required from a regionally accredited college or university and must fulfill all College requirements regarding the acceptance of transfer credit. Only courses with a grade of "C" or better are accepted to meet prerequisite course requirements. Students are eligible for the MLS program after completing 64 credits, including all of the science and mathematics requirements. However, upon acceptance into the program, an additional 6 credits of core curriculum must be listed on the student's degree plan.

Area/Typical Course Title	Minimum Semester Credit
CORE CURRICULUM*	
English Composition	6
History of Civilization/World History	3
American History or National Government	3
Social Science [Psychology, Sociology, Anthropology, Geography, or Economics]	6
Speech Communication	3
Fine Arts [Art (including Architecture and Film) Music, or Theatre Art] ¹	3
Humanities [Philosophy, Political Science, Literature, or Humanities] ²	3
Electives ³	<u>16</u>
	43

*6 hours of core curriculum may be completed after enrolling in the program but prior to graduation.

SCIENCE AND MATHEMATICS REQUIREMENTS

Biological/Health Science: ⁴	
Biology Electives	8
Anatomy & Physiology (or Physiology)	4
Microbiology	4
General Chemistry	8
College Algebra (or higher level mathematics)	<u>3</u>
	<u>27</u>
TOTAL	70

¹The Fine Arts requirement cannot be fulfilled with a studio course.

²Humanities requirements may be selected from the courses in the subject areas of philosophy, political science, literature and the humanities. The course in National Government, if selected to meet the US History/National Government requirement, cannot also be used to meet the Humanities requirement in Political Science. Acceptable courses in literature must be broad survey courses; world literature is especially recommended.

³Recommended electives include introductory courses in Computer Science, Statistics, Management, Genetics, Organic Chemistry, Biochemistry, and Quantitative Analysis.

⁴To include not more than 4 credits of botany.

Chemistry and Biology/Health Science courses must be suitable for majors in those disciplines and must include laboratory credit in required courses. Other courses may fulfill the program's requirements. Contact the department for course approval. CLEP credits are not acceptable to fulfill chemistry and biological science requirements.

PROFESSIONAL CURRICULUM

The following 50 credits are required in the program curriculum:

Course #	Title	Credit
Fall		
MET 3110	Body Fluids Laboratory	1
MET 3113	Current Topics in Medical Laboratory Sciences	1
MET 4114	Parasitology	2
MET 4212	Hematology Laboratory	2
MET 4223	Body Fluids	2

MET 4134	Laboratory Medicine Seminar	1
MET 4135	Laboratory Medicine Case Studies Seminar	1
MET 4138	Laboratory Management	1
MET 4145	Immunology Internship	1
MET 4332	Hematology Internship	3
MET 4335	Microbiology Internship	3
MET 4341	Blood Bank Internship	<u>3</u>
		14
TOTAL		50

A letter grade of "C" or better is required for the student to progress in the program.

Distant Education Track: The first year of the 17 month program includes course work (lectures and laboratory exercises) using distance education technology. The first-year student is required to complete on-campus laboratory sessions, at the beginning, mid-semester and during the final two weeks of the fall and spring semesters. During the final six months of the program, students complete an internship at a program-approved clinical affiliation site.

MLT-to-MLS Distance Learning Program: The MLT-to-MLS Distance Learning program allows medical laboratory technicians with an associate degree who are registered by the American Society for Clinical Pathologists (ASCP) or certified by the National Certification Agency for Medical Laboratory Personnel, Inc. (NCA) to complete the B.S. degree in Medical Laboratory Sciences in three years through a combination of distance education and concentrated laboratory and advanced clinical laboratory experiences. To be eligible for the program, students must submit proof of certification or registration from one of the above agencies.

Prior to enrollment in the program, applicants must complete 78 credits to include:

Area/Typical Course Title	Minimum Semester Credit
CORE CURRICULUM*	
English Composition	6
History of Civilization/World History	3
American History or National Government	3
Social Science [Psychology, Sociology, Anthropology, Geography, or Economics]	6
Speech Communication	3

Fine Arts [Art (including Architecture and Film) Music, or Theatre Art] ¹	3
Humanities [Philosophy, Political Science, Literature, or Humanities]	3
Electives	<u>25</u>
	52

*6 hours of core curriculum may be completed after enrolling in the program but prior to graduation.

SCIENCE AND MATHEMATICS REQUIREMENTS

Biological/Health Science:	
Biology Electives	8
Anatomy & Physiology (or Physiology)	4
Microbiology	4
General Chemistry	8
College Algebra (or higher level mathematics)	<u>3</u>
	<u>27</u>
TOTAL	79

The MLT-to-MLS curriculum requires 41 credits of upper level MLS courses for a total of 120 credits for a Bachelor of Science in Medical Laboratory Sciences degree.

In addition, all students are required to attend concentrated advanced skills laboratory courses on the UAMS campus in Little Rock. The laboratory sessions are conducted in one to three day sessions each spring and/or summer.

After completing the courses listed above, students will progress to advanced clinical laboratory internships. MLTs will demonstrate MLS level clinical skill competencies in approved clinical laboratories. Additional selected experiences in clinical laboratories located in Little Rock may be required to provide advanced procedures and techniques.

PROGRAM POLICIES

The following program specific policies and procedures can be found on the program [website](#).

- Acceptable Grades for Progression
- Application Procedures
- Essential Functions
- Outcomes
- Program Goals
- Program Tracks

PROGRAM COSTS

The total cost of the three semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

NUCLEAR MEDICINE ADVANCED ASSOCIATE – MASTER OF IMAGING SCIENCES DEGREE

Department of Imaging and Radiation Sciences

Nuclear Medicine Advanced Associate [Website](#)

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730
Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The Nuclear Medicine Advanced Associate (NMAA) program, is offered through an educational consortium formed by the UAMS in cooperation with the Georgia Regents University (GRU) in Augusta, Georgia; Saint Louis University (SLU) in St. Louis, Missouri; and University of Missouri at Columbia (UMC). UAMS is the degree-granting institution and administers this three-state, four-institution collaborative. The four institutions, each of which currently offers a bachelor's degree in nuclear medicine technology, cooperatively participate in curriculum development, course instruction, and the supervision and assessment of NMAA interns.

The NMAA program is designed for both part-time and full-time distance students and is delivered using a combination of online instruction and clinical instruction at facilities affiliated with UAMS and the consortium partners. The professional curriculum is based on competencies approved by the Society of Nuclear Medicine and Molecular Imaging (SNMMI). The NMAA program is designed to be completed in five semesters and may be taken at sites distant from the main UAMS, SLU, GRU, or UMC campuses.

Graduates will be eligible for the national NMAA credentialing examination administered by the Nuclear Medicine Technology Certification Board (NMTCB). Students must have successfully completed all NMAA degree requirements to be eligible for the certification examination. Successful completion of the program does not itself insure certification.

NMAA graduates are advised that credentialing requirements for NMAAs may vary by location. Some states, for example, may require that NMAAs be registered by the NMTCB, licensed in accordance with state regulations, and/or granted practice privileges in writing at each facility for specific procedures to be performed. Accordingly, successful completion of the UAMS NMAA program does not in itself assure compliance with specific state practice requirements.

APPLICATION PROCEDURES

The program may begin in any semester. Applications postmarked by **June 1** will be considered for fall semester; by **November 1**, for spring semester; and by **March 1**, for summer semester. The forms specific to the program may be found on the program's website. Send all requested materials to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the [CHP website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course.
4. **Graduate Record Examination (GRE):** Scores (from an examination taken within five years of the date of application to the NMAA program) must be sent directly from GRE. Use GRE code number 6146 to have scores sent directly to the College of Health Professions.
5. **Preceptor and Affiliate Agreement Forms:** One Preceptor Agreement Form completed by a nuclear medicine physician or radiologist who is willing to serve as the applicant's clinical preceptor must be submitted. An Affiliate Agreement form to be completed by the clinical facility will be provided upon receipt of the preceptor form. Information about the role of the physician preceptors and the Preceptor Agreement Form is available on the program [website](#) under How to Apply.
6. **Reference Forms:** Two completed reference forms, one of which must come from a current supervisor, must be submitted.
7. **Professional Certification:** Evidence of current certification in nuclear medicine technology by the Nuclear Medicine Certification Board (NMTCB), the American Registry of Radiologic Technologists (ARRT), or the Canadian Association of Medical Radiation Technologists (CAMRT) must be submitted.
8. **Advanced Cardiac Life Support (ACLS):** Evidence of current ACLS certification must be provided.

9. **Post-Certification Clinical Experience:** Evidence of completion of a minimum of two years of full-time equivalent clinical experience in imaging sciences following certification must be provided. This experience must have been completed within the past three years. Teaching experience in an accredited nuclear medicine program may be submitted for consideration in meeting this requirement.
10. **Letter of Interest:** A personal statement or letter of interest, including one's professional goals is required. The statement is intended to allow applicants an opportunity to provide in narrative form any information that they believe would be useful to the admissions committee but may not have been included in any other documentation. The statement should be approximately 500-700 words in length.
11. **Interview:** Qualified applicants must present themselves for an interview, if invited. The interview may be in person at UAMS, UMC, GRU, or SLC, or may take place by telephone or audio conference. Interviews will be scheduled by the NMAA program director.
12. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Written and oral communication
- Professional experience
- Career goals

TRANSFER CREDIT

Up to six hours of graduate credit from another accredited graduate program in the United States will be accepted, provided the grades are "B" or better and the subjects are acceptable to the program director and department chairman as part of the student's degree plan.

PREREQUISITES

Bachelor's degree from a regionally accredited college or university and certification by the NMTCB, ARRT, or CAMRT.

CURRICULUM

Students are required to complete a minimum of 41 credits. The NMAA program is designed to be completed in five semesters and may be taken at sites distant from the main UAMS, SLU, GRU, or UMC campuses. A flexible degree plan starting in any semester and extending the program up to a maximum of five years may be arranged, although students

are strongly encouraged to complete the program in nine or fewer semesters. The clinical internship courses must be completed in consecutive semesters with at least one didactic course per semester. Applicants will develop individualized degree plans with the program director when they accept admission. The courses include:*

Course #	Title	Semester	Credit
MIS 5311	Patient Assessment		3
MIS 5315	Statistics & Research Methods		3
MIS 5321	Clinical Pharmacology		3
MIS 5413-N	Clinical Internship I		4
MIS 5423-N	Clinical Internship II		4
MIS 6341-N	Pathophysiology & Clinical Correlation		3
MIS 6343-N	Pathophysiology & Clinical Correlation II		3
MIS 6351	Healthcare Systems in America		3
MIS 6433-N	Clinical Internship III		4
MIS 6443-N	Clinical Internship IV		4
MIS 6453-N	Clinical Internship V		4
MIS 6V31	Research Project I		3
MIS 6V42	Research Project II (optional)		1-3
TOTAL			41-44

*Course requirements are subject to change.

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the program [website](#).

- Acceptable Grades for Progression
- Attendance Policy
- Computer Usage
- CPR Certification
- E-mail
- Examination Protocol
- Grading Scales
- Requesting Extra Clinic Time
- Responsibilities as a UAMS Nuclear Medicine Advanced Associate Student
- Student Behavior and Dress
- Student Supervision in the Clinic and Laboratory
- Student Transportation, Parking, and Clinic Rotation Hours

PROGRAM COSTS

The total cost of the five semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

NUCLEAR MEDICINE IMAGING SCIENCES – BACHELOR OF SCIENCE DEGREE

Department of Imaging and Radiation Sciences

Nuclear Medicine Imaging Sciences [Website](#)

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The nuclear medicine imaging sciences program is a full-time distance education program with one cohort of 40 students beginning each fall semester. The program consists of two semesters (fall/spring) with an intervening summer session. The program consists of 80 semester credits of prerequisite course work and 40 credits in the program for a total of 120 credits. Graduates receive a bachelor of science degree in Nuclear Medicine Imaging Sciences.

ACCREDITATION

The program is accredited by the Joint Review Committee on Educational Programs in Nuclear Medicine Technology (JRCNMT), 2000 W. Danforth Road, Suite 130 #203, Edmond, Oklahoma 73003. Telephone: (405) 285-0546. E-mail: jrcnmt@coxinet.net.

CERTIFICATION AND LICENSURE

Successful completion of all program requirements qualifies the graduate to apply for certification examinations given by the Nuclear Medicine Technologists Certification Board (NMTCB) and the American Registry of Radiologic Technologists (ARRT). Successful completion of the program does not itself ensure certification or registration. Each student is responsible for familiarizing himself/herself with the applicable certification and registration requirements.

APPLICATION PROCEDURES

For first consideration, all application materials must be received by **March 1**. Application materials received after this date will be considered only if the class has not been filled. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A minimum GPA of 2.50 is required for all math and science requirements and a minimum overall GPA of 2.50 is required to apply for

admission. Have transcripts sent to the CHP Welcome Center.

4. **References:** Reference forms will be sent via e-mail upon receipt of the application form. References from three persons qualified to judge your promise of success in the program are required.
5. **Professional Observation Form:** Observation form will be sent via e-mail upon receipt of the application form. The required form must be completed by a certified nuclear medicine technologist. At least 6 observation hours in a nuclear medicine department must be documented and the completed form must be submitted to the department before the deadline.
6. **FERPA:** A FERPA form will be sent to applicants via e-mail upon receipt of the application form. The completed form must be submitted to the department before the deadline.
7. **Interview:** Qualified applicants will be contacted after the admission deadline to arrange a required interview.
8. **Essay:** The submission of a confidential biographical statement is required. More information will be sent via e-mail upon receipt of the application form.
9. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the nuclear medicine imaging sciences program is competitive and based on the following factors:

- Academic achievement
- Math and science aptitude
- Written and oral communication

PREREQUISITES

The following 80 credits, of which at least 6 must be upper level, are required for admission. All listed courses are required from a regionally accredited post-secondary academic institution, and must fulfill all College requirements regarding acceptance of transfer credit. If in doubt of the suitability of the following prerequisite courses, please contact the CHP Welcome Center.

Area/Typical Course Title	Minimum Credits	Course # Title	Credits
SCIENCE AND MATH			
Human Anatomy and Physiology with Laboratory ²	8	CHP 3101 Legal and Ethical Issues for Allied Health Professionals	1
General Chemistry I ³	4	NMIS 4115 Radiopharmacy I	1

UPPER LEVEL ELECTIVES¹	6		
TOTAL	80		

¹Up to 9 SC of course work indicated may be taken as co-requisites. Those applicants who have completed 80 SC or more of the preprofessional curriculum prior to enrollment will have priority in admission decisions.

²Course work must cover all body systems and include laboratory credit.

³Course work must include laboratory credit. Chemistry courses designed specifically for nursing and other allied health technology students may meet this requirement; however, overview or preparatory chemistry courses will not.

⁴Course work must be algebra-based, at a minimum, and include a laboratory section for credit. Physics courses completed in radiography programs may be considered as substitutes.

⁵Biology courses taken as prerequisites to the human anatomy and physiology courses will satisfy this requirement.

CURRICULUM

The courses are conducted via distance education, primarily through the Internet, by faculty at UAMS. Clinical education is conducted at a variety of clinical affiliates in Fayetteville, Jonesboro, Little Rock, Rogers, Springdale, and Texarkana, Arkansas; Baton Rouge, Louisiana; Dallas and Tyler, Texas; Springfield, Missouri; and Tulsa, Oklahoma. The number and location of clinical affiliates may change.

The following 40 credits are required in the program.

Area/Typical Course Title	Minimum Credits	Course # Title	Credits

A grade of "D" or "F" or a mark of "U" or "NC" in a professional course is not acceptable for progression to the next semester, nor is it acceptable for graduation if it occurs in the last semester of the program.

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the program [website](#).

- Acceptable Grades for Progression
- Attendance Policy
- Computer Usage
- CPR Certification
- E-mail
- Examination Protocol
- Grading Scales
- Requesting Extra Clinic Time
- Responsibilities as a UAMS Nuclear Medicine Imaging Sciences Student
- Student Behavior and Dress
- Student Supervision in the Clinic and Laboratory
- Student Transportation, Parking, and Clinic Rotation Hours

PROGRAM COSTS

The total cost of the three semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

OPHTHALMIC MEDICAL TECHNOLOGY – BACHELOR OF SCIENCES DEGREE

Department of Ophthalmic Technologies

Ophthalmic Medical Technology [Website](#)

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The ophthalmic medical technology program is a full-time, day program with one cohort of four students beginning each fall semester. The 24 months program consists of four fall/spring semesters and two summer semesters.

Upon successful completion of all program requirements the student qualifies to apply to take the national certification examination. The Joint Commission on Allied Health Personnel in Ophthalmology (JCAHPO) grants permission for ophthalmic medical technology students to apply for and begin the certification process prior to graduation. Students are required to take the Certified Ophthalmic Medical Technologist (COMT) certification examination in their final semester. The program's mission, goals, and competencies/learning outcomes can be found on the department website.

The Bachelor of Science in Ophthalmic Medical Technology consists of 51 semester credits of prerequisite course work and 69 credits in the ophthalmic medical technology curriculum for a total of 120 credits.

ACCREDITATION

The program is accredited by the Commission on Accreditation of Ophthalmic Medical Programs, 2025 Woodlane Drive, St. Paul, Minnesota 55125. Telephone: (651) 731-7245. Website: www.coa-omp.org/.

APPLICATION PROCEDURES

The deadline for submitting completed applications is **May 15**. Early consideration will be given to those who have submitted complete applications by **April 15**. Applications must be received by **May 15** to be assured of consideration for admission. In the event the class is not filled from those applicants, the application deadline may be extended to as late as August 1. Send all requested materials to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official

transcript of your course work. A minimum prerequisite GPA of 2.25 is required in the prerequisite courses to apply for admission.

4. **Professional Observation Form:** A professional observation form signed by an eye doctor or ophthalmic medical technician that documents at least 2 observation hours in an eye clinic must be submitted before the deadline. Contact the department at (501) 526-5880 or at OMT@uams.edu to schedule a professional observation or to obtain the professional observation form.
5. **Interview:** Qualified applicants are contacted to arrange an interview after receipt of application and all official transcripts.
6. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the ophthalmic medical technology program is competitive and based on the following factors:

- Academic achievement
- Math and science aptitude
- Written and oral communication

PREREQUISITES

The following 51 credits are required from a regionally accredited college or university and must fulfill all College requirements regarding the acceptance of transfer credit. While students are strongly encouraged to complete all 51 credits prior to enrollment, students lacking up to 8 credits of the 51 prerequisite credits may be considered for admission with the understanding that all prerequisite courses will be completed within one year of entry into the program. If in doubt of the suitability of the following prerequisite courses, please contact the CHP Welcome Center.

Area/Typical Course Title	Minimum Credit
Science	
Biology	4
Principles of biology course with laboratory	

Anatomy & Physiology	4-6
Course/courses with laboratory that covers all body systems*	
Microbiology	
One semester course with a laboratory	4
Chemistry	
Principles of chemistry course	3
Physics	
General physics course with a laboratory	4
Mathematics	
College Algebra or higher mathematics	<u>3</u>
	22-24
LIBERAL ARTS	
English Composition	
Two-semester sequence of English Composition	6
History	
History of the United States or National Government	3
History of Civilization (one semester course on world history)	3
Fine Arts	
Music, Art, Theater	3
Humanities	
Philosophy, Political Science, Literature, or Humanities	3
Social Science	
Psychology	
General Psychology	3
Sociology	
Introduction to Sociology	3
Communications	
Speech Communication	
Fundamentals of Speech or Speech Communication	<u>3</u>
	<u>27</u>
TOTAL	49-51

*A single 4 credit anatomy & physiology course covering all body systems must be preapproved by the OMT department. If approved, 2 credits of elective coursework must be completed in order to meet the 120 credit program requirement.

Science courses must be suitable for majors in those disciplines and must include laboratory credit in required courses. Other courses may fulfill the program's requirements. Contact the CHP Welcome Center for course approval. If completed seven or more years prior to application, knowledge should be updated by taking appropriate current courses in Microbiology. CLEP credits are not acceptable to fulfill biological science requirements.

Marks of Pass/Credit will be considered grades of C and marks of Fail/No Credit will be considered grades of F for admission purposes.

Fulfillment of the prerequisite does not assure admittance into the professional program (please see Application Procedures).

CURRICULUM

The following 69 SC are required in the professional program:

Course #	Title	Credit
Year 1		
Fall		
OPH 3201	General Medical Knowledge & Terminology	2
OPH 3202	Introduction to Ophthalmic Technology, Medical Law, & Ethics	2
OPH 3203	Ocular Anatomy & Physiology	2
OPH 3204	Optics I	2
OPH 3101	Clinical Skills Laboratory I	1
OPH 3510	Clinical Practicum I	<u>5</u>
		14
Spring

		15
Summer		
OPH 3106	Clinical Skills Laboratory III	1
OPH 3412	Clinical Practicum III	<u>4</u>
		5
Year 2		
Fall		
OPH 4201	Ocular Motility II: Abnormalities of Binocular Vision	2
OPH 4202	Survey of Eye Diseases	2
OPH 4303	Special Testing	3
OPH 4204	Ophthalmic Photography & Angiography	2
OPH 4207	Advanced Concepts in Ophthalmology	2
OPH 4101	Clinical Skills Laboratory IV	1
OPH 4510	Clinical Practicum IV	<u>5</u>
		17
Spring		
OPH 4205	Ocular Emergencies & Oculoplastics	2
OPH 4108	CPR	1
OPH 4306	Special Topics	3
OPH 4309	Ophthalmic Surgical Assisting	3
OPH 4511	Clinical Practicum V	<u>5</u>
		14
Summer		
OPH 4412	Clinical Practicum VI	4
TOTAL		69

A grade of "F" or a mark of "U" or "NC" is not acceptable for progression to the next semester, nor is it acceptable for graduation if it occurs in the last semester of the program. A grade of "D" in the following professional courses is not acceptable for progression to the next semester, nor is it acceptable for graduation if it occurs in the last semester of the program: Clinical Practicum II (OPH 3611), Clinical Practicum III (OPH 3412), Clinical Practicum IV (OPH 4510), Clinical Practicum V (OPH 4511), and Clinical Practicum VI (OPH 4412). A first semester student who passes all courses but achieves a CGPA of less than 2.0 will be allowed to progress on probation to the second semester if he/she has achieved a CGPA of at least 1.8 in the professional courses. A student in subsequent semesters must maintain a GPA of not less than 2.0 for all courses taken since entering the program.

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the department [website](#):

- Alternative Clinical Activities
- Attendance Regulations
- Change of Address and/or Name Responsibility
- Changes in Policy
- Conduct and Ethics
- Correspondence between Students and Faculty
- Incidents in the Clinical Agency
- National Credentialing
- Outside Employment
- Policy on Working
- Procedure for Readmission to the Ophthalmic Medical Technology Program
- Professional Development and Service
- Program Outcomes Assessment Plan
- Release of Student Information
- Student Appeals
- Uniform Policy for Clinical Practice

PROGRAM COSTS

The total cost of the six semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

PHYSICAL THERAPY – DOCTOR OF PHYSICAL THERAPY DEGREE

Department of Physical Therapy

Physical Therapy Website

Department of Physical Therapy

College of Health Professions
University of Arkansas for Medical Sciences-Northwest
1125 N. College Avenue
Fayetteville, AR 72703-1908

Telephone: (479) 713-8600
Email: PTprogram@uams.edu

THE PROGRAM

The physical therapy program is a continuous 34-month, full-time program that enrolls a class of 24 new students each August. This is a cohort-based full time program with a lock-step curriculum. The program offers a 4+3 curriculum, requiring a baccalaureate degree prior to admission into the program. The program consists of 116 credits of coursework, including 32 weeks of full-time clinical internships. Upon completion of the degree requirements, students are awarded a Doctorate of Physical Therapy degree.

The curriculum uses the flipped classroom concept, with lectures delivered electronically to the students and in-class time devoted to integration of material and problem solving. In-class sessions involve problem-based and team-based learning, as well as interprofessional learning experiences.

The program is located at the UAMS Northwest Campus in Fayetteville, Arkansas.

ACCREDITATION

Graduation from a physical therapist education program accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE) is necessary for eligibility to sit for the licensure examination, which is required in all states. Effective January 2014, UAMS has begun the pre-accreditation process. In March 2015, the program will submit an Application for Candidacy, which is the formal application required in the pre-accreditation stage. Submission of this document does not assure that the program will be granted Candidate for Accreditation status. Achievement of Candidate for Accreditation status is required prior to implementation of the professional phase of the program; therefore, no students may be enrolled in professional courses until Candidate for Accreditation status has been achieved. Further, though achievement of Candidate for Accreditation status signifies satisfactory progress toward accreditation, it does not assure that the program will be granted accreditation. For further information on the Accreditation process, contact CAPTE at 1111 North Fairfax Street, Alexandria, VA, 22314; phone: 703-706-3245; email: accreditation@apta.org.

APPLICATION PROCEDURES

The application deadline is **December 31**. All necessary documents for applications must be submitted on or before this date. First consideration may be given to Arkansas residents; however, highly qualified out-of-state applicants are strongly encouraged to apply and may successfully compete for admission.

All application materials should be sent to:

UAMS College of Health Professions
Student Welcome Center
4301 W. Markham Street, #619
Little Rock, AR 72205

Applicants must provide:

1. **Application:** Application is required and is available on the [CHP website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Documentation of Observation Hours:** Documentation of 60 hours of observation of a physical therapist. The documentation form can be found on the [CHP website](#).
4. **Reference Letters:** Two letters of reference sent directly from the referee to the CHP, using the reference form found on the [CHP website](#).
5. **Photograph:** A recent 2 ½ by 3 ½ in. color photograph
6. **GRE Scores:** Use Institution Code: **6901** to have scores sent directly to the CHP.
7. **Official Transcripts:** A bachelor's degree completed by **June 1** of the year of admission along with specific prerequisite coursework and a minimum cumulative and prerequisite GPA of 3.0 (on a 4.0 scale) is required for consideration for admission. Arrange for each of your previous institutions to forward an official transcript directly to the CHP. All pre-requisite coursework needs to be completed and submitted by Dec 31 of the year prior to admission.
8. **Personal Statement:** A personal written statement addressing the applicant's professional goals (one page, typed, double spaced).

9. **Interview:** Qualified applicants will be invited for an on-campus interview beginning in February.
10. **TOEFL scores as applicable:** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the physical therapy program is competitive and based on the following factors:

- Academic achievement
- Volunteer and service work
- Observation hours / experience in the field
- Professionalism / Attitude / Maturity
- Life Experiences
- Diversity / Cultural Awareness
- Written and oral communication

PREREQUISITES

Earned bachelor's degree from an accredited institution, by **June 1st** of the year of admission is required. In addition, the following 33 credits are required for admission:

Prerequisite Course Work	Minimum Credits
Anatomy	3
- Human or Vertebrate Anatomy	
- Recommended focus on neuromuscular system	
- Course w/ human cadaver dissection lab preferred	
Physiology	3
- Human or Vertebrate Physiology	
- Recommended topics include: striated and cardiac muscle physiology, cardiovascular regulation, physiology of respiration and acid-base homeostasis	
Biology	6
- General and specialized courses	
- Recommended topics include: Histology, Microbiology, Immunology, Developmental Biology, or Neuroscience	
Chemistry	6
- Two semesters of general or specialized chemistry	
Physics	6
- Two semesters of general physics	
- Recommended topics include: light, heat, sounds, electricity and mechanics	
Statistics	3
- Recommended topics include: Biostatistics, Research Methods & Design, Hypothesis Testing, and Quantitative Analysis	
Psychology	6
- General and specialized courses.	
- Recommended topics include: Abnormal Psychology, Child Psychology, Developmental Psychology, and Psychology of Aging.	
TOTAL	33

Only grades of C or higher are acceptable for all prerequisite coursework.

No transfer credits are accepted from other degree programs or physical therapy programs. There is no advanced standing permitted in the PT program. Required prerequisite course work graded as Pass/Fail or credit obtained by CLEP Examination or Advanced Placement (AP) will not be accepted.

All prerequisite course work must be obtained from a regionally accredited institution in the U.S.

CURRICULUM

The curriculum consists of:

- 116 credit hours of didactic and clinical education
- 32 weeks of clinical internships

Content areas include:

Basic Sciences:

- Human Anatomy
- Neuroanatomy
- Clinical Medicine /Pathology
- Kinesiology / Exercise Physiology
- Motor Control/Motor Learning
- Pharmacology

Basic Skills:

- Foundation of Patient Care Skills
- Foundation of PT Examination, Evaluation and Diagnosis
- Physical Agents
- Medical Screening
- Diagnostic Imaging

Practice Patterns:

- Musculoskeletal I, II, III, IV, V
- Neuromuscular I, II, III
- Cardiopulmonary
- Integumentary

Inquiry:

- Principles of Research – includes statistics
- Evidence-based Practice
- Capstone project

Other Courses:

- Health Promotion and Wellness
- Professional Issues & Ethics
- Cultural Competence
- Lifespan (includes pediatrics & geriatrics)
- Prosthetics & Orthotics
- Psychosocial Aspects
- Motor Control/Motor Learning
- Selected Topics in Physical Therapy
- Administration, Health Care Management and Policy
- Management of Complex Medical Conditions

Clinical Education:

- Clinical Education Rotations I, II, III
- Clinical Internship

PROGRAM COSTS

The total cost of the program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center website.

PHYSICIAN ASSISTANT – MASTER IN PHYSICIAN ASSISTANT STUDIES DEGREE

Department of Physician Assistant Studies

Physician Assistant Studies Website

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The physician assistant program is a full-time, day program with one cohort of students beginning each May. The didactic (classroom) phase of the program is approximately 13 months and the clinical phase of the program is 15 months in length. The M.P.A.S. requires 44 semester credits of prerequisite course work and courses of 128 credits in the P.A. curriculum. Upon completion of the degree requirements, students are awarded a Master of Physician Assistant Studies degree (M.P.A.S.). Graduates will be eligible to sit for the national certification examination through the National Commission on the Certification of Physician Assistants. Once nationally certified, graduates of the PA program will be eligible to apply to the Arkansas State Medical Board or another state board for a license to practice in the state. Successful completion of the program does not itself ensure certification and/or licensure. It is the student's responsibility to be familiar with licensure and certification requirements.

ACCREDITATION

The Physician Assistant program is Provisionally Accredited by the Accreditation Commission on Education for the Physician Assistant (ARC-PA), 12000 Findley Road, Suite 150, Johns Creek, GA 30097. Telephone: (770) 476-1224. Website: www.arc-pa.org.

APPLICATION PROCEDURES

The program will have a rolling admissions process and will accept candidates until the class is selected for May enrollment annually.

During admission reviews, first consideration may be given to Arkansas residents. Highly qualified applicants from out-of-state are strongly encouraged to apply and may successfully compete for admission. The Program is committed to admitting and graduating qualified candidates from diverse backgrounds.

Applicants must provide:

1. **Application for Admission:** Applicants must apply through the Central Application Service for Physician Assistants (CASPA) at <https://portal.caspaonline.org/>. Through CASPA, applicants will submit the following:
 - a. **Application**
 - b. **Application Fee**
 - c. **Official Transcripts:** Bachelor's degree completed prior to matriculation from a regionally accredited institution in the United States is required. A Cumulative Undergraduate GPA of 3.0 on a 4.0 scale is strongly recommended. A Natural Science GPA of 3.0 on a 4.0 scale is strongly recommended.
 - d. **GRE Score(s):** Graduate Record Examination (verbal, quantitative and analytical writing) is required. The GRE must be completed within the last 5 years at the time of application with verbal, quantitative and analytical writing scores. A combination of scores from separate exam dates may not be utilized.
 - e. **Letters of Recommendation.** Letter of recommendation from a physician or physician assistant, a professor/instructor, and a work supervisor, for a total of three letters of recommendation.
 - f. **Personal Narrative:** The CASPA application requires one narrative and the PA Program supplemental application requires two narratives. Narrative questions may change annually. Please refer to the applications for the specific narrative questions.
 - g. **Patient Care Experience:** Clinical experience of 500 hours demonstrating direct patient care is required and is documented in the CASPA application. The experience does not have to be paid or full-time experience. Volunteer hours may count towards this requirement. Some accepted categories of experience include:

Athletic Trainer

Certified Nursing Assistant

Ophthalmology Technician

Paramedic/ EMT

Dental Hygienist	Patient Care Technician
Dietician	Peace Corp Volunteer
Emergency Room Technician	Phlebotomist
Home Health Aide	Physical Therapist
Hospice Volunteer	Physical Therapist Assistant
Licensed Practical Nurse	Radiologist Technologist
Medical Assistant	Registered Nurse
Medical Corpsman	Respiratory Therapist
Nursing Assistant/Aide	Surgical Technology
Occupational Therapist	

Direct patient care is defined as actively working with patients and having a direct influence of care on a specific patient. Example activities include eliciting histories, taking vital signs, drawing blood, performing procedures, etc. While shadowing a PA or physician is highly recommended to gain a better understanding of the medical profession, shadowing cannot count towards direct patient care.

- Supplemental Application:** A PA Program application is required and is available on the CHP [website](#).
- Supplemental Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the supplemental application.
- Interview:** The most qualified applicants will be contacted for an on-campus interview.

Admission to the UAMS PA Program is a highly selective and competitive process. Selection is based on a combination of academic performance (GPAs and GRE), quality of direct patient care experience, letters of recommendation, personal narratives and performance during the interview.

ADMISSION FACTORS

Admission to the physician assistant program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Quality of direct patient care experience
- Personal/professional endorsement
- Career goals
- Written and oral communication

PREREQUISITES

The following 44 credits are required for admission:

Prerequisite Course Work	Minimum Credits
General/Principles of Biology I and II with Laboratory*	8
Human Anatomy with Laboratory**	4
Human Physiology with Laboratory	4
Microbiology with Laboratory	4
Medical Genetics/Genetics	3
General Chemistry I and II with Laboratory	8
Organic Chemistry I with Laboratory	4

General Psychology	3
Abnormal Psychology	3
Biostatistics or Statistics	3
TOTAL	44

*If General Biology II is unavailable at the educational institution of attendance, General Zoology with Laboratory or Cell Biology with Laboratory may be substituted.

**A combined full year Anatomy and Physiology I and II with laboratories will meet this requirement.

Only grades of C or higher are acceptable for all prerequisite coursework.

Anatomy, Physiology, and Microbiology must be completed within the last seven years at time of matriculation.

Survey courses do not meet the prerequisite requirements. Online courses are permitted for prerequisite courses but not for the laboratory component of the course.

No transfer credits are accepted from other degree programs or physician assistant programs. There is no advanced standing permitted in the PA program. Required prerequisite course work graded as Pass/Fail or credit obtained by CLEP Examination or Advanced Placement (AP) will not be accepted.

All prerequisite course work must be obtained from a regionally accredited institution in the U.S.

CURRICULUM

The following 128 credits are required in the program and designed to be completed in 28 months.

SERVICE LEARNING

The program has a service learning requirement that is separate from course work during the didactic phase of the program.

PROGRAM POLICIES

Program specific policies and procedures can be found in the student Entrance Policies and Requirements on the department [website](#).

PROGRAM COSTS

The total cost of the program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

RADIOLOGIC IMAGING SCIENCES – ASSOCIATE OF SCIENCE DEGREE BACHELOR OF SCIENCE DEGREE

Department of Imaging and Radiation Sciences

Radiologic Imaging Sciences Website

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730
Email: CHPWelcomeCenter@uams.edu

THE PROGRAMS

The Radiologic Imaging Sciences program offers two degree options: An Associate of Science in Medical Radiography and a Bachelor of Science in Radiologic Imaging Sciences.

The department has two program sites: Little Rock and Fayetteville (Northwest Campus). Successful completion of the Associate of Science degree program requirements qualifies the student to apply for the national certification examination. Successful completion of the program does not itself insure certification. The program's mission, goals, and competencies/learning outcomes can be found on the department website.

Associate of Science Degree: The Associate of Science Degree program is a full-time, day program with a cohort of 33 students beginning each fall semester with 23 students in Little Rock and 10 students in Fayetteville. It consists of four fall/spring semesters with one intervening summer session. The program consists of 35 credits of prerequisite course work and 60 credits in the RIS curriculum for a total of 95 credits.

Bachelor of Science Degree: The Bachelor of Science in Radiologic Imaging Sciences consists of the same 35 semester credits of prerequisite course work and successful completion of an Associate of Sciences in Medical Imaging or Associate of Applied Science in Radiologic Technology. Students with an Associate of Science in Medical Radiography from UAMS are required to successfully complete 25 credits in the BS degree completion program. Students with an Associate of Applied Science in Radiologic Technology from a different accredited college or university are required to successfully complete 32-40 credits in the BS degree completion program. Many of these courses are offered online. Students who completed a non-degree certificate/hospital based program and are currently in CE compliance with the ARRT should contact the program director for more information.

ACCREDITATION

The Associate of Science program is accredited by the Joint Review Committee on Education in Radiologic Technology, 20 N. Wacker Drive, Suite 2850, Chicago, Illinois 60606-3182. Telephone: (312) 704-5300. Website: <http://www.jrcert.org/>.

APPLICATION PROCEDURES

All application materials must be received by **March 1** to be considered for admission. No applications will be reviewed after this date. Send all requested materials to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the [CHP website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A minimum cumulative and prerequisite GPA of 2.50 is required to apply for admission.
4. **Professional Observation Form:** A professional observation form signed by a registered radiographer that documents at least 4 observation hours in a busy radiology department must be sent by the radiographer before the deadline. The form is available on the [program website](#).
5. **Interview:** The most qualified applicants will be contacted after January 31 to arrange an interview.
6. **Essay:** The submission of a written essay is required. More information is sent to the applicant when contacted for an interview.
7. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the radiologic imaging sciences program is competitive and based on the following factors:

- Academic achievement
- Understanding of the profession
- Professionalism
- Written and oral communication

PREREQUISITES

The following 35 credits are required for admission. All listed courses are required from a regionally accredited post-secondary academic institution, and must fulfill all College requirements regarding acceptance of transfer credit. If in doubt of the suitability of the following prerequisite courses, please contact the CHP Welcome Center.

Area/Typical Course Title	Minimum Credit
SCIENCE AND MATHEMATICS	
College Algebra	3
Anatomy and Physiology I with Laboratory	4
Anatomy and Physiology II with Laboratory	<u>4</u>
	11
LIBERAL ARTS

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The Radiologist Assistant Masters of Imaging Sciences (MIS) program is designed to prepare diagnostic imaging technologists for careers as advanced practice radiologic health care providers. The MIS degree is designed to accommodate multiple educational tracks as the demand for advanced practitioners in specific modalities emerge, beginning with the Radiologist Assistant (RA). Core courses address educational needs for advanced practice across the imaging disciplines and specific program tracks focus on specialized areas of imaging expertise.

The program is designed to be completed in five consecutive semesters on a full-time basis. A flexible degree plan starting in any semester and extending the program up to a maximum of nine semesters may be arranged, resources permitting; however the five required clinical internship courses must be completed consecutively.

Graduates of the program are eligible to take the national RA credentialing examination administered by the American Registry of Radiologic Technologists (ARRT). The program's mission, goals, and competencies/learning outcomes can be found on the department website.

Students are required to be registered radiographers in CE compliance with the ARRT and must complete a minimum of 40 semester credits of course work in the program.

The American Society of Radiologic Technologies (ARSRT) provides practice standards and a curriculum model for the academic preparation of RAs.

ACCREDITATION

The program is officially recognized by the American Registry of Radiologic Technologists (ARRT), 1255 Northland Drive, St. Paul, Minnesota 55120-1155. Telephone: (651) 687-0048. Website: www.arrt.org.

APPLICATION PROCEDURES

The program may begin in any semester. Applications postmarked by **June 1** will be considered for fall semester, by **November 1** will be considered for spring semester, and by **March 1** will be considered for summer semester. Send all requested materials to the CHP Welcome Center. Applicants must provide:

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Certification as a Radiologic Technologist by the American Registry of Radiologic Technologists (ARRT):** Submit evidence of current certification in radiography as a radiologic technologist.
4. **Official Transcripts:** Arrange for each college or university attended to forward an official transcript. An earned bachelor's degree, or higher degree, from a regionally accredited college or university is required.
5. **Graduate Record Examination (GRE):** Submit GRE scores from an examination taken within five years of the date of application to the program. GRE code: 6146.
6. **Advanced Cardiac Life Support (ACLS):** Submit current evidence of satisfactory completion of ACLS that meets American Heart Association requirements, including skills practice and skills testing.
7. **Post-Certification Clinical Experience:** Submit evidence of completion of a minimum of two years of full-time equivalent clinical experience in imaging sciences following certification. This experience must have been completed within the past three years. Teaching experience in an accredited radiologic technology program may be submitted for consideration in meeting this requirement.
8. **Radiology Supervisor References:** Applicants must submit two reference forms completed by their radiology supervisors, including their current supervisor. Reference forms located on program [website](#).
9. **Preceptor and Affiliate Agreement Forms:** Submit at least one Preceptor Agreement Form completed by a radiologist who is willing to serve as the applicant's clinical preceptor. An Affiliate Agreement form to be completed by the clinical facility will be provided upon receipt of the radiologist preceptor form. Information for radiologists about their role as preceptors is available from the department.

10. **Interview:** Qualified applicants must present themselves in person at UAMS for an interview, if requested by the department.
11. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

- Responsibilities as a UAMS Radiologist Assistant Student
- Social Networking
- Student Behavior and Dress

ADMISSION FACTORS

Admission to the program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Written and oral communication
- Professional experience.

PREREQUISITES

RIS 4381 Geriatric Imaging or its equivalent is a prerequisite course for the undergraduate professional curriculum. Students who have not completed RIS 4381 or its equivalent prior to being accepted into the RA programs must complete the graduate level Geriatric Imaging course (MIS 5281).

CURRICULUM

The following 40 credits are required in the program.

Course #	Title	Minimum Credits
MIS 5261-R	Pathophysiology & Clinical Correlation I	2
MIS 5262-R	Pathophysiology & Clinical Correlation II	2
MIS 5311	Patient Assessment	3
MIS 5315	Statistics & Research Methods	3
MIS 5321	Clinical Pharmacology	3
MIS 5413-R	Clinical Internship I	4
MIS 5423-R	Clinical Internship II	4
MIS 6351	Healthcare Systems	3
MIS 6433-R	Clinical Internship III	4
MIS 6443-R	Clinical Internship IV	4
MIS 6453-R	Clinical Internship V	4
MIS 6V31	Research Project I	1-3
MIS 6V42	Research Project II (optional)	1-3
Elective(s) (optional)		<u>3</u>
TOTAL MINIMUM		40

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the program [website](#):

- Acceptable Grades for Progression
- Attendance Policy
- Computer Usage
- E-mail
- Examination Protocol
- Grading Scales

PROGRAM COSTS

The total cost of the five semester Master of Imaging Science degree program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

RESPIRATORY CARE – BACHELOR OF SCIENCE DEGREE

Department of Respiratory and Surgical Technologies

Respiratory Care Website

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The respiratory care program is available for traditional students entering the profession for the first time as well as for non-traditional, practicing professionals wishing to complete the Bachelor of Science Degree.

Traditional Program: Each fall semester, the traditional program admits a full-time and a part time cohort who attend classes during the day. A satellite program is available in Texarkana (AHEC-Texarkana) where part-time (8 semesters) and full-time (5 semesters) cohorts are also admitted each fall semester. The number of students in each cohort at each site depends upon clinical slot availability. Second year part-time students and first year full-time students comprise a clinical cohort. There are 24 clinical slots available in Little Rock and six clinical slots available in Texarkana. The program consists of 55 semester credits of prerequisites course work and 65 credits in the respiratory care curriculum for a total of 120 credits.

Students are eligible to earn the CRT (Certified Respiratory Therapist) credential and the RRT (Registered Respiratory Therapist) credential upon graduation. Students earn credentials in Advanced Cardiac Life Support (ACLS), Pediatric Advanced Life Support (PALS), and Neonatal Resuscitation Program (NRP) as program requirements. Successful completion of all program requirements qualifies graduates to apply for a license to practice in Arkansas. Successful completion of the program does not itself insure licensure.

Non-Traditional Program - RRT-to-BS Degree: The non-traditional program has two tracks, both of which may be completed on a part-time or full-time schedule. A thesis track is suggested for experienced therapists or for those who are preparing for entry into graduate education (26-29 SC). It is offered through on-line courses or by independent study. A clinical track is suggested for recent graduates of Associate Degree programs (25-36 SC). It includes courses offered online, by interactive video, face-to-face, by independent study and clinical courses. The number of students admitted each summer semester depends upon number and credential level of faculty and clinical slot availability. Ungraded transfer credit is awarded for the RRT credential (up to 40 SC).

ACCREDITATION

The traditional program is accredited by the Commission on Accreditation for Respiratory Care Education, 1248 Harwood Road, Bedford, Texas 76021-4244. Telephone: (817)-283-2835. Website: www.coarc.com.

APPLICATION PROCEDURES

All application materials must be received by **May 1**. Applications may be accepted after the deadline depending on class capacity. Applicants are encouraged to apply early, as qualified applicants may receive conditional acceptance prior to **May 1**. Send all requested materials to the CHP Welcome Center.

1. **Application for Admission:** The application is required and is available on the CHP [website](#).
2. **Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
3. **Official Transcripts:** Arrange for each college or university you have attended to forward an official transcript of your course work. A minimum cumulative and prerequisite GPA of 2.5 is required to be considered for admission.

All applicants must successfully complete College Algebra and two of the four science prerequisite courses by June 1 of the year of application in order to be considered for admission.

All applicants must successfully complete Human Anatomy and Physiology I and II (8 SC) before the first semester of the program.

Applicants to the full-time traditional program track must successfully complete all prerequisites before the first semester of the program.

Applicants to the part-time track and to either track of the non-traditional RRT-to-BS degree track must successfully complete at least 35 SC of prerequisite course work before the first semester of the program.

Applicants for the traditional program must also provide:

4. **Professional Observation:** Documentation of observation of and discussion with a practicing professional in the field is required. Contact the program for details.
5. **Testing Results:** Completion of the Health Occupations Admission Examination is required. The cost of the online examination is \$20.00. Contact the program for details.
6. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of the catalog.

Applicants for the non-traditional RRT-to-BS degree completion program tracks must also provide:

4. **Proof of RRT Status:** A notarized copy of the RRT certificate must be submitted.
5. **Statement of Career Summary and Goals:** A typewritten statement that summarizes the applicant's career thus far and explains how completion of the BS degree will assist him/her in completion of career goals must be submitted. The submission must include a traditional resume of educational and professional achievements using a chronological or functional format.
6. **Portfolio:** A professional portfolio that documents and articulates skills, abilities and accomplishments must be submitted. Samples of the applicant's work, testimonials, letters of recommendation, degrees, licenses, certifications, awards, honors, descriptions of volunteer/community service and professional development activities may be included, for example. A portfolio is required for applicants to the non-traditional thesis track, only.
7. **TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of the catalog.

ADMISSION FACTORS

Admission to the traditional respiratory care program is competitive and based on the following factors:

- Academic achievement
- Academic aptitude
- Academic experience
- Math and science achievement

Admission to the non-traditional RRT-to-BS degree completion program as based on the following factors:

- Academic achievement
- Academic experience
- Math and science achievement
- Writing skills
- Depth and breadth of professional involvement
- Career goals

PREREQUISITES

The following 55 credits are required for admission to the traditional track (full-time or part-time) or the RRT-to-BS degree completion track. All listed courses are required from a regionally accredited post-secondary academic institution, and must fulfill all college requirements regarding acceptance of transfer credit. If in doubt of the suitability of the following prerequisite courses, please contact the CHP Welcome Center.

Area/Typical Course Title	Minimum Semester Credit

ELECTIVES	
	<u>2</u>
TOTAL	55

*Science courses must be suitable for science or health professions majors and include a laboratory.

**Students admitted to the part-time track must complete the Human Anatomy and Physiology course requirements as described above by the date of registration at UAMS. In addition, completion of at least one of the three other science courses is required.

***Anatomy and physiology courses must cover all body systems and include accompanying laboratory sections.

A final grade of "C" or better is required in each of the above courses. Documentation of successful completion is required by the date of registration for the first semester.

Actual course titles may vary among institutions. Consult the department for preprofessional counseling.

Fulfillment of the preprofessional curriculum does not in itself ensure admittance into the professional program (please see Application Procedures and Deadlines).

****A course in Medical Terminology may be waived for RRT-to-BS applicants.

CURRICULUM

The following 65 credits are required in the traditional program two-year track (full-time):

		<u>Year 1</u>	
Course #	Title		Credits
Fall			
RES 3113	Equipment and Techniques I Laboratory	1	
RES 3115	Basic Assessment and Diagnosis Laboratory	1	
RES 3116	Pharmacology I	1

PROGRAM POLICIES

The following program specific policies and procedures can be found in the student handbook on the program [website](#):

- Affiliate Health Services
- Attendance/Tardiness
- Clinical Affiliates
- Clinical Policies and Procedures Handbook
- Completion of Degree Requirements
- Computerized Examinations
- Counseling
- Criminal Background Checks and Drug Testing
- Dress Code
- Grading
- Email Accounts
- Employment
- Equipment
- Laptop and PowerPoint Use
- Remediation
- Service, Service-Learning and Professional Development Requirements
- Student Conduct
- Use of Calculators and Cell Phones During Examinations

PROGRAM COSTS

The total cost of the five semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

SURGICAL TECHNOLOGY – ASSOCIATE OF SCIENCE DEGREE

Department of Respiratory and Surgical Technologies

Surgical Technology [Website](#)

CHP Welcome Center

College of Health Professions
University of Arkansas for Medical Sciences
4301 West Markham Street, #619
Little Rock, AR 72205

Telephone: (501) 686-5730

Email: CHPWelcomeCenter@uams.edu

THE PROGRAM

The surgical technology program is a full or part-time day program with one cohort of 16 students beginning each fall semester. The full-time program consists of 2 semesters (fall/spring) with a summer session. The part-time program consists of 4 semesters (2 fall/2 spring) with a summer session. The program is located in Little Rock. Graduates receive an Associate of Science in Surgical Technology.

Successful completion of all program requirements qualifies the student to sit for the national certification exam. Successful completion of the program does not itself ensure certification. The program's mission, goals, and competencies/learning outcomes can be found on the department website.

The program consists of 39 credits of prerequisites course work and 31 credits in the surgical technology curriculum for a total of 70 credits.

ACCREDITATION

The program is accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), 1361 Park Street, Clearwater, Florida 33756. Telephone: (727) 210-2350. Website: www.caahep.org.

APPLICATION PROCEDURES

In order to be eligible for the CHP scholarships, application must be received by **March 1**. All other application materials received by **May 31** will be considered for admission. No applications will be reviewed after **May 31**. Applicants must provide:

- Application for Admission:** The application is required and is available on the CHP [website](#).
- Application Fee:** A non-refundable application fee of \$40.00 is required and must accompany the application.
- Official Transcripts:** Arrange for each college and university you have attended to mail an official transcript directly to the CHP Welcome Center. A cGPA of at least 2.0 is required to be considered for admission.
- Interview:** Qualified applicants are contacted after receipt of transcripts and the CHP application form to arrange interviews.

- Testing Results:** Writing, reading, and mathematical skills are evaluated at the time of interview by using the Nelson-Denny and a basic math examination.
- TOEFL scores as applicable.** See International Applicants in the Admissions/Academic Information section of this catalog.

ADMISSION FACTORS

Admission to the surgical technology program is competitive and based on the following factors:

- Academic achievement
- Reading and mathematics aptitude
- Written and oral communication

PREREQUISITES

The following 39 credits are required from a regionally accredited college or university and must fulfill all College requirements regarding acceptance of transfer credit. If in doubt of the suitability of the following prerequisite courses, please contact the CHP Welcome Center.

Area/Typical Course Title	Minimum Credits
SCIENCE*	
Human Anatomy & Physiology	8
Microbiology	<u>4</u>
	12
MATHEMATICS	
College Algebra or Higher Level Mathematics	3
LIBERAL ARTS	
English Composition	6
American History or National Government	<u>3</u>
	9
FINE ARTS/HUMANITIES	
Fine Arts/Humanities	9
OR	
Fine Arts/Humanities	6
Speech Communication	<u>3</u>
	9
SOCIAL SCIENCES	
Psychology	3
Sociology	<u>3</u>
	<u>6</u>
TOTAL	39

*Science courses must be suitable for science or health professions majors and include a laboratory.

A final grade of "C" or better is required in each of the above courses. Documentation of successful completion is required by the date of registration for the first semester.

Fulfillment of the prerequisite curriculum does not in itself ensure admittance into the professional program (please see Application Procedures and Deadlines).

CURRICULUM

The following 31 credits are required in the program.

Course	Title	Semester Credit
Fall		
SUT 2211	Basic Operating Room Techniques I Laboratory	2
SUT 2215	Clinical Practicum I	2
SUT 2312	Medical Terminology	3
SUT 2313	Surgical Pathophysiology	3
SUT 2510	Basic Operating Room Techniques	5
		<u>15</u>
Spring		
SUT 2221	Pharmacology for the Surgical Technologist	2
SUT 2222	Perioperative Practice	2
SUT 2425	Clinical Practicum II	4
SUT 2520	Advanced Operating Room Techniques	5
		<u>13</u>
Summer		
SUT 2123	Professional Certifications Seminar	1
SUT 2231	Clinical Practicum III	2
		<u>3</u>
TOTAL		31

A grade of "D" or "F" or a mark of "U" or "NC" in a professional course is not acceptable for progression to the next semester, nor is it acceptable for graduation if it occurs in the last semester of the program.

Part-Time Professional Curriculum: A two-year program option is available. In order to be eligible, students must have completed 21 credits in mathematics, sciences, and social sciences prior to enrolling in the program. The remaining 18 credits must be successfully completed and documented by an official college/university transcript prior to registration for the second professional year. The part-time curriculum is five semesters in length (fall, spring, fall, spring, and summer).

The following 31 credits are required in the program.

Course	Title	Semester Credit
Fall - Year 1		
SUT 2312	Medical Terminology	3
SUT 2313	Surgical Pathophysiology	3
		<u>6</u>
Spring - Year 1		
SUT 2221	Pharmacology for the Surgical Technologist	2
SUT 2222	Perioperative Practice	2
		<u>4</u>

Fall - Year 2

SUT 2510	Basic Operating Room Techniques	5
SUT 2211	Basic Operating Room Techniques I Laboratory	2
SUT 2215	Clinical Practicum I	2
		<u>9</u>

Spring - Year 2

SUT 2425	Clinical Practicum II	4
SUT 2520	Advanced Operating Room Techniques	5
		<u>9</u>

Summer - Year 2

SUT 2123	Professional Certifications Seminar	1
SUT 2231	Clinical Practicum III	2
		<u>3</u>

TOTAL

31

A grade of "D" or "F" or a mark of "U" or "NC" in a professional course is not acceptable for progression to the next semester, nor is it acceptable for graduation if it occurs in the last semester of the program.

PROGRAM POLICIES

The following program policies and procedures can be found in the student handbook on the program [website](#):

- Attendance Policy
- Dress Code
- Grading Scales
- Professional Development
- Use of Calculators and Cell Phones

PROGRAM COSTS

The total cost for the three semester program can be found on the college [website](#).

Health Insurance is required. Unless otherwise insured, cost of student health insurance varies with plan selected. Information on the student health insurance plans is available at the Campus Life and Student Support Center [website](#).

COURSE DESCRIPTIONS

AUDIOLOGY

The first number listed for courses is for the UAMS College of Health Professions; the second (in parenthesis) is for the University of Arkansas at Little Rock.

AUD 5013 (7360)—Research Methods in Communication Disorders
Introduction to research methodologies in audiology and speech pathology. Includes prospectus development, funding sources, data collection and analysis, and professional research writing and editing in communicative disorders and/or speech sciences. (3 Credits, Lecture)

AUD 5023 (7380)—Basic Diagnostic Audiology
Principles and techniques for basic audiologic evaluation, including pure tone testing, speech audiometry, and the clinical application of masking, immittance, and otoacoustic emissions. Relevant calibration issues will also be discussed. (3 Credits, Lecture/Laboratory)

AUD 5033 (7330)—Educational Audiology
The delivery of audiology services to a school-based population. Includes the development, management, and utilization of hearing and middle ear system screening programs, classroom acoustics, selection and fitting of classroom-based amplification, and federal laws associated with children who have special needs. (3 Credits, Lecture)

AUD 5041 (7181)—Clinical Laboratory
Lab instruction in clinical procedures and methods for evaluation and treatment of clients and care, maintenance and use of technology in audiology clinical practice. Perform evaluation and rehabilitation procedures under faculty supervision. (1 Credit, Laboratory)

AUD 5043 (7331)—Anatomy and Physiology of the Auditory and Vestibular Systems I
Detailed information of the anatomy, physiology, electrophysiology, and neurophysiology of the auditory and vestibular systems. (3 Credits, Lecture)

AUD 5053 (7332)—Acoustics and Psychoacoustics
Basic information regarding the physics of sound, the measurement of sound and an introduction to the psychoacoustic basis of hearing and its clinical applications. (3 Credits, Lecture/Laboratory)

AUD 5063 (7333)—Auditory Processing
Theoretical overview, differential assessment, and treatment of adults and children with auditory processing disorders (APD). Intended to blend theoretical knowledge with practical clinical methods and techniques. Prerequisites: AUD 5023 (7380). (3 Credits, Lecture)

AUD 5073 (7381)—Advanced Diagnostic Audiology
Principles of and techniques for advanced audiometric evaluation, including speech audiometry, reflex decay, audiometric special tests and otoacoustic emissions. Report writing and making appropriate recommendations will also be discussed. (3 Credits, Lecture/Laboratory)

AUD 5083 (7382)—Clinical Electrophysiology
Principles and techniques in the use of evoked potentials to assess auditory function. Includes case studies and analysis of waveforms. Lecture and laboratory. (3 Credits, Lecture/Laboratory)

AUD 5103 (7383)—Medical Audiology
Introduction to the major pathologies of the auditory and vestibular systems, as well as medical/surgical treatment of those pathologies. Audiologic assessment and management of the disorders will also be discussed. Prerequisites: AUD 5023 (7380) and AUD 5043 (7331). (3 Credits, Lecture)

AUD 5113 (7321)—Instrumentation in Audiology & Speech Pathology
Introduction to basic principles of electronics and electrical safety and to proper use and care of equipment used in the evaluation and treatment of the auditory and vestibular systems. (3 Credits, Lecture/Laboratory)

AUD 5123 (7335)—Advanced Psychoacoustics
Advanced information regarding how listeners with normal hearing and those with hearing loss process sound. Topics include: loudness, frequency selectivity, temporal processing, pitch perception, space perception, object/pattern perception, speech perception, experimental design, and signal detection theory. Prerequisites: AUD 5053 (7332). (3 Credits, Lecture/Laboratory)

AUD 5132 (7222)—Speech Perception
Production and perception of speech sounds and the prosodic features of speech. Several theories of speech perception presented and discussed, and the effects of hearing loss on speech production and perception explored. (3 Credits, Lecture)

AUD 5133 (7367)—Infant-Toddler Communication: Development-Assessment
Investigates prelinguistic/early linguistic communication and feeding/swallowing development. Multidisciplinary assessment and intervention for infants and toddlers (birth to five) with special needs and their families. Current formal and informal assessment tools and techniques, current intervention strategies, enhancing the therapeutic process across environments, utilizing team collaboration, and facilitating parent-infant interaction. (3 Credits, Lecture)

AUD 5143 (7323)—Advanced Electrophysiology
Principles and techniques in the use of mid- and late-evoked potentials to assess auditory function. Prerequisite: AUD 5083 (7382). (3 Credits, Lecture/Laboratory)

AUD 5152 (7261)—Organization and Administration
Organization, administration and accreditation of school, university, and community programs. Private practice and billing procedures. Various and alternative career opportunities including corporate speech pathology practice. Issues related to medicaid, medicare and other third party payers, as well as current legislation. Governmental and professional practice issues. (3 Credits, Lecture)

AUD 5153 (7334)—Pediatric Audiology
Normal auditory development and theoretical, clinical, and practical issues involved in screening, assessment, and management of children with hearing loss. Prerequisite: AUD 5023 (7380). (3 Credits, Lecture/Laboratory)

AUD 5162 (7224)—Genetics of Hearing Loss
Basic information on the genetic basis of hearing loss and an overview of syndromic and non-syndromic hearing losses. Strategies for referral to genetic counselors and other health care professionals will be included. Prerequisite: AUD 5103 (7383). (3 Credits, Lecture)

AUD 5163 (7320)—Auditory Based Speech/Language Intervention
Auditory-based speech and language intervention with infants and toddlers who are deaf and hard of hearing. Emphasis is on the principles of the normal development sequence of the listening skills, assessment of skills obtained within the hierarchy, and intervention aimed at teaching skills not yet acquired. Auditory based intervention for infants and toddlers requires family participation; therefore, learning styles of parents and caregivers will be discussed. (3 Credits, Lecture)

AUD 5173 (7365)—Counseling in Communication Disorders

Principles of counseling for working with persons with communication disorders and their families throughout the life span. Students will review major theories of counseling and will select those most useful for the various settings and practices of audiology and speech pathology. (3 Credits, Lecture)

AUD 5183 (7326)—Outcomes Research and Evidence-Based Practice

Principles of outcomes research, and the levels of evidence supporting clinical practice. Students will understand the principles of critical evaluation of diagnostic procedures and critical evaluation of the evidence for treatment efficacy and effectiveness as well as the importance of practice guidelines that define best practices. (3 Credits, Lecture)

AUD 5192 (7230)—Cultural Competence in Audiology

Knowledge and skills needed by audiologists to provide culturally competent services to diverse clients. Sources of diversity and application of concepts to the field of audiology will be discussed. (3 Credits, Lecture)

AUD 5193 (7336)—Anatomy and Physiology of the Auditory and Vestibular Systems II

Continuation of the first anatomy and physiology course with greater focus on skull anatomy and on peripheral and central nervous system embryology, neuroanatomy, and neurophysiology. Prerequisite: AUD 5043 (7331). (3 Credits, Lecture/Laboratory)

AUD 520V (7087)—Topics in Audiology

Graduate seminar with emphasis on topics related to clinical or rehabilitative audiology. May be repeated for additional credit not to exceed 6 hours total. Prerequisite: Consent of instructor. (3 Credits, Lecture)

AUD 5212 (7227)—Hearing Conservation

Noise measurement, OSHA requirements, occupational noise management, recreational audiology, and designing and implementing hearing conservation programs for adults and children. Prerequisites: AUD 5023 (7380); AUD 5112 (7221). (3 Credits, Lecture)

AUD 5222 (7228)—Professional Issues in Audiology & Speech Pathology

Personal and professional ethical values and their applications to dilemmas encountered in the clinical practices of audiology and speech pathology will be explored with students. Preferred practices and criteria for quality services will be topics for discussion. (3 Credits, Lecture)

AUD 5223 (7384)—Amplification

Effective use of hearing aids and auditory training equipment. Includes their component parts, electroacoustic analysis, hearing aid orientation/counseling, and approaches to hearing aid evaluation. Prerequisite: AUD 5023 (7380). (3 Credits, Lecture/Laboratory)

AUD 5232 (7229)—Audiology: Practice Management

Roles of audiologists in meeting the needs of the communicatively impaired. Students will understand preferred practices, criteria for quality services and quality improvement through the evaluation of service delivery models and exploration of the laws affecting service delivery in health care and educational settings. (3 Credits, Lecture)

AUD 5233 (7385)—Pediatric Amplification and Intervention

Advanced strategies specific to pediatric hearing assessment, applicable technologies and management utilizing a family centered approach to intervention.

AUD 5243 (7386)—Audiologic Rehabilitation: Adult

Principles of audiologic rehabilitation for adults, including diagnosis, counseling, use of amplification and other assistive devices, and communication strategies. Various models of audiologic rehabilitation will be presented. Prerequisite: AUD 5023 (7380). (3 Credits, Lecture)

AUD 5253 (7351)—Amplification II

Advanced study of amplification systems, including strategies to assess benefit and satisfaction, binaural/bilateral considerations, alternatives to conventional hearing aids, and speech perception issues related to hearing loss. Prerequisite: AUD 5223 (7384). (3 Credits, Lecture/Laboratory)

AUD 5263 (7350)—Evaluation & Treatment of the Balance System

Basic information on the evaluation and treatment of balance disorders. Topics: anatomy and physiology of the vestibular, oculomotor, and proprioceptive systems; clinical tests of electronystagmography, dynamic posturography, and rotary chair. Medical and surgical treatments and rehabilitation strategies for vestibular/balance pathologies. Prerequisite: AUD 5043 (7331). (3 Credits, Lecture/Laboratory)

AUD 5273 (7325)—Implant Device Technology

Overview of history of cochlear implants, corporation technology in the cochlear-implant industry, and contemporary speech processing strategies for cochlear implants. Discussion of surgeries, audiological evaluation procedures used pre- and post-operatively, patient performance, counseling, and current research topics. Prerequisite: AUD 5223 (7384). (3 Credits, Lecture/Laboratory)

AUD 5282 (7282)—Learning Disabilities

An introduction to the characteristics, definitions, etiologies, assessment, and therapeutic procedures in the treatment of children diagnosed with learning disabilities. Emphasis placed on the scope of practice for speech-language pathologists and audiologists in the due process procedures for these children. (3 Credits, Lecture)

AUD 5283 (7371)—Gerontology in Audiology

Basic information on the aging process and a discussion of how the aging process affects people with hearing loss. The cognitive, physical, and social aspects of aging will be discussed. (3 Credits, Lecture)

AUD 530V (7000)—Independent Study

Prerequisites: graduate standing and consent of instructor. Directed readings in audiology and/or speech/language pathology, individual discussion with a faculty member. (1-3 hours) May be repeated for up to 6 hours credit. (Variable Credit, Independent Study)

AUD 5142 (7263)—Sociolinguistics

The linguistic structure of language, nature, and forms of symbolic behavior. Human uses of symbols from various groups and socio-economic levels, particularly in communication. Prerequisite: Courses in phonetics and normal language acquisition. (2 Credits, Lecture)

AUD 536V (7094)—Directed Research

Research or individual investigation for graduate students. Credits earned may be applied toward meeting degree requirements if the program approves and if a letter grade is given. Repeated registration is permitted. (Variable Credit, Independent Study)

AUD 540V (7091)—Audiology Practicum

Applied, supervised practicum experiences for graduate students that encompass the breadth of the current scope of practice with both adults and children from culturally diverse backgrounds. Repeated registration is permitted. (Variable Credit, Independent Study)

AUD 546V (7091)—Clinical Externship

Full-time, applied, supervised practicum experience for graduate students in residence, encompassing the broad scope of diagnostic and rehabilitative audiology clinical practice (4-9 hours). Repeated registration is permitted. (*Variable Credit, Independent Study*)

CLINICAL NUTRITION

NUTR 4123—Biochemistry in Nutrition

In this online course, students will gain an understanding of the basic concepts of biochemistry which is essential for their career in any area of nutrition. This includes: an understanding of the major biomolecules affecting nutrition and found in living organisms, the control and regulation of protein structure and function, enzyme kinetics, nucleic acid, lipids and membrane transport, biochemical evolution and carbohydrates and metabolism. Prerequisites: working knowledge of basic chemistry and basic nutrition or consent of faculty. (3 credits, Online)

NUTR 5032—Assessment of Nutritional Status

A study of nutritional assessment systems and methodology including the latest technology in dietary, biochemical, anthropometric, and clinical evaluation. Emphasis placed on the design of systems, the interpretation of indices for all age groups in health and disease, and the application of data in nutrition counseling and consultation. Prerequisites: undergraduate courses in biochemistry, anatomy, physiology, nutrition, food science or equivalents. (2 Credits, Online)

NUTR 5033—Advanced Clinical Nutrition

Integration of principles of biochemistry, physiology, pathology, anatomy, psychology, anthropology, epidemiology, nutrition and food science into therapeutic use of foods and nutrients in disease prevention and treatment through a case-oriented approach. Prerequisites: Biochemistry, Diet in Disease, Nutrition, Anatomy and Physiology, or consent. NUTR 5333 in the Dietetic Internship program may be substituted for this course. (3 Credits, Lecture and Online)

NUTR 5043—Diet and/or Cancer Prevention

Focused on clinical and preclinical studies that address how dietary related factors, such as nutrients, bioactive food components and obesity, influence cancer development and cover major mechanisms by which dietary factors modify cancer risk. Prerequisites: A previous course in nutrition, biology, biochemistry, or physiology, and consent of faculty. (3 Credits, Lecture)

NUTR 5063—Medical Nutrition Therapy

Online course introducing nutrition as a medical specialty from the perspective of disease prevention and treatment including assessment, patient interviewing strategies, medical terminology, nutrition care plan techniques, and prevention strategies. Prerequisites: a course in nutrition and inorganic biochemistry or equivalent, and consent of faculty. (3 Credits, Online)

NUTR 509V—Independent Study in Clinical Nutrition (1-6)

This option may be used by students seeking to define a thesis topic or to pose a research question about a specific aspect of clinical nutrition. The student will prepare a written report following designated guidelines. (Variable Credits, Research)

NUTR 5102—Management Principles in Dietetics

Application of current higher level management skills in clinical nutrition and dietetics. Emphasis on incorporation of latest technological developments, management theories, and future trends in legal aspects, cost analysis, personnel and resource management, quality control, and reimbursements. (2 Credits, Lecture)

NUTR 5103—Nutrition and Metabolism: Macronutrients

Reviews cell function, including acid-base balance, utilization of macronutrients in metabolic processes, and roles of specific nutrients in human metabolism. Relationship of physiology and organ system functions to nutrition is addressed. Alterations in metabolic processes caused by specific diseases will be discussed. (3 Credits, Lecture and Online)

NUTR 5112—Nutrition Counseling

Provides an understanding of the methods, strategies, and evaluation of nutrition and diet counseling to modify eating habits for health promotion and increase compliance with therapeutic regimens. Consideration of learning styles, nutritional anthropology, and effective application of instructional technology in the health care setting. Prerequisite: NUTR 5033 or equivalent; and consent of faculty. (2 Credits, Lecture)

NUTR 5122—Principles of Advanced Nutrition Support

Advanced study in the art and science of nutrition support explored through a comprehensive review of the literature; discussion of the biochemical, psychological, and medical aspects of nutrition support; and application of principles in clinical practice through case study presentation. Students participate in the literature analysis and case discussions. Prerequisites: NUTR 5033 or equivalent, NUTR 5103 or equivalent, NUTR 5032 or equivalent, and consent of faculty. (2 Credits, Lecture)

NUTR 5143—Nutrition Research and Statistical Methods

A study of research designs, statistics, and data collection methods used in nutrition research. Emphasis on planning metabolic, epidemiological, education, and clinical studies including food composition and nutritional assessment surveys with basic and advanced statistical applications. Prerequisite: Graduate level course in Statistics and consent of faculty. (3 Credits, Lecture and Online)

NUTR 5153—Nutrition and Metabolism Micronutrients (II)

Reviews the roles of vitamins, minerals, and trace elements in metabolic processes and their roles in human metabolism. Alterations in metabolic processes caused by specific vitamin deficiency diseases will be discussed. Metabolism of common drugs and drug-nutrient interactions will be reviewed. Prerequisite: NUTR 5103 or equivalent. (3 Credits, Lecture)

NUTR 5161—Advanced Nutrition Seminar

Graduate seminar of important current research in clinical nutrition to reflect content, application to clinical practice, and study parameters and design. Students will read original papers, write critiques, and make presentations for discussion. (1 Credit, Lecture)

NUTR 5203—Geriatric Nutrition

Examines the relationships between nutrition and physiologic aging. The impact of aging on nutritional requirements, effects of chronic and acute disease, effects of nutrition on the aging process, and nutrition programs for older adults are explored. Students will actively analyze and discuss research literature. Prerequisite: graduate courses in metabolism, nutrition assessment, and advanced clinical nutrition and consent of faculty. (3 Credits, Lecture and Online)

NUTR 5213—Pediatric Nutrition

Describes the relationship of growth and development to nutrient requirements from infancy to adolescence. The assessment of feeding practices, food habits, and nutritional status in growth problems, health and disease will be discussed. Nutritional interventions and therapies for specific conditions will be planned. Prerequisites: NUTR 5103, NUTR 5153, NUTR 5033, NUTR 5333, and consent of faculty. (3 Credits, Lecture and Online)

NUTR 5223—Nutrition in Health Promotion, Wellness, and Athletics

Describes the application of advanced principles of normal and preventive nutrition in health and fitness, physical performance, disease prevention, and health promotion in dietetic practice. It relates clinical research in exercise physiology to decision-making in wellness and sports nutrition counseling. Prerequisites: NUTR 5103, NUTR 5153, NUTR 5033, NUTR 5133, and consent of faculty. (3 Credits, Lecture and Online)

NUTR 5243—Community Nutrition

This course will provide students with a framework to approach, analyze, and work with community nutrition problems. Needs of different populations and various resources within the community will be discussed. The course will cover areas such as community needs assessment, nutrition education, public policy, grant writing, and communication skills needed for various audiences. Prerequisites include either NUTR 5103 or NUTR 5153 or NUTR 5333 or consent of the faculty. Off-site activities will be necessary to fulfill the requirements for this course. (3 Credits, Lecture and Online)

NUTR 523V—Advanced Clinical Practicum (I-III)

Based on individual needs and prior clinical experiences, the student may elect an area of advanced clinical nutrition practice for in-depth experiences after determining the goals, objectives, and major experiences desired. A total of three semester credits (3 SC) are required. Prerequisites: NUTR 5033, NUTR 5032, NUTR 5112, and NUTR 5203 or equivalent, and consent of faculty. (3 Credits, Research)

NUTR 5333—Advanced Clinical Dietetics

Integration of scientific principles of nutrition and food science into the use of foods and nutrients in disease prevention and treatment in accordance with clinical competencies for the entry-level dietitian. Co-requisite: Admission to Dietetic Internship. Consent of instructor. (3 credits, Lecture)

NUTR 551V—Special Topics in Clinical Nutrition

Advanced work in selected topics of current interest and investigation in clinical nutrition. Topics may include new research and guidelines in the use of nutrition or selected nutrients to prevent or treat a specific disease state, such as diabetes, digestive diseases, osteoporosis, obesity, or cardiovascular diseases. (1-3 Credits, Lecture)

NUTR 600V—Master's Thesis in Clinical Nutrition

Under supervision of graduate faculty, an original research study will be designed and conducted with written thesis following graduate college guidelines. Prerequisite: consent of faculty. (6 Credits, Research)

NUTR 601V—Clinical Nutrition Special Project

A capstone research project under direction of faculty advisor and project committee. Prerequisite: completion of, or concurrent enrollment in, all core courses in Clinical Nutrition. Corequisite: approval of project advisor. A grade of "R" is given until requirements of all three hours are met. (Variable Credits, Research)

NUTR 608V—Research in Nutrition (1-10) (I, II, S)

Students will participate in a research project under the supervision of a faculty member. (3 Credits, Research)

COMMUNICATION SCIENCES AND DISORDERS

– M.S.

The first number listed for courses is the UAMS listing; the second (in parenthesis) is the University of Arkansas at Little Rock listing.

CSD 5013 (7360)—Research Methods in Communication Disorders

Introduction to research methodologies in audiology and speech pathology. Includes prospectus development, funding sources, data collection and analysis, and professional research writing and editing in communicative disorders and/or speech sciences. (3 Credits, Lecture)

CSD 5042 (7294)—Augmentative and Alternative Communication

Theory, design, and organization of nonverbal communication systems. Emphasis on considerations for choosing specific devices for particular clients. Includes manual, graphic, electronic, and mechanical systems. (2 Credits, Lecture)

CSD 5073 (7366)—Advanced Anatomy and Physiology for Speech

Investigates the anatomy and physiology of speech and language. Topics include respiration, phonation, articulation, and neurological control of speech and language, and embryological development of the speech structures. (3 Credits, Lecture)

CSD 5093 (7371)—Neurogenic Language Disorders

Assessment procedures and intervention techniques for acquired neurogenic language disorders in adults. Covers language disorders secondary to cerebrovascular accident, traumatic brain injury, and dementia. (3 Credits, Lecture)

CSD 5113 (7364)—Language Assessment and Therapy

Acquisition of first language competence in relationship to language behavior. Includes the phonological, morphological, syntactical, and semantic components of language. Language deviations-emphasis on symptomology, etiology, evaluation, and therapy. Language testing and therapy explored in the second half of the course. (3 Credits, Lecture)

CSD 5122 (7270)—Fluency Disorders

Procedures, theories, and therapeutic techniques in the treatment of various types and degrees of stuttering and cluttering in adults and children. (2 Credits, Lecture)

CSD 5133 (7367)—Infant-Toddler Communication: Development-Assessment

Investigates prelinguistic/early linguistic communication and feeding/swallowing development. Multidisciplinary assessment and intervention for infants and toddlers (birth to five) with special needs and their families. Current formal and informal assessment tools and techniques, current intervention strategies, enhancing the therapeutic process across environments, utilizing team collaboration, and facilitating parent-infant interaction. (3 Credits, Lecture)

CSD 513V (7093)—Topics in Speech-Language Pathology

A seminar offered for special projects or topics related to procedures and instrumentation, theoretical foundations, assessment, clinical, or rehabilitative speech-language pathology. May be repeated for additional credit not to exceed nine (9) semester credit hours. (Variable Credit, Lecture)

CSD 5142 (7263)—Sociolinguistics

The linguistic structure of language, nature, and forms of symbolic behavior. Human uses of symbols from various groups and socioeconomic levels, particularly in communication. Prerequisite: Courses in phonetics and normal language acquisition. (2 Credits, Lecture)

CSD 5152 (7261)—Organization and Administration

Organization, administration and accreditation of school, university, and community programs. Private practice and billing procedures. Various and alternative career opportunities including corporate speech pathology practice. Issues related to medicaid, medicare and other third party payers, as well as current legislation. Governmental and professional practice issues. (2 Credits, Lecture)

CSD 5163 (7320)—Auditory Based Speech/Language Intervention

Auditory-based speech and language intervention with infants and toddlers who are deaf and/or hard of hearing. Emphasis is on the principles of the normal developmental sequence of listening skills, assessment of skills obtained within the hierarchy, and intervention aimed at teaching skills not yet acquired. Auditory based intervention for infants and toddlers requires family participation; therefore, learning styles of parents and caregivers will be discussed. (3 Credits, Lecture)

CSD 5173 (7365)—Counseling in Communication Disorders

Principles of counseling for working with persons with communication disorders and their families throughout the lifespan. Students review major theories of counseling and select those most useful for the various settings and practices of audiology and speech pathology. Students demonstrate their understanding of the counseling process through case presentations. (3 Credits, Lecture)

CSD 5183 (7372)—Advanced Articulation Disorders

Advanced study of functional and organic articulation disorders, variables related to articulation, assessment and diagnosis of articulation disorders, and therapeutic procedures. (3 Credits, Lecture)

ASP 5192 (7273)—Neurogenic Speech Disorders

Assessment procedures and intervention techniques for acquired neurogenic speech disorders in adults, especially dysarthria and verbal and oral apraxia. (2 Credits, Lecture)

CSD 5213 (7368)—Dysphagia

Examines normal oral, pharyngeal, and esophageal swallowing function in adults and children including neurology, physiology, and the effects of aging. Swallowing disorders discussed with an emphasis on oral and pharyngeal function. Various methods of evaluation, as well as current management and treatment options. (3 Credits, Lecture)

CSD 5233 (7385)—Audiologic Rehabilitation: Children

Audiometric evaluation procedures and the habilitation/rehabilitation of infants and children with hearing loss. Emphasis is placed on the determination of appropriate remediation, language and speech therapy, auditory training, and counseling parents for home programming. (3 Credits, Lecture)

CSD 5243 (7386)—Audiologic Rehabilitation: Adult

Principles of audiologic rehabilitation for adults, including diagnosis, counseling, use of amplification and other assistive devices, and communication strategies. Various models of audiologic rehabilitation presented. (3 Credits, Lecture)

CSD 5253 (7377)—Voice Disorders

Assessment procedures and rehabilitative techniques for voice disorders in children and adults. Instrumental and behavioral approaches, as well as medical and/or surgical treatment approaches. A team approach to care is emphasized. (3 Credits, Lecture)

CSD 5262 (7275)—Craniofacial Speech Disorders

Provides an understanding of speech disorders often associated with craniofacial differences. Information presented on craniofacial development, relevant anatomy and physiology, as well as procedures for evaluation (both behavioral and instrumental) and treatment of craniofacial speech disorders. A team approach to care is emphasized. (2 Credits, Lecture)

CSD 5273 (7396)—Advanced Differential Diagnosis of Speech and Language Disorders

Advanced study in differential diagnosis of speech and language disorders of children and adults. Proficiency in the use and interpretation of standardized assessment procedures. Prerequisite: an under-graduate course in diagnostic methods or its equivalent. (3 Credits, Lecture)

CSD 5282 (7282)—Learning Disabilities

An introduction to the characteristics, definitions, etiologies, assessment, and therapeutic procedures in the treatment of children diagnosed with learning disabilities. Emphasis placed on the scope of practice for speech-language pathologists and audiologists in the due process procedures for these children. (2 Credits, Lecture)

CSD 5293 (7392)—Multicultural Issues

Systematic analysis of cultural similarities and differences. Examine cultural differences, verbal and nonverbal, in the clinical setting. (3 Credits, Lecture)

CSD 530V (7193)—Independent Study in Communication Disorders

Prerequisites: Consent of the instructor. Directed readings in audiology and/or speech/language pathology, individual discussion with a faculty member. May be repeated for up to six (6) hours of credit. Offered as needed. (Variable Credit, Lecture/Laboratory)

CSD 536V (7092)—Independent Research

Research or individual investigation for graduate students. Credits earned may be applied toward meeting degree requirements if the program approves and if a letter grade is given. Repeated registration is permitted. Prerequisite: ASP 5013. (Variable Credit, Laboratory)

CSD 540V (7091)—Practicum

Applied, supervised practicum experiences for graduate students that encompass the full current scope of practice with both adults and children from culturally diverse backgrounds. (Variable Credit, Clinic)

CSD 600V (8000)—Thesis

Thesis students must register for a total of 6 semester hours; one (1) to six (6) credit hours per semester. Prerequisite: ASP 5013. (6 Credits, Laboratory)

COMMUNICATION SCIENCES AND DISORDERS - PH.D.

ASP 6003 (8300)—Advanced Research Methods

Introduces theory, principals and practices of research design in communication sciences and disorders. Emphasis on methodology of collecting, organizing, analyzing and presenting both qualitative and quantitative data. Topics will include: research questions and problems, literature and background review, group and single-subject research design, data organization and manipulation, scientific writing, and the publication and presentation process. (3 Credits, Lecture)

ASP 6023 (8302)—Doctoral Seminar in Speech

Engages students in the exploration and evaluation of current research, practice, and technology related to speech development and disorders. Content reflects recent developments in the literature and specific interests of participants. Relevant topics may include motor speech disorders, speech science, physiological and neurophysiological bases of speech production, voice, dysphagia, fluency, articulation, phonology, phonological theory, craniofacial anomalies, gerontology, AAC. (3 Credits, Lecture)

ASP 604V (8104)—Research Project

This course covers skills necessary to complete a research project consisting of a research question, review of the literature, methodology, data collection, data analysis and written report. (1 Credit, Lecture)

ASP 6052 (8205)—Grant Writing Pedagogy

Covers strategies for identifying funding agencies appropriate for research and special programs. Emphasis will be on techniques for writing grant proposals for both private and public funding. (2 Credits, Lecture)

ASP 6062 (8206)—Supervision Pedagogy

Familiarizes students with the art and science of clinical teaching, supervision of clinical services, management of clinical programs, and instruction in communication disorders. Emphasis on clinical problem solving, maximizing student and client feedback, supervisory conferencing, evaluating student and client performance, clinical scheduling/record keeping, and clinical and program efficacy. (2 Credits, Lecture)

ASP 6091 (8109)—Grant Writing Internship

Involves the student in the development, completion, and submission of a grant proposal to a private or public funding agency. (1 Credit, Lecture)

ASP 6033 (8303)—Doctoral Seminar in Language

Engages students in the exploration and evaluation of current research, practice, and technology related to language development and disorders. Content reflects recent developments in the literature and specific interests of participants. Topics may include child language development and specific developmental disorders, neurophysiological bases of language and communication, neurogenic cognitive-linguistic disorders, AAC, multicultural issues, gerontology. (3 Credits, Seminar)

ASP 6072 (8207)—Teaching Pedagogy

Introduces students to principles and practices of course development and teaching skills in communication sciences and disorders. Emphasizes understanding and integrating course content, targeted levels of learning, specific objectives, instructional strategies, and assessment to enhance the learning experience. Additional topics include motivating students, attributes of good teaching, professional development in teaching, distance education, and team/interdisciplinary teaching. (2 Credits, Lecture)

ASP 6083 (8305)—Multicultural Issues

This course will engage students in discussions of multicultural and linguistic variables that must be recognized and applied in teaching, research, and clinical supervision in the field of speech-language pathology and audiology. (3 Credits, Lecture)

ASP 610V (8110)—Teaching Internship

Provides students with supervised experience in academic instruction. (Variable Credit, Internship)

ASP 611V (8111)—Supervision Internship

Provides students with supervised experience in clinical supervision and instruction. (Variable Credit, Internship)

ASP 6013 (8301)—Doctoral Seminar in Hearing

Engages students in the exploration and evaluation of current research and practice related to hearing science, hearing disorders, evaluation and remediation. Content reflects recent developments in the literature and specific interests of participants. Topics may include the anatomical basis of hearing science, acoustics and instrumentation, psychoacoustics, physiological acoustics, physiological evaluation of hearing, hearing conservation, amplification, and aural habilitation and rehabilitation. (3 Credits, Seminar)

ASP 700V (9199-9999)—Dissertation

Completion of an original research project in collaboration with the dissertation advisor and committee. Successful completion of an oral defense to the dissertation committee. Continual enrollment is required until all related requirements are completed. (Variable Credit, Independent Study)

CYTOTECHNOLOGY

CYTO 4126—Molecular Diagnostics Laboratory

Laboratory for Molecular Diagnostics 4225. Emphasis on basic molecular techniques such as DNA extraction and quantitation, restriction enzyme digestion, polymerase chain reaction, and agarose gel electrophoresis. (1 Credit, Laboratory)

CYTO 4221—Laboratory Operations

Principles of management, supervision, and laboratory safety. A seminar and practicum approach will be utilized with an emphasis on problem-solving and ethical practice as related to cytopathology. (2 Credits, Lecture)

CYTO 4225—Molecular Diagnostics

Explores the use of molecular techniques for the diagnosis of disease. Includes tests for genetic disorders (both inherited and acquired); infectious diseases, such as HIV and hepatitis C; tissue histocompatibility for organ transplants; and human identity testing. (2 Credits, Lecture)

CYTO 4313—Gynecological Cytopathology II

Histopathology and cytopathology of endometrial hyperplasia; adenocarcinoma of the endocervix and endometrium; benign and malignant lesions of the tubes, ovaries, vulva, and vagina. Radiation biology, irradiation and chemotherapy induced atypia. Prerequisite: CYTO 4412. (3 Credits, Lecture and Laboratory)

CYTO 4331—Comprehensive Cytotechnology

Discussions of the cytology of all major body sites, includes computer image reviews. Emphasis on preparation for comprehensive examinations in cytotechnology. (3 Credits, Lecture)

CYTO 4411—Introduction to Cytotechnology

Introduction to cell morphology, cell cycle, and principles of cytopreparation. Emphasis on the anatomy, histology, and cytopathology of the female genital tract under normal conditions. (4 Credits, Lecture and Laboratory)

CYTO 4412—Gynecological Cytopathology I

Histopathology and cytopathology of inflammation, benign proliferative reactions, pre-malignant lesions, carcinoma in situ, microinvasive, and invasive squamous carcinoma. Prerequisite: CYTO 4411. (4 Credits, Lecture and Laboratory)

CYTO 4424—Cytology Internship I

Supervised clinical internship within an accredited cytology laboratory with an emphasis on pre-screening cytopathology specimens from all body sites. Students may also participate in observing fine needle aspiration biopsies. Prerequisite: CYTO 4623. (4 Credits, Clinical)

CYTO 4531—Cytology Internship II

Supervised clinical internship within an accredited cytology laboratory with an emphasis on pre-screening cytopathology specimens from all body sites. Students may also participate in observing fine needle aspiration biopsies. Prerequisite: CYTO 4424. (5 Credits, Clinical)

CYTO 4614—Non-Gynecological Cytopathology I: Respiratory, Gastrointestinal, and Urinary Tracts

Cytopathology of respiratory, gastrointestinal, and urinary tracts. Includes methods of obtaining and processing specimens, microbiology, and the role of cytology in evaluating lung, gastrointestinal tract, and urinary tract diseases. Continuation of cytopreparation in prescreening of the female genital tract. Prerequisite: CYTO 4313. (6 Credits, Lecture and Laboratory)

CYTO 4623—Non-Gynecological Cytopathology II: Body Fluids and Fine Needle Aspirates

Cytopathology of body fluids and fine needle aspirations from multiple body sites. Emphasis on anatomy, histology, and methods of specimen procurement, cytopreparation techniques, and histopathologic correlations. Prerequisite: CYTO 4614. (6 Credits, Lecture and Laboratory)

DENTAL HYGIENE

DHY 2116—Oral Embryology and Histology

Development and composition of tissues of the oral cavity and related structures. (1 Credit, Lecture)

DHY 2119—Dental Hygiene Seminar I

Current scientific literature related to topics in dental hygiene and oral health will be examined to enhance knowledge of the dental hygiene process of care. (1 Credit, Lecture)

DHY 2215—Oral Anatomy

Anatomy of dental structures. (2 Credits, Lecture/Laboratory)

DHY 2217—Dental Radiography I

Introduction to radiographic essentials. Emphasis on safety precautions, paralleling technique, and processing of exposed film. (2 Credits, Lecture/Laboratory)

DHY 2223—Dental Radiography II

History and development of radiography, biological effects of exposure, extraoral techniques, and interpretation of processed film. Prerequisite: DHY 2217. (2 Credits, Lecture/Laboratory)

DHY 2312—Dental Hygiene Theory

Orientation to preclinical procedures. Emphasis on prevention of disease transmission, examination techniques, medical histories, etiology of plaque, calculus, and periodontal disease. (3 Credits, Lecture)

DHY 2314—Human Anatomy and Physiology I

Functions of the major organ systems. Emphasis on physiology, microanatomy, and macroanatomy. (3 Credits, Lecture)

DHY 2327—Dental Materials

Restorative and impression materials and abrasive agents. Includes physical properties and manipulation variables. (3 Credits, Lecture/Laboratory)

DHY 2413—Dental Hygiene Preclinic

Orientation and clinical application of instruments and practical experience in performing the oral prophylaxis. (4 Credits, Lecture/Laboratory)

DHY 2425—Human Anatomy and Physiology II

Continuation of Human Anatomy and Physiology I. Includes anatomy of the head and neck with emphasis on osteology, neurology, and the circulatory system. (4 Credits, Lecture)

DHY 2521—Dental Hygiene Clinic I

Clinical application of dental hygiene techniques. Emphasis on patient medical history, aseptic techniques, patient assessment procedures, instrumentation, patient management, professional behavior, and instrument sharpening. Prerequisite: DHY 2312, 2413, 2217. (5 Credits, Lecture/Laboratory)

DHY 3119—Dental Hygiene Seminar II

Continuation of DHY 2119 Dental Hygiene Seminar I. Current scientific literature related to topics in dental hygiene and oral health will be examined to enhance knowledge of the dental hygiene process of care. (1 Credit, Lecture)

DHY 3145—Dental Hygiene Clinic—Summer

Provides for continuous clinical experience to enhance skills and promote clinical competence. Offered in summer term only. (1 Credit, Clinic)

DHY 3245—Community Dentistry II

Continuation of DHY 3344 dental health education and public health. Emphasis on the role of the hygienist in promoting oral health in the private office and community, education methods, biostatistics, and epidemiology. DHY 3245 will incorporate concepts from DHY 3344 to include a community project with data collection, analysis and evaluation. (2 Credits, Lecture)

DHY 3246—Local Anesthesia

Introduces principles related to local anesthetic injections and provides for the clinical application of techniques. Reviews related anatomical, neuro-physiological, and pharmacological considerations. Prevention and treatment of local and systemic complications of local anesthesia are stressed. (2 Credits, Lecture/Laboratory)

DHY 3332—Pharmacology

Physiologic effects of medications. Emphasis on drugs used by the dental profession. (3 Credits, Lecture)

DHY 3333—Nutrition

Introduction to the science of nutrition and its oral relevance. Emphasis on preventive dentistry and counseling for dental disease prevention. (3 Credits, Lecture)

DHY 3335—Periodontology

Periodontal diseases and the role of the dental hygienist in their diagnosis, prevention, and treatment. (3 Credits, Lecture)

DHY 3342—Management of Patients with Special Needs

Management techniques for geriatric, chronically ill and handicapped individuals. Includes topics and demonstrations related to head and neck cancer. (3 Credits, Lecture)

DHY 3343—Practice Management

Dental hygiene and its relationship to the practice of dentistry. Emphasis on procedures for patient management, recall, and record keeping. Includes ethical issues and the American Dental Hygienists Association Code of Ethics as well as jurisprudence topics. (3 Credits, Lecture)

DHY 3344—Community Dentistry I

Dental health education and public health. Emphasis on the role of the hygienist in promoting dental health in the private office and community, education methods, biostatistics, and epidemiology. (3 Credits, Lecture)

DHY 3434—Pathology

This course includes the basic concepts of pathology; including inflammation, oral lesions, and changes due to microorganisms, neoplasms, nutrition, and hormonal influence. (4 Credits, Lecture)

DHY 3531—Dental Hygiene Clinic II

Continuation of Summer Clinic. Includes increased competency in instrumentation and patient management skills on periodontally involved patients. Prerequisite: DHY 2521, DHY 2223, and DHY 3145. (5 Credits, Lecture/Clinic)

DHY 3541—Dental Hygiene Clinic III

Continuation of Dental Hygiene Clinic II. Includes increased competency in the use of curets on periodontally involved patients, root planing, subgingival curettage, use of the ultrasonic scaler, and time management. Prerequisite: DHY 2223, DHY 3531. (5 Credits, Lecture/Clinic)

DIAGNOSTIC MEDICAL SONOGRAPHY

DMS 2310—Basic Patient Care

Discussion of common patient care theories, procedures, and techniques emphasizing the physical and psychological wellness of the patient during diagnostic imaging procedures. Ethical and legal principles are included. (3 Credits, Online)

DMS 3132—Applied Sonographic Procedures: Abdomen, Obstetrics & Gynecology, Physics and Instrumentation

This is an elementary applications course emphasizing sonographic procedures in abdominal, obstetric and gynecologic imaging, including physics and instrumentation. A study of general sectional anatomy of the transverse, longitudinal, and coronal planes with an emphasis on the organs of sonographic interest. Selected pathology of these organs will be discussed. The control, operation and use of sonographic equipment to acquire images in these examinations will be explained. (3 Credits, Lecture)

DMS 3211—Sectional Anatomy

A study of sectional anatomy of the transverse, longitudinal, and coronal planes are included with an emphasis on the organs of sonographic interest. Correlation with other imaging procedures will be emphasized. (2 Credits, Lecture)

DMS 3221—Gynecologic Sonography

Gynecological anatomy and physiology are the foci of this course. Laboratory tests, signs and symptoms of gynecologic disease will be discussed. Scanning techniques and protocols will be included. (2 Credits, Lecture)

DMS 3222—Advanced Physics

Lectures and related demonstrations covering advanced areas of ultrasonic propagation principles, transducer parameters, interactive properties of ultrasound with human tissues, possible biologic effects, advanced equipment types, instrumentation, and quality control procedures. An introduction to Doppler physics is included. (2 Credits, Lecture)

DMS 3312—Introductory Physics

Lectures and related laboratory exercises covering the areas of ultrasonic propagation principles, transducer parameters, interactive properties of ultrasound with human tissues, possible biologic effects, basic equipment types, instrumentation, and quality control procedures. (3 Credits, Lecture)

DMS 3313—Abdominal Sonography

Clinical applications in the abdomen include a review of gross abdominal anatomy, physiology, and pathology of every organ imaged in the abdomen. Pertinent laboratory tests as well as signs and symptoms related to disease processes of each organ will be discussed. Basic scanning techniques and protocols will be included. (3 Credits, Lecture)

DMS 3321—Sonographic Applications: Obstetrics

Normal maternal changes and fetal development throughout gestation are reviewed. Embryonic and fetal measurements, anatomy, and anomalies of the first, second and third trimesters are studied. Scanning techniques and protocols are included. (3 Credits, Lecture)

DMS 3514—Clinical Practicum I

Supervised clinical experience emphasizing sonographic procedures of the abdomen. (5 Credits, Clinic)

DMS 3541—Clinical Practicum III

Continuation of clinical course work at the intermediate skill level. Prerequisite: DMS 3824. (5 Credits, Clinical)

DMS 3824—Clinical Practicum II

Supervised clinical experience at an intermediate level emphasizing sonographic procedures of the gynecologic system. Prerequisite: DMS 3514. (8 Credits, Clinical)

DMS 4241—Advanced Obstetrics, Genetics, and Pathology

Advanced topics in obstetrical sonography and fetal disease, including an introduction to genetics and the range of pathologies related to genetics and teratogenesis. (2 Credits, Online)

DMS 4242—Sonographic Conference

Specialists in the field will present special lectures focusing on specific organs or disease entities. Historical and new developments in techniques or applications of ultrasound and safety are discussed. (2 Credits, Lecture)

DMS 4251—Cardiovascular Pathophysiology

An advanced study of the structure, function, and pathologies of vascular and cardiac anatomy of sonographic interest. (2 Credits, Online)

DMS 4261—Current Issues in Health Care

A discussion of the moral, ethical, economical, and legal issues that confront sonographers as they practice in the dynamic health care environment. (2 Credits, Online)

DMS 4300—Introduction to Health Care Management

This course is an introduction to the functions of management in health care organizations. The concepts of management, supervision, and leadership are included. (3 Credits, Online)

DMS 4301—Health Care Systems in America

This course is an introduction to the health care services provided within the United States of America. The evolution, structure, financing, and regulation of the nation's health care institutions will be covered. In addition, ethics and legal issues in medicine will be discussed. (3 Credits, Online)

DMS 4303—Neurosonography

This course is a study of fetal/pediatric brain and spinal cord anatomy. Anomalies of the fetal/pediatric brain and spinal cord are discussed. Scanning techniques and protocols used to diagnose pathology in these structures are also included. (3 Credits, Online)

DMS 4342—Introductory Cardiac and Vascular Sonography

This course is an introductory study of color Doppler imaging and spectral Doppler waveform analysis related to blood flow within the cardiac and vascular system and the abdominal, pelvic, fetal, and superficial organs. Interpretation of ECG recordings is also included. (3 Credits, Online)

DMS 4352—Doppler Sonography & Advanced Hemodynamics

A discussion of Doppler sonography that includes basic ultrasound physics and instrumentation, continuous-wave Doppler, pulsed Doppler, and duplex-triplex scanning with emphasis on the analysis of Doppler spectral waveforms and interpreting color Doppler images. An in-depth analysis of normal cardiac and vascular hemodynamics and the effects of pathology on the flow of blood within the heart and throughout the vascular circulation are presented. (3 Credits, Online)

DMS 4353—Intermediate Vascular Sonography

This intermediate-level vascular course includes arterial and venous anatomy, vascular imaging protocols, basic scanning techniques, and transducer manipulation. B-Mode imaging, color flow image interpretation, and spectral Doppler waveform analysis will be discussed. Vascular disease and its effect on blood flow will be covered. (3 Credits, Online)

DMS 4354—Intermediate Cardiac Sonography

Cardiac anatomy, physiology, and hemodynamics will be the focus of this course. Laboratory tests, and signs and symptoms of cardiac disease will be discussed. Scanning techniques and protocols for pediatric and adult procedures will be included. (3 Credits, Online)

DMS 4363—Advanced Vascular Sonography

Advanced study of vascular anatomy and physiology are the foci of this course. Symptoms of venous and arterial diseases are discussed. Scanning techniques and protocols used to diagnose vascular pathology are also included. (3 Credits, Online)

DMS 4364—Advanced Cardiac Sonography

Hemodynamics, cardiovascular principles, cardiac Doppler and the related physics, physiology and pathophysiology will be the focus of this course. (3 Credits, Online)

DMS 4843—Clinical Practicum IV

Supervised clinical experience at the intermediate level emphasizing adult cardiac and vascular examination procedures. Prerequisite: DMS 3541. (8 Credits, Clinical)

DMS 4854—Clinical Practicum V

Advanced practice supervised clinical experience emphasizing vascular or cardiac sonographic procedures. Prerequisite: DMS 4843. (8 Credits, Clinical)

DIETETIC INTERNSHIP

NUTR 5073—Practicum in Clinical Dietetics

Supervised learning experience in clinical dietetics designed to meet specific objectives and achieve identified clinical nutrition competencies. Experiences scheduled in a variety of health care and community settings. This course is an elective in the MSCN program and a required core course in the internship program. *(3 Credits, Clinical)*

NUTR 5083—Practicum in Administrative Dietetics

Supervised learning experiences in administrative dietetics to meet specific objectives and achieve identified management competencies. Experiences scheduled in a variety of units within health care facilities. This course is an elective in the MSCN program and a required core course in the internship program. *(3 Credits, Clinical)*

NUTR 5112—Nutrition Counseling

Provides an understanding of the methods, strategies, and evaluation of nutrition and diet counseling to modify eating habits for health promotion and increase compliance with therapeutic regimens. Consideration of learning styles, nutritional anthropology, and instructional technology effectively applied in the health care setting. Prerequisite: NUTR 5033 or NUTR 5333: Advanced Clinical Nutrition or equivalent; and consent of faculty. *(2 Credits, Lecture and Laboratory)*

NUTR 5161—Advanced Nutrition Seminar

Graduate seminar of important current research in clinical nutrition to reflect content, application to clinical practice, and study parameters and design. Students will read original papers, write critiques, and make presentations for discussion. *(1 Credit, Seminar)*

NUTR 5333—Advanced Clinical Dietetics

Integration of scientific principles of nutrition and food science into the use of foods and nutrients in disease prevention and treatment in accordance with clinical competencies for the entry-level dietitian. Corequisite: admission to Dietetic Internship and consent of faculty. *(3 Credits, Lecture)*

EMERGENCY MEDICAL SCIENCES

EMS 1122—EKG Interpretation

This course covers cardiac anatomy and physiology with particular attention to cardiac electrical activity and the interpretation of electrocardiograms. (1 Credit, Lecture and Online)

EMS 1201—Patient Assessment

History taking, physical examination techniques, patient assessment in the field, clinical decision making, communications, and documentation. Emphasis on detecting, defining, and describing normal and pathological conditions. (2 Credits, Lecture and Online)

EMS 1210—Clinical Preparation

Prepares the student to care for patients in the clinical area by teaching the principles of intravenous access, medication administration, and airway management. (2 Credits, Lecture and Laboratory)

EMS 1211, 1222, 1233—Clinical Practicum I, II, and III

Supervised rotations through selected clinical and field areas. Emphasis on developing and improving skills which reinforce classroom instruction. (2 Credits, Clinical)

EMS 1291—Emergency Medical Responder

Prepares individuals to function as Emergency Medical Responders. The Emergency Medical Responder is an integral part of the Emergency Medical Services System and is usually the first to arrive at the scene in emergency situations. The Emergency Medical Responder uses a limited amount of equipment to perform initial assessment and intervention and is trained to assist other EMS providers. This level of provider is not intended to be utilized as the minimum staffing for an ambulance. (2 Credits, Lecture)

EMS1320—Pharmacology

Addresses the basic principles of pharmacology, including the history of pharmacology; drug regulation, nomenclature, and classification; and pathophysiological principles of drug uptake, utilization, and elimination in the body. This course will also cover basic medical terminology. (3 Credits, Online and Lecture)

EMS 1334—Life Span Development

Recognition, pathophysiology, and management of emergencies among gynecologic, obstetric, neonatal, pediatric, and geriatric patients. (3 Credits, Online and Lecture)

EMS 1340—Trauma Management

Trauma systems, mechanism of injury, pathophysiology, management, and treatment of traumatic injuries including hemorrhage, burns, thoracic trauma, soft tissue injury, head injury, spinal injury, abdominal injury, and musculoskeletal injury. (3 Credits, Online and Lecture)

EMS 1410—Medical Emergencies I

Recognition, pathophysiology, and management of patients with respiratory, neurologic, endocrine, anaphylactic, non-traumatic abdominal, and urologic emergencies. (4 Credits, Online and Lecture)

EMS 1602—Introduction to Emergency Medical Technology

This course includes all of the skills necessary for the individual to provide emergency medical care at a basic life support level with an ambulance service or in another specialized area. Completing this course fulfills all of the requirements for the students to challenge the Arkansas and National Registry of Emergency Medical Technicians certification examination. (6 Credits, Lecture)

EMS 2159—Paramedic Competencies

This capstone course combines preparation and evaluation of significant entry level paramedic competencies including psychomotor and cognitive skills. Emphasis is placed on all psychomotor skills and cognitive aspects of the national professional credentialing examination. (1 Credit, Laboratory)

EMS 2210—Foundations of the Paramedic

A study of the roles and responsibilities within an EMS system, the importance of personal wellness, implementation of injury prevention activities, understanding legal issues, ethics, and principles of therapeutic communications. (2 Credits, Online and Lecture)

EMS 2220—Pathophysiology

Application of the general concepts of pathophysiology for the assessment and management of emergency patients. Pharmacological interventions are emphasized. (2 Credits, Online and Lecture)

EMS 2250—Assessment Based Management

Integration of assessment findings in order to formulate a field impression and implement a treatment plan for those with common physical, mental, and social complaints, chronic care problems, and financial challenges; abuse victims; and assault victims. (2 Credits, Online and Lecture)

EMS 2310—Medical Emergencies II

Recognition, pathophysiology, and management of patients with toxicologic, substance abuse, hematologic, environmental, infectious, psychiatric, and behavioral emergencies. (2 Credits, Online and Lecture)

EMS 2431—Paramedic Field Internship

Supervised experience in prehospital care settings. Emphasis on the application of previous course work in the field environment. (4 Credits, Online and Lecture)

EMS 2501—Cardiovascular Care

Utilization of the assessment findings to formulate a field impression, to implement and evaluate the management plan for the patient experiencing a cardiac emergency. Includes Advanced Cardiac Life Support (ACLS) didactic. (5 Credits, Online and Lecture)

EMS 3301—Foundations of Emergency Medical Services

An overview of EMS as related through a review of the historical development through the modern day implementation. Includes an overview of federal rules and regulations as well as the planning and operations of typical EMS configurations systems including, methods of service and funding options. (3 Credits, Online)

EMS 3302—EMS Operations Management

This course focuses on the role that operations management plays in the service industry through an emphasis on the principles and methodologies applicable to solving problems within the industry. (3 Credits, Online)

EMS 3303—Leadership Development

A comprehensive view of the historical development of leadership theories and models and how they can be applied to emergency services. (3 Credits, Online)

EMS 3304—Community Paramedic

This course introduces a new direction and expanded role for EMS. The community paramedic adapts to the specific needs and resources of each community more broadly in the areas of primary care, public health, disease management, mental health, and dental care. This course emphasizes the role, advocacy, outreach, and community assessment for the community paramedic. Includes Modules 1 & 2 of Community Paramedic curriculum. (3 Credits, Online)

EMS 4301—Human Resources Management

A general overview of the basic concepts and methods of human resources relevant in making decisions within any organization.

EMS 4303—Foundations of Health Professions Education

Introduction to the methods and materials of community, and professional staff education; project development is required. This course satisfies all requirements toward Arkansas licensure as an EMS Professional Educator. This course does require some actual face to face classroom interaction. (Prerequisite as an Arkansas EMT for two consecutive years). (3 Credits, Online)

EMS 4304—Safety & Risk Management

A discussion of the laws and regulations that governs the prevention and control of employee safety and health and the management techniques involved. (3 Credits, Online)

EMS 4305—Special Operations

Discusses the role that EMS providers play in special operations events such as mass casualty incidents, fire rehabilitation, extended operations, wilderness EMS, sporting events, technical rescues, hazardous materials, tactical events, and terrorism. (3 Credits, Online)

EMS 4306—Community Paramedic Strategies

This course emphasizes the strategies to identify community health needs, developing strategies to meet those needs and building community capacity. Includes Modules 3 & 4 of Community Paramedic Curriculum. (Prerequisite EMS 3304) (3 Credits, Online)

EMS 4307—Current Topics in EMS

This seminar course is designed to discuss current problems in EMS systems. Particular attention will be paid to evidence-based clinical medicine, EMS management issues, and public perceptions of EMS. (3 Credits, Online)

EMS 4X08 – Directed Internship

An internship & capstone experience in which the student serves as an apprentice within any organization that impacts the field of EMS. Suggested organizations include EMS providers, aeromedical EMS providers, a state or county Emergency Management agencies, Medicare or Medicaid governing agencies, industrial health settings, etc. The student will also complete an individual project in a specific EMS area under the guidance and supervision of a faculty member. (Usually 3 Credits, Practicum)

EMS 4316—Community Paramedic Practicum

Directed clinical experiences in community health areas. (Pre or Corequisite EMS 4306 and credentialed as a paramedic or advanced level healthcare professional) (3 Credits, Clinical)

EMS 4320—Critical Care Paramedic Practicum

Directed field and clinical experiences for the critical care paramedic. (Pre or Corequisite EMS 4610 and credentialed as a paramedic or advanced level healthcare professional) (3 Credits, Clinical)

EMS 4330—Introduction to Research (RES 4330)

An introduction to the methods of scientific research to include research design and statistical analysis. Critical review of the components of research reports will be performed to include definition of the problem, review of the literature, research design, data analysis, and results. (3 Credits, Online)

EMS 4610—Critical Care Paramedic

This advanced course involves the complicated technological care for emergent patients with complex multisystem problems. Significant patient care experience as a paramedic or advanced level healthcare professional is required. (6 Credits, Online and Lecture)

In addition to regular course work, the following seminars and special workshops are offered occasionally to professionals in the field as continuing education course work: EMT Refresher, Advanced EMT Refresher, Paramedic Refresher, CPR, ACLS, PALS, PHTLS, CPR Instructor, EMT Instructor, and ACLS Instructor.

GENETIC COUNSELING

GENC 5004—Introduction to Molecular Genetics and Genomics

Background in the principles of molecular genetics and genomics and familiarizing the student with the laboratory techniques now available. The course will also assist students in developing the problem-solving skills required to extract and utilize genetic information from patients and families. Acceptance into the Genetic Counseling program is the prerequisite. (4 Credits, Lecture and Online)

GENC 5011—Clinical Observation I

Rotation through individual outpatient genetic clinics or laboratories to lay a foundation for a student's more active participation in later clinical genetic counseling. (1 Credit, Clinical)

GENC 5013—Counseling Theory and Skills for Genetic Counselors

An overview of the psychological and sociological impact that genetic disease and birth defects have on affected individuals, families, and society at large. The theories of psychosocial counseling that represent the core of the profession will be explored. In addition, the students will examine their own beliefs and backgrounds, and understand how these may impact their ability to provide genetic counseling. Prerequisite for this course is acceptance into the program. (3 Credits, Lecture)

GENC 5021—Clinical Observation II

Continuation of rotations through individual outpatient genetics clinics to lay the foundation for a student's more active participation in later clinical genetic counseling. Prerequisite is admission into the program. (1 Credit, Clinical)

GENC 5022—Professional Issues in Genetic Counseling I

An introduction to the profession of genetic counseling. It will provide students with information necessary to function in that role in a variety of settings. Teaching will include lectures, observations, demonstrations, and special independent and group assignments. Topics include: history of the profession, obtaining accurate family histories/recording accurate pedigrees, multicultural sensitivity, and constructing an overall genetic counseling session. (2 Credits, Lecture and Online)

GENC 5043—Medical Genetics I

Instruction in Mendelian Inheritance, atypical patterns of inheritance of human disease, the pathogenesis of genetic conditions and birth defects, the importance of the field of genetics in clinical medicine, including the basics of genetic screening, testing, and treatment. In addition, the role of chromosomes in heredity will be introduced and human hereditary disease mechanisms will be discussed in detail. (3 Credits, Lecture and Online)

GENC 5052—Writing and Critical Analysis

A course in scientific writing, medical documentation and critical analysis of both the medical literature and lay articles/patient information as it pertains to genetic counseling. Prerequisite: acceptance into the program. (2 Credits, Lecture and Online)

GENC 5062—Human Embryology

This course will cover in detail normal and abnormal human development, as well as placental anomalies. The approach will explore why and when congenital malformations occur. (2 Credits, Lecture)

GENC 5141—Research Methods in Genetic Counseling

Introduction to research methodologies in genetic counseling. Students focus on developing research questions; reviewing the literature; methodology, and data analysis plans for their independent research or thesis project; and writing and submitting an IRB proposal. Prerequisites: successful completion of GENC 5052 Writing & Critical Analysis, acceptance in the program, a research advisor, and a research topic. (1 Credit, Lecture and Online)

GENC 5142—Human Cytogenetics

Graduate instruction in all aspects of human cytogenetics including chromosomal anomalies, rearrangements, uniparental disomy, and epigenetics, with particular relevance to the genetic counseling profession. The course content will include human chromosome structure, behavior, nomenclature, clinical chromosomal abnormalities, as well as current cytogenetic laboratory methods covering both their capabilities and their limitations. (2 Credits, Lecture and Online)

GENC 5153—Psychosocial Genetic Counseling

Builds on GENC 5013; continues to explore the psychological, familial, and sociological impact that genetic disease, developmental disability and birth defects have on individuals, families and society. More time is devoted to application of learned theory and concepts through role play and standardized patients at the clinical skills center. (3 Credits, Lecture)

GENC 5162—Human Population Genetics

The basics of genetic epidemiology and population genetics, including interpretation of large-scale, population based genetic studies. The course will introduce and teach students to use probability theory, Hardy-Weinberg equilibrium, segregation and linkage analysis, and the Bayesian Theorem. (2 Credits, Lecture)

GENC 5172—Prenatal Diagnosis

Prenatal genetic counseling techniques and prenatal diagnostic procedures will be introduced, discussed, and demonstrated. (2 Credit, Lecture)

GENC 5181—Teratology

The course will present an overview of teratology. Information on known and potential human teratogens will be provided. Students will become familiar with major teratogen references and databases, and will practice strategies for informing patients and providers about teratogen information. (1 Credit, Lecture)

GENC 5183—Systems Disorders for the Genetic Counselor

This course will provide the student with an understanding of genetic disorders as they affect multiple body systems. It will cover the natural history and differential diagnosis of disorders. This course is not just about learning theory. Students will use the information they learned about genetic conditions to evaluate examples of cases that presented a particular birth defect or clinical condition. (3 Credits, Lecture)

GENC 5192—Dysmorphology and Common Syndromes

Information on the genetic, clinical, and diagnostic testing bases of a variety of genetic syndromes. Information on normal and abnormal human development and the study of dysmorphology. Acceptance into the program is the prerequisite, as is successful completion of GENC 5002 and GENC 5042. (2 Credits, Lecture)

GENC 5232—Professional Issues in Genetic Counseling II

Instruction specific to the profession of genetic counseling. Topics include: awareness of available genetic services for appropriate patients including clinical, education, and psychosocial support; methods of genetic outreach in rural areas including telemedicine; clinical skill development utilizing difficult clinical cases; and other professional genetic counseling issues, expanding upon the counseling theory and techniques introduced in previous semesters and clinical clerkships. (2 Credits, Lecture and Online)

GENC 5242—Cancer Genetics

The genetic basis of inherited cancer and cancer syndromes, with an overview of the development and treatment of these cancers. In addition, exploration of cancer genetics, patient education, and psychosocial adjustment to presymptomatic testing. (2 Credits, Lecture)

GENC 5251—Genetic Counseling Ethics I

Methods of ethical case analysis through lecture, demonstrations, and problem-based learning. Focus will be placed on cases/situations that genetic counselors will encounter in everyday employment and other professional areas. (1 Credits, Lecture)

GENC 5351—Genetic Counseling Ethics II

Methods of ethical case analysis through lecture, demonstrations, and problem-based learning. Focus will be placed on cases/situations that genetic counselors will encounter in everyday employment and other professional areas. (1 Credits, Lecture)

GENC 5262—Metabolic Genetics

Information on inborn errors of metabolism: diagnosis, biochemical characteristics, inheritance, and treatment options. (2 Credits, Lecture)

GENC 5312—Public Health Genomics

Overview of historical and contemporary issues in public health genomics. Topics include eugenics; newborn screening; advocacy; health care system and public health service in the US; needs assessments; epidemiology; registries; core functions of public health; gene-environment interactions; emergency preparedness and the role of the regional genetics collaboratives. (2 Credits, Lecture and Online)

GENC 5322—Medical Genetics II

An overview of epigenetics, the genetics of the immune system and genetic bases of autoimmune disorders, such as diabetes and lupus, will be explored. A portion of this course will also be devoted to a new field of research (pharmacogenetics) involving treatment of disease with specific combinations of drug therapies based on patient genotypes. In addition, it will include hereditary immunodeficiencies and psychiatric genetics. (2 Credits, Lecture)

GENC 5513—Novice Clinical Clerkship

Provide students with practical experience performing novice level genetic counseling skills. Students will observe and counsel patients under the supervision of board certified genetic counselors and/or medical geneticists. Prerequisite: Successful completion of GENC 5021 Clinical Observation II. (3 Credits, Clinicals)

GENC 5613—Intermediate Clinical Clerkship

Provide the student with practical experience performing intermediate level genetic counseling skills. Students will observe and counsel patients under the supervision board certified genetic counselors and/or medical geneticists. Prerequisite: Successful completion of GENC 5513 Novice Clinical Clerkship. (3 Credits, Clinical)

GENC 5713—Advanced Clinical Clerkship

Provide the student with practical experience performing advanced level genetic counseling skills to prepare the student for an entry level genetic counseling job. Students will observe and counsel patients under the supervision board certified genetic counselors and/or medical geneticists. Prerequisite: Successful completion of GENC 5613 Intermediate Clinical Clerkship. (3 Credits, Clinical)

GENC 6152—Research Project I

Independent study for non-thesis genetic counseling students. Students focus on data collection and drafting their research manuscript. Pre-requisite: successful completion of GENC 5141 Research Methods in Genetic Counseling, acceptance in the program and an IRB proposal that is either in-review or approved. (2 Credits, Independent Study)

GENC 6162—Research Project II

Independent study for non-thesis genetic counseling students. Students focus on data collection, data analysis, finalizing their research manuscript and present an oral public presentation of their research. Prerequisite: successful completion of either GENC 6152 Research Project I or GENC 617V Thesis. (2 Credits, Independent Study)

GENC 617V—Thesis in Genetic Counseling

Independent study for thesis genetic counseling students. Thesis students must register for a total of six semester hours; one to three semester hours per semester. Prerequisite: successful completion of the entire Genetic Counseling program first year curriculum including GENC 5141 Research Methods in Genetic Counseling. (6 Credits, Independent Study)

HEALTH INFORMATION ADMINISTRATION

HIA 3301—Reimbursement Methodology & Revenue Cycle (3 SC)

Identify processes and review strategies to enhance the efficiency and effectiveness of the revenue cycle. Investigate each phase of this process to identify areas needing improvement and techniques to improve cash flow. The student will explore various types of health plans and payers, which exist and how these programs provide reimbursement. Areas reviewed include the structure of reimbursement, chargemasters, revenue cycle management, and how reimbursement is executed from the viewpoints of the employer, consumer, and provider.

HIA 3302—Health Data Management (3 SC)

A study of health care data, its collection, analysis, and uses with emphasis on infrastructure and regulatory requirements to support electronic health records. An overview of informatics and methods of applying information technology to health information management functions, including storage, management, use, and reporting of health care data. Also included are data sets, data sources, and data capture tools as well as secondary records and data standards.

HIA 3303—Epidemiology (3 SC)

An introduction to epidemiology, with an emphasis on understanding the general field of epidemiology and its main applications to society. Course instruction is based on lectures and discussions reviewing the basics of epidemiological analysis of disease and intervention, the ways that the field of epidemiology can uncover causes of diseases, and the application of epidemiology to disease evaluation and health policy.

HIA 3304—Management of Information Systems (3 SC)

This course will allow students to apply computer technology and information concepts to the decision making process in the health care environment. Acquisition of systems, systems analysis life cycle, design, implementation, and evaluation will be explored along with issues relating to system security. Systems found in health care will be reviewed as will problems, limitations and future trends. The roles of administrator, clinician, and information manager within health care of various systems will be examined. Database architecture and design with interface design will be studied.

HIA 3305—Regulatory Standards & Accreditation (3 SC)

Addresses the regulatory standards for documentation of various agencies for acute care, rehabilitation, skilled nursing and other types of facilities. Also covers standards for records and data transmission from such external agencies such as ANSI, HL-7, ASTM, HIPAA, and others. Reviews accreditation standards as well as licensure requirements for acute care, rehab, state health, and others.

HIA 3306—Statistics (3 SC)

This course provides an introduction to research methodology and principles using methods of statistical analysis on healthcare data. Topics include descriptive and inferential statistics, data reporting and presentation, and use of computerized statistical packages.

HIA 3307—Networking & Security (3 SC)

This course addresses the concepts of health information data and exchange along networks. Data sharing internal and external to the facility as well as network exchange to other federal, state, and national initiatives such as National Health Information Network (NHIN) will be discussed. Security of patient data along networks will be examined as this relates to HIPAA and HITECH and identity theft.

HIA 3308—Human Resource Management (3 SC)

A study of principles and policies of personnel administration including interviewing, evaluating, employment laws, and performance standards. Workforce trends and market analysis as well as organizational assessment and benchmarking will be considered. Management principles, change management, communication, team building, and problem solving will be surveyed.

HIA 3309—Finance & Fiscal Management (3 SC)

An introduction to accounting principles, with an emphasis on budget processes, healthcare finance, cost effectiveness, and cost/benefit analysis. Case mix analysis, bond ratings, investments, and capitalization will be studied. This course includes financial statements, analysis and control, management of capital, and decision analysis.

HIA 3310—Research & Evaluation (3 SC)

An introduction to research methods and practical investigation for the student to learn and develop skills to critique and conduct studies in health information management areas. A foundation is obtained in basic types of studies where the student develops a project proposal including selecting the topic, developing the problem statement or definition, and the rationale for the project. The framework for the literature review is outlined and submitted for approval by the department faculty.

HIA 4301—Advanced Legal (3 SC)

Review of laws and administration as it applies to healthcare settings. Emphasis is on recent legislation and on electronic health records. Also discussed are legal health records, record amendments, confidential communications in the electronic setting, release of information, consents, authorizations, and risk management.

HIA 4302—Quality Management & Outcomes Assessment (3 SC)

Assesses outcomes research activities, focuses on leadership in implementing outcomes assessment projects/programs within healthcare organization and systems. Investigates initiatives which impact outcomes and activities on patients and how data are integrated to improve patient care effectively. Theories of quality, models, workflow re-design, and outcome measurement will be addressed.

HIA 4303—Internship with Current Trends in Healthcare (3 SC)

Two hours of lecture within this course (fifteen weeks of a two hour lecture course) will include a study of the latest trends in healthcare. Within this study, students will learn the latest trends in U.S. healthcare delivery and organization of healthcare systems. National health initiatives will be examined as applicable to health information policies and systems. The structure and operation of healthcare organizations such as e-health delivery will be explored with a focus on how the electronic health record impacts overall operations for a healthcare facility from perspectives of clinical, administrative, and the patient. The remaining hour of this course will be considered a lab hour of 3:1 ratio where the student will perform hands-on professional practice for a total of 45 clock hours. This is a supervised management experience and training within a healthcare or related setting. The student will participate in administrative, management, and problem-solving activities.

HIA 4401—Capstone Project (4 SC)

Using the framework from the Research & Evaluation course, the literature review requires reading, thinking, and writing within the selected HIM topic. This will allow the student to develop the project using research design methods and knowledge-based research techniques. The completed project will be submitted to the department for final approval.

HEALTH INFORMATION TECHNOLOGY

HIM 1101—Clinical Laboratory I

The student will be given the opportunity to correlate the didactic experience of previous courses with on-site and on-campus laboratory learning experience. (1 Credit, Clinical)

HIM 1102—Clinical Laboratory II

The student will be given the opportunity to correlate the didactic experience of previous courses with on-site and on-campus laboratory learning experience. (1 Credit, Clinical)

HIM 1103—Professional Issues Seminar

Introduction to the HIM profession, ethics, and professional organizations. Concepts of professionalism. Overview of basic skills required for the profession. Group and team building processes. (1 Credit, Lecture)

HIM 1202—Registry Principles & Practice

Introduction to basic registry operations which include hospital registries and central registries, basics of staging and classification systems used in cancer registries, overview of the survey process, procedures, requirements and standards of a registry and accreditation. Topics are: statistics, reporting, data sets, data editing, quality control, case-finding principles, cancer committees, cancer conferences, agency reporting, legal issues, and confidentiality. (2 Credits, Lecture)

HIM 1203—Epidemiology

Introduction to the basic principles and methods of epidemiologic research and practice - presents an overview of the history and theoretical basis of epidemiology; measures of morbidity and mortality; disease transmission and risk; major epidemiologic study designs; measures of association; sources of error including bias, confounding, and interaction; evaluation of screening tests, inference, and causality. (2 Credits, Lecture)

HIM 1301—Medical Terminology

Introduction to the language of medicine. Emphasis is on terminology of all anatomical body systems, roots of words, suffixes, prefixes, and correlation with basic anatomy and physiology classes. (3 Credits, Lecture)

HIM 1304—Pathophysiology with Pharmacology

Common pathological conditions of the organ systems and the drugs of choice used in their treatment. (3 Credits, Lecture)

HIM 1307—Applied Systems

Application of methods for implementing and managing health information systems in acute and ambulatory health care environments. (3 Credits, Lecture)

HIM 1308—Health Record Systems and Issues

Basic concepts and functions in health information management to include development, storage, and maintenance of the health record in the health care delivery systems environment. (3 Credits, Lecture)

HIM 1309—ICD-10-CM/PCS Coding & Classification System

Introduction to the ICD-10-CM/PCS system for coding developed by CMS. Includes a brief history of its development and characteristics, and basic information. Emphasis is on the structure, characteristics and applications in detail to include procedures in the medical and surgical sections and ancillary sections. Also included are ICD-10-PCS definitions and coding guidelines of all seven characters: section, body system, root operation, body part, approach, device, and qualifiers. (3 Credits, Lecture)

HIM 2101—Clinical Practice

The student will be given the opportunity to correlate the didactic experience of previous advanced courses with on-site and on-campus laboratory learning experience. (1 Credit, Clinical)

HIM 2102—Problem Solving Seminar

Examination of the latest trends in health information management. Use of case studies for problem solving responses to management and supervisory issues. (1 Credit, Lecture)

HIM 2201—Legal and Ethical Issues

The health record as a confidential legal document; legal principles, policies, regulations and standards for the control and use of health information. The basic structure of the federal and state court system. Definition and application of professional ethics and consideration of contemporary legal and ethical issues. (2 Credits, Lecture)

HIM 2202—Registry Professional Practice

Directed practice provides hands-on experience in all aspects of registry operations. Supervised practice in a hospital registry includes skill and understanding in registry management, data collection and abstracting, coding and staging, follow-up, data utilization and reporting, computer applications, and quality assessment. The clinical rotations include 11 hours of directed practice each week during the 15-week semester. (2 Credits, Clinical)

HIM 2203—Preceptorship

The student will be given the opportunity to correlate the didactic experiences of previous and concurrent courses with on-site and on-campus laboratory learning experiences. Application of operational management theory and orientation to all aspects of practice as a supervisor of a health information department component in a hospital, long term care or ambulatory setting. Includes student project(s). (2 Credits, Clinical)

HIM 2301—Quality in Health Care

Purpose, philosophy and processes of improving organizational performance through quality assessment, credentialing, utilization management, and risk management. Use of quality improvement tools for case review, data collection, data display, and data analysis. (3 Credits, Lecture)

HIM 2302—Expanded Coding (CPT-4)

Introduction to nomenclature and classification systems with instruction in coding procedures with the CPT/HCPCS system. Coding data quality issues and methodology are introduced and related to the reimbursement system. (3 Credits, Lecture)

HIM 2303—Data Management and Statistics

Computation and interpretation of health care statistics. Report generation, data display and data analysis. (3 Credits, Lecture)

HIM 2304—Supervisory Management

Supervisory principles of a health care information service. Review of specific human resource management functions including communication, motivation, and supervision. Review of budgets, staffing schedules, policies, procedures, and productivity. Analysis of case study examples from health information departments, in the inpatient, ambulatory, and physician office environments. (3 Credits, Lecture)

HIM 2305—Intermediate Coding & Reimbursement

Application of advanced guidelines of ICD-9-CM, CPT/HCPCS, and coding in the prospective payment and managed care environments for acute and ambulatory care reimbursement. (3 Credits, Lecture)

HIM 2401—Staging & Classification

Introduction to basic staging and classification systems to include hospital and central registries. Course covers the Facility Oncology Registry Data Standards (FORDS), International Classification of Diseases for Oncology, Third Edition (ICD-O-3), American Joint Committee on Cancer Staging Manual (TNM staging); Surveillance, Epidemiology, and End Results (SEER) Extent of Disease (EOD); and SEER Summary Staging Manual 2000. An overview of the principles and rules governing the classification system and each staging system to meet requirements and standards of a hospital and central registry are presented. *(4 Credits, Lecture)*

MEDICAL DOSIMETRY

MED 4102—Clinical Orientation for Medical Dosimetry

This course introduces all clinical aspects of radiation therapy including patient admission, consultation, case review, CT simulation, treatment planning, patient immobilization, setup ventilation, quality assurance, weekly charting, and case follow up. Principles of radiation health and safety and professional responsibilities of the medical dosimetrist will be discussed and practiced. (1 Credit, Clinical)

MED 4203—Practicum I

Both lectures and “hands-on” exercises will be included to help students develop sufficient skills in using and administering radiation therapy planning systems. Basic planning techniques will also be taught. (2 Credits, Clinical)

MED 4301—Cross-Sectional Anatomy for Medical Dosimetry

Fundamentals of acquisition and interpretation of cross-sectional anatomy from CT and MRI for all anatomical systems. (3 Credits, Online)

MED 4303—Medical Dosimetry Physics

The course will review and expand upon the physics that govern the use of radiation in medicine as were discussed in the courses, RTH-Radiation Therapy Physics I, II. (3 Credits, Lecture)

MED 4304—Treatment Planning

Application of physics and anatomical principles in developing and understanding a manual and computer-based treatment plan for patients with lesions at different anatomical treatment sites. (3 Credits, Lecture and Laboratory)

MED 4305—Special Programs in Dosimetry

Discussion of special procedures in radiation therapy, such as intensity modulated radiation therapy, total skin irradiation, and tomotherapy as it pertains to treatment planning. (3 Credits, Lecture)

MED 4306—Research/Special Topics

Directed research and bibliography search on a current investigational topic in medical dosimetry. (3 Credits, Directed Research)

MED 4404—Practicum II

Assigned exercises organized by treatment site and procedure type will be carried out under the direct supervision of an assigned advisor. These will be both simulated and real case assignments. The student will rotate to different facilities for the completion of the tasks. (4 Credits, Clinical)

MED 4405—Practicum III

Assigned exercises organized by treatment site and procedure type will be carried out under the direct supervision of an assigned advisor. These will be both simulated and real case assignments. The student will rotate to different facilities for the completion of the tasks. (4 Credits, Clinical)

MED 5501—Medical Dosimetry Internship I

MED 5502—Medical Dosimetry Internship II

This course enables the medical dosimetry graduate to gain practical experience in the clinical environment as a medical dosimetry intern. The Medical Dosimetry Certification Board (MDCB) requires a minimum of 840 hours of professional experience (35 hours per week for six months) prior to taking the certification examination. The intern and his/her preceptor collaborate to identify the experiences necessary to meet the national certification examination requirements. Interns enrolled in a post-graduation clinical internship

who become employed as dosimetrists prior to completing the course may request to complete the remaining internship hours for the course as an employee with his/her employer, in accordance with MDCB policy. (5 Credits, Clinical)

MEDICAL LABORATORY SCIENCES

MET 3110—Body Fluids Laboratory

Laboratory sessions are designed to introduce basic laboratory techniques including but not limited to safety, phlebotomy, pipetting and the use of basic instruments as well as techniques for the analysis of urine, cerebrospinal and other body fluids. (1 Credit, Laboratory)

MET 3113—Current Topics in Medical Laboratory Sciences

A course, which provides a discussion of current issues in medical laboratory science that include but not are limited to ethics, regulations, research, and credentialing. The course will also provide a discussion of teamwork, leadership, and interpersonal skills needed by health care professionals. Prerequisite: Admission to the medical laboratory science professional program. (1 Credit, Lecture)

MET 4214—Parasitology and Virology

Pathogenic parasites and viruses are covered. Emphasis is on the identification of parasites and the clinical significance of viruses. Epidemiology is included as appropriate. (2 Credits, Lecture and Laboratory)

MET 4116—Immunohematology Laboratory

Laboratory for Immunohematology 4316. Emphasis is on testing methods to assure the safe and effective transfusion of blood components. Includes techniques to manage maternal and neonatal blood incompatibilities. (1 Credit, Laboratory)

MET 4117—Molecular Diagnostics Laboratory

Laboratory for Molecular Diagnostics 4217. Emphasis on basic molecular techniques such as DNA extraction and quantitation, restriction enzyme digestion, polymerase chain reaction and agarose gel electrophoresis. (1 Credit, Laboratory)

MET 4120—Phlebotomy (Lecture, Laboratory, and Internship)

Lectures emphasize theory regarding blood collection procedures, and laboratory sessions introduce basic techniques for the collection of blood samples including venipuncture and capillary puncture. Clinical internship consists of supervised practice in the collection of blood samples. (1 Credit, Laboratory)

MET 4134—Laboratory Medicine Seminar

Presentation of laboratory medicine topics by each student and attendance at laboratory seminars presented by others. Requires guided individual investigations. (1 Credit, Laboratory)

MET 4135—Laboratory Medicine Case Studies Seminar

Presentation of laboratory medicine case studies to correlate the student's didactic knowledge with the clinical experience. (1 Credit, Laboratory)

MET 4138—Laboratory Management

Focuses on knowledge and techniques needed to identify and resolve basic management problems in the laboratory. Topics include basic management concepts, diversity, educational methodologies, laboratory information systems, personnel issues, policies and procedures, finances and budgeting, and compliance. (1 Credit, Lecture)

MET 4145—Immunology Clinical Internship

Clinical application of theory and techniques in affiliated institutions. Prerequisites: Admission into the Medical Technology program, successful completion of Clinical Internship I. (1 Credit, Clinical)

MET 4200—Internship Preparation

Provides a general overview of clinical internship and internship expectations. Laboratory cases emphasize the application of theoretical knowledge to clinical practice. Laboratory sessions provide a review of major psychomotor techniques in preparation for clinical internships. (2 Credits, Lecture and Laboratory)

MET 4212—Hematology Laboratory

Laboratory for Hematology 4312. Emphasis on quantitative and qualitative techniques to evaluate the number, function and morphology of blood cells in bone marrow and peripheral blood. Includes testing methods to diagnose and monitor treatment for hematologic and hemostatic disorders. (2 Credits, Laboratory)

MET 4215—Clinical Microbiology Laboratory

Laboratory for the Clinical Microbiology course. Emphasis is on the laboratory procedures for isolating, culturing, and identifying microorganisms. (2 Credits, Laboratory)

MET 4217—Molecular Diagnostics

Explores the use of molecular techniques for the diagnosis of disease. Includes tests for genetic disorders (both inherited and acquired); infectious diseases, such as HIV and hepatitis C; tissue histocompatibility for organ transplants; and human identity testing. (2 Credits, Lecture)

MET 4223—Body Fluids

Theory and techniques of analyzing urine, cerebrospinal, synovial, amniotic, and other body fluids. Correlates chemical, cellular, and micro-biological findings in normal and disease states. (3 Credits, Lecture)

MET 4311—Immunology

Introduction to the mechanisms of normal and abnormal immune response. Emphasis on laboratory diagnosis by agglutination, precipitation, immunofluorescence and enzyme immunoassay. (3 Credits, Lecture)

MET 4312—Hematology

Normal and abnormal hematopoiesis and hemostasis. Emphasis on recognizing alterations correlating with diagnosis and treatment. Includes quantitation techniques and morphologic evaluation and function of blood cells in bone marrow and peripheral blood. (3 Credits, Lecture)

MET 4315—Clinical Microbiology

Pathogenic microorganisms are covered. Emphasis is on isolation, cultivation, and identification. Fundamental microbiology, epidemiology and pathogenesis are also included as appropriate. (3 Credits, Lecture)

MET 4316—Immunohematology

Study of the immunochemical reactivity of blood antigens and antibodies, blood grouping, and compatibility testing. Includes basic problems relating to hemolytic disease of the newborn and component therapy. (3 Credits, Lecture)

MET 4332—Hematology Internship

Supervised clinical internship in the area of hematology/coagulation. Emphasis on manual and automated techniques and development of professional behavior. Includes diagnostic correlations, quality assurance, and management practices. (3 Credits, Clinical)

MET 4335—Microbiology Internship

Supervised practical experience in the microbiology laboratory. Emphasis on principles, procedures, and quality assurance. Includes management practices and development of professional behavior. (3 Credits, Clinical)

MET 4514—Clinical Chemistry

Detection and quantitation of metabolic compounds of major clinical significance in the diagnosis and treatment of disease. Emphasis on principles of analysis and diagnostic significance on biological constituents. *(5 Credits, Lecture)*

MET 4314—Chemistry Internship

Supervised clinical internship in the areas of chemistry and urinalysis. Emphasis on automated techniques, quality control, diagnostic correlations, management practices, and development of professional behavior. Practical application of course work in the area of urinalysis. Emphasis on principles, procedures, and quality assurance. *(3 Credits, Clinical)*

MET 4341—Blood Bank Internship

Supervised practical experience in the blood bank laboratory and immunology/serology. Emphasis on principles, procedures, and quality assurance. Includes management practices and development of professional behavior. *(3 Credits, Clinical)*

NUCLEAR MEDICINE ADVANCED ASSOCIATE

MIS 5311—Patient Assessment

Assessment of health status emphasizing cultural, ethnic, and age differences. Focuses on taking patient histories, inspection, palpation, percussion, and auscultation. Body systems and functional health patterns are used to organize data and to develop clinical pathways in medical imaging. (3 Credits, Lecture)

MIS 5315—Statistics & Research Methods

Introduction to research designs, epidemiology, probability, test statistics, sample size, power, correlations, non-parametric tests, regression, and analysis of variance. (3 Credits, Lecture)

MIS 5321—Clinical Pharmacology

Study of pharmacodynamics, medication administration, drug categories, and implications in patient care. Emphasizes pharmaceuticals frequently used in medical imaging. (3 Credits, Lecture)

MIS 5342—Fusion and Hybrid Technologies

The principles and applications of imaging technologies that are complementary to and/or merged with nuclear medicine technology will be presented. Instruction in cross-sectional anatomy will be a significant component of this course. (3 Credits, Lecture)

MIS 5413-N—Clinical Internship I

NMAA track emphasizes general nuclear medicine imaging procedures of the pulmonary, endocrine, and skeletal systems. (4 Credits, Clinical)

MIS 5423-N—Clinical Internship II

NMAA track emphasizes therapeutic and PET imaging procedures. (4 Credits, Clinical)

MIS 6341-N—Pathophysiology and Clinical Correlation

Application of the concepts of pathophysiology for the assessment and management of medical imaging patients. Emphasizes the characteristic manifestations, pattern recognition, and image assessment of pathologies observed in medical images specific to the program track selected. (3 Credits, Lecture)

MIS 6343-N—Pathophysiology and Clinical Correlation II

Application of the concepts of pathophysiology for the assessment and management of medical imaging patients. Emphasizes the characteristic manifestations, pattern recognition, and image assessment of pathologies observed in medical images specific to the program track selected. (3 Credits, Lecture)

MIS 6351—Health Care Systems in America

Analysis of the health care services provided within the United States. The evolution, structure, financing, and regulation of the nation's health care institutions will be covered. In addition, ethics and legal issues related to the health professions will be studied. (3 Credits, Lecture)

MIS 6433-N—Clinical Internship III

NMAA track emphasizes general nuclear medicine imaging procedures of the gastrointestinal, genitourinary, and neurological systems. (4 Credits, Clinical)

MIS 6443-N—Clinical Internship IV

NMAA track emphasizes cardiac imaging procedures and stress testing. (4 Credits, Clinical)

MIS 6453-N—Clinical Internship V

NMAA track emphasizes administrative procedures and specialized modalities. (4 Credits, Clinical)

MIS 6V31—Research Project I

Practical experience in conducting research. A written plan describing the project's objectives and goals must be approved by the student's research mentor and program director prior to implementation. The student will submit the completed project for consideration to be published in a peer reviewed journal or to be presented at a professional meeting as a poster or lecture. A minimum of 3 SC in MIS 6V31 or in MIS 6V42 is required for program completion. (1-3 Credits, Lecture)

MIS 6V42—Research Project II (optional)

A minimum of 3 SC in this research project course is required for program completion. The research project courses may be taken for up to 6 SC. (1-3 Credits, Lecture)

NUCLEAR MEDICINE IMAGING SCIENCES

NMIS 4115—Radiopharmacy I

Radiopharmaceutical preparation for diagnostic use to include quality control. Chemical, physical, and biological properties of radiopharmaceuticals will be examined. (1 Credit, Lecture)

NMIS 4116—Journal Review and Research Methods

Critical evaluation of medical scientific literature to include statistical evaluation methods and presentation techniques. (1 Credit, Lecture)

NMIS 4211—Introduction to Nuclear Medicine

Survey course for all phases of nuclear medicine technology. (2 Credits, Lecture)

NMIS 4213—Nuclear Physics

Presents concepts and physical properties governing the atom to include systems and units of measurement, atomic and nuclear structure, particulate and electro-magnetic radiation. (2 Credits, Lecture)

NMIS 4214—Instrumentation I

Operational principles of radiation detection equipment to include statistical applications and quality control. (2 Credits, Lecture)

NMIS 4221—Health Physics

Legal, biological, and administrative aspects of radiation protection in nuclear medicine. Emphasis on practical means of minimizing radiation exposure to the patient, nuclear medicine staff, and the general public. Prerequisite: NMIS 4213. (2 Credits, Lecture)

NMIS 4223—Instrumentation II

Advanced application of radiation detection theory and instrumentation. Prerequisite: NMIS 4214. (2 Credits, Lecture)

NMIS 4224—Radiation Biology

A study of the interactions of ionizing radiation with human tissues and the potential biological effects resulting from such interactions. (2 Credits, Lecture)

NMIS 4225—Radiopharmacy II

Radiopharmaceutical preparation for diagnostic use, to include quality control. Chemical, physical, and biological properties of radiopharmaceuticals will be examined. Prerequisite: NMIS 4115. (2 Credits, Lecture)

NMIS 4242—CT Physics and Instrumentation

A study of the physics and instrumentation of computed tomography, computed tomographic image formation, and radiation dose and safety concerns. (2 Credits, Lecture)

NMIS 4302—Interdisciplinary Diagnostic Cardiac Imaging

This course provides the student with an understanding of the major modalities for the diagnostic imaging of the human heart. Included are overviews of the methods, effectiveness, advantages and disadvantages of echocardiography, nuclear medicine, magnetic resonance, computerized tomography, and cardiac catheterization for the diagnosis of heart disease. (3 Credits, Lecture/Elective)

NMIS 4303—Clinical Pharmacology

A study of pharmacodynamics, medication administration, drug categories, and implications in patient care. Emphasizes pharmaceuticals frequently used in medical imaging. (3 Credits, Lecture/Elective)

NMIS 4312—Clinical Procedures and Diagnosis I

Current uses of radiopharmaceuticals for organ visualization and function with evaluation of results for diagnostic value. Emphasis placed on in vivo procedures. (3 Credits, Lecture)

NMIS 4322—Clinical Procedures and Diagnosis II

Continued study of application of radiopharmaceuticals for diagnostic use. In vitro and therapeutic procedures are introduced. Prerequisite: NMIS 4312. (3 Credits, Lecture)

NMIS 4431—Clinical Internship III*

Continuation of clinical course work at the advanced level. Prerequisite: NMIS 4524. (4 Credits, Clinical)

NMIS 4517—Clinical Internship I*

Practical application of course work presented in the classroom. Students are assigned educational experiences in clinical imaging, radioimmunoassay, and radiopharmaceutical preparation. (5 Credits, Clinical)

NMIS 4524—Clinical Internship II*

Continuation of clinical course work at the intermediate level. Prerequisite: NMIS 4517. (5 Credits, Clinical)

NMIS 4V41—Clinical Internship IV*

Based on individual needs and prior clinical experiences, the student may elect to continue clinical course work at the advanced level. Prerequisite: consent of the faculty. (1-4 Credits, Clinical/Elective)

*This course is offered on a satisfactory/unsatisfactory marking basis.

OPHTHALMIC MEDICAL TECHNOLOGY

OPH 3101—Clinical Skills Lab I

Focus on ophthalmic exam protocol; subsequent clinical skills lab courses are aimed at developing ophthalmic clinical skills in a logical progression with increasing levels of complexity. (1 Credit, Laboratory)

OPH 3105—Clinical Skills Lab II

This course will familiarize students with various ophthalmic equipment and testing protocols emphasizing concepts underlying construction of equipment; proper usage of the equipment, focus on lensmeter, tonometry, retinoscopy, and refractometry concepts and skills. (1 Credit, Laboratory)

OPH 3106—Clinical Skills Laboratory III

Continuation of previous clinical laboratory course in order to develop and enhance clinical skills focusing on the areas of advanced refractometry techniques, advanced retinoscopy techniques, and basic Goldmann perimetry. (1 Credit, Laboratory)

OPH 3201—General Medical Knowledge & Terminology

Provides the student instruction in basic medical terminology, a general overview of human anatomy and physiology, and systemic illnesses. (2 Credits, Lecture)

OPH 3202—Introduction to Ophthalmic Technology, Medical Law, and Ethics

Introduces the student to ophthalmic technology, including the role of the ophthalmic technologist, duties and responsibilities of the technologist, basic ocular examination techniques, measurement of visual acuities, basic lensometry, identification and usage of ophthalmic equipment, maintenance of ophthalmic examination lanes and special testing areas, and ethics: medical-legal aspects of ophthalmology. (2 Credits, Lecture)

OPH 3203—Ocular Anatomy & Physiology

Provides the student a detailed knowledge of the normal anatomy and physiology of the eye and orbit. (2 Credits, Lecture)

OPH 3204—Optics I

Introduces the human eye as an optical system by discussing physiology of image formation, optical relationships of eye structures, accommodation and effects of aging, refractive errors, astigmatism, prisms and Prentice's Rule, magnification, and basics of refractometry. (2 Credits, Lecture)

OPH 3206—Optics II

Introduces principles of physical optics in which light is treated as a form of energy and part of the electromagnetic spectrum. Examines wave and particle theory, polarization, interference, fluorescence, and lasers. Students use ray tracing to examine refraction, reflection, diffraction, dispersion, vergence lenses and mirrors. The object-image relationships, magnification, and graphical analysis of simple and thick lens systems will also be discussed. (2 Credits, Lecture)

OPH 3207—Contact Lenses/Opticianry

Familiarizes the student with contact lenses including types, fitting procedures, care and storage procedures, indications for use, complications and patient instruction, spectacle dispensing, ordering, and verification. (2 Credits, Lecture)

OPH 3208—Ophthalmic Pharmacology

Detailed exploration of the various ophthalmic pharmaceuticals, indications for their use, sites of action, side effects, proper instillation of agents, and various abbreviations used for medications and their schedules. (2 Credits, Lecture)

OPH 3209—Ocular Motility I

Acquaints the student with normal and abnormal binocular vision, including evaluation of motor and sensory status. (2 Credits, Lecture)

OPH 3412—Clinical Practicum III

Continues to develop clinical skills and build on previous clinical courses. The student will begin to gain more specialized skills. New skills will be demonstrated and supervised by one or more members of the faculty. Clinical applications and classroom portions of the course will coincide where possible. Return demonstrations will be required at various times during this course. (4 Credits, Clinic)

OPH 3510—Clinical Practicum I

Introduction to procedures for care of ophthalmology patients. Students observe techniques in various specialty clinics performed by a faculty member. Many procedures will be observed, but emphasis will be on basic skills needed to begin patient examination. When possible, clinical applications will coincide with the classroom portions of the course. Students will be introduced to appropriate equipment and instruments for patient examination, assigned examination rooms to maintain, taught basic procedures for information gathering in an examination, and become contributing members of the health care team. (5 Credits, Clinic)

OPH 3611—Clinical Practicum II

Continuation of Clinical Rotation I, with further instruction in patient care and examination techniques. The course will build on the newly acquired basic skills as well as introduce new skills to be learned. More specific examination techniques will be observed, discussed, and return demonstrations given for these more advanced tasks. Students will begin to greet patients and start examinations. Clinical applications will reflect, where possible, the classroom portions of the course. (6 Credits, Clinic)

OPH 4101—Clinical Skills Laboratory IV

Continue to develop clinical skills including familiarizing the student with advanced protocols required for performing the following ophthalmic tests and procedures: advanced tonometry, ophthalmic photography and angiography, advanced Goldmann perimetry. (1 Credit, Laboratory)

OPH 4108—CPR

Teaches student cardiopulmonary resuscitation for certification by the American Red Cross. (1 Credit, Lecture)

OPH 4201—Ocular Motility II: Abnormalities of Binocular Vision

Continuation of Motility I, and acquaints the student with advanced motility problems. The diagnosis and treatment of amblyopia are also studied. (2 Credits, Lecture)

OPH 4202—Survey of Eye Diseases

Familiarizes the student with pathophysiological conditions of the globe and orbital region, encompassing both the more common conditions as well as some of the more unusual diseases. (2 Credits, Lecture)

OPH 4204—Ophthalmic Photography & Angiography

Familiarizes the student with the more common forms of ophthalmic photography, and includes lectures and hands-on training in fluorescein angiography, fundus and external photography, and slit-lamp biomicrography. (2 Credits, Lecture)

OPH 4205—Ocular Emergencies & Oculoplastics

Familiarizes students with varying degrees of ocular emergencies, triage of patients, immediate interventions, long-term complications, and preventative measures. Familiarizes the student with various aspects of oculoplastics including surgical interventions. (2 Credits, Lecture)

OPH 4207—Advanced Concepts in Ophthalmology

This course will use journals and ophthalmic literature to introduce students to on-going research in clinical and surgical ophthalmology, and re-introduce important ophthalmic concepts to enable the student to become more effective in assisting ophthalmologists deliver eye care to patients. *(2 Credits, Lecture)*

OPH 4303—Special Testing

Familiarizes the student with special testing procedures not normally accomplished during routine ophthalmic examinations. *(3 Credits, Lecture)*

OPH 4306—Special Topics

Introduces student to concepts of billing and coding, and management and supervision of allied health personnel. Additional topics may be added as new techniques, protocols, and treatments emerge. *(3 Credits, Lecture)*

OPH 4309—Ophthalmic Surgical Assisting

Prepares the student to serve as a sterile scrub assistant, sterile first assistant, and circulator for the more common ophthalmic surgical procedures. Students will also learn about various ophthalmic surgical procedures. *(3 Credits, Lecture)*

OPH 4412—Clinical Practicum VI

The final course in patient care experiences. Students are expected to act as full members of the health care team in all clinical areas. Students will use this semester to advance their skills across the discipline. *(4 Credits, Clinic)*

OPH 4510—Clinical Practicum IV

Continuation of previous clinical experiences completed in the junior year. Students will begin to develop autonomy in patient care, and basic skills will become more advanced. New tasks will be demonstrated first by a member of the faculty, followed by student performance. When possible, classroom portions will coincide with clinical experiences in this course. *(5 Credits, Clinic)*

OPH 4511—Clinical Practicum V

Continuation of previous clinical experiences in patient care. The student will be required to perform at a high level of competence in all phases of ophthalmic technology. Classroom instruction will decrease, as most of this material will already have been presented. Emphasis will be placed on advanced supervision techniques, specialized testing techniques, and autonomy. *(5 Credits, Clinic)*

PHYSICIAN ASSISTANT

PAS 5111–Professional Issues I

Application-based introduction to concepts of physician assistant profession. Topics to include history of physician assistant profession, physician assistant organizations, accreditation, the health care team, documentation, oral presentations, professionalism, and ethical issues. (1 Credit, Lecture)

PAS 5112–Professional Issues II

Continuation of professional issues in physician assistant profession. Topics include documentation, safety, patient education, disease prevention, cultural issues, ethical issues and specific health care settings. (1 Credit, Lecture)

PAS 5113–Professional Issues III

Continuation of professional issues in physician assistant profession. Topics include documentation, health care systems and policy, patient education, cultural issues, ethical issues and specific health care settings. (1 Credit, Lecture)

PAS 5114–Professional Issues IV

Continuation of professional issues in physician assistant profession. Topics include practice and prescriptive laws, reimbursement, malpractice, certification and licensure, health care resources, HIPAA guidelines, and specific health care settings. (1 Credit, Lecture)

PAS 5121–Clinical Reasoning I

Introduction to critical thinking and application of medical knowledge and skills in a case-based small group setting. Emphasis this semester will be on eliciting appropriate medical histories, determining appropriate physical examination techniques to perform, and formulating a differential diagnosis. Cases will correlate with topics covered in the Physical Assessment course. (1 Credit, Facilitation)

PAS 5122–Clinical Reasoning II

Continuation of the utilization of critical thinking skills and application of medical knowledge through small-group case discussions. Focus will shift from medical history taking and physical examination to placing more emphasis on laboratory and diagnostic test ordering/interpretation and patient management. Cases will correlate with topics covered in the Principles of Medicine I course. (1 Credit, Facilitation)

PAS 5123–Clinical Reasoning III

Continuation of the utilization of critical thinking skills and application of medical knowledge through weekly small-group case discussions. Emphasis on laboratory and diagnostic test ordering/interpretation and patient management. Cases will correlate to topics being covered in the Principles of Medicine II course. (1 Credit, Facilitation)

PAS 5131–Patient Communication I

Course emphasizes interviewing techniques and interpersonal communication skills across the life span with emphasis on cultural diversity issues. Standardized patients will be utilized to enhance student interviewing skills. (1 Credit, Lecture)

PAS 5132–Patient Communication II

Course builds on concepts covered in Patient Communication I with emphasis on interviewing techniques and interpersonal communication skills across the life span and emphasis on cultural diversity issues. Standardized patients will be utilized to enhance student interviewing skills. (1 Credit, Lecture)

PAS 5143–Clinical Nutrition

Study of the nutritional care of the primary care patient with topics including geriatric, pediatric, diabetic, renal and cardiac patients and pregnant and lactating patients. Course also covers vitamin and mineral deficiencies, proper dieting, nutritional supplements, herbal supplements, nutritional medical disorders, enteral and parenteral nutrition, and patient nutritional assessment. (1 Credit, Lecture)

PAS 5144–Medical Genetics

Introduction to medical genetics. Topics include rules of inheritance, human pedigrees, chromosomal abnormalities, genetic disease, genetic screening and counseling, and genetic pharmacotherapy. (1 Credit, Lecture)

PAS 5233–Medical Ethics

Introduction to ethical issues that occur in clinical medicine. Topics include informed consent, confidentiality, nonmaleficence and beneficence, patient decision-making capacity, futile intervention, advance directives, end-of-life issues, assisted suicide, abortion, human research, and health care provider issues. Special topics in surgery, pediatrics and women's health are also covered. (2 Credits, Lecture)

PAS 5252–Pharmacotherapy I

Addresses the pharmacotherapeutic principles of specific medications utilized in disease management. Course includes drug identification, indications, contraindications, adverse effects, drug interactions, cost, routes of administration, therapeutic monitoring, patient education and pertinent mechanism of action of specific drugs. Course topics will correlate with topics being presented in Principles of Medicine I course. (2 Credits, Lecture)

PAS 5253–Pharmacotherapy II

Addresses the pharmacotherapeutic principles of specific medications utilized in disease management. Course includes drug identification, indications, contraindications, adverse effects, drug interactions, cost, routes of administration, therapeutic monitoring, patient education, and pertinent mechanism of action of specific drugs. Course topics will correlate with topics being presented in Principles of Medicine II course. (2 Credits, Lecture)

PAS 5273–Surgical Medicine

Course involves the evaluation, diagnosis, and management of the surgical patient. The course addresses pre and post-op management, common surgical procedures and complications, indications and contraindications, surgical techniques and instruments, sterile technique, operating room protocol, anesthesia, and an introduction to the surgical subspecialties. (2 Credits, Lecture)

PAS 5281–Introduction to Evidence Based Medicine

Introduction to utilizing the best available evidence in current medicine in addition to clinical experience to more effectively manage patients. Topics will include a brief overview of clinical epidemiology, research design, biostatistics, formulating a clinical question, database searching, and interpretation of medical literature. (2 Credits, Lecture)

PAS 5282–Foundations of Evidence Based Medicine

Study of utilizing the best available evidence in current medicine in addition to clinical experience to more effectively manage patients. Course builds on the foundation established in first EBM course and utilizes a journal club approach to emphasize the application of EBM principles. (2 Credits, Lecture)

PAS 5342–Clinical Physiology

Study of the physiological function of the cell and organ systems with introduction to pathophysiology of disease in the systems. Systems include cardiovascular, respiratory, digestive, urinary,

reproductive, nervous, musculoskeletal, special senses, lymphatic, endocrine and integument. Course topics will correlate with the topics presented in PA Gross Anatomy. (3 Credits, Lecture)

PAS 5351–Clinical Pharmacology

Study of the physiologic and biochemical aspects of the major classes of pharmacological agents. Brief overview of pharmacokinetic and pharmacodynamic principles of pharmacology. Major concepts involve drug classification, mechanism of action, absorption, distribution, metabolism, elimination, and dose-response relationships of the different drug classes. Major drug interactions and adverse effects of specific classes will be covered. (3 Credits, Lecture)

PAS 5361–Diagnostic Assessment I

Study of ordering and interpreting laboratory, imaging and diagnostic tests utilized in current medical practice. Course includes indications, contraindications, precautions, complications, techniques, cost-effectiveness, patient preparation, and ordering and interpretation of specific labs and tests. Course will correlate with the topics being addressed in Principles of Medicine I course. (3 Credits, Lecture)

PAS 5362–Diagnostic Assessment II

Study of ordering and interpreting laboratory, imaging and diagnostic tests utilized in current medical practice. Course includes indications, contraindications, precautions, complications, techniques, cost-effectiveness, patient preparation, and ordering and interpretation of specific labs and tests. Course will correlate to the topics being addressed in Principles of Medicine II course. (3 Credits, Lecture)

PAS 5371–Behavioral Medicine

Study of psychological and behavioral medical conditions. Course addresses the signs and symptoms, etiology, diagnosis, differential diagnosis, and treatment of behavioral disorders. Also includes conducting a psychiatric interview, classifying disorders, substance abuse, eating disorders, sleep disorders, abuse and neglect, death and dying, childhood disorders, psychological testing, psychological therapy, and pharmacological agents. (3 Credits, Lecture)

PAS 5372–Emergency Medicine

Presentation, diagnosis, and management of trauma and acute care patients who present to the emergency department. Topics involve multiple trauma, shock, wound management, environmental injuries, toxicology, orthopedic injuries, acute general medical and surgical diseases, pain control, emergency procedures, bioterrorism, and disaster medicine. Course also covers emergent conditions in cardiology, respiratory, pediatrics, gynecology, obstetrics, endocrinology, and hematology and oncology. (3 Credits, Lecture)

PAS 5394–Principles of Medicine III

An advanced medicine course that emphasizes pediatric, geriatric and rehabilitative medicine. Pediatric and geriatric modules emphasize etiology, signs and symptoms, differential diagnosis, diagnosis, prognosis, and management of medical conditions specific for the life-span. The rehabilitative module involves an overview of rehabilitative medicine, assistive devices, gait assessment, and stroke and cardiac rehabilitation. Laboratory includes infant evaluation, child evaluation, geriatric evaluation, functional assessment, and the use of assistive devices. (3 Credits, Lecture and Laboratory)

PAS 5441–PA Gross Anatomy

Study of basic gross and functional anatomy in an organ-system approach. Course covers cardiovascular, respiratory, digestive, urinary, reproductive, nervous, musculoskeletal, special senses, lymphatic, endocrine and integument systems by lecture, laboratory

and independent learning activities. The laboratory utilizes anatomical models, histology slides, prosected cadavers, radiographic images, and virtual anatomy software. (4 Credits, Lecture and Laboratory)

PAS 5591–Physical Assessment

An introduction to clinical medicine. Course includes eliciting a medical history; performing physical examination; reviewing anatomy, physiology and pathophysiology of common diseases; and differentiating between normal and abnormal physical exam findings. A physical examination skills laboratory will be held weekly to permit students to practice history and physical exam techniques. Students will also experience patient encounters throughout the semester in which they will elicit a medical history from patients in an inpatient or outpatient setting and then appropriately document and orally present the patient findings. (5 Credits, Lecture and Laboratory)

PAS 5892–Principles of Medicine I

Foundational principles of clinical medicine covered in a discipline based approach. Each module will review anatomy and physiology of specific systems. Instruction will cover pathophysiology, etiology, incidence, signs and symptoms, differential diagnosis, diagnostic techniques, diagnosis, prognosis, and management of specific common diseases.

This course will include a brief overview of the microbiological and immunological aspects of medicine. Topics will include normal flora, organism classification and transmission, and pathogenesis of infection of microbial pathogens, cell-mediated and humeral immunity, hypersensitivity reactions, and immune-mediated diseases. A weekly clinical procedural laboratory will correlate with the medical topic being covered in the lectures. Students will experience clinical patient encounters in outpatient or inpatient settings several times during the semester and then appropriately document and orally present the patient findings. (8 Credits, Lecture and Laboratory)

PAS 5893–Principles of Medicine II

Foundational principles of clinical medicine covered in a discipline-based approach. Each module will review anatomy and physiology of specific systems. Instruction will cover pathophysiology, etiology, incidence, signs and symptoms, differential diagnosis, diagnostic techniques, diagnosis, prognosis, and management of specific diseases. A weekly procedural laboratory will correlate with the discipline topic being covered in the lectures. Students will experience clinical patient encounters in outpatient or inpatient settings several times during the semester and then appropriately document and orally present the patient findings. (8 Credits, Lecture and Laboratory)

PAS 6101–Summative Evaluation

PA students will complete a one week comprehensive review and evaluation of expected physician assistant knowledge and skills. A combination of written examinations, clinical procedural skills testing, objective structured clinical examinations (OSCEs) and diagnostic interpretation will be utilized. Grading system will be satisfactory/unsatisfactory. (1 Credit, Lecture)

PAS 6201–Capstone Project

Course focuses on applying evidence-based medicine principles to a patient case study or original research. The emphasis of the project will be on formulating a clinical question, summarizing background information about the medical topic, conducting an extensive literature search about the topic, and critiquing journal articles on the topic. The goal of the project is to answer the clinical question utilizing current research and guidelines, and then apply it to the

patient case or research. This is partially an independent study course with required written assignments due at scheduled intervals throughout the clinical curriculum phase of the program. The course will conclude with a classroom portion in which an oral presentation of the project utilizing Power Point, a written EBM paper, and a written journal article for potential submission will be required for course completion. (2 Credits, Lecture)

Clinical Phase Curriculum

PAS 6511	Clinical Rotation I	(5 Cr Hrs)
PAS 6512	Clinical Rotation II	(5 Cr Hrs)
PAS 6513	Clinical Rotation III	(5 Cr Hrs)
PAS 6514	Clinical Rotation IV	(5 Cr Hrs)
PAS 6515	Clinical Rotation V	(5 Cr Hrs)
PAS 6516	Clinical Rotation VI	(5 Cr Hrs)
PAS 6517	Clinical Rotation VII	(5 Cr Hrs)
PAS 6518	Clinical Rotation VIII	(5 Cr Hrs)
PAS 6519	Clinical Rotation IX	(5 Cr Hrs)
PAS 6520	Clinical Rotation X	(5 Cr Hrs)

These clinical rotation courses are a series of supervised clinical experiences for students who have completed the didactic phase of the Physician Assistant Program. The supervised clinical experience enables students to meet program expectations and acquire the competencies needed to practice as a physician assistant. The experiences will involve preventive, emergent, surgical, acute and chronic clinical experiences with patients across the life span. The clinical experience descriptions include family practice, outpatient internal medicine, inpatient medicine, pediatric medicine, women's health, surgical medicine, emergency medicine, behavioral medicine, orthopedic medicine, and geriatric medicine.

Family Practice Experience

Clinical experience focuses on the clinical aspects of family practice/primary care. Students will participate in history taking, performing physical exams, developing differential diagnoses, formulating diagnoses, designing prevention and management plans, and documenting common medical conditions observed in the family practice setting. Students will have exposure to a variety of primary care procedures. Emphasis will be placed on caring for patients across the life-span. (5 Credits, Clinical)

Internal Medicine Outpatient Experience

Clinical experience that focuses on outpatient adult care medicine. Students will participate in performing complete outpatient history and physical exams and problem-focused history and physical exams, developing problem lists, identifying the clinical presentation of chronic and acute medical disorders, developing differential diagnoses, formulating diagnoses, ordering and interpreting diagnostic tests, and designing management plans for chronic and complex medical problems. (5 Credits, Clinical)

Internal Medicine Inpatient Experience

Clinical experience focuses on the evaluation, diagnosis, and management of acute and chronic inpatient medical conditions. Students will perform complete inpatient history and physical exams, assist with consultations, and evaluate and manage hospitalized patients from admission to discharge. Students will be taught how to perform and interpret diagnostic tests commonly utilized in inpatient medicine and to perform common clinical hospital procedures. Students will also be involved with inpatient hospital documentation to include the admission summary, history and physical examination, daily progress note, consultation note, and discharge summary. (5 Credits, Clinical)

Pediatric Medicine Experience

Clinical experience in an outpatient and inpatient (if available) pediatric setting. Students will participate in the care of patients ranging from neonates to adolescents through well-child and sick-child office visits. Focus of experience is recognizing the clinical presentation of common pediatric medical problems, developing differential diagnoses, formulating diagnoses, and designing management plans for these patients. Other areas of focus include clinical application of drug dosing, immunizations, growth and developmental milestones, common diagnostic procedures, nutritional assessment, and documentation and communication with parents and pediatric patients. (5 Credits, Clinical)

Women's Health Experience

Clinical experience in outpatient women's healthcare. Emphasis will be on eliciting and performing the gynecological history and physical examination, screening techniques, diagnostic procedures, management plans, and contraceptive counseling and management. Focus will also be on pre-natal and post-natal care, menstrual abnormalities, infertility, sexuality issues, menopause, and sexually transmitted diseases. (5 Credits, Clinical)

General Surgery Experience

Emphasis on the clinical evaluation, diagnosis and surgical management of patients in the general surgery setting. Students will participate in pre-operative and post-operative patient care, outpatient evaluation of surgical candidates, surgical inpatient management, assisting with surgical techniques and cases, and documentation specific to surgical patients. Students will be exposed to common surgical procedures and the description, indications, contraindications, and complications of each. Students will also participate in interpreting diagnostic tests utilized in the general surgical environment and in understanding operating room protocol. (5 Credits, Clinical)

Emergency Medicine Experience

Clinical evaluation, diagnosis and management of acute medical and trauma conditions that present to the emergency department. Students will participate in triaging patients, performing problem-focused history and physical examinations, developing differential diagnoses, formulating diagnoses, and designing management plans for patients presenting to an emergency setting. Focus will also be on performing emergency procedures, recognizing life-threatening medical conditions, assisting with resuscitation efforts, and interpreting diagnostic tests specific to the emergency medicine setting. (5 Credits, Clinical)

Behavioral Medicine Experience

Clinical experience that introduces students to a variety of behavioral medicine and psychological conditions in an outpatient and/or inpatient setting. Students will participate in psychiatric interviews and physical examinations, individual and group psychological counseling, development of management strategies for the psychiatric patient, and interpretation of diagnostic and psychological testing. Focus of experience will be in recognizing psychiatric medical conditions through clinical presentation and the psychiatric interview. (5 Credits, Clinical)

Orthopedic Medicine Experience

Clinical experience that focuses on chronic, acute, and emergent musculoskeletal conditions that present to the orthopedic setting. Students will participate in clinical outpatient, surgical outpatient, surgical inpatient, consultation, and operating room orthopedics. Focus of experience is to enable student to recognize the clinical presentation of common general orthopedic conditions, order and interpret orthopedic diagnostic tests, and perform specific orthopedic procedures. (5 Credits, Clinical)

Geriatric Medicine Experience

Clinical experience that focuses on all aspects of geriatric medicine including outpatient, inpatient, and nursing home settings. Students will participate in diagnosing and managing acute and chronic medical conditions specific to the geriatric population, recognizing polypharmacy, and performing functional assessments. *(5 Credits, Clinical)*

PAS 6321–Elective Clinical Rotation I

PA Student will be permitted to select an area/ discipline of medicine in which he/she desires to gain additional clinical experience. A list of elective clinical rotation settings will be provided to the student including the general core rotations and then subspecialty areas of medicine and surgery. *(3 Credits, Clinical)*

PAS 6322–Elective Clinical Rotation II

PA Student will be permitted to select a second area/ discipline of medicine in which he/she desires to gain additional clinical experience. A list of elective clinical rotation settings will be provided to the student including the general core rotations and then subspecialty areas of medicine and surgery. *(3 Credits, Clinical)*

RADIOLOGIC IMAGING SCIENCES

RAD 2123—Radiographic Procedures I Laboratory

Laboratory session to accompany Radiographic Procedures I. Guided practice in principles of radiographic positioning. (1 Credit, Laboratory)

RAD 2125—Radiographic Exposure Laboratory

Laboratory session to accompany Radiographic Exposure. Guided practice in radiographic equipment manipulation. (1 Credit, Laboratory)

RAD 2133—Radiographic Procedures II Laboratory

Laboratory session to accompany Radiographic Procedures II. Guided practice in principles of radiographic positioning. (1 Credit, Laboratory)

RAD 2212—Radiologic Anatomy

An investigation of human anatomy of the skeletal, gastrointestinal, genitourinary, cardiovascular, and central nervous systems as demonstrated on radiologic images. (2 Credits, Lecture)

RAD 2226—Clinical Practicum I

Supervised clinical experience emphasizing radiographic procedures of the chest, abdomen, and extremities. (2 Credits, Clinical)

RAD 2334—Radiologic Imaging

A study of the physical aspects of advanced imaging systems such as automatic exposure devices, fluoroscopic systems, tomography, computed tomography, and magnetic resonance imaging. The use of computers in radiology is emphasized. (3 Credits, Online)

RAD 2321—Basic Patient Care

A discussion of common patient care theories, procedures, and techniques emphasizing the physical and psychological wellness of the patient during diagnostic imaging procedures. Ethical and legal principles are included. (3 Credits, Online)

RAD 2121—Basic Patient Care Lab

Practice and application of common patient care theories, procedures, and techniques emphasizing the physical and psychological wellness of the patient during diagnostic imaging procedures. (1 Credit, Laboratory)

RAD 2322—Radiographic Procedures I

A study of radiographic positioning of the chest, abdomen, extremities, and vertebral column. (3 Credits, Online)

RAD 2324—Radiographic Exposure

A study of radiographic density, contrast, detail, and distortion; radiographic film, screens, and accessory imaging equipment; factors affecting technique selection; and automatic processing. (3 Credits, Online)

RAD 2331—Radiation Physics

A study of the instrumentation of radiographic equipment, x-ray tubes, the production of x-rays, properties of electromagnetic radiation, and x-ray interactions. (3 Credits, Online)

RAD 2332—Radiographic Procedures II

A study of radiographic positioning of the cranium, gastrointestinal structures, and genitourinary structures. (3 Credits, Online)

RAD 2335—Clinical Practicum II

Supervised clinical experience emphasizing radiographic procedures of the extremities and vertebral column. (3 Credits, Online)

RAD 3213—Radiographic Sectional Anatomy

A study of human sectional anatomy in transverse, longitudinal, and coronal planes with an emphasis on the organs of interest in Computed Tomography and Magnetic Resonance Imaging. (2 Credits, Online)

RAD 3253—Radiographic Procedures III

A study of alternate radiographic projections, pediatric radiography, geriatric radiography, and trauma radiographic procedures. (2 Credits, Online)

RAD 3351—Special Imaging Procedures

A study of advanced radiologic procedures of the skeletal, cardiovascular, genitourinary, and gastrointestinal systems emphasizing pharmacology, the use of radiologic contrast media, and the equipment used during these procedures. (3 Credits, Online)

RAD 3352—Radiation Protection and Radiobiology

A study of the principles and practices of the safe application of radiation and of the responses of biological systems to irradiation. (3 Credits, Online)

RAD 3461—Radiologic Pathology

A study of disease processes emphasizing major organ-related and multiple system disease from a clinical and radiologic standpoint. (4 Credits, Online)

RAD 3554—Clinical Practicum IV

Supervised clinical experience emphasizing pediatric and trauma radiographic procedures and the refinement of radiographic skills in orthopedic, gastrointestinal, and genitourinary procedures. (5 Credits, Clinical)

RAD 3641—Clinical Practicum III

Supervised clinical experience emphasizing radiographic procedures of the cranium, gastrointestinal system, and genitourinary system. (6 Credits, Clinical)

RAD 3663—Clinical Practicum V

Supervised clinical experience emphasizing geriatric and advanced skeletal, cardiovascular, genitourinary, and gastrointestinal radiographic procedures; an introduction to various imaging modalities; and the demonstration of competency on all required clinical skills. (6 Credits, Clinical)

RIS 4377—Cardiac Interventional I

Advanced cardiac angiographic procedures performed using angiographic equipment. This course includes an in-depth study of cardiac imaging equipment, the use of sterile technique and supplies, the study of pharmacology, vascular access, cardiac anatomy and cardiac hemodynamics. (3 Credits, Online)

RIS 4378—Cardiac Interventional II

Advanced cardiac angiographic procedures performed using angiographic equipment. This course includes an in-depth study of cardiac anatomy, cardiac hemodynamics, diagnostic cardiac catheterization, cardiac interventional procedures, cardiac pathologies, and a brief introduction to electrophysiology. (3 Credits, Online)

RIS 4381—Geriatric Imaging

Investigation of the phenomena of aging, including selected biological, medical, and psychosocial issues. Methods of radiography are emphasized. (3 Credits, Online)

RIS 4382—Advanced Patient Care

A study of advanced patient care skills emphasizing the cardiovascular and respiratory systems. (3 Credits, Online)

RIS 4383—Mammography I

A study of patient care, mammographic positioning, and technical aspects involved in producing quality radiographs. The principles of mammography, anatomy and physiology of the breast, psychological aspects, image evaluation, pathological conditions, protection, and quality control are included. (3 Credits, Online)

RIS 4384—Mammography II

This course focuses on advanced mammographic imaging, diagnostic procedures, and breast cancer treatments. Emphasis is placed upon current and upcoming technologies, quality control, and patient care during intensive situations. (3 Credits, Online)

RIS 4386—Physics of Computed Tomography

A study of the instrumentation of computed tomography, computed tomographic image formation, and radiation dose and safety concerns. (3 Credits, Online)

RIS 4387—Computed Tomographic Procedures

A study of computed tomographic procedures of the head, neck, vertebral column, chest, extremities, abdomen, and pelvis. Anatomy, positioning, scanning procedures, post-processing procedures, and patient care are emphasized. (3 Credits, Online)

RIS 4391—Advanced Quality Management

The focus of this course is on comprehensive quality management for the radiation sciences including radiography, mammography, digital imaging, ultrasound, nuclear medicine, CT, and MRI. Advanced concepts, current quality management theory, accreditation, and audit documentation are covered. (3 Credits, Online)

RIS 4392—Physics of Magnetic Resonance Imaging

A study of the instrumentation of magnetic resonance imaging, magnetic resonance image formation, and magnetic field safety concerns. (3 Credits, Online)

RIS 4393—Magnetic Resonance Imaging Procedures

A study of magnetic resonance imaging procedures of the head, neck, vertebral column, chest, extremities, abdomen, and pelvis. Anatomy, positioning, scanning procedures, post-processing procedures, and patient care are emphasized. (3 Credits, Online)

RIS 4394—Current Issues in Health Care

An emphasis on the critical evaluation of ethical, legal, and economic problems associated with health care delivery. (3 Credits, Online)

RIS 4395—Vascular Interventional I

Advanced vascular angiographic procedures performed using angiographic equipment. This course includes an in-depth study of vascular imaging equipment, cerebral angiography, abdominal visceral angiography, and upper and lower extremity angiography. (3 Credits, Online)

RIS 4396—Vascular Interventional II

Advanced vascular angiographic procedures performed using angiographic equipment. This course includes an in-depth study of pulmonary and thoracic angiography, cardiac catheterization, the venous system, and non-vascular special procedures. (3 Credits, Online)

RIS 4398—Managerial Leadership

Basic principles and practices necessary for effective supervision and leadership in a health care environment. Includes principles and practices in human resource management in health care settings. (3 Credits, Online)

RIS 4399—Research in the Radiologic Sciences

An introduction to research in the radiologic sciences, including literature review, research design, methodology, data collection, scientific writing, and research publications. (3 Credits, Online)

RIS 4579—Cardiac Interventional Practicum

Supervised clinical experience in cardiovascular interventional imaging. (5 Credits, Clinical)

RIS 4585—Mammography Practicum

Supervised clinical experience in mammography. (5 Credits, Clinical)

RIS 4588—CT Practicum

Supervised clinical experience in computed tomography. (5 Credits, Clinical)

RIS 4594—MRI Practicum

Supervised clinical experience in magnetic resonance imaging. (5 Credits, Clinical)

RIS 4597—Vascular Interventional Practicum

Supervised clinical experience in vascular interventional imaging. (5 Credits, Clinical)

RADIOLOGIST ASSISTANT

MIS 5261-R—Pathophysiology and Clinical Correlation I

Application of the concepts of pathophysiology for the assessment and management of medical imaging patients. Emphasis is placed on physiologic processes that contribute to understanding disease manifestation. An overview of cell function and growth, body defenses, tissue oxygenation, respiratory function, ventilation and its failure, and image correlation focusing on chest and thoracic imaging pathology is included. Moreover, presentation of lymphatic, vascular, and genitourinary functioning is addressed with correlation of imaging findings of representative pathology. (2 Credits, Online)

MIS 5262-R—Pathophysiology and Clinical Correlation II

Application of the concepts of pathophysiology for the assessment and management of medical imaging patients. Emphasis is placed on physiologic processes that contribute to understanding disease manifestation. An overview of endocrine, metabolic, and nutritional functions, and associated imaging manifestations of disease are addressed. Neurological processes as well as neuromuscular and musculoskeletal morphology are evaluated with correlation of medical imaging techniques demonstrating pathology. Finally, an overview of skin diseases and an investigation of concepts in pediatric and geriatric imaging as they correlate with radiologic appearance of disease are covered. (2 Credits, Online)

MIS 5281—Geriatric Imaging

Investigation of the phenomena of aging, including selected biological, medical, and psychosocial issues. Methods of radiography are emphasized. (2 Credits, Online)

MIS 5311—Patient Assessment

Assessment of health status emphasizing cultural, ethnic, and age differences. Focuses on taking patient histories, inspection, palpation, percussion, and auscultation. Body systems and functional health patterns are used to organize data and to develop clinical pathways in medical imaging. (3 Credits, Online, Laboratory)

MIS 5315—Statistics & Research Methods

Introduction to research designs, epidemiology, probability, test statistics, sample size, power, correlations, non-parametric tests, regression, and analysis of variance. (3 Credits, Online)

MIS 5321—Clinical Pharmacology

Study of pharmacodynamics, medication administration, drug categories, and implications in patient care. Emphasizes pharmaceuticals frequently used in medical imaging. (3 Credits, Online)

MIS 5413-R—Clinical Internship I

The focus of this clinical internship course is on thoracic and abdominal imaging procedures. Radiologist Assistant (RA) interns are required to document a minimum of 260 clock hours, excluding breaks, in the clinical setting for the clinical internship course. Sixty-five of these 260 hours must be devoted to observing the radiologists' interpretations of images. (4 Credits, Online)

MIS 5423-R—CLINICAL INTERNSHIP II

The focus of this clinical internship course is on musculoskeletal imaging procedures. Radiologist Assistant (RA) interns are required to document a minimum of 260 clock hours, excluding breaks, in the clinical setting for the clinical internship course. Sixty-five of these 260 hours must be devoted to observing the radiologists' interpretations of images. (4 Credits, Online)

MIS 6351—Health Care Systems in America

Analysis of the health care services provided within the United States of America. The evolution, structure, financing, and regulation of the nation's health care institutions will be covered. In addition, ethics and legal issues related to the health professions will be studied. (3 Credits, Online)

MIS 6433-R—Clinical Internship III

The focus of this clinical internship course is on gastrointestinal and genitourinary imaging procedures. Radiologist Assistant (RA) interns are required to document a minimum of 260 clock hours, excluding breaks, in the clinical setting for the clinical internship course. Sixty-five of these 260 hours must be devoted to observing the radiologists' interpretations of images. (4 Credits, Online)

MIS 6443-R—Clinical Internship IV

RA track emphasizes invasive imaging procedures. (4 Credits, Online)

MIS 6453-R—Clinical Internship V

RA track emphasizes specialized modalities. (4 Credits, Online)

MIS 6V31—Research Project I

Practical experience in conducting research. A written plan describing the project's objectives and goals must be approved by the student's research mentor and program director prior to implementation. The student will submit the completed project for consideration to be published in a peer reviewed journal or to be presented at a professional meeting as a poster or lecture. A minimum of 3 SC is required for program completion. (Variable Credits, Online)

MIS 6V42—Research Project II (optional)

A minimum of 3 SC in this research project course is required for program completion. This course may be taken for up to 6 SC. (Variable Credits, Online)

RESPIRATORY CARE

RES 3113—Equipment and Techniques I Laboratory

Respiratory care equipment function, maintenance, and use; guided practice prior to clinical experiences. (1 Credit, Laboratory)

RES 3115—Basic Assessment and Diagnosis Laboratory

Cardio-respiratory assessment and diagnostic equipment function, maintenance and use; guided practice prior to clinical experience. (1 Credit, Laboratory)

RES 3116—Pharmacology I

Practical and clinical pharmacology related to inhaled drugs administered by the respiratory therapist. (1 Credit, Lecture)

RES 3117—Clinical Practicum I

Supervised clinical experience in basic respiratory care procedures and practices. (1 Credit, Clinical)

RES 3124—Introduction to Clinical Practice

Review and application of practical and clinical pharmacology and basic cardio-respiratory assessment and an introduction to therapeutic and diagnostic procedures commonly used in respiratory care practice. The course will include clinical observation of therapeutic and diagnostic procedures and discussion of case studies. (Elective course. Spring semester only.) (1 Credit, Lecture)

RES 3128—Pulmonary Function Testing

The Registered Respiratory Therapist (RRT) is expected to understand pulmonary function testing (PFT) methods, perform PFT procedures, interpret PFT result, and analyze data related to pulmonary function lab quality control and quality assurance. This course is designed to prepare students for clinical experience with PFT performance, PFT interpretation, use of PFT results in patient care management, an understanding of quality control/quality assurance methods used in the PFT lab. (1 Credit, Lecture)

RES 3223—Equipment and Techniques II Laboratory

Critical respiratory care equipment and function, maintenance and use; guided practice prior to clinical experiences. (2 Credits, Laboratory)

RES 3226—Clinical Practicum II

Continuation of Clinical Practicum I; includes an introduction to critical respiratory care procedures and practice. (2 Credits, Clinical)

RES 3132—Pharmacology II

A continuation of Pharmacology I. Emphasis will be placed on non-steroidal, anti-asthmatic and anti-infective drugs as well as sedatives, analgesics, neuromuscular blocking agents, and cardiac drugs. (1 Credit, Online)

RES 3231—Clinical Internship I

Concentrated clinical experiences in critical and non-critical respiratory care procedures and practices. (2 Credits, Clinical)

RES 3314—Basic Assessment and Diagnosis

Basic cardio-respiratory assessment and diagnostic procedures and practice. (3 Credits, Lecture)

RES 3322—Equipment and Techniques II

Cardio-respiratory Care of critically ill patients with emphasis on mechanical ventilation and physiologic monitoring. (3 Credits, Lecture)

RES 3327—Neonatal Cardiopulmonary Care

Study of neonatal respiratory care with emphasis on: physiology, cardiopulmonary disorders, assessment, evaluation, monitoring, and modalities of treatment. The laboratory will focus on neonatal critical care equipment function, maintenance, and use and guided practice prior to clinical experiences. Neonatal Resuscitation Program (NRP) certification required. (2 Credits, Lecture)

RES 3411—Cardiopulmonary Anatomy and Physiology

Emphasis on the respiratory, cardiac, and renal systems. (4 Credits, Lecture)

RES 3412—Equipment and Techniques I

Respiratory Care procedures and equipment; emphasis on basic respiratory care procedures and practice. (4 Credits, Lecture)

RES 3421—Cardio-Respiratory Disorders

Study of common respiratory and cardiac disorders. (4 Credits, Lecture)

RES 4131—Patient Care Simulations

Clinical simulations designed to enhance critical thinking skills in patient assessment, airway management, development of plan of care and management of a critically ill respiratory care patient. (1 Credit, Laboratory)

RES 4133—Patient and Family Centered Care

Introduction to patient- and family-centered care. Emphasis on the importance of interprofessional teams and patient and family advisors to provide high quality, low cost health care. (1 Credit, Online and Laboratory)

RES 4146—Foundations of Respiratory Care Education

Course description pending. (1 Credit, Internet)

RES 4241—Advanced Assessment and Diagnosis

Advanced cardiopulmonary assessment and diagnostic procedures and practices. (2 Credits, Lecture)

RES 4243—Pediatric Cardiopulmonary Care

Study of pediatric respiratory care with emphasis on: physiology, cardiopulmonary disorders, assessment evaluation, monitoring, and modalities of treatment. The laboratory will focus on pediatric critical care equipment function, maintenance and use and guided practice prior to clinical experiences. Pediatric Advanced Life Support (PALS) certification required. (2 Credits, Lecture)

RES 4250—Integration Project

Integration of respiratory care course work, focused on a case study. (2 Credits, Independent Study)

RES 4255—Respiratory Care Seminar

Review of respiratory care as it pertains to credentialing examination administered by the National Board for Respiratory Care (NBRC) and other agencies that offer specialty credentials of interest to the respiratory therapist. (2 Credits, Lecture)

RES 4257—Literature Review

Discussion of advanced theory and application of cardio-respiratory care as found in the professional literature. Prerequisite: RES 4330. (2 Credits, Independent Study)

RES 4258—Bachelor's Thesis Proposal

Planning the Bachelor's thesis practicum, research project, or scholarly activity. Prerequisites include RES 4330 and 4257. (2 Credits, Independent Study)

RES 4330—Research and Evaluation

An introduction to the methods of scientific research and evaluation. (3 Credits, Online)

RES 4342—Critical Care Practices

Special techniques, case studies and pathological complications associated with the critically ill patient; emphasis on the care of the cardiac and trauma patient. (3 Credits, Lecture)

RES 4355—Leadership and Management

Basic concepts, principles, and practices necessary for effective supervision and leadership in a health care environment. (3 Credits, Online)

RES 4356—Clinical Internship II

Continuation of Clinical Practicum III; includes alternate care site and additional critical care practices and procedures. (3 Credits, Clinical)

RES 4445—Clinical Practicum III

A continuation of Clinical Practicum II; includes neonatal and diagnostic procedures and practices. (4 Credits, Clinical)

RES 4452—Disease Management

Introduction to chronic disease management. (3 Credits, Online)

RES 4653—Bachelor's Thesis

The Bachelor's thesis is implemented, evaluated, and evidenced-based recommendations are disseminated. Prerequisite: RES 4258. (6 Credits, Independent Study)

RES 4V40—Legal and Ethical Issues in Health Care

Course description pending. (1 Credit, Online)

RES 4V44—Scholarship Project

An introduction to the application of scientific research methods. (1-2 Credits, Independent Study)

SURGICAL TECHNOLOGY

SUT 2123—Professional Certifications Seminar

Preparation for the Certification Examination for the Surgical Technology profession. *(1 Credit, Lecture)*

SUT 2211—Basic Operating Room Techniques I Laboratory

Fundamental procedures of perioperative patient care. Guided practice prior to clinical experiences. Must be taken concurrently with SUT 2510: Basic Operating Room Techniques and successful completion is pre-requisite to SUT 2215: Clinical Practicum I. *(2 Credits, Laboratory)*

SUT 2215—Clinical Practicum I

Supervised clinical experience in the application of basic patient care procedures, safe practice, and beginning skills of sterilization/disinfection and aseptic technique. Prerequisite: Successful completion of competency evaluation in SUT 2211. *(2 Credits, Clinic)*

SUT 2221—Pharmacology for the Surgical Technologist

Introduction to the classification, actions, and uses of drugs. Emphasis on drugs associated with various surgical, obstetrical, and emergency care procedures. Includes calculation of dosages and drug preparation. *(2 Credits, Lecture)*

SUT 2222—Perioperative Practice

An overview of surgical technology as a health care profession. Explores standards of care, criteria for professional growth, psychological aspects of the patient including social and cultural dimensions, and the ethical and legal issues surrounding the profession. *(2 Credits, Lecture)*

SUT 2231—Clinical Practicum III

Four (4) week clinical course work in all subspecialty areas of the operating room at the advanced level. Prerequisites: SUT 2215, SUT 2425. *(2 Credits, Clinic)*

SUT 2312—Medical Terminology

Introduction to commonly used medical abbreviations and terminology used in the health care setting. Includes prefixes, suffixes, and root words. *(3 Credits, Lecture)*

SUT 2313—Surgical Pathophysiology

Emphasis on the anatomical structures of those body regions in which surgery is most commonly performed and the diseases related to the surgical patient. *(3 Credits, Lecture)*

SUT 2425—Clinical Practicum II

Supervised clinical experience in the application of basic, intermediate, and advanced surgical procedures, and a continuation of aseptic technique and sterilization/disinfection skills. *(4 Credits, Clinic)*

SUT 2510—Basic Operating Room Techniques

Orientation to surgical technology with emphasis on the fundamental principles of basic patient care concepts, asepsis and the surgical environment, and basic case preparation and procedures before, during and after a surgical procedure. Classroom. *(5 Credits, Lecture)*

SUT 2520—Advanced Operating Room Techniques

Emphasis placed on specialty surgical procedures and instrumentation. *(5 Credits, Lecture)*

CHP INTERPROFESSIONAL COURSES

In addition to the discipline-specific courses described on the preceding pages, the College offers courses open to more than one discipline. The health professions, though different in many ways, share areas of common content and interest. The CHP interdisciplinary courses were developed on the premise that sharing learning experiences promotes mutual understanding and respect among various disciplines and promotes collaboration in health care delivery, develops a common language among health professionals, and develops a common philosophical framework for sharing of values.

CHP 2401—Chemistry for Health Professions

A focused introduction to the fundamental and relevant connections between chemistry and life. The course emphasizes the development of problem-solving skills and empowers the student to solve problems in different and applied contexts relating to health and biochemistry. Laboratory included. Online course. Sponsoring department: Imaging & Radiation Sciences, Nuclear Medicine Imaging Sciences

CHP 2402—Physics for Health Professions

This course focuses on the physics foundations needed for healthcare workers. Includes mechanics; the kinematics and dynamics of masses in translation and rotation; Newton's Laws; gravity; the conservation of energy and momentum; simple harmonic motion; and introduction to wave motion and sound. Laboratory included. Online course. Sponsoring department: Imaging & Radiation Sciences, Nuclear Medicine Imaging Sciences

CHP 2403—Biological Sciences for Health Professions

Study and application of the concepts of cellular function, microscopic organisms associated with disease, human body systems, genetics, and the environment. Laboratory included. Online course. Sponsoring department: Imaging & Radiation Sciences, Nuclear Medicine Imaging Sciences

CHP 4133—Patient- and Family-Centered Care

Introduction to patient- and family-centered care. Emphasis on the importance of interprofessional teams and patient and family advisors to provide high quality, low cost health care. Laboratory included. Hybrid course with clinical simulations. Sponsoring department: Respiratory and Surgical Technologies, Respiratory Care

CHP 4V10; 5V10—Multicultural Health

This course focuses on differences in cultural beliefs about health and illness and models for cross-cultural health and communication. Students will learn the impact that culture plays on health and effective ways to implement health promotion programs and program evaluation across cultures. Online course. Sponsoring department: imaging & radiation sciences, nuclear medicine imaging sciences

DMS 4261—Current Issues in Health Care

A discussion of the moral, ethical, economical, and legal issues that confront sonographers as they practice their vocation in the dynamic health care environment. Sponsoring department: imaging & radiation sciences, diagnostic medical sonography

HIM 1301—Medical Terminology

Introduction to the language of medicine. Emphasis is on terminology of all anatomical body systems, roots of words, suffixes, prefixes, and correlation with basic anatomy and physiology classes. Online course. Sponsoring department: health information management

MIS 5315—Statistics and Research Methods

Introduction to research designs, epidemiology, probability, test statistics, sample size, power, correlations, non-parametric tests, regressions, and analysis of variance. Online course. Sponsoring department: imaging & radiation sciences, nuclear medicine imaging sciences

MIS 6351—Health Care Systems in America

Analysis of the health care services provided within the United States. The evolution, structure, financing, and regulation of the nation's health care institutions will be covered. In addition, ethics and legal issues related to the health profession will be studied. Online course. Sponsoring department: imaging & radiation sciences, nuclear medicine imaging sciences

NUTR 2100—Basic Human Nutrition

This course provides an integrated overview of the physiological requirements and functions of protein energy and the major vitamins and minerals that are determinants of health and diseases. This includes: an understanding of nutrients, digestion and absorption, effects of nutrient deficiencies, requirements, food sources, nutrient interactions, dietary guidelines, and food safety. Online course. Sponsoring department: dietetics and nutrition

RES 4254—Leadership and Supervision

Basic concepts, principles and practices necessary for effective supervision and leadership in a health care environment. Online course. Sponsoring department: respiratory and surgical technologies, respiratory care

RES 4330—Research and Evaluation

An introduction to the methods of scientific research and evaluation. Online course. Sponsoring department: respiratory and surgical technologies, respiratory care

RIS 4394—Current Issues in Health Care

An emphasis on the critical evaluation of ethical, legal, and economics problems associated with healthcare delivery. Online course. Sponsoring department: imaging & radiation sciences, radiation imaging sciences sponsoring department: imaging & radiation sciences, radiation imaging sciences

RIS 4398—Managerial Leadership

Basic principles and practices necessary for effective supervision and leadership in a health care environment. Includes principles and practices in human resource management in health care settings. Online course. Sponsoring department: respiratory and surgical technologies, respiratory care

ADMINISTRATION AND FACULTY/STAFF

ADMINISTRATION

BOARD OF TRUSTEES

Jim von Gremp, Chairman
Ben Hyneman, Vice Chairman
Jane Rogers, Secretary
Stephen Broughton, M.D., Assistant Secretary
Mark Waldrip
C.C. "Cliff" Gibson, III
John Goodson
Morril Harriman
David H. Pryor
Reynie Rutledge

UNIVERSITY OF ARKANSAS (SYSTEM)

Donald R. Bobbitt, Ph.D.
President

UNIVERSITY OF ARKANSAS FOR MEDICAL SCIENCES

Daniel W. Rahn, M.D.
Chancellor

Robert W. Bishop, J.D.
Vice Chancellor for Institutional Compliance

Bill Bowes
Vice Chancellor for Finance and Chief Financial Officer

Lance Burchett
Vice Chancellor for Development and Alumni Affairs

Cherry Duckett
Vice Chancellor for Institutional Relations

Larry Cornett, Ph.D.
Vice Chancellor for Research

Jeanne Heard, M.D., Ph.D.
Provost and Vice Chancellor for Academic Affairs

Mark Kenneday
Vice Chancellor for Campus Operations

Peter Kohler, M.D.
Vice Chancellor for Northwest Arkansas Region

Mark Mengel, M.D.
Vice Chancellor for Regional

David Miller
*Vice Chancellor for Information Technology Services and
Chief Information Officer*

Leslie Taylor
Vice Chancellor for Communications and Marketing

Billy Thomas, M.D., M.P.H.
Vice Chancellor for Diversity and Inclusion

Roxane Townsend, M.D.
Chief Executive Officer and Vice Chancellor for Clinical Programs

FACULTY/STAFF LISTINGS

The following abbreviations indicate a faculty member's primary appointment or employment if outside the College: ACH, Arkansas Children's Hospital; ADH, Arkansas Department of Health; ADE, Arkansas Department of Education; AHEC, Area Health Education Center; ARC, Arkansas Red Cross; BH, Baptist Health; CARTI, Central Arkansas Radiation Therapy Institute; CAVHS, Central Arkansas Veterans Healthcare System; DHHS, Department of Health and Human Services; JRMC, Jefferson Regional Medical Center; LRAFB, Little Rock Air Force Base; MP, Merck Pharmaceuticals; PR Private Practice; RMH, Rebsamen Memorial Hospital; SI, Syncor International; STJ, St. Joseph Mercy Medical Center; SVIMC, St. Vincent Infirmary Medical Center; and UAMS, University of Arkansas for Medical Sciences.

B.S., University of Arkansas for Medical Sciences, 1998; Advanced Certificate in Sonography, University of Arkansas for Medical Sciences, 1999; M.P.H., University of Arkansas for Medical Sciences, 2006; Ph.D., University of Arkansas for Medical Sciences, 2013.

Bhatti, Sabha, M.D. Co-Medical Director of Diagnostic Medical Sonography, Cardiac Sonography (2013). M.D., Aga Khan University, 2003.

Botkin, Crystal D., B.S., C.N.M.T.(P.E.T.). Adjunct Assistant Professor of Nuclear Medicine Imaging Sciences (2009). B.S., Saint Louis University, 2000.

Butler, Becky B., M.S.S.W., L.C.S.W. Assistant Professor of Diagnostic Medical Sonography and Genetic Counseling (2000). B.A., Baylor University, 1970; M.S.S.W., University of Texas at Arlington, 1972.

Callaway, John L., M.Ed., R.T.(R)(ARRT). Assistant Professor of Radiologic Imaging Sciences and Clinical Coordinator (2006). B.S., University of Arkansas for Medical Sciences, 1995.

Caraway, Shaun, M.B.A., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences (2004). B.S., University of Oklahoma, 1984; B.S.R.T., University of Oklahoma, 1986; M.B.A., Southern Illinois University, 1995.

Chlanda, Carri, B.S., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences (2003). B.S., Southwest Missouri State University, 1987.

Coley, Carla D., Pharm.D. Assistant Professor of Nuclear Medicine Imaging Sciences (2002). B.S.E., Arkansas State University, 1988; Pharm.D., University of Arkansas for Medical Sciences, 1995.

Couch, Andee L., B.S., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences, Texarkana PET Imaging (2006). B.S., University of Arkansas for Medical Sciences, 2005.

DeBlanche, Lorraine E., M.D. Medical Director and Assistant Professor of Nuclear Medicine Imaging Sciences (2010). M.D., University of the Witwatersrand, Johannesburg, 1987.

Diacon, William Lindley, M.D., RDMS. Clinical Assistant Professor of Diagnostic Medical Sonography (2005). B.A. Microbiology, University of Kansas, 1973; M.D., University of Kansas School of Medicine, 1976.

Doney, Brad C., B.S., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences, St. Bernards Medical Center (2006). B.S., University of Central Arkansas, 1998.

DuBose, Terry J., M.S., R.D.M.S., F.A.I.U.M., F.S.D.M.S. Emeritus Associate Professor of Diagnostic Medical Sonography (1996). B.B.S., Hardin-Simmons University, 1966; A.S., Concordia Lutheran University, 1974; M.S., Texas State University, 1996.

East, Robert W., B.A., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences, Christus St. Michael Health Systems (2006). B.A., Ottawa University, 1994.

Filat, Isaac, MHSM, C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences (1995). B.S., University of Arkansas for Medical Sciences, 1987; MHSM, Webster University, 1992.

Fletcher, Kathleen E., B.S., R.T.(R)(CI)(ARRT), RCIS. Instructor of Radiologic Imaging Sciences (2010). B.S., University of Central Arkansas, 2004.

Fordyce, Janina A., M.I.S., RRA, R.T.(R)(CT)(ARRT). Instructor of Radiologist Assistant Program and Clinical Coordinator (2014). M.I.S., University of Arkansas for Medical Sciences, 2012; B.S., University of Arkansas for Medical Sciences, 2006.

Gladson, Jamie L., B.S., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences, Highland Oncology Group (2002). B.S., University of Arkansas for Medical Sciences, 1999.

Goad, Kenneth W., A.R.R.T. (N). Clinical Instructor of Nuclear Medicine Imaging Sciences, SVIMC (1989).

Gordon, Debra, Ph.D., M.S.N., R.N. Instructor of Radiologic Imaging Sciences (2013). B.S.N., University of Texas at Arlington, 1988; M.S. Nursing, University of Central Arkansas, 1996; Ph.D., Capella University, 2009.

Green, Sarah, R., M.S. Adjunct Instructor of Diagnostic Medical Sonography (2012). B.A., University of Arkansas at Fayetteville, 2007; M.S., University of Arkansas for Medical Sciences, 2010.

Green-Washington, DeAndria, B.S., R.T.(R)(CI)(ARRT) Instructor of Radiologic Imaging Sciences (2014). B.S., University of Arkansas for Medical Sciences, 2007.

Guffey, Josh T., B.S., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences, Northwest Medical Center (2006). B.S., University of Central Arkansas, 2005.

Han, Eun Young, Ph.D., D.A.B.R. Assistant Professor of Medical Dosimetry (2010). B.S., Kyung Hee University, 1998; M.S., Korea Advanced Institute of Science and Technology, 2000; Ph.D., University of Florida, 2005.

Hardee, Matthew E., M.D., Ph.D. Assistant Professor of Radiation Oncology (2012). B.S., Henderson State University, 2000; M.D., Ph.D., Duke University, 2007.

Harris, Murray T., M.D. Medical Advisor, AHEC Northwest, Radiologic Imaging Sciences (1994). B.S., M.D., University of Arkansas for Medical Sciences, 1968.

Hart, Rhonda T., M.A., R.D.M.S., R.V.T. Adjunct Instructor of Diagnostic Medical Sonography (2012). B.A., University of Arkansas at Little Rock, 2009; M.A., University of Arkansas at Little Rock, 2011.

Heggie, Glen., Ed.D., R.T.N.M., FCAMRT. Adjunct Associate Professor of Nuclear Medicine Imaging Sciences (2009). B.Ed., University of Alberta, Canada, 1983; M.Ed., University of Alberta, Canada, 1988; Ed.D., University of Alberta, Canada, 2000.

Hewing, Debra, M.B.A., C.N.M.T., R.T.(N.), N.C.T., C.C.R.P. Adjunct Instructor of Nuclear Medicine Imaging Sciences (2013). B.S., University of Iowa, 2003; M.B.A., Maryville University, 2007.

Hubble, William L., M.A., C.N.M.T., R.T. (R)(N)(CT). Adjunct Associate Professor of Nuclear Medicine Imaging Sciences (2009). B.A., Webster University, 1986; M.A., Webster University, 1994.

Jean, Alan B., M.D. Medical Advisor, AHEC Southwest, Radiologic Imaging Sciences (1994). B.S., University of Arkansas, 1976; M.D., University of Arkansas for Medical Sciences, 1980.

Krupicki, Shawnda K., B.S., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences, St. Bernards Medical Center (1998). M.S.H.S., University of Central Arkansas, 1998; B.S., University of Central Arkansas, 1996.

Liang, Xiaoying, Ph.D. Assistant Professor of Radiation Oncology (2008). B.S., Beijing University of Science and Technology, 1993; Ph.D., University of Paisley, United Kingdom, 2001.

Lugo-Zamudio, Carlos E., M.D. Clinical Assistant Professor of Nuclear Medicine Imaging Sciences (2000). B.S., Centro Universitario Mexico, 1958; M.D., Universidad Nacional De Mexico, 1966.

Lukacs, Joseph, B.S. Clinical Instructor of Nuclear Medicine Imaging Sciences, SI (1992). B.S., Purdue University, 1987.

Malak, Sharp, M.D., M.P.H. Medical Director and Assistant Professor of Radiologic Imaging Sciences (2011). B.A., Hendrix College, 1994; M.P.H., Columbia University Mailman School of Public Health, 1998, M.D., University of Arkansas for Medical Sciences, 2005.

Maune, Authur G., M.Ed., C.N.M.T. Assistant Professor of Nuclear Medicine Imaging Sciences (2001). B.S., Lyon

College, 1975; B.S., University of Arkansas for Medical Sciences, 1977; M.Ed., University of Phoenix, 2003.

Morrill, Steven M., Ph.D. Professor of Radiation Oncology (2013). B.S., Weber State College, 1978; Ph.D., Brigham Young University, 1984.

Nagle, William A., Ph.D. Associate Professor of Radiologic Imaging Sciences (1977). B.S., Albright College, 1965; M.S., Oklahoma University, 1966; Ph.D., University of Texas Southwestern Medical School, 1972.

Owen, Mary A., M.H.E., R.T.(N). Adjunct Associate Professor of Nuclear Medicine Imaging Sciences (2011). B.S., University of Georgia, 1971; A.S., Medical College of Georgia, 1994.

Pate, James H., B.S., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences, Wadley Medical Center (2006). B.S., University of Arkansas for Medical Sciences, 1991.

Peñagaricano, Jose A., M.D. Medical Director of Medical Dosimetry and Assistant Professor of Radiation Oncology (2000). B.S., Georgetown University, 1988; M.D., Universidad Central del Caribe, School of Medicine, 1992.

Pickett, Martha W., M.H.S.A., C.N.M.T. Emerita Assistant Professor of Nuclear Medicine Imaging Sciences (1985); Adjunct Instructor of Radiologic Technology, UAMS (1982). B.S., University of Arkansas at Fayetteville, 1975; B.S., University of Arkansas for Medical Sciences, 1977; M.H.S.A., University of Arkansas at Little Rock, 1987.

Ratanatharathorn, Vaneerat, M.D. Professor and Director of Medical Dosimetry and Radiation Oncology (2000). B.S., Mahidol University, 1975; M.D., Siriraj Medical School, Mahidol University, 1977; MBA University of Miami, 1999.

Reinert, Jeff L., Pharm.D. Clinical Assistant Professor of Nuclear Medicine Imaging Sciences, Cardinal Health Pharmacy Services (2006). B.A., University of Arkansas, 1999; Pharm.D., University of Arkansas for Medical Sciences, 2003.

Rhoden, Lisa A., M.Ed., N.M.T., C.N.M.T., A.S.R.T.(R)(ARRT). Assistant Professor of Radiologic Imaging Sciences (2007). A.S., University of Arkansas for Medical Sciences, 2003; B.S., University of Arkansas for Medical Sciences, 2004.

Rogers, Edwin W., M.S., C.N.M.T., ARRT(N). Clinical Instructor of Nuclear Medicine Imaging Sciences (1990). B.S., University of Arkansas at Little Rock, 1969; M.S., University of Central Arkansas, 1976.

Romilly, Shirley G., R.T.(R)(ARRT) (N.M.). Assistant Instructor of Nuclear Medicine Imaging Sciences, CAVHS (1989).

Russell, Beth, B.S., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences, Heart Clinic Arkansas (1992). B.A., Zoology, University of Arkansas at Fayetteville, 1986; B.S., University of Arkansas for Medical Sciences, 1992.

Russo, Leslie P., B.S., A.R.R.T.(N.), A.R.R.T.(R). Clinical Instructor of Nuclear Medicine Imaging Sciences (2000). B.S., Northeast Louisiana University, 1993.

Salam, Maqbool A., M.D. Clinical Assistant Professor of Nuclear Medicine Imaging Sciences (2000). M.D., Madras University, 1979.

Saylor, Cynthia P., M.Ed., R.T.(R)(CT)(ARRT). Assistant Professor and Division Director of Radiologic Imaging Sciences (2004). B.S., Northwestern State University, 1979; M.Ed., University of Arkansas at Little Rock, 2009.

Simoneaux, Monique, B.S., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences (2003). B.S., Louisiana State University, 2000; B.S., University of Arkansas for Medical Sciences, 2001.

Spurlock, Leslie D., B.S.R.T., (R)(MR)(ARRT). Instructor of Radiologic Imaging Sciences, AHEC Northwest (2008). B.S., University of Arkansas for Medical Sciences, 2004.

Thaxton, Paul D., M.A.T., C.N.M.T., ARRT(N). Assistant Professor and Division Director of Nuclear Medicine Imaging Sciences (1994). B.S., University of Arkansas for Medical Sciences, 1989; M.A.T., Webster University, 2002.

Wallenmeyer, Mark, M.B.A., C.N.M.T. Assistant Professor of Nuclear Medicine Imaging Sciences (2003). B.A., Southwest Baptist University, 1990; Certificate of Nuclear Medicine, Baylor College of Medicine, 1992; M.B.A., University of Phoenix, 2005.

Warner, Mary Catherine, B.S., C.N.M.T. Clinical Instructor of Nuclear Medicine Imaging Sciences, Our Lady of the Lake Regional Medical Center (2002). B.S., University of Arkansas for Medical Sciences, 2001.

Whitney, Ella C., M.Ed., R.D.M.S., R.D.C.S., R.V.T. Assistant Professor of Diagnostic Medical Sonography and Clinical Coordinator (2008). B.S., Nicholls State University, 1984; M.Ed., University of Arkansas, 2011.

Young, Quinnie J., M.A., R.T.(R)(ARRT). Associate Professor of Radiologic Imaging Sciences (1966). B.S., University of Arkansas for Medical Sciences, 1979. M.Ed., University of Arkansas at Fayetteville, 1987; M.A., University of Arkansas at Little Rock, 1996.

Yousaf, Muhammad, M.D. Assistant Professor and Medical Director of Radiologist Assistant (2009). M.D., Punjab Medical College, 1990.

Zhang, Xin, Ph.D. Assistant Professor and Division Director of Medical Dosimetry (2008). B.S., Hengyang Engineering College, 1990; M.S., Institute of Radiation Therapy Medicine, 1996; M.S., Colorado State University, 2001; Ph.D., Georgia Institute of Technology, 2006.
