I. INTRODUCTION

For the purposes of this document, “the University” refers to the University of Arkansas for Medical Sciences; “the College” refers to the UAMS College of Health Professions, “the Department” refers to the UAMS Department of Genetic Counseling, and “the Program” refers to the UAMS Master of Science program in Genetic Counseling. At the current time, the department chair and program director are one in the same, and therefore, are used interchangeably throughout this document.

This handbook serves as a guide to the Program. Unless otherwise noted, the Program follows the policies and academic calendar of the University of Arkansas for Medical Sciences (UAMS) College of Health Professions, (CHP). Please refer to the 2022 - 2023 UAMS Academic Catalog at: <http://healthprofessions.uams.edu/current-students/catalogs-and-handbooks/> and the academic calendar published on the CHP website (http://registrar.uams.edu/academic_calendar/).

Procedures stated in this handbook require continuing evaluation, review and approval by appropriate University officials. All statements contained herein reflect policies in existence at the time this handbook was completed. The University reserves the right to make modifications at any time and without prior notice. All students are responsible for the information contained in this handbook, as well as the content of the 2022 - 2023 UAMS Academic Catalog.

The Program respects each student’s right to individually identify gender as male, female or nonbinary, and we are working to make the Program handbook as inclusive as possible by using the plural pronouns "they," "their" and "them" instead of singular pronouns associated with specific gender identities (e.g., her/hers/him/his).

II. THE PROGRAM

A. DESCRIPTION

The Program offers a Master of Science degree in genetic counseling, through the UAMS College of Health Professions. The Program is a full-time, day program with cohorts starting each fall semester. It consists of four, fall/spring semesters with one intervening summer semester session. The Program curriculum consists of 58 required semester credits. Students who successfully complete the program will be eligible for the American Board of Genetic Counseling (ABGC) certification examination. Graduates are responsible for preparing for the examination, as completion of the program alone does not ensure certification. Graduates are responsible for familiarizing themselves with the applicable certification and licensing requirements for the state in which they wish to work.

B. VISION

The UAMS Genetic Counseling Graduate Program develops future genetic counselors who are innovative, adaptive, and compassionate experts committed to making a difference in the lives of others both nationally and internationally and their faculty are experts in teaching, scholarship, and service to the profession.

C. MISSION STATEMENT & OBJECTIVES

The mission of the Genetic Counseling Graduate Program is to produce competent genetic counselors by providing rigorous, forward-thinking training through education, research and diverse fieldwork experiences.

We accomplish this by:

- offering students a rigorous, innovative, and contemporary education/training;
- contributing to patient-centered genetic counseling both in person and via telegenetics;
- contributing new knowledge to the profession through research and scholarship; and
- advocating for and serving our communities, patients and profession.

D. CORE VALUES

Integrity
Respect
Diversity
Inclusion
Teamwork
Creativity
Excellence
Advocacy
Empathy
Community

E. ADMINISTRATION

The Program is housed within its own department, the Department of Genetic Counseling. This department is one of ten departments in the College of Health Professions at UAMS.

F. ACCREDITATION

The Program was granted full accreditation by the American Board of Genetic Counseling (ABGC) in January 2009 and 2012, and then by the Accreditation Council for Genetic Counseling (ACGC) in 2015. The next accreditation cycle is 2023.

Accreditation Council for Genetic Counseling (ACGC), Inc., 7918 Jones Branch Drive, Ste. 300, McLean, VA 22102. Telephone: (703) 506-7667. <http://gceducation.org/Pages/Accredited-Programs.aspx>

G. HISTORY OF THE PROGRAM

The UAMS Department of Genetic Counseling was established in 2004 with initial funding for the Department, and ultimately the Program, from congressionally directed grants (P116Z040234 & P116Z050201). The Department earned provisional accreditation from the American Board of Genetic Counseling (ABGC), which was the accrediting body at that time, in the fall of 2005, offered its first courses in the spring of 2006 and matriculated its first class in the fall of 2006.

Initially, the Program was established as a multi-state genetic counseling program. Four regional

academic health science institutions comprised the Mid-America Genetics Education Consortium (MAGEC): the University of Arkansas for Medical Sciences (UAMS), Kansas University Medical Center (KUMC), University of Nebraska Medical Center (UNMC), and the University of Oklahoma Health Sciences Center (OUHSC). Faculty members throughout these states served the Program as course directors and clinical supervisors. In order to develop a genetic counseling program, despite the relative shortage of genetic counselors in the region, many of the Program's courses were designed to be delivered via distance, allowing students to complete coursework off-site, maximizing the potential number of clinical sites and enrolled students.

Although the consortium has disbanded, the Program continues to use technology to connect students and faculty and for content delivery. The majority of the Program courses are "blended," which means that the content is delivered with elements of the traditional classroom as well as elements involving technology. The "technology" primarily used by the Program is the learning management system Blackboard™ and live interactive video (e.g. Zoom).

The use of technology allows the option for some students to spend their first and/or second year away from the main UAMS campus in Little Rock. Many classes utilize live interactive video to connect to students, guest speakers and instructors.

In 2018, the Program expanded to Northwest Arkansas and admitted its first cohort of students to complete the first and second years of the Program at the UAMS Northwest campus.

H. KEY PERSONNEL

UAMS, College of Health Professions (CHP)

Dean – Dr. Susan Long

Associate Dean of Academic Affairs – Dr. Tina Maddox

Associate Dean of Student Affairs – Dr. Phyllis Fields

Associate Dean for Finance and Administration - Jessica Stahulak, MHA

CHP, Department of Genetic Counseling & Genetic Counseling Graduate Program

Chair/ Program Director / Fieldwork Coordinator – Noelle Danylchuk, MS, CGC

Assistant Program Director / Didactic Coordinator – Tiffany Lepard Tassin, MS, CGC

Medical Director – Dr. Brad Schaefer

Medical Director – Dr. Elizabeth Sellars

Student Research Coordinator – Lori Williamson Dean, MS, CGC

Department Faculty – Alexandria Wadley, MS, CGC

Executive Administrator – Sheena Joyner

III. MATRICULATION PROCESS

A. ADMISSION PROCESS

The Program participates in the Genetic Counseling Admissions Match (GC Admissions Match) along with other genetic counseling graduate programs in North America. The match is performed by National Matching Services, Inc. (NMS) <https://natmatch.com/gcadmissions/>

Applicants must be registered with NMS for the GC Admissions Match. Applicants must not only meet the requirements set forth by the Program but also those determined by the College. See the Program's website for accessing forms related to the application <http://healthprofessions.uamsonline.com/GC>, as well as the College website for the application requirements and forms <https://healthprofessions.uams.edu/future-students/>. These forms, as well as the admission requirements, processes and deadlines are outlined on the above websites.

B. MATRICULATION REQUIREMENTS

Following the GC Admissions Match, an official letter will be mailed to each applicant who matches with the Program. If an applicant's acceptance into the Program or admission into the College is contingent upon, for example, completing a required prerequisite course, the applicant must submit proof of completion to the Program before registration.

Once admitted, the enrollment process begins. Registration is one part of the enrollment process and occurs in mid-July. Enrollment confirmation is sent by the Registrar via email. Students are required to reply to the enrollment confirmation email or they will be dropped from classes. Questions regarding enrollment should be directed to the Office of the University Registrar at 501-526-5600.

Another step in the enrollment process is to complete the University, College and Program pre-matriculation requirements. Matriculating students are emailed instructions for the onboarding process in order to complete these requirements. This process provides students an orientation and training at the levels of University, College and Program. Students must complete all trainings and the onboarding process prior to the first day of class. All vaccinations, health insurance, drug screen, background check and TB testing must be complete before the first day of class. Students will also upload electronic copies to their Typhon Group accounts (once granted access) and keep all documents current. Students are required to have cardiopulmonary resuscitation (CPR) training. Incoming students are encouraged to complete CPR training prior to the first day of class, but options to complete this on campus (Little Rock or Fayetteville) within the first month of classes can be coordinated by the Program. Students are responsible for the cost associated with training.

Orientation is held in-person for all incoming students before the first day of classes in the fall semester. Students are expected to attend all orientation events for CHP and the GC Program.

IV. PROGRAM CURRICULUM AND GRADUATION REQUIREMENTS

The Program requires 58 graduate credit hours, which must include those curriculum courses as identified by the Program. Additional credits may be completed. All aspects of the Program's curriculum, requirements and content are subject to change. Students are required to review required classes each semester on the Program website to ensure they are registering for the correct courses and the correct number of credits. The frequency and semester that a course is held are subject to change, but will be posted on the Program website. The Program will communicate any

course changes to the students in advance. Some courses, including didactic courses, are meant to be completed in a series. The Program Director must approve any instance where a student desires to take courses out of their intended sequence. The Program will send course schedules (days/times) to students prior to the start of the semester. The timelines in this handbook are for students who complete the Program on the 22-month plan. With permission, students may complete the Program on an extended plan. Under an extended plan, the course sequence, fieldwork experiences, and thesis timelines are adjusted.

- A. DIDACTIC CURRICULUM** The didactic portion of this curriculum uses a blended learning approach leveraging the learning management system Blackboard™ and live interactive video (e.g., Zoom). Faculty members utilize a variety of instructional methods for delivering content. Didactic coursework is defined as all credit-based courses that are not titled as either Thesis or Clerkship.

The course sequence is organized so that most courses occur within the first academic year. The reasons for this are twofold: first, these courses prepare students for their Novice Clerkship, which occurs during the intervening summer semester, and second, students need more time in their second year for their research, fieldwork experiences, professional meetings, and job searches. The Program's course sequence is updated and published on the website:

<https://healthprofessions.uams.edu/programs/geneticcounseling/professional-curriculum/>

Graduation requirement: Students of the Program are required to complete all didactic coursework in accordance with the Academic Progression Policy (see Section VII of this handbook) and all other applicable policies apply. Each course must be completed with a final grade of at least a "B."

- B. FIELDWORK EXPERIENCES** Per the ACGC Standards, section B3 p.21, "Fieldwork experiences must support the development of the Practice Based Competencies (PBCs) by integrating didactic and experiential training."

The fieldwork curriculum includes clinical and non-clinical training and begins with observations and progresses towards more independent work. At the discretion of the fieldwork supervisor and the site, students may be allowed to see patients on their own, with the supervisor readily available. This is known as indirect supervision.

Schedule of Fieldwork Experiences: The fieldwork experiences are organized into a) two clinical observation courses spanning the first two semesters and b) three clerkships starting in the summer semester before the second year. The clerkships are organized with a student's development in mind. Within each clerkship, students will develop skills that relate to the ACGC's PBCs. (<https://www.gceducation.org/practice-based-competencies/>)

The three clerkships are courses that students enroll in for credit hours: GENC 5513 (Novice), 5613 (Intermediate), and 5713 (Advanced). Students earn three credit hours per clerkship.

The Novice Clerkship spans 10 weeks during the summer semester between the first and

second year of the Program and is intended to be an immersion experience. During this clerkship, students complete two field placement rotations (5 weeks each), generally in two different genetics specialties. The Fieldwork Coordinator works with each fieldwork site to design a schedule for each student that allows the student adequate time to practice the Novice Clerkship goals. For the Novice Clerkship, students have the option to utilize a fieldwork site outside of Arkansas, including international sites, when available.

During the first semester of the Program, students will provide the Fieldwork Coordinator with a ranked list of preferences for the summer rotations in the Novice Clerkship. A sincere effort is made to place the student at one or more preferred site, but no guarantee is made. The Fieldwork Coordinator will arrange all summer placements. Students should not contact potential field sites before first discussing with the Fieldwork Coordinator. The student can decline any out-of-state placement. If one or both out-of-state placements are not identified, the student will be placed at sites in Arkansas.

For both the Intermediate and Advanced Clerkships, each student completes 3 fieldwork rotations (15 weeks total each clerkship), based on the available options at the student's second year location and available remote (telehealth) rotations.

Students admitted to the Program will have adequate opportunity to obtain the number and diversity of required participatory cases during the Program's clerkships.

Across the three clerkships, each student completes 40 weeks of fieldwork training including:
Reproductive Genetics (preconception/prenatal) 10 – 15 weeks.
Pediatrics Genetics 10 - 15 weeks (at least 5 weeks to also include Adult clinic and 5 weeks will also include laboratory)
Cancer Genetics 10 – 15 weeks
Elective (optional based on student progress, performance, interest and availability) 5 weeks

Other Fieldwork Experiences: Students are required to have field experiences “in a variety of diverse settings that may include clinical, laboratory, research, industry, and/or other environments” (ACGC Standard B3.1.4, p. 22). Fieldwork experiences outside of the clinical setting will be scheduled concurrently within didactic courses, clinical observations and/or clerkships and may take place via distance learning with industry and research partners.

Documentation of Fieldwork Experiences: Typhon Group (www.typhongroup.com) is an online student tracking program to aid students and the Program in documenting and tracking each student's fieldwork experiences. The one-time, \$90.00 fee is included in the student fees and paid directly to Typhon Group by the Program. Training on how to use the Typhon website will be included during orientation. *Note: the Program has no financial investment with Typhon Group and there is no conflict of interest.*

Through Typhon Group, students will be able to update their contact information; view a directory of fieldwork supervisors; record all observational and participatory cases; complete

evaluations of their fieldwork supervisors and fieldwork sites; receive evaluations of their own performance from their fieldwork supervisors; and run reports to track their cases and skills. Starting with the Novice Clerkship, students begin to accumulate their 50 required participatory cases (e.g., core cases) required to fulfill their graduation requirements.

Student fieldwork performance evaluations

Students are provided feedback throughout each fieldwork placement. Supervisors complete evaluations in Typhon Group to provide feedback on the student's medical documentation skills as well as a mid-rotation and end-of-rotation evaluations of the student's performance and acquisition of the clerkship/rotation goals and the PBCs.

Graduation requirement: Students are required to complete all clerkships successfully in order to be eligible for graduation. The Academic Progression Policy (see Section VII) and all other applicable policies apply. Clinical observation courses and clerkships must be completed with a final grade of "PASS."

At the end of each clerkship, students are required to complete a self-reflection of their performance as well as a self-reflection of their attainment of the PBCs. The Fieldwork Coordinator will review each student's participatory cases, documentation, evaluations, and progress in achieving competence in the Practice Based Competencies.

C. THESIS

Graduation requirement: Each student must complete a research project culminating in a thesis document and successful oral defense of the thesis in order to be eligible for graduation. Two courses, GENC 5140 and GENC 5141, support the student in completing this requirement prior to enrolling in thesis credits (GENC 5700). Students will complete six thesis credit hours. Students will enroll in two thesis credits in each of the last three semesters of the Program. Students will receive a letter grade each time they enroll in thesis credits.

Selecting a thesis project: The Student Research Coordinator works with first-year students during the Fall I semester to identify advisors and projects. All research projects require approval by the Program Director.

Thesis Advisory Committee: Each student, with the help of their thesis advisor and the Student Research Coordinator, will assemble a thesis committee consisting of a minimum of three UAMS faculty members, one of whom is a regular faculty member in the Genetic Counseling Department. Each committee member should contribute their expertise to the project. Non-UAMS faculty members may be added to a committee.

Thesis Process: A thesis checklist is annually updated for each cohort and placed in the GENC 5700 course in Bb.

Formatting the Thesis Document: The thesis document will be formatted according the requirements of the UAMS Library with the body of the thesis largely adhering to a

journal-ready format for submission to an appropriate peer-reviewed journal.

Instructions from the UAMS Library can be found here:

<https://libguides.uams.edu/thesis-dissertation> . For formatting the body of thesis, refer to the selected journal for manuscript guidelines with the following exceptions:

- a) use APA style – current version,
- b) literature review completed in GENC 5140 will become Appendix 1 of the thesis document,
- b) embed texts and figures in the document – do not place at the end of the manuscript, and
- c) the reference list is titled “Bibliography.”

Scheduling the Thesis Defense: After a student presents a complete thesis manuscript to their Thesis Advisory Committee, the thesis advisor and student (with the concurrence of the committee) will schedule a thesis defense at least two weeks from the date the committee received the complete thesis manuscript.

Notification of Thesis Defense. A public announcement (campus wide) of the thesis defense must be made not less than ten days prior to the date of the thesis defense. The student is responsible for emailing the Program Executive Administrative Assistant details of the thesis defense: name of student, name of advisor, title of presentation, date, time, and place of the defense for posting on the CHP website and email notifications to UAMS faculty and students.

Submitting the Thesis Document to the UAMS Library:

See Thesis Checklist in GENC 5700 course in Blackboard™.

Attendance at the Thesis Defense: All students are required to attend all oral thesis defenses by genetic counseling students in the Program. Students by request an excused absence from the PD if they have a schedule conflict (e.g., clinic). Attire is business casual, even if joining via video. Joining via video must be approved by the PD.

D. EDUCATIONAL ENRICHMENT

Interwoven into the explicit curriculum are service-learning opportunities, ancillary lectures and meetings, support group organizations’ activities, and public speaking opportunities that students participate in while in the Program. Participation in these activities aids the student in achieving the PBCs involving education, professional development and research. Activities completed in a semester must be submitted by the end of that semester to receive credit for the activity.

Graduation requirement: Each student is required to participate in a minimum of forty-two (42) activities by the end of their fifth semester (Fall I – 12; Spring I – 12; Summer– 2; Fall II – 12; and Spring II - 4). Activities are documented within the Educational Enrichment module in Blackboard™

E. INTERPROFESSIONAL EDUCATION (IPE)

In order to graduate from UAMS, every degree-seeking student must complete all seven Interprofessional Education (IPE) activities. For more information about IPE:

<http://ipe.uams.edu/5-pillars-of-ipe/student-curriculum/>

F. GENETIC COUNSELING CASE CONFERENCE

The Genetic Counseling Case Conference is a weekly meeting in which students, faculty and guest speakers present clinical cases, journal articles, and other current topics. Nearly every genetics practice has a “case conference,” although they vary widely in formality, content, and format. At UAMS, genetic counseling students are expected to treat Genetic Counseling Case Conference as a professional requirement. In other words, attendance is required, avoid tardiness, pay attention, take notes, ask questions, dress professionally, and complete evaluations for each guest speaker.

G. OTHER CASE CONFERENCES and GRAND ROUNDS

Students are required to attend when on fieldwork rotation for that specialty and when it does not conflict with class. Below are the conferences at UAMS and ACH. Students on rotations at other institutions may substitute these for a conference at that institution or join these remotely when the option is available.

Adult / Pediatric Rotations:

Genetics Case Conference (Tuesdays from 2 – 3pm): weekly meeting hosted by the Arkansas Children’s Hospital (ACH) Pediatric Genetics team to discuss patients who may be difficult-to-diagnose, present with interesting manifestations, etc. Attendees include medical geneticists, genetic counselors, physician assistants, nurses, students, and other interested professionals. To join, contact Deanna Hardin (HardinDeannaL@uams.edu)

Prenatal Rotations:

Fetal Anomaly Interdisciplinary Management (FAIM) Teleconference (One Friday per month 7 – 8am): monthly meeting for MFM, genetic counseling, NICU providers, and pediatric specialists to discuss management and delivery of fetuses with birth defects.

High Risk OB Teleconference (Thursdays from 7 – 8am): OB/GYN Conference Room S5/25, Shorey Building, UAMS (students in NWAR may join from the IDHI office)

<https://learnondemand.org/events.aspx>

Cancer Rotations:

UAMS Cancer Institute Tumor Boards <https://cancer.uams.edu/education/meetings/tumor-board-meetings/> (Students pick one per week after discussion with rotation supervisor)

Breast (Wednesdays 7 – 8am): Strauss Classroom CI.10-17

Gyn Onc (Wednesdays 4 – 5pm): 4th Floor Conference Room (4S/15 – Pathology Dept. Shorey Building)

GI/HCC (1st, 2nd, & 3rd Wednesday 5:00-6:00PM): Strauss Classroom CI.10-17

H. STUDENT ADVISEMENT MEETINGS & SUPPORT

Advisement Meeting Check-Ins: Each student will be assigned a Program leader as their advisor. Students will have scheduled check-in meetings with this Program leader to identify any major stressors or situations that may affect a student's academic success, track the student's progress on the graduation requirements, identify areas for improvement, and explore/identify opportunities that align with the student's professional goals. If concerns are identified early, resources can be accessed, which may mitigate negative impacts on academic performance.

Graduation Requirement: Students are required to meet with their assigned Program leader at least twice per year (once each fall and spring semester) for "Check-Ins" and additional meetings as directed by the advisor or requested by the student. This is separate from meetings with the thesis advisors, Fieldwork Coordinator (FC), Student Research Coordinator (SRC), course directors and fieldwork supervisors.

The Educational and Student Success Center (ESSC) (<http://studentsuccess.uams.edu/>)

The Student Wellness Program (<https://studentwellness.uams.edu/>)

UAMS ADA/Disability Services office (<https://students.uams.edu/ada-disability-services/>)

Additional health and wellness services are listed in the 2022 - 2023 UAMS Academic Catalog at: <http://healthprofessions.uams.edu/current-students/catalogs-and-handbooks/>

I. TIME FRAME

Genetic counseling students are time-limited by the academic progression policies. The degree is not granted until after successful completion of all graduation requirements. A student may need an extension to repeat a course that is only offered in certain semesters, to accommodate a leave of absence, or to finish the thesis project. With approval from the Program Director, students have up to 4 years from the date of matriculation to complete all graduation requirements. This is generally only considered for students who have had extenuating circumstances arise during their graduate training.

J. COMPREHENSIVE EXAMINATION

All students who matriculate during or after August 2021 will sit for a two-part comprehensive examination. **Graduation requirement:** Passing the comprehensive examinations (Part A and Part B) is required for successful completion of the Program.

Part A

Exam items cover key concepts addressed during the first two semesters of the Program. The exam is 100 multiple choice questions in ExamSoft. Students will have 2 hours to complete the exam.

Exam A1 (Spring I semester after final exams).

Score	Pass/Fail
≥ 80%	Pass: Student has completed the Comp Exam Part A.
75 – 79%	Provisional Pass: The student will be given a take-home/open note exam consisting of essay questions addressing each missed exam item. Once all items answered correctly, the student will pass.
<75%	Score <75% - Fail - the student will have to enroll in GENC 5592 Special Topics in Genetic Counseling for 1 credit, which will be a tailored remediation plan for the student that will include taking Exam A2 during the summer semester.

Exam A2

Score	Pass/Fail
≥ 80%	Pass: Student has completed the Comp Exam Part A and the requirements for GENC 5592 Special Topics in Genetic Counseling.
75 – 79%	Provisional Pass: The student will be given a take-home/open note exam consisting of essay questions addressing each missed exam item. Once all items answered correctly, the student will pass.
<75%	Fail: The student will meet with the Program Director, Assistant Program Director, a Co-Medical Director and the Assistant Dean of Academic Affairs to determine the consequences, which may include dismissal from the Program.

Part B

Exam items cover key concepts a student entering the Advanced Clerkship should possess. The exam is 200 multiple choice questions in ExamSoft. The exam is broken into 2 sections – section 1 (100 items, 2 hours) and section 2 (100 items, 2 hours). Students will have a 30-minute break between sections.

Exam B1 (end of Fall II after final exams).

Score	Pass/Fail
≥ 80%	Pass: Student has completed the Comp Exam Part B.
75 – 79%	Provisional Pass: The student will be given a take-home/open note exam consisting of essay questions addressing each missed exam item. Once all items answered correctly, the student will pass.
<75%	Score <75% - Fail - the student will have to enroll in GENC 5592 Special Topics in Genetic Counseling for 1 credit, which will be a tailored remediation plan for the student that will include taking Exam B2 by the end of February.

Exam B2

Score	Pass/Fail
≥ 80%	Pass: Student has completed the Comp Exam Part B.
75 – 79%	Provisional Pass: The student will be given a take-home/open note exam consisting of essay questions addressing each missed exam item. Once all items answered correctly, the student will pass.
<75%	Fail: The student will meet with the Program Director, Assistant Program Director, a Co-Medical Director and the Assistant Dean of Academic Affairs to determine the consequences, which may include dismissal from the Program.

K. STUDENT FILE

The Program maintains complete files for each student via UAMS Box for the purposes of accreditation. Each student has preview uploader access to their Student File. This access allows students to upload, download, preview, edit and share documents. Students are expected to regularly upload documents to their UAMS Box File. Students are encouraged to maintain copies of their work, as well.

Each student is expected to maintain the following in their UAMS Box File:

- A. Educational Enrichment – all 42 self-reflections
- B. Fieldwork
 - Typhon report of all participatory cases by rotation (pdf)
 - Typhon report of all observation experiences from Year 1 (pdf)
 - PDFs of all evaluations in Typhon
 - Summary of all cases from Typhon (pdf)
 - Medical Documentation (deidentified) and feedback (pdfs from Typhon)
- C. IPE – upload copies of the reflections submitted in Blackboard™
- D. PBC Summaries – upload a pdf of the self-reflection completed after each clerkship
- E. Personnel Documents
 - Accomplishments / Awards / Scholarships / Grants
 - Training certificates
- F. Resume – students should start this in the first semester and update regularly
- G. Teaching, Service and Creative Works (includes, but not limited to the following)
 - Projects and presentations for courses
 - Projects created for the Educational Enrichment
 - Educational presentations to various populations of learners (e.g., public, high school, undergraduate students)
 - Formal teaching assistant experience
 - Patient, professional, or community educational materials
 - Professional genetics presentations such as journal clubs, research seminars, case conference
 - Documentation of advocacy experiences
 - Other publications
- H. Thesis Project

- Final Document for UAMS library
- Thesis Defense Presentation
- Local / National Presentation(s) - poster and platform presentations
- ALL thesis related documents while working on the project

L. DEGREE APPLICATION

Students must submit a Graduation Application via Gateway for UAMS Students (GUS) for the term in which they intend to graduate. The application is available in GUS under the Academics tab of the Student Self-Service area. Students must have an active graduation application in order to graduate. Information about Commencement will be available during the Spring II semester.

M. EXIT SURVEY

During the last week of the final semester, the Program Administrator will provide students with an exit survey to complete. Responses help the Program in its efforts of continuous quality improvement.

N. CAMPUS CLEARANCE

Campus clearance by the Office of the University Registrar is required prior to the awarding of the degree. For students who are also employed by UAMS (including work study/student worker), there are additional clearances. See the current UAMS Academic Catalog for additional information.

V. GENETIC COUNSELING BOARD CERTIFICATION

Graduates from the Program are eligible to apply to the American Board of Genetic Counseling (ABGC) to become an active candidate for the board certification examination. Students and alumni are responsible for knowing and completing all ABGC certification-associated procedures. The certification requirements are subject to change and are available at the ABGC website, www.abgc.net.

VI. PROGRAM EXPENSES

A. TUITION AND FEES

Tuition and fees are published by the College and are available at: <https://studentfinancialservices.uams.edu/tuition-and-fees-2/college-of-health-professions-tuition-fees/>. Tuition and fees are subject to change. Please refer to this website for information about tuition refund, as well.

B. ASSOCIATED EXPENSES

Students are responsible for all associated expenses of the Program and its curriculum. The following are a few examples of expenses not covered by tuition and fees. This list may not be comprehensive.

1. Technology and equipment

Personal computer, equipment, communication and technology expenses, off-campus computing and communications equipment, and its associated costs, are the

responsibility of the student. The department does not provide printing services for students except under occasional circumstances. The Student Success Center (<http://studentsuccess.uams.edu/>) has computers and printers available for use.

2. Fieldwork training-associated expenses

Some observation and clerkship sites have rules and requirements that are in addition to those of the College and Program. Clerkship sites may require updated drug testing, background checks, additional immunizations or other preliminary procedures for the student to participate at the site. These clerkship site requirements are in addition to those requirements for onboarding at UAMS. The cost for these procedures and others may be charged to the student.

Access to Typhon Group, which is used for clinical tracking of logbook cases, is purchased by the Department and included in the student fees.

C. TRAVEL

The student is responsible for the cost of all course and program-associated transportation, which may include travel to off-campus locations. UAMS Genetic Counseling students are encouraged to have access to a car as public transportation in Little Rock, Fayetteville, and Louisville are limited and cab fare can become expensive. Moreover, field placements during the fall and spring semesters may include sites that are 2 – 3 hours from where the student lives. It is the responsibility of the student to secure travel and lodging to these sites, although the Program will assist (logistically and financially) whenever possible.

D. PROFESSIONAL MEETINGS

Second-year students are strongly encouraged to attend a professional meeting (e.g., National Society of Genetic Counselors Annual Education Conference). The conference and associated costs are the responsibility of the student. If a student presents at a regional or national conference, the Program will assist the student with the associated costs of attending.

VII. POLICIES AND PROCEDURES

UAMS Academic Policies are available online in the UAMS intranet at <https://academicaffairs.uams.edu/policy-search/> . The UAMS Academic Catalog 2022 – 2023 contains summaries of key policies (<https://registrar.uams.edu/academic-catalog/>)

It is important to review all policies on the College of Health Professions' website (<https://healthprofessions.uams.edu/current-students/resources/forms/> and the UAMS Academic Catalog. These policies serve to protect students, provide expectations for appropriate conduct, and guide students, faculty members and administrators when issues arise. Also, the College has provided an abbreviated version of the Title IX (sexual harassment and discrimination) policy for inclusion in this handbook. These policies are as follows:

A. CHP DISABILITY POLICY

UAMS is committed to providing equal access to learning opportunities to students with disabilities. To ensure access to any class or program, please contact the ADA Coordinator to engage in a confidential conversation about the process for requesting accommodations in the classroom and clinical settings. Accommodations are not applied retroactively. Students are encouraged to register with the ADA Coordinator's office as soon as they begin their program or as soon as the student recognizes their need for an adjustment.

UAMS encourages students to access all resources available through the ADA Office for consistent support and access to their programs. More information can be found online at <http://students.uams.edu/ada-disability-services/> or by contacting the disability services office at (501) 526-5641.

B. GRIEVANCES & CHP's ACADEMIC APPEAL POLICY

If a student has a grievance regarding a faculty member, staff member or fieldwork supervisor, the student should notify the PD. If the grievance involves the PD, the student should contact a medical director for the Program or the College of Health Professions Associate Dean of Academic Affairs.

The Academic Appeal Procedure represents a formal mechanism whereby a student may obtain a review of a complaint related to academic matters including grades or other evaluations awarded for a course, assignment, project, examination, clinical procedure, clinical rotations, or other program-related performance. The procedures provide opportunities for students to request a review of recommendations and decisions made by the department faculty, submit information not previously available to the faculty, or suggest alternative remedies. Established college or program policies themselves cannot be appealed. To access the Academic Appeal Procedure go to <https://healthprofessions.uams.edu/wp-content/uploads/sites/9/2020/09/policy-library-01.15.01-student-academic-appeal-revised-8-2020.pdf>

Policies and procedures for scholastic dishonesty (<https://healthprofessions.uams.edu/wp-content/uploads/sites/9/2020/11/01.00.02-scholastic-dishonesty-policy-reviewed-7-9-2020.pdf>) or other non-academic disciplinary matters differ from the Academic Appeal Procedure and are addressed in procedures and regulations governing student behavior and discipline. Processes for complaint resolution can be found at <https://academicaffairs.uams.edu/irpa/complaint-resolution-process-information/>.

C. TITLE IX NOTICE OF NONDISCRIMINATION

The University of Arkansas for Medical Sciences (UAMS) does not discriminate on the basis of sex, gender, or sexual orientation in its education programs or activities. Title IX of the Education Amendments of 1972, and certain other federal and state laws, prohibit discrimination on the basis of sex in all education programs and activities operated by UAMS (both on and off campus). Title IX protects all people regardless of their gender or gender identity from sex discrimination, which includes sexual harassment and sexual violence. The full policy can be found at: <http://hr.uams.edu/other/title-ix/>

The Title IX Coordinator for the College of Health Professions is available to explain and discuss: your right to file a criminal complaint (sexual assault and violence); the university's complaint process, including the investigation process; how confidentiality is handled; available resources (both on and off campus); and other related matters. You may contact the coordinator at 501-526-5641. You may also contact the UAMS Police Department, 501-686-7777 (non-emergency) or 911 (emergency). If you are in the midst of an emergency, please call the police immediately by dialing 9-1-1. The United States Department of Education's Office of Civil Rights ("OCR") is responsible for enforcing Title IX, as well as other federal civil rights laws that prohibit discrimination in programs or activities that receive federal financial aid. Inquiries and complaints may also be directed to OCR at 1-800-421-3481 or ocr@ed.gov

D. ACADEMIC MONITORING, PROGRESSION, PROBATION and REMEDIATION POLICIES

Below are the policies for the Department of Genetic Counseling. If a student wishes to dispute the charges and/or penalties related to an academic issue, the student must follow the CHP Student Academic Appeals Policy 01.15.01, which can be found in the current UAMS Academic Catalog.

Monitoring Student Performance

Faculty use a variety of methods to assess whether a student is meeting the objectives in courses and is meeting expectations in fieldwork placements. These include active learning strategies, such as informal class discussion, and more formal formative assessments, such as low stake quizzes and exams.

Faculty monitor student performance and communicate with students who are not meeting objectives by requesting a meeting with the student. In addition, students receive feedback on their assignments, participation, and examinations. Student grades are posted in Blackboard™. For most examinations, course directors will release exams with feedback (so students can identify which items they answered correct vs. incorrect) through ExamSoft.

Faculty members are instructed to contact the PD if they feel a student is not meeting the objectives or is performing poorly. The PD will request information to support the concern (e.g., grades or examples of concerning or unprofessional behavior) and solicit recommendations from the faculty member. In addition, the faculty member will contact a student directly to share their concerns about the student's performance. The faculty member will meet with the student in order to explore what insight the student has regarding their performance and if the student can identify any modification on the student's part or if there is a desire for the faculty member to make a modification. If needed, the faculty member will suggest appropriate interventions. Interventions vary but may include a referral to the Educational and Student Success Center. In some situations, a student may benefit from accommodations.

Didactic Courses

The Department considers the letter grade "B" or better as passing. If a student earns less than a

“B”, the course director will make a recommendation to the Program Director for the student to either repeat the course or enroll in GENC 5592 Special Topics to remediate the course. If a course is repeated and the student earns below a “B” on the second attempt, the student will be dismissed from the Program. If a student remediates a course, the student will have until the end of the next semester to pass GENC 5592 Special Topics.

Retaking a course or postponing a clerkship may delay the originally anticipated graduation date. Tuition and fees apply to repeated courses and to the GENC 5592 course. Please refer to the UAMS Academic Catalog regarding grade point average calculations.

- Students may only repeat a given didactic course once, with the exception of GENC 5592 and GENC 5700.
- Students may not repeat more than two non-thesis didactic courses in the Program.
- If a student earns less than a “B” in a third course, the student will be dismissed from the Program.

Thesis

Students enrolled in their final two thesis credits (typically in the fifth semester) who require additional time to complete their thesis project will meet with the Program Director, Student Research Coordinator, and thesis advisor to discuss the option of granting an extension. If additional time is granted, the student may be required to enroll in 2 thesis credits per additional semester (up to two consecutive semesters may be granted). If the thesis project is incomplete after two additional semesters, the student may receive a grade of F for the thesis hours and may be dismissed from the Program.

Academic Probation

If a student earns below a “C” in a course, the student will be placed on academic probation in addition to having to repeat the course (see above).

Students who do not maintain a program grade point average (PGPA) of 3.00 in the genetic counseling degree program will be placed on academic probation. If the student does not achieve a PGPA of 3.00 by the conclusion of the next semester (excluding summer semester), the student will be dismissed from the Program.

Students on academic probation will not be allowed to attend fieldwork placements until the requirements of their probation have been met.

A PGPA of 3.00 is required at the conclusion of the Program’s last semester in order to be eligible for graduation from the Program.

Fieldwork Training

The supervisors provide recommendations to the Program regarding whether or not the student passes a rotation. Students who receive a “pass with reservation” or a “do not pass” for two or more rotations, will meet with the Program Director, Assistant Program Director, and Associate

Dean for Academic Affairs to discuss progression in the Program.

Clerkship courses (GENC 5513, 5613 and 5713) are rarely eligible for repeating. Upon reviewing the circumstances leading to a student's fieldwork performance being less than passing work, exceptions to this regulation may be granted. Repeating a placement, rotation or clerkship may postpone graduation.

In extreme circumstances and with supportive documentation, the Program may grant an exception to the above departmental academic progression policies. However, only the Dean of the College has jurisdiction regarding the UAMS College of Health Professions policies.

E. DISMISSAL, LEAVE, WITHDRAWAL & RE-ADMISSION POLICIES

If a student is dismissed from the Program for academic reasons, they may not reapply to the Program.

A student admitted to the Program may request a leave of absence from the Program with the intention of re-entering the Program in a subsequent semester. The Program follows the CHP leave of absence policy.

If a student withdraws from the Program for reasons other than academic issues, that student may request reapplication to the Program. Reapplication would need to reflect the current admission standards rather than those in effect during the student's original matriculation into the Program. Approval/denial of such request is determined by the Program Director and is also dependent upon whether the student can return to the Program without displacing another student from their academic progression, including the clinical training.

F. DEPARTMENT & CAMPUS FACILITY POLICY

The Department of Genetic Counseling is located in the College of Health Professions (CHP) Building 5, Suite G-15 on the UAMS Little Rock campus and in the CHP Suite on the first floor of the UAMS Northwest Building on the Fayetteville, AR campus. The Little Rock CHP building is badge access accessible to students 24 hours a day, 7 days a week. Little Rock students have access to the study areas of the library 24 hours a day, 7 days a week. Students on the Fayetteville campus have access to the building and the study area of the library 24 hours a day, 7 days a week.

A classroom policy for all CHP classrooms is that trashcans must remain outside of the classrooms, in the hallway. Students are responsible for making sure that no trash remains in the classroom at the conclusion of class.

A break room is provided for Little Rock students in Building 5, ground level. Students may use the microwave, water cooler, sink and refrigerator. Students are expected to clean up after themselves. Also, within the department suite, students may use the coffee machine. Students in Fayetteville have access to any student lounge areas and the lockers in the CHP Suite (must provide your own lock).

Use of Genetic Counseling Department equipment and books:

- When in Little Rock, students may work or 'hang out' in the Genetic Counseling Department during regular business hours. A student will be asked to leave if their behavior is disruptive to faculty members, students or staff.
- There are study areas with wireless internet access in CHP buildings as well as the library and elsewhere on campus.
- Do not use the facsimile machine without seeking permission.
- Use of the department printer and photocopier is allowed for special circumstances but should not be used as a student's only printing resource.
- Students may use the department printer for scanning and emailing documents.
- Do not use faculty offices (phones, computers, space) without permission of that faculty member.
- Books in the Department of Genetic Counseling (Little Rock and Fayetteville) are available for check-out. Students must use the sign-out sheet posted on the bookcases.

G. STUDENT PRIVACY, DISTANCE EDUCATION & TECHNOLOGY POLICIES

Students have a legal right to privacy and confidentiality. To protect that right, access to any given distance-based course is restricted to its registered students and program faculty. In addition, personnel who provide support for the delivery of such courses (Interactive Video, Clinical Skills Center, Blackboard™ and any other delivery formats/platforms) have access as required by their responsibilities to administer the system and assist faculty and students. Students who are registered for a course will see other students' discussion board postings, class presentations and designated assignments (e.g., peer reviewed assignments).

Each student must respect the privacy of their peers, and therefore, not share materials including any identifying information. Should a faculty member wish to share course information that contains student identifiers to individuals outside of the Program, course, or its administrators, the Program will first seek permission from the student(s). Students are responsible for securing computers and all program-related files, software and hardware.

Students connecting to classes via video from home* are required to have:

- a working computer with virus protection;
- high speed internet with direct connection to computer via Ethernet (not Wi-Fi);
- Google Chrome browser;
- an HD webcam; and
- a working microphone and speakers (earbuds with built-in microphone are highly recommended).

**Students are allowed to connect from home in special circumstances (e.g., COVID-19 related restrictions on in-class activities; student is sick; inclement weather; etc.) or with permission of the course director or Program Director.*

At UAMS, technical assistance can be obtained in the individual computer laboratories from staff

located in each area. The UAMS Academic Affairs Student Success Center provides assistance with laptops and mobile devices. A Student Support/Technology Analyst is available to assist with various technology issues, from connecting to the wireless network to troubleshooting possible hard drive issues. The Analyst is available Monday through Friday from 8AM to 5PM. You can stop by or remote assistance is available. Please contact 501-526-6003 for help with technology.

H. TELEHEALTH WORK STATION POLICY

Within the Department of Genetic Counseling Little Rock office is a designated telehealth work station for students in the Student Office. The workstation contains a Cisco video conferencing monitor that allows students to easily connect with a variety of telehealth clinics utilized by UAMS and ACH.

Students in Little Rock should utilize this workstation when assigned to fieldwork experiences with the UAMS Institute for Digital Health & Innovation – High Risk Pregnancy Program (formally known as ANGELS).

The Telehealth work station may be used for other fieldwork placements and other learning experiences as directed by the Fieldwork Coordinator.

I. DRESS CODE POLICY

On campus classes: Genetic Counseling students attend classes and professional meetings at a medical center where patients are present. As such, when on campus and wearing a UAMS badge, students represent UAMS and should strive to dress modestly. Students should be dressed in daytime clothes (no pajamas or slippers) and maintain good personal hygiene.

Professional activities: When attending case conferences, grand rounds, and other professional events in person or via video, students should dress business casual.

Field Placements: When participating in field placements either in person or via video, students must comply with the institutional dress code.

Students are required to thoroughly familiarize themselves and comply with the institutional dress code for each clinical and other field placement site to which they are assigned. In the event the institutional dress code and the Program differ, students are required to comply with the more stringent or strict code requirement for the particular dress code issue in question. Questions regarding appropriate dress should be directed to field placement supervisor or the Program Director before a potential violation occurs.

The dress code is designed to ensure appropriate appearance while students are in a professional setting. Professional dress ensures a professional image; as genetic counselors provide service to patients/clients. The dress code is also designed to show respect for cultural differences. **The student's appearance should not be a distraction from care the student is trying to provide to the patient/client.**

DRESS CODE VIOLATION: Students who are in violation of the dress code policy may, at the discretion of the instructor or supervisor, be asked to leave clinic, class or the professional event and will have an unexcused absence for the missed activity.

In the situation of laboratory rotation, those rules of the laboratory hold precedent.

J. IDENTIFICATION BADGE POLICY

Students must wear UAMS student ID badges in a visible location at all times while on campus. While attending a field placement site, the student must wear that site's issued ID badge and/or the UAMS student ID badge, whatever is directed by the site supervisor.

K. CLASSROOM & VIDEO ETIQUETTE

The UAMS Program recognizes the benefits and limitations of technology. Any type of technology, smart phones, video communication products (e.g., Zoom), social media (e.g., Facebook, SnapChat, etc.) can be used to augment or interfere with learning, and can, in some circumstances, interfere with relationships. Therefore, the Program does not allow video communication products to substitute for an unexcused absence. Moreover, some professors will ask that you turn off cell phones in class, whereas others will use applications on devices during class (e.g., Kahoot, Poll Everywhere). Check your course syllabi for details. **In no circumstances should students be on social media while in class unless necessary for a class related activity.**

Some professors use pictures and information about real patients (with permissions) during class lectures and discussions. Therefore, **you must receive permission from the instructor before making ANY recording of a class.**

Participation is expected in all learning environments (classroom, clinic, case conference, etc.). A participatory student is one who listens, reads, completes assignments, asks questions, reflects, and shares with faculty and classmates their discoveries and insights. Genetic counselors do not work in isolation (even if they are the only genetic counselor in the practice!). Genetic counselors work with other professionals, in corporate or healthcare systems, and are often the only genetics expert on the team. Since participation is expected in the "real world," the Program expects students to cultivate this skill throughout their graduate career.

Video etiquette:

- Be dressed as you would if you were on site.
- Do not join classes or case conference from coffee shops or other public places unless you have complete privacy (visual and audio).
- Be seated at a desk or table. If you are too sick to get out of bed, do not join class by video. You will be considered absent from class or case conference. Student may have an excused absence with permission of instructor.
- Remove distractions (visual and audio). This includes but is not limited to messy closets or offensive posters/artwork in the background, etc. If there are distracting noises on your end, mute your microphone. Note: The Program recognizes that pets are therapeutic and often present when students join class from "home". This is generally not a problem. Please

use your best judgement regarding whether or not to allow your pet to be visible during a video conference.

- You must be seen (video on & make sure the lighting is good so the other participants and instructors can see you). If you wish to turn your camera off, you must receive permission from the instructor, otherwise you will receive an unexcused absence.
- Look into the camera.
- Refrain from eating while on camera during professional conferences and/or telehealth. Eating during class may be allowed by instructors.

L. FINAL EXAMINATIONS

The schedule of final examinations is set at the start of the semester. The final exam dates and times will be posted on the Department Outlook Calendar. All changes to final examination dates and/or times must have approval from the Program Director.

M. WRITING STYLE

The Program uses American Psychological Association (APA) style (7th edition) for writing clearly and concisely; mechanics in scientific writing (punctuation, capitalization, tense, etc.); displaying results (tables, figures, etc.); and crediting sources (quoting, paraphrasing, in text citations, and reference lists).

N. PLAGIARISM

Plagiarism is a form of academic misconduct. Students are responsible for avoiding plagiarism. This pertains to but is not limited to assignments, PowerPoint presentations, examinations, and thesis. Unintentional plagiarism is still plagiarism. See the UAMS Academic Catalog for a definition of plagiarism as well as the CHP policy and discipline actions that may be taken.

O. PROGRAM COMMUNICATIONS

The Program Director (PD) and Assistant Program Director (APD) are available via email, instant messaging (Microsoft Teams), text, cell phone, and face-to-face meetings (in person or video conference). Never hesitate to contact either the PD or APD if there is a crisis, even if it is after business hours. Faculty contact information is provided in each course syllabus, and contact information for fieldwork supervisors is located in Typhon Group and Blackboard™. Additional key points about communication within the Department include:

- Each Genetic Counseling Case Conference will begin with announcements, business items, and Q&A.
- Students are encouraged to bring any concerns to the attention of the PD, APD, or one of the Medical Directors.
- The PD, APD, Executive Assistant, and department faculty use the Microsoft Outlook calendar system. Students are expected to use this too when scheduling meetings.
- There is a Genetic Counseling Training Program Outlook calendar that all students, faculty, and fieldwork supervisors within the UAMS system have access to and should review regularly for important dates/deadlines, etc.
- Department core faculty and staff meet monthly; all faculty (regular and adjuncts) meet once per semester, and the Program's Advisory Board meets at least once a year. Dates and times

of these meetings are available upon request.

P. PROGRAM LEADERSHIP LEAVE OF ABSENCE POLICY

If one of the Program leadership required a planned or unplanned leave of absence (LOA), the Program would follow UAMS policy 4.6.08 Leave of Absence Without Pay (revised 09/09/2021) and ACGC standard A.2.4.4. Internally, the Program Director or Assistant Program Director would assume the responsibilities of the other. At that time, the remaining program leaders would reassign program responsibilities that could be delegated to other faculty or staff (e.g., covering a course). The coverage could be sustained for no more than three months. During that time, program leaders, in conjunction with the Dean's office, would identify an interim leader in the event that the LOA extends more than three months. If one of the co-medical directors required a LOA, the other co-medical director would assume all the responsibilities of the other. Should one of the medical directors leave the Program, the other medical director may become the only medical director for the Program.

Appendix A – Graduation Checklist [This is a copy of the document that is maintained in each Student File in Box. This document is visible in Box to the student, PD, APD, Executive Administrator, Fieldwork Coordinator, and Student Research Coordinator.]

Graduation Requirement	Evidence of Completion	Comments
